EXECUTIVE SUMMARY

Through Cooperative Agreement (CA) No. 511-A-00-05-00153-00, dated August 1, 2005, USAID/Bolivia awarded ACDI/VOCA the Integrated Community Development Fund (ICDF) for a period of five years. This agreement was later modified to include civil society and municipal strengthening activities. Pursuant to the terms of Modification 7 approved by USAID/Bolivia, ICDF methodology was subsequently adjusted to more directly respond to the diverse development needs as well as support the policies and strategy of the Plurinational State of Bolivia (PSB) as outlined in Implementation Letter (IL) No. 043. The modification also provided for a restructuring of the program to reflect two components: economic and community development.

During this reporting period, USAID asked ACDI/VOCA to elaborate a Request for Revised Application (RFRA) in order to include new activities and/or broaden the reach of activities already in implementation. The RFRA presented by ACDI/VOCA reflected the ICDF's strong emphasis in the region of La Asunta, where it proposed to implement a majority of community development activities. After being reviewed by USAID and the Vice Ministry for Coca and Integrated Development (VCDI in Spanish), the RFRA was approved, resulting in Modification 15.

Throughout the aforementioned series of methodological and geographical adjustments, the ICDF has maintained its primary goal of supporting the joint efforts of the U.S. government (USG) and the PSB to establish a sustainable economy in Bolivia's coca-producing regions. The ICDF's strategy is to meet basic human needs and alleviate poverty by improving social and economic conditions in the Yungas of La Paz (YLP) and the Tropics of Cochabamba (TC).

This report covers the first quarter of the 2010 fiscal year, encompassing activities carried out between October 1 and December 31, 2009. At the close of the quarter, the total number of small-grant development projects under the ICDF was 585, including 318 community development projects and 267 economic development projects. During the quarter, 38 new projects were added. At the end of the quarter, 19 projects were in the design phase, 23 were under procurement, and 134 were in implementation. Fifty-three ICDF projects were concluded during this reporting period. Of these, ten were community development projects and 43 were from the economic development portfolio. To date, 409 subaward projects have been completed.

During the reporting period, the ICDF accomplished multiple key activities contributing to its overall objectives. Highlights include:

- The VCDI convened the ICDF technical committee (CT) on two occasions. During these meetings, 38 new projects were discussed and approved, 28 of which correspond to community development and 10 of which fall under economic development. The total budget for the approved projects is slightly more than US$1 million.

- One of the more outstanding community development projects concluded this quarter is the Santa Rosa de Quilo Quilo Health Center in the municipality of Coroico. The construction of this health center, which includes staff living quarters, allows for the expansion of healthcare coverage in twelve different communities, where the center will offer primary care services to a population of 1,512 people.

- The ICDF broke ground on nine new community and four new economic development infrastructure projects. Highlighted community infrastructures include teacher housing in three communities of the Central Bolivar in the municipality of La Asunta and flood prevention infrastructure along the Ebenay River, also in La Asunta. Economic development infrastructures consist of chicken and pig farms in different municipalities.

- Work began on the final component of the ICDF mid-term evaluation. The purpose of this external evaluation is to determine the ICDF's impact on the quality of life of the community members in ICDF target areas and to determine how much the ICDF contributed to the significant reduction in structural poverty documented in the most recent Unsatisfied Basic Needs (NBI, for its acronym in Spanish) study.

- In October the ICDF conducted a training course on the Governmental Administration and Control law (Law 1178 SAFCO). The training took place in Irupana, where 36 representatives from the municipal governments of Irupana, Chulumani, Coripata, La Asunta and Coroico participated. The event was coordinated with and certified by the Comptroller General's National Training Center (CENCAP-CGE).

- During the month of November, the ICDF concluded immediate impact projects in seven municipalities in the Yungas of La Paz (Palos Blancos, La Asunta, Coroico, Coripata, Yanacachi, Irupana and Chulumani). Through equipment provision, the projects contributed to the development of four important sectors: health, education, potable water and transportation infrastructure.

- On November 13, at the invitation of the La Asunta Farmers' Federation (*Federación Especial Unica de Trabajadores Campesinos* in Spanish, FEUTCA) and the municipal government, the high impact education, health, potable water and transportation infrastructure projects in the municipality of La Asunta were inaugurated. The Vice Minister for Coca and Integrated Development, Gerónimo Meneses, the Vice Minister for Social Defense, Felipe Cáceres, the director of USAID/Bolivia's Office for Integrated Alternative Development (IAD), Mary Norris, the mayor of La Asunta, Reynaldo Calcina Luna, the head of FEUTCA, Freddy Saire and the head of the Rural Federations Council (*Consejo de Federaciones Campesinas* in Spanish-COFECAY), Felix Barra participated. Over 200 people from the 25 communities benefited by the projects were present, as well as various neighborhood and school advisory committee representatives. Medical equipment, clinical furniture, 2,000 pieces of school furniture, approximately 50 kilometers of piping for five potable water systems and 1,000 meters of culverts were handed over during the event.

Community members gather in the main square in La Asunta for the inauguration of projects in the zone.

- Taking advantage of the aforementioned visit to La Asunta, representatives of the VCDI and USAID visited various economic development projects implemented by the ICDF and the Rural Competitiveness (ARCo) project. This multi-institutional visit provided an opportunity for the VCDI and USAID representatives to speak with various producers while they visited plantain crops, chicken houses and coffee and stevia nurseries. The USAID and VCDI representatives congratulated producers on the advances achieved so far.

Producers at work in a coffee nursery in La Asunta.

- In late November, the ICDF environmental staff conducted a training in coordination with the National Institute of Health Laboratories (INLASA, for its acronym in Spanish) directed at health center employees in the municipality of Coroico. The theme of the training was the management of solid waste typically generated by health establishments. Seventy-eight individuals from various health centers and health posts participated.

- At the beginning of December, the ICDF participated in a meeting with the ARCo project to improve coordination between the two projects. Executive and technical staff from both programs worked on how both projects can better work together to achieve the ultimate shared goal of sound, integrated development in the municipality of La Asunta.

- During mid December, the ICDF together with the Bolivian Cancer Foundation conducted a Cervical and Breast Cancer Prevention and Early Detection campaign for women in La Asunta. The project was coordinated with the La Asunta Hospital through the Yungas branch of the Departmental Health Services (SEDES) and the Municipality. Over the course of two days, Bolivian Cancer Foundation volunteer healthcare professionals conducted trainings and collected Pap smears. Over 200 women, many of whom were accompanied by their partners, attended the free campaign. The lab results will be sent to the La Asunta Hospital to be distributed at the start of the next quarter.

Women in La Asunta waiting to participate in the cancer prevention and early detection campaign.

- As part of the project "Support of Enterprising Youth" implemented in coordination with the *Unidad Academica Campesina Carmen Pampa* (UAC-CP) and Nueva Economía, 25 students presented theses in the form of business plans. The students are expected to defend their theses and graduate during the next reporting period.

- During this quarter, 500,000 stevia seedlings were transplanted from nurseries to 40 commercial plots occupying a total of 10 hectares in the communities of Bolívar II and

Bolívar III in the municipality of La Asunta. Additionally, implementation of plots in Bolívar IV and Santa Teresita began. As part of field school activities, producers conducted the first harvest of the first five stevia plots implemented by the ICDF. Due to the nature of the stevia crop, the first harvest did not produce an export-quality product as it will in the future. However, in addition to gaining valuable harvest experience, producers were able to attain an acceptable price in local markets, where they sold their stevia for approximately 15 Bolivianos (around US$2) a pound.

The first stevia harvest in the municipality of La Asunta.

- In the three communities of the Central Bolívar and three other communities in the municipality of La Asunta, the number of community coffee nurseries was increased from nine to twelve. The seedlings in these nurseries will be used to establish 250 hectares of coffee. They will be transplanted to their plots beginning in January.

  Forty new families signed on to participate in beekeeping activities in the three communities of the Central Bolívar, raising the total number of participating families in the municipality of La Asunta to 84. Approximately 90 percent of the 40 new families have received their hives and established apiaries, while the remaining 10 percent will receive their hives and equipment at the beginning of the upcoming quarter. Field school activities continued in the communities of Pichari, 1 de Julio and Puerto Aroma.

- Fifteen new hectares of plantain were implemented in different communities during the quarter, adding up to a total of 80 established hectares in the municipality of La Asunta. In order to learn more about the practice of buying corms, approximately 20 producers participated in different exchange visits to producer associations in Santa Lucia, Alto Olivos and San Pablo in the Tropics of Cochabamba.

- Work continued to promote amaranth production in the *Zona Tradicional*. A total of 98 plots in 15 communities in the municipality of Coroico and 10 communities in the municipality of Irupana were prepared. Four hundred pounds of seeds were handed over by Bolivia Natura as part of this company's cost-share to be used to plant 23 hectares of amaranth. At present, approximately 15 hectares have been planted.

  In the zone of Nuevo Belén plants as tall as 1.5 meters exist, exhibiting a growth rate that has exceeded producers' and ICDF staffs' expectations.

An amaranth producer with his flourishing crop in Nuevo Belén, Irupana.

I. ICDF IN NUMBERS

The VCDI convened two CTs during the present reporting period. During these two meetings, 38 new projects were approved; 28 of these new projects fall under community development while 10 correspond to economic development. Highlighted projects include the construction of playgrounds and the renovation of the meteorological network in the Yungas. The following table shows a breakdown of newly approved projects by portfolio and sub-portfolio.

Table 1. Projects approved during October – December 2009 quarter by portfolio and sub-portfolio

Portfolio	Sub-Portfolio	Total
Community Development	Potable Water	11
	Education	6
	Community Infrastructure	3
	Health	2
	Environment	1
	Sanitation	3

	Other	1
Community Development Subtotal		28
Economic Development	Technical training	1
	Transportation Infrastructure	6
	Tourism	1
	Other	2
Economic Development Subtotal		10
Total		38

Twelve of the newly approved projects will be implemented in the municipality of Coroico and nine in the municipality of La Asunta. Eight projects will have a regional impact, and the remaining nine projects are spread throughout various municipalities in the Yungas. The following table shows a breakdown of newly approved projects by municipality.

Table 2. Projects approved during October – December 2009 quarter by municipality, portfolio and sub-portfolio

Municipality	Project	Portfolio	Sub-portfolio
Coripata	Culvert Provision and Implementation for Coripata, Puerto Chacon, Anaruri and Auquisanana	Economic Development	Transportation Infrastructure
	Rehabilitation of the Coripata Potable Water and Sanitation System	Community Development	Sanitation
	Provision of School Furniture for Primary Schools	Community Development	Education

	Institutional Strengthening of the VCDI	Community Development	Various
	Institutional Strengthening and Equipment Provision to the MMYLP	Community Development	Institutional Strengthening
Yanacachi	Public Bathrooms for the Sanitation System in Mina Chojlla	Community Development	Sanitation

The ICDF has 585 projects in its general portfolio. Fifty-four percent of projects fall under community development, with the remaining 46 percent of projects contributing to the economic development of the ICDF's target regions. Currently, 42 projects are in the final design or acquisitions stage and 134 are being implemented. With 53 projects concluded during the reporting period, the total number of completed projects is 409. Table 3 below delineates the total number of ICDF projects by status and component.

Table 3. Number of projects by implementation status and by component

State of Project	Community Development	Economic Development	Total
Final Design	19		19
Acquisitions	14	9	23
Implementation	66	68	134
Completed	219	190	409
TOTAL	**318**	**267**	**585**

The last two economic development projects in the TC were concluded. With this action, the portfolio for the TC region has been closed. Fifty-one projects were concluded in the Yungas of La Paz. Forty-one of these were economic development projects, while ten belong to the community development portfolio. Table 4 shows a breakdown of projects by project status and region.

Table 4. Number of project by implementation status and by region

State of Project	TC	Yungas	Total
Final Design		19	19
Acquisitions		23	23
Implementation		134	134
Completed	101	308	409
TOTAL	**101**	**484**	**585**

Chart 1 – Distribution of ICDF projects by implementation status

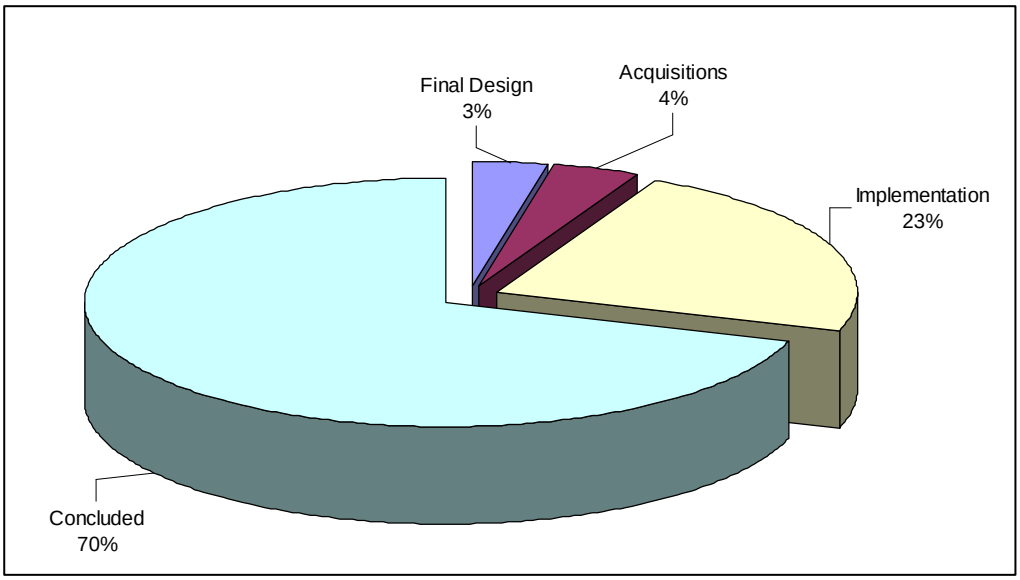

Chart 2 shows the number of new projects added to the ICDF portfolio each month compared with the number of projects completed during the same time period. Thirty-eight new projects were added this quarter and 53 projects were concluded. Per the ICDF program schedule, an average of 55 projects will be concluded each quarter until the end of the program.

Chart 2. Cumulative number of ICDF sub-grant projects included in the portfolio and number of completed projects

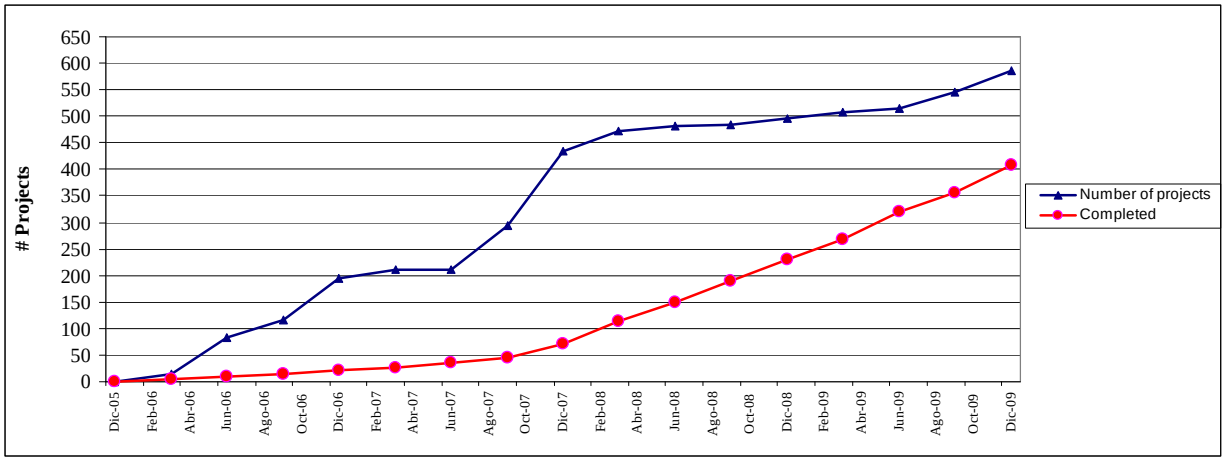

Table 5 illustrates how the ICDF has responded to the regional guidelines established in IL-43. After the signing of IL-43, 90 projects were identified in the municipality of La Asunta. More than 125 projects were identified in the municipalities that make up the *Zona Tradicional*, and 51 were prioritized for Palos Blancos (primarily for economic development). At present, 65 percent of ICDF projects respond to IL-43 guidelines.

Table 5. Number of projects by region and municipality before and after the signing of IL-43

Region	Municipality	Pre- IL	Post- IL	Overall Total
TC	Chimore	8	6	14

Chart 3 below demonstrates the breakdown of community development projects by sector. The number of projects in the sub-portfolios of education and potable is notable. This increase is attributed to the high impact activities that provide furniture and/or equipment for the expansion of access to healthcare, potable water and education in multiple municipalities that were included in the ICDF community development portfolio in response to Modification 14 of the CA. Chart 4 demonstrates the breakdown of economic development projects by sector.

Chart 3 – Number of community development projects by sector sub-portfolio

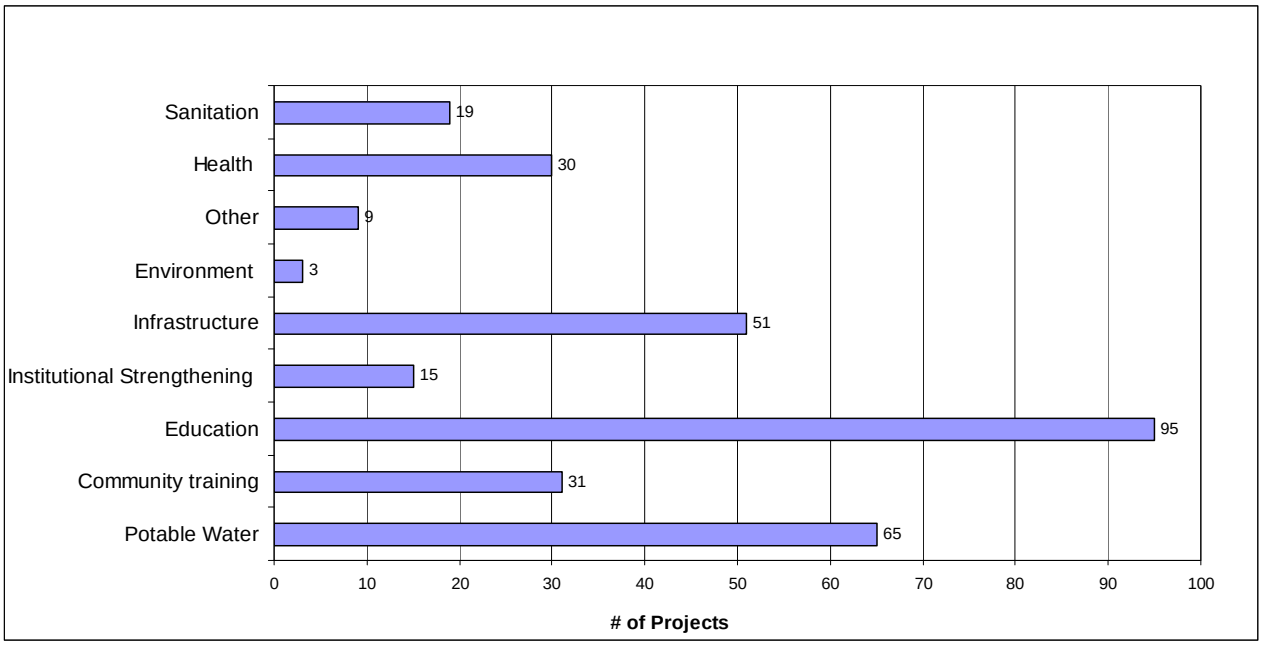

Chart 4 – Number of economic development projects by sector sub- portfolio

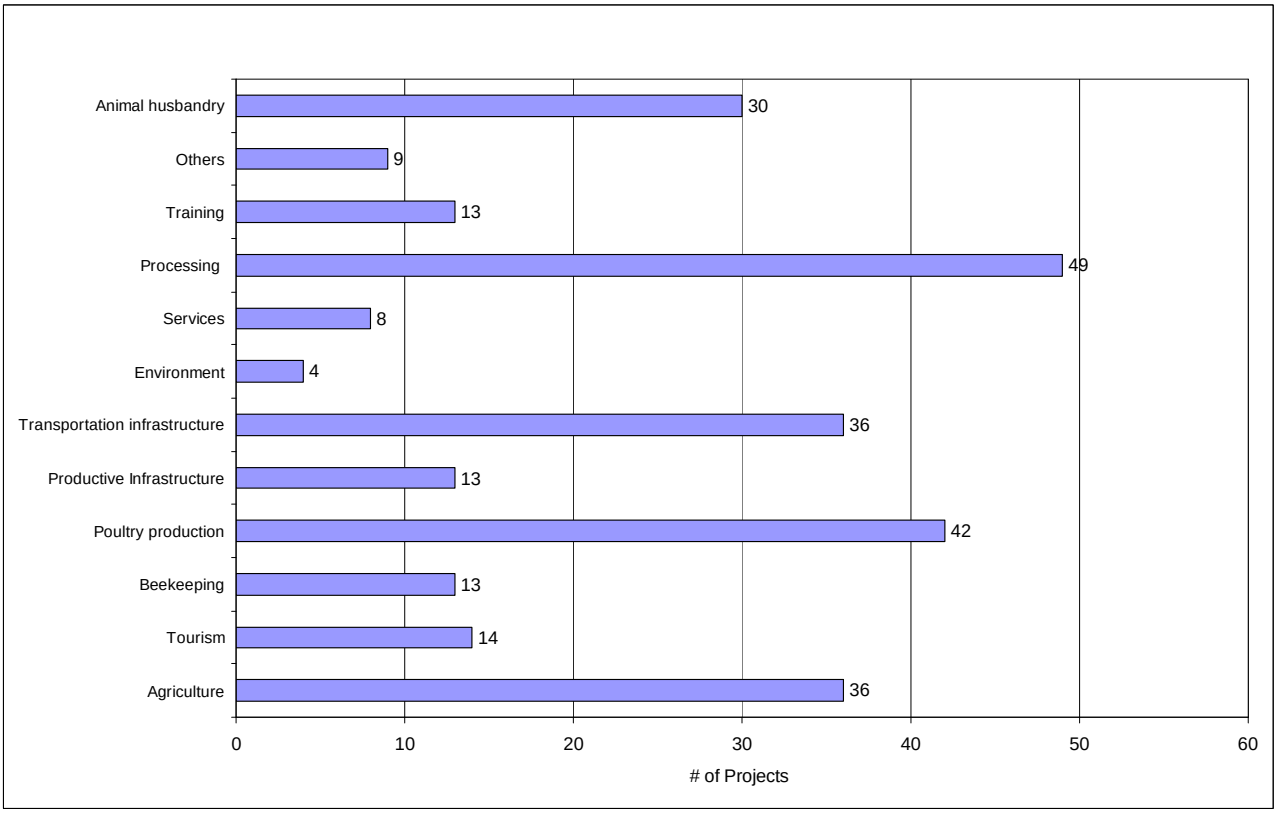


II. SUMMARY OF ACTIVITIES

This section consists of a breakdown of ICDF illustrative activities for the quarter by component and sector; within each component, activities are divided by geographical region. An activities update from the performance monitoring and evaluation (M&E) team and the environmental department can also be found in this chapter.

II.1 Activities by Component and Region

A. COMMUNITY DEVELOPMENT

A total of ten community development projects were concluded in the Yungas. These are presented by region and municipality in the following table:

Table 7: Community development projects completed during the October – December 2009 quarter

CODE	REGION	MUNICIPALITY	PROJECT
YC0190	Yungas	Various YUN	Support of Sports Activities in the Yungas
YC0479	Yungas	La Asunta	La Asunta Communication Strategy: Community Mobilizing and Field Schools
YC0484	Yungas	Coripata	Conclusion of the Franz Tamayo School
YC0502	Yungas	Irupana	Design and Construction of Water Storage Tank-Chicaloma
YC0552	Yungas	La Asunta	Furniture Provision for Schools in the Federation of La Asunta in the municipality of La Asunta
YC0553	Yungas	La Asunta	Furniture Provision for Schools in the Federation of Chamaca in the municipality of La Asunta
YC0579	Yungas	La Asunta	Cervical and Breast Cancer Prevention and Early Detection Campaign in La Asunta
YC0580	Yungas	Various YUN	Short Story, Poetry and Painting Contest in Six Yungas Schools
YR0056	Yungas	Coroico	Santa Rosa de Quilo Quilo Health Center
YR0101	Yungas	Coroico	Multipurpose Sports Complex - Coroico

One of the more outstanding community development projects concluded this quarter is the Santa Rosa de Quilo Quilo Health Center in the municipality of Coroico. The center is equipped with a maternity ward, doctor's offices, a pharmacy, a multipurpose training room, and administrative office space. The health center was also complemented with living quarters for the staff. The construction of this health center allows for the expansion of healthcare coverage in twelve different communities, where the center will offer primary care services to a population of 1,512 people.

Another community development project of special interest is the multipurpose sports complex in Coroico, a covered multi-use field with lights, bleachers and an outside wall. This community sports center will provide a comfortable space protected from the rain and sun for residents of all ages to gather to play sports. The complex will be administered by the municipality.

1. High Impact, Rapid Response Projects

The ICDF implemented high impact, rapid response projects in seven different municipalities in the Yungas of La Paz. All projects were coordinated with the corresponding municipal governments, who contributed a cash counterpart. Over 6,000 families in the municipalities of Coroico, Coripata, Chulumani, Irupana, Yanacachi, Palos Blancos and La Asunta will benefit from the provision of medical equipment, school furniture, potable water system equipment and culverts for road drainage.

During the inauguration of projects in La Asunta, clinical furniture destined for the La Asunta Hospital and nine health posts was on display.

Medical Equipment. This project provides four hospitals and twelve heath centers and posts with medical machines such as instrument sterilizers and an X-Ray machine, surgical equipment and clinical furniture including delivery beds, stretchers, hospital beds and examining tables. Over 4,000 families attend the hospitals and health centers equipped by these projects.

Potable Water Systems. This project provides 98,925 meters of piping for the rehabilitation and/or expansion of potable water systems in 30 communities in the seven aforementioned municipalities. With the new tubing and technical assistance provided, a total of 1,360 families will now have stable access to potable water.

Due to lack of suffient seating, students in the Yungas commonly sit three to a bench.

Education: The school furniture and educational material projects provide 64 different primary and secondary schools in the Yungas with new wooden desks, chairs and other school furniture. Almost 4,500 furniture items were purchased for the different schools as well as blackboards, maps, sports equipment and musical instruments. In total, the equipment will benefit approximately 2,500 students. Currently, due to a lack of adequate furniture, many schoolchildren have to share old-fashioned school benches. The new furniture will give each student her or his own chair and desk space, fostering a comfortable learning environment.

Trucks bearing school furniture before the inauguration of projects in La

At the invitation of the La Asunta Farmers' Federation (*Federación Especial Unica de Trabajadores Campesinos* in Spanish, FEUTCA) and the municipal government, the projects corresponding to the municipality of La Asunta were inaugurated. The Vice Minister for Coca and Integrated Development, Gerónimo Meneses, the Vice Minister for Social Defense, Felipe Cáceres, the director of USAID/Bolivia's Office for Integrated Alternative Development (IAD), Mary Norris, the mayor of La Asunta, Reynaldo Calcina Luna, the head of FEUTCA, Freddy

Saire and the director of COFECAY, Felix Barra participated. Over 200 people from the 25 communities benefited by the projects were present, as well as various neighborhood and school advisory committee representatives. Medical equipment, clinical furniture, 2,000 pieces of school furniture, approximately 50 kilometers of piping for five potable water systems and 1,000 meters of culverts were handed over during the event.

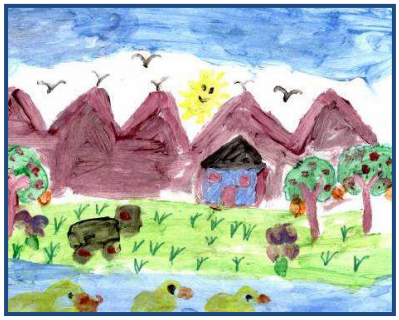
2. Human Development and Institutional Strengthening

In October, the ICDF conducted a training course on the Governmental Administration and Control law (Law 1178 SAFCO). The course addressed municipal government planning, programming, management and control. The training took place in Irupana, where 36 representatives from the municipal governments of Irupana, Chulumani, Coripata, La Asunta and Coroico participated. The event was coordinated with and certified by the CCENCAP-CGE.

As part of the project, "Support of Enterprising Youth", implemented in coordination with the UAC-CP and Nueva Economía, 25 students presented theses in the form of business plans. Particularly innovating theses projects include, "Pegazzo Daycare Center and Hotel for Pets", "Guinea Pig Meat Production and Sales Promotion in the municipality of Coroico", "Vermicompost Production and Sales Promotion in the community of Coscoma, Coripata" and "Snail Production in the community of Carmen Pampa". The students are expected to defend their theses and graduate during the next reporting period.

3. Education in the Zona Tradicional and La Asunta

In addition to providing school furniture for schools throughout the Yungas, the ICDF concluded the Short Story, Poetry and Painting Contest project in six schools in the municipality of La Asunta and the *Zona Tradicional*. The theme of the contest was springtime and the environment, and special emphasis was placed on the topic of water. Particular schools were invited to participate because of their involvement in the implementation or design of ICDF-supported potable water systems. During the last reporting period, a total of 600 students submitted their environment-themed poems, stories, paintings and drawings for the contest. During the current quarter, individual winners were selected by a professional judges' panel made up of Silvia Alvarez, a renowned children's author, Jorge Campero, a prize-winning poet, and Roberto Mamani Mamani, a celebrated Bolivian painter, all of whom volunteered their time. Due to time-constraints on the part of the judges, the panel met privately and no public judging occurred. Individual winners as well as each participating student and school received awards in the form of books and school materials.



A painting submitted by a 3rd grade student from Puerto Rico, La Asunta.

Prize-winning artwork submitted by a 4th grade student from Marchacamarca.

4. Health

In addition to its support of health centers and posts through equipment provision and the Bolivian Cancer Foundation, the ICDF conducted a Cervical and Breast Cancer Prevention and Early Detection campaign for women in La Asunta. The project was coordinated with the La Asunta Hospital through the Yungas SEDES and the Municipality. In December, Bolivian Cancer Foundation volunteer healthcare professionals conducted trainings and collected Pap smears. Over 200 women, many of whom were accompanied by their partners, attended the free campaign. The lab results will be sent to the La Asunta Hospital to be distributed at the start of the next quarter.

***5. Scholarship Programs, Yungas: Unidad Académica Campesina Carmen Pampa* (UAC-CP)**

The UAC-CP is a non-profit university located 111 km. northeast of La Paz, in the North Yungas Province of the department of La Paz. The university is located in the community of Carmen Pampa, which is 13 km from Coroico, the capital of the province. It offers higher education to the rural regions of tropical northern Bolivia and to the youth from the marginalized areas of the city of La Paz. It was created by an inter-institutional agreement between the Catholic University of Bolivia (UCB), the Dioceses of Coroico, the Franciscan Missionary Sisters and Villa Nilo Sub Central, the local governing body of the indigenous people, on October 4, 1993. The UAC-CP offers bachelor degrees to a student body of approximately 700 students in agronomy, nursing, veterinary medicine, animal husbandry and primary education. It also offers an associate degree in tourism. Each program includes both academic coursework and opportunities for hands-on practice in the respective career tracks. The ICDF continued to support UAC-CP students by funding 30 thesis scholarships and 39 regular study scholarships during the second semester of 2009.

B. ECONOMIC DEVELOPMENT

1. Concluded Economic Development Projects

A total of 43 economic development projects were completed during the present reporting period—two in the TC region and 41 in the Yungas region. The names of these projects are listed in the table below.

Table 8. Economic development projects completed during the October- December 2009 quarter

CODE	REGION	MUNICIPALITY	PROJECT
TC0499	TC	Various TC	Institutional Strengthening - UNAPPAL
TE0498	TC	Various TC	Institutional Strengthening for the Prevention of Hoof and Mouth Disease in the TC
YE0227	Yungas	La Asunta	100 parcels of communal agroforestry systems
YE0237	Yungas	Alto Beni (North Caranavi)	Sheep's' Wool Production

YE0577	Yungas	Various YUN	Training and Equipment Provision in Tailoring
YE0595	Yungas	Various YUN	Enterprising Youth of the Yungas Participate in Global Enterprise Week

2. Economic Development Projects in the Yungas

Based on experience gained from working nearly ten years in the Yungas, ACDI/VOCA understands very well the geographical, social and economic diversity that characterizes the region. The ICDF strategy in the Yungas has been designed to reflect this diversity and follow the guidelines set by the PSB and USAID. The ICDF is currently working in three different areas of the Yungas: La Asunta, the *Zona Tradicional* and Alto Beni.

Enterprising Youth of the Yungas in Global Enterprise Week

The "Enterprising Youth of the Yungas in Global Enterprise Week" project was concluded, as 12 ICDF-supported young business owners and UAC-CP students from the Yungas participated in the 3rd International Enterprising Culture Meeting in Tarija. Five regional education administrators, including the district school board directors of Chulumani and Palos Blancos, the

director of the Alto Beni Youth Organization and the director of the Adult Education Center in Chulumani, also attended the event. The young people were able to take part in various workshops and seminars, exchange ideas, and make important business contacts. These young business leaders were also able to represent the Yungas of La Paz and the enterprising rural youth of Bolivia in general.

Drainage equipment at the inauguration in La Asunta.

2.1. La Asunta:

Drainage Systems for Transportation Infrastructure

One of the projects implemented during the reporting period, which was closely coordinated with Caminos Vecinales (CCVV) and the municipality of La Asunta, involved transportation infrastructure. This project will result in the overall improvement and long-term reduction of maintenance of multiple roads in La Asunta through the provision of 1,055 meters of culverts which will be installed along 12 stretches of roads. The drainage equipment provided will help better connect 25 communities that are home to approximately 1,200 families. The culverts will facilitate stream crossings and therefore help prevent parts of the existing roads from being washed away during the rainy season. Stable roadways are essential for producers of coffee, banana, chicken, stevia and other crops who need to reach regional markets in a timely manner in order to ensure the quality of their products.

Plantain: Fifteen new hectares of plantains were planted in different communities during the quarter, adding up to a total of 80 established hectares in the municipality of La Asunta. In order to learn more about the practice of buying corms, approximately 20 producers participated in different educational visits to producer associations in Santa Lucia, Alto Olivos and San Pablo in the TC. Securing quality corms, or the stem from which the plantain tree grows, is important in ensuring a quality final product. Producers from La Asunta were able to gain important knowledge on corm selection, as well as purchase their corms, during these visits.

Beekeeping: Forty new families joined the beekeeping promotion activities in the three communities of Central Bolívar, raising the total number of participating families in La Asunta to 84. Approximately 90 percent of the 40 new families have received their hives and established apiaries, while the remaining 10 percent will receive their hives and equipment at the beginning of the upcoming quarter. Field school activities continued in the communities of Pichari, 1 de Julio and Puerto Aroma.

Plaintain producers from La Asunta during an educational visit in the TC.

Coffee: In the three communities of Central Bolívar and three other communities in the municipality of La Asunta, the number of community coffee nurseries was increased from nine to 12. The seedlings in these nurseries will be used to establish 250 hectares of coffee during the next quarter. The ICDF provided technical assistance of pre-existing parcels in the zone and performed organic treatment of a pest outbreak.

Producer with his stevia nursery in La Asunta.

Stevia: During this quarter, 500,000 stevia seedlings were transplanted from nurseries to 40 commercial parcels occupying a total of ten hectares in the communities of Bolívar II and Bolívar III. Additionally, implementation of plots in Bolívar IV and Santa Teresita began. As part of field school activities, producers conducted the first harvest of the first five stevia plots implemented by the ICDF. Due to the nature of the stevia crop, the first harvest did not produce an export-quality product, as it will in the future. However, in addition to gaining valuable harvest experience, producers were able to yield an acceptable price in local markets, where they sold their stevia for approximately 15 Bolivianos (around US$2) a pound.

During the month of November, representatives of the VCDI and USAID visited various economic development projects implemented by the ICDF and the ARCo project in La Asunta. The multi-institutional visit was an opportunity for the VCDI and USAID representatives to speak with various producers while they visited banana fields, chicken houses and coffee and stevia nurseries. The USAID and VCDI representatives congratulated producers on the advances achieved so far.

2.2. Zona Tradicional

Work continued towards promoting amaranth production in the *Zona Tradicional.* Market studies have showed a proven market demand for export-quality amaranth. A total of 98 plots in 15 communities in the municipality of Coroico and 10 communities in the municipality of Irupana were prepared. Four hundred pounds of high-quality seeds were handed over by Bolivia Natura as part of this company's cost-share. These seeds will be used to plant 23 hectares of amaranth. At present, approximately 15 hectares have been planted. In the zone of Nuevo Belén plants exists as tall as 1.5 meters, exhibiting a growth rate that has exceeded producers'and ICDF staff's, expectations.

2.3. Alto Beni

An Alto Beni dairy producer with a gyrholand heifer he received through an ICDF project.

Over the course of 2009, 36 Gyrholand heifers and 6 bulls were donated to producers as part of activities to improve the zone's dairy herds. As a result of continued ICDF technical assistance and training, 25 of the aforementioned heifers have given birth to healthy calves. ICDF staff offered veterinary support at a number of these births.

The ICDF also donated sheep as part of another ICDF-supported microenterprise project. These sheep are specifically bred for sheep's wool production. The ICDF continued to conduct technical assistance to the producers benefitted by this innovative activity.

During late November, the 4th *Exponorte La Paz* took place in Caranavi. During this important event, over 100 producers from Santa Cruz, Cochabamba, Tarija and La Paz showcased their business activities, including agricultural production, animal husbandry, tourism, artisanal goods, and coffee. Based on his own initiative, the owner of the ICDF-supported Inicua Carpentry Shop in Palos Blancos participated in this exciting expo, where he was able to showcase his impressive artisanal carpentry work. The feedback he received from the experience was inspirational and encouraging in terms of possible future sales.

3. Tropics of Cochabamba
The ICDF concluded the last two remaining projects in the TC, which include institutional strengthening for the Palm Heart Producers' Association Union (UNAPPAL) and the National Agriculture and Food Health and Safety Service (SENASAG). The ICDF supported UNAPPAL by successfully conducting 22 training events on palm heart production and post-harvest processes, which were attended by 74 producers. Additionally, the ICDF trained over 500 producers and Tecnologico Agropecuario Canadiense (TAC) students on production and environmental management. Institutional strengthening of SENASAG was also successful. SENASAG was able to achieve its established vaccination goal for the 18th season, vaccinating almost 50 percent of the cattle in five TC municipalities against hoof and mouth disease. Through this process, SENASAG greatly improved its ability to lead such campaigns in the future.

II.2 Cross-cutting Activities

Volunteer Consultant Technical Assistance
The volunteer-based technical assistance program supports the ICDF's main goal of helping establish diversified sustainable economies in Bolivia's coca-producing regions. With the expertise of its international consultants, the program constitutes an important channel through which the ICDF can provide its clients with specialized technical assistance that is not available locally. ICDF volunteer consultants supply producers with demand-driven assistance in different areas. In agriculture, this includes assistance in production, post-harvest handling, value-added processing and marketing. In addition to providing technical support in agriculture, the volunteer consultants give important assistance in institutional strengthening as well as in developing sectors of Bolivia's economy that have shown high potential for growth within the ICDF's target regions.

The ICDF saw one volunteer assignment in citrus pest control to its conclusion during the current reporting period. In addition, the ICDF successfully recruited a volunteer expert in lily production who is scheduled to begin her assignment at the beginning of the next quarter. Recruiting continued for a technical assistance assignment in agroforestry.

Concluded Volunteer Consultancy

<u>Technical Assistance in Citrus Pest Control</u>
The Alto Beni region of the Yungas relies on a diverse range of crops including but not limited to cocoa, citrus, coffee, banana, rice and yucca. The agriculture in this region is predominantly organic and does not employ the use of synthetic pesticides. In spite of the organic controls for pest and disease that are already in place, the area's growing conditions are a major concern for

small-holder farmers in Alto Beni. In fact, the region's less than ideal climate for citrus production facilitates the spread of various types of pests and disease.

To prevent future economic loss, it is essential that Alto Beni's citrus producers learn to use efficient techniques for controlling pests and disease. To help achieve this goal the Association of Citrus Producers of Alto Beni (ACIBENI) requested the technical assistance of an ACDI/VOCA volunteer consultant with expertise in organic pest control specific to citrus cultivation. The assignment's main objective was to actively engage 30 to 50 citrus producers in organic pest and disease control. The anticipated result was higher quality fruit and a value-added final product that is more competitive in the marketplace.

Dr. Phil Phillips, a volunteer expert in citrus plagues and pest management, speaks with a producer outside of Sapecho, Palos Blancos.

Dr. Phillip Phillips, the volunteer consultant recruited for this assignment, spent three weeks in the field working closely with ACIBENI's citrus producers. The first part of Dr. Phillips' field work involved a diagnostic study and analysis of Alto Beni's citrus parcels. During this time he was able to diagnose the major pests and diseases affecting the area's citrus crops. He was also able to determine those areas within the municipality of Palos Blancos with the highest potential for successful citrus production.

Dr. Phillips also gave practical workshops in the field where he trained approximately 200 citrus producers in Organic Pest Management (OPM) and/or Integrated Pest and Disease Management (IPM) techniques. Through workshops, he offered training in the management of the most serious pests and diseases observed during his visit. These included phytophthora root, crown, and trunk disease; ants (both honeydew foraging and leaf cutting species); rust mite, and the parasitic plant "jamillo". Besides training producers in feasible techniques for managing each of the problems mentioned, Dr. Phillips left a manual he wrote as part of his volunteer assignment entitled "Organic Citrus Pest Management" for the use of ACIBENI's citrus producers.

During his time in the Yungas, Dr. Phillips was also able to give workshops on OPM and IMP in citrus fruit to three different groups of university students. In Palos Blancos, around 40 students from the department of tropical agriculture of the public university, *Universidad Mayor de San Andrés* attended, and the same number of students from the Agro-industrial Technical Institute of Caranavi participated in a separate training. Finally, Dr. Phillips visited the UAC-CP in Coroico, where he was able to share his knowledge with approximately 45 agriculture students.

The ICDF expects that ACIBENI's citrus producers will be able to put many of Dr. Phillips's recommendations for organic pest and disease control into practice within their parcels. By producing higher quality fruit and a better value-added final product, the ICDF expects the implementation of the volunteer consultant's recommendations to result in job creation and income generation for area citrus producers and their families. As part of standard volunteer assignment follow-up activities, the ICDF will conduct a review of how the assignment's clients

are able to implement the volunteer consultant's recommendations. This monitoring activity will take place three months after the conclusion of the assignment and will be reported in the next quarterly report.

Pending Volunteer Consultancies

Technical Assistance in Lily Production
A recent series of market surveys reveal unsatisfied local demand as well as opportunities for export for lily flowers. Fundacion Taquesi, an ICDF partner in Yanacachi, *Zona Tradicional*, introduced lilies into the area for small-scale production as recently as three years ago. As a result, despite a significant level of commitment, local producers have little experience with the species. This lack of experience has led to demonstrated deficiencies in the areas of bulb production and disease control. In light of these problems Fundacion Taquesi and the project's flower producers requested the assistance of a volunteer consultant with expertise in lily bulb production and in the general management of lily parcels.

This assignment is scheduled to take place in January 2010. The expert's curriculum vitae was presented to the Fundacion Taquesi for approval during the current quarter and once consensus was achieved, all logistics in terms of recruitment and fielding the volunteer were completed.

II.3 Performance Monitoring and Evaluation (M&E)

The M&E team performed field visits to the projects completed during this quarter as well as to those completed one year ago. The purpose of the latter was to evaluate whether those projects are functioning well per the ICDF's sustainability indicator. A total of 52 site visits were conducted, the majority of which relate to the economic development portfolio.

Work began on the final component of the ICDF mid-term evaluation. The purpose of this external evaluation is to determine the ICDF's impact on the quality of life of the community members in ICDF target areas and to determine how much the ICDF contributed to the significant reduction in structural poverty documented in the most recent NBI study.

II.4 Environment

A. Status of Environmental Licenses

The ICDF environmental staff continued to prepare the required environmental forms to present before the Department of Natural Resources and Environment (DRNMA) of the Prefecture of La Paz. The ICDF worked on procuring the environmental licenses for the following projects:

Project	Community – Municipality	Environmental Form	Category	Environment Management Plan	Environment License
Potable Water System	Milluguaya	X			
Vehicular Suspension Bridge	San Gabriel – La Asunta	X	3	X	In process
Land Fill	Coroico	X	3	X	X

The DRNMA assigned the vehicular suspension bridge in La Asunta and the landfill to category 3, which means that due to the low environmental impact anticipated, these projects do not require a specific environmental evaluation. For projects in this category, the DRNMA emits an environmental waiver.

At the conclusion of the Santa Rosa de Quilo Quilo Health Center project, ICDF environmental staff presented the center with its environmental license and a manual on proper incinerator management. Additionally, a training was given to the center staff on the management of solid waste typically generated by health establishments. Health center employees throughout the municipality of Coroico were invited to participate in this training, which was conducted in coordination with INLASA. Seventy-eight individuals from various health centers and health posts participated.

Thirteen economic development projects obtained their industrial environmental register (*Registro Ambiental Industrial* - RAI) and environmental licenses. The environmental team visited a range of economic development activities, including six chicken farms, in order to follow up on the environmental procedures established with producers as part of their projects. These procedures are important in reducing the environmental impact of the different business activities supported by the ICDF.

B. Soil Restoration Project

As a much more efficient alternative to the common practice of allowing infertile fields to recover nutrients on their own, based on producer demand and the recommendation of the VCDI, the ICDF has undertaken a soil recuperation project, which works through the implementation of agroforestry systems. This quarter, 34 additional community members joined in on soil recuperation activities. All of the 94 participants in this program have access to fully operational community nurseries, which are used to develop the seedlings necessary to implement individual agroforestry systems. The community nursery of Arapata in the municipality of Coripata has more than 5,000 seedlings of twelve different species. Additionally, the project team evaluated the soil on 26 participants' plots, implemented 14 agroforestry plots, and continues to conduct trainings with all 94 participants in agroforestry systems management.

III. PERFORMANCE INDICATOR RESULTS

The ICDF activities are divided into two portfolios: economic development and community development. These two programmatic areas support the USG and PSB's policies and provide the VCDI with the necessary tools to facilitate sustainable development in the Yungas and previously the Tropics of Cochabamba. The following table summarizes the ICDF's performance indicator targets per programmatic pillar:

Table 9. ICDF performance indicators and annual targets[1]

Indicator		Unit	Targets (Annual Increment)					Total LOP
			05 -06	07	08	09	10	
Overall Indicators								
SO 1.1	Percentage of population below poverty line as measured by the Unsatisfied Basic Needs Index	Percentage YLP	70%*		65%			60%
		Percent TC	75%*		70%			65%
SO 1.2	Total number of families (and their communities) with increased access to public goods, services and jobs.	Families	3,499	15,204	7,229	4,154	1,868	31,954
* Percentages for ’05 and ’06 are baseline reference numbers								
Community Development								
IR 1.1	Number of social infrastructure and related works completed	Infrastructures	14	23	201	140	75	443
Economic Development								
IR 2.1	Incremental sales from economic initiatives supported by ICDF	$US (thousands)	0	0	902	2,580	608	4,090
IR 2.2	Number of new, licit equivalent jobs directly attributable to all ICDF-supported initiatives	Equivalent jobs	40	94	1,550	1,275	513	3,472
IR 2.3	Number of hectares of agricultural licit crops that have been developed or expanded with ICDF support.	Hectares	0	0	175	1,251	160	1,586
Cross-cutting Indicators								
CC 1.1	Number of people who received training within the framework of an ICDF activity.	Trainees	2,582	21,514	9,249	3,488	845	37,678
CC 1.2	Percent of counterpart by component	% 10%	10%	10%	10%	10%	10%	10%
		% 30%	30%	30%	30%	30%	30%	30%
CC 1.3	Percent of relevant sub-grant initiatives that are still “functioning well” one year after completion	Sub – grants	n/a	95%	95%	95%	95%	95%

[1] The reformulated targets were approved in Modification 15.

The main objective of the ICDF is to support the joint USG-PSB efforts to establish a sustainable economy in Bolivia’s coca-producing and associated areas by addressing basic human needs, alleviating poverty and improving social and economic conditions through the implementation of subaward projects identified through participatory methodologies. This objective primarily responds to USAID/Bolivia’s Intermediate Result (IR) 5.3:

> To improve basic public services and social conditions in the Tropics of Cochabamba and in the Yungas region of La Paz, Bolivia.

Two indicators monitor this IR: 1) the index of unsatisfied basic needs; and, 2) the number of families benefited. Due to the departure of IAD from the TC, the ICDF did not evaluate the NBI indicator in this region, nor is it planned to do so in the future. Also, given that the PSB plans to conduct the national census and measure the NBI in 2011, it was decided that the next NBI indicator measurement be done by means of the national census. Thus this indicator will only be measured once by the ICDF during LOP. The number of families' indicator is monitored on a quarterly basis.

SO 1.1 Indicator: Index of unsatisfied basic needs

The Unsatisfied Basic Needs (NBI in Spanish) is a structural poverty index that is calculated based on individual access to housing, basic sanitation, electricity, education and health. It is a direct measurement method, as it observes and assesses whether or not households have the basic services that enable them to satisfy their needs effectively. The NBI identifies structural poverty – not household income.

There was a notable reduction in the number of households classified as living under conditions of "moderate poverty." These households are now living in conditions known as "the poverty threshold": living on or above the poverty line.

Table 10. Percentage of population living below the poverty line as measured by the 2001 Census and NBI Index

Municipality	2001 Census	2005 NBI Survey	2009 NBI Survey
Coroico	79.1	59.4	47.8
Chulumani			
Coripata			
Yanacachi			
La Asunta	94.9	73.0	70.6
Palos Blancos	90.5	71.4	57.1
Caranavi	86.6	80.1	56.2
Yungas	**85.3**	**70.3**	**52.2**

As table 10 shows, poverty as measured by the NBI fell by more than 18 percent between 2005 and 2009. This reduction can be explained by various factors, including investments made in social infrastructure made by local governments between 2006 and 2008, those made by other IAD activities during the same timeframe, people investing in improving their homes, and, of course, ICDF investments, specifically in potable water, sanitation, education and health.

SO 1.2 Indicator: Number of families

Title of the performance indicator: Total number of families (and their communities) with increased access to public goods, services or jobs.

Measurement unit: Number of families benefited by ICDF supported activities

Table 11. Targets and results of the number of families indicator (October – December 2009)

Milestones	Total 2006	Total 2007	Total 2008	Calendar Year 2009					Total 2010	Total LOP
				Jan - Mar	Apr – Jun	Jul – Sep	Oct - Dec	Total - 09		
Target	***3,499***	***15,204***	***7,229***	*598*	*1,724*	*932*	*900*	***4,154***	***1,868***	***31,954***
Results TC	**2,543**	**5,924**	**1,911**	135	343	540	179	**1,197**		**11,575**
Results Yungas	**956**	**9,280**	**5,318**	463	1,381	392	728	**2,964**		**18,518**
Total	**3,499**	**15,204**	**7,229**	**598**	**1,724**	**932**	**907**	**4,161**	**0**	**30,093**

In the TC, two institutional strengthening projects were completed. These projects, which supported UNAPPAL and SENASAG, benefited 179 families. In the Yungas, projects that increase access to education and healthcare benefitted 350 families in different municipalities.

Table 12. Number of families by region, municipality and portfolio (October – December 2009)

REGION	MUNICIPALITY	PORTFOLIO		Total
		Community Development	Economic Development	
TC	Various TC		179	179
Total TC			**179**	**179**
Yungas	Alto Beni (Norte Caranavi)		4	4
	Chulumani		3	3
	Coripata	49	4	53
	Coroico	401		401
	Irupana	16		16
	La Asunta	48	109	157
	Palos Blancos		15	15
	Various YUN	10	67	77
	Yanacachi		2	2
Total Yungas		**524**	**204**	**728**
OVERALL TOTAL		**524**	**383**	**907**

The number of families benefited in the municipality of Coroico stands out due to the conclusion of the Santa Rosa de Quilo Quilo Health Center and the Coroico Multipurpose Sports Complex. Both of these projects are important for this municipality. In La Asunta, a significant number of families were benefited by the provision of school furniture to 20 different schools, and an additional 100 families were benefited by the implementation of agroforestry systems.

III.1 Intermediate Result 1

The ICDF's intermediate result 1 (IR 1):

> Community development in the Yungas and in the TC is strengthened; social and productive infrastructure is constructed, expanded and/or equipped.

IR 1.1 Indicator: Complementary infrastructure and related projects

Title of the performance indicator: infrastructures and related projects completed.

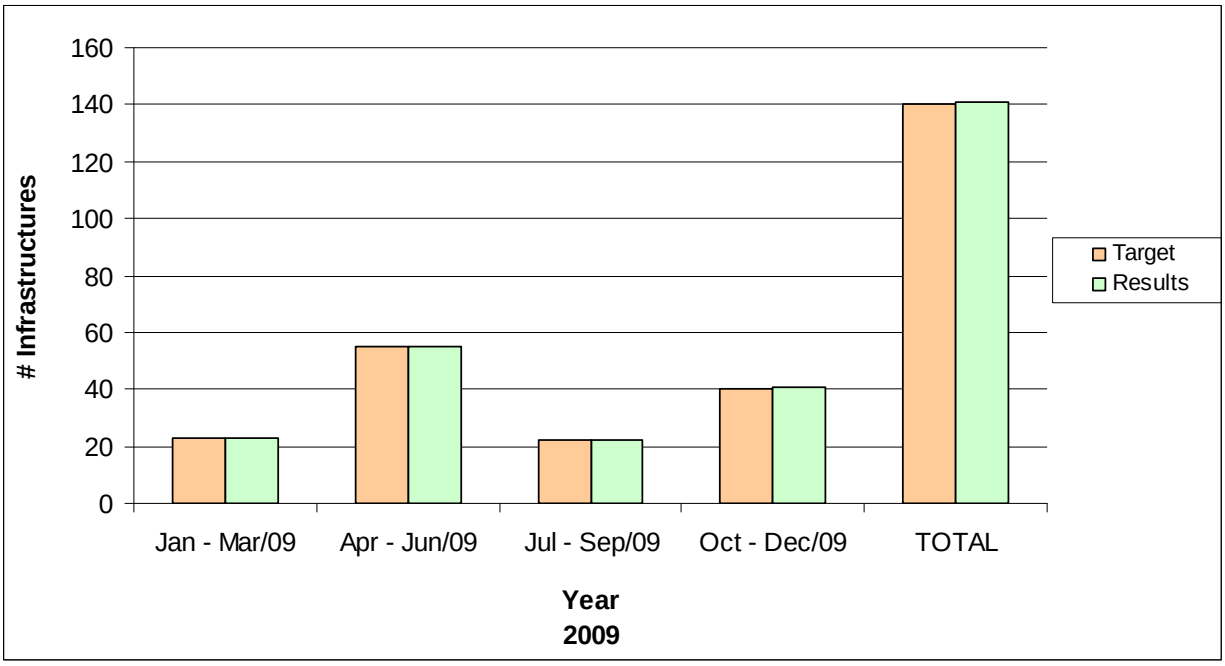
Measurement Unit: Number of complementary infrastructures and other projects concluded by the ICDF.

Table 13. Targets and results of the complementary infrastructure and related projects indicator (October – December 2009)

Milestones	Total 2006	Total 2007	Total 2008	Calendar Year 2009					Total 2010	Total LOP
				Jan - Mar	Apr – Jun	Jul – Sep	Oct - Dec	Total - 09		
Target	***14***	***23***	***201***	*23*	*55*	*22*	*40*	***140***	***75***	***453***
Results TC	**11**	**4**	**25**	5	7			**12**		**52**
Results YLP	**3**	**19**	**176**	18	48	22	41	**129**		**327**
Total	**14**	**23**	**201**	**23**	**55**	**22**	**41**	**141**	**0**	**379**

The 41 infrastructure projects concluded include the construction, expansion and/or equipping of schools, health centers and potable water systems as well as chicken houses and pig houses. The following chart compares the target number of infrastructures with the number of achieved during calendar year 2009, and illustrates that the target has been surpassed.

Chart 5. Number of Infrastructures completed by the ICDF during calendar year 2009



The ICDF continued offering technical assistance to the different groups and individuals that have received infrastructure projects. This assistance includes trainings on use and maintenance as well as follow-up visits.

Table 14. Number of completed infrastructure projects by type (October – December 2009)

PORTFOLIO	SUB-PORTFOLIO	REGION		Total

	Animal Husbandry		6	6
	Processing		8	8
	Tourism		2	2
Total Economic Development			**17**	**17**
OVERALL TOTAL			**41**	**41**

Particularly outstanding are the education projects that provided over 2,000 desks, chairs and bookcases for the use of students and teachers in schools throughout the Yungas. Under economic development, a number of farm infrastructures were completed for the production of chicken, pigs and eggs. These infrastructures offer producers "solid ground" upon which to start or continue their businesses. Specifically, the chicken houses can house between 500 and 700 chickens, and include separate areas for slaughtering and cleaning the poultry. All of these farms have been built in accordance with national and USAID environmental regulations, and all producers received training on proper disposal of animal waste.

III.2 Intermediate Result 2

The ICDF's intermediate result 2 (IR.2):

> Economic initiatives are promoted in the Yungas region of La Paz and in the Tropics of Cochabamba by the creation of job opportunities in these regions.

IR 2.1 Indicator: Incremental sales

Title of the performance indicator: Increases in sales generated by economic initiatives supported by the ICDF.

Unit of Measure: U.S. Dollars x 1,000

Table 15. Targets and results of the Incremental Sales indicator (October – December 2009)

Milestones	Total 2006	Total 2007	Total 2008	Calendar Year 2009					Total 2010	Total LOP
				Jan - Mar	Apr – Jun	Jul – Sep	Oct - Dec	Total -09		
Target	***0***	***0***	***902***	*218*	*1,385*	*327*	*650*	***2,580***	***608***	***4,090***
Results TC			**155**	60	1,301	268	0	**1,629**		**1,784**
Results YLP			**747**	158	84	60	672	**974**		**1,721**
Total	**0**	**0**	**902**	**218**	**1,385**	**327**	**672**	**2,603**	**0**	**3,505**

All registered sales correspond to economic development activities in the Yungas region. The most significant sales were produced by poultry, due to the high demand and stable market price for this product. On average, one chicken farm produces 500 chickens four times per year. The average chicken produced weighs 2.2 Kg, and can be sold for between 12.50 Bs. (US$1.77) and 16 Bs. (US$2.26) per kilogram.

This quarter, the ICDF was reminded of the important sales that can be generated by supporting small businesses, as the Corfab Carpentry Shop was able to secure a contract with the municipality of La Asunta to provide school furniture for several of the municipality of La Asunta's 82 schools. The sales from this relationship are valued at US$42,857.

The food processing plant in Alto Beni also registered important sales; during 2009, the plant sold 1,000 quintals of chicken feed for a total of US$16,500. Hotel Erika in the municipality of La Asunta has experienced a rise in sales as well, registering US$19,571 in sales during 2009. Much of the increase in Hotel Erika's sales can be attributed to the ICDF's support with the construction of a third floor, in that the hotel now boasts more private rooms with bathrooms, which generate a higher daily fee.

IR 2.2 Indicator: Equivalent employment

Title of the performance indicator: Equivalent employment directly attributed to initiatives supported by the ICDF.

Unit of Measure: Equivalent employment

Table 16. Targets and results of equivalent Employment Indicator (October– December 2009)[1]

Milestones	Total 2006	Total 2007	Total 2008	Calendar Year 2009					Total 2010	Total LOP

Total	**40**	**94**	**1,550**	**237**	**404**	**384**	**252**	**1,272**	**0**	**2,956**

[1] Based on the RIG audit recommendation, the equivalent employment indicator has been meticulously re-evaluated. The figures presented in the above chart reflect this reevaluation.

Two hundred and fifty-two equivalent employments were generated by community development construction projects as well as economic development projects. In the TC, 99 equivalent jobs were created through the final two economic development projects in that region. In the Yungas, 104 equivalent jobs were generated by the construction of four infrastructures and the production of furniture for two education projects. Additionally, 49 employments in economic development projects were created.

Table 17. Number of Equivalent jobs created by portfolio and sub-portfolio (October – December 2009)[1]

Overall Total		**99**	**153**	**252**

The municipality with the most equivalent employments is Coroico. This is due to the hiring of local community members for the construction of the Coroico Multipurpose Sports Complex and the Santa Rosa de Quilo Quilo Health Center. The municipalities of La Asunta and Palos Blancos also reported significant equivalent employment, due mainly to processing and animal husbandry economic development projects. Table 18 presents a breakdown of the 252 equivalent jobs created by municipality and portfolio.

ICDF staff verified that 25 hectares of agroforestry systems have been planted in the municipality of La Asunta. These systems were implemented by community members who are interested in growing citrus crops to sell as well as for their own consumption.

III.3 Cross-cutting Indicators

The ICDF implements projects whose results contribute to both IRs. These results are reported by way of three cross-cutting indicators: 1) number of trainees; 2) counterpart contribution; and, 3) projects that are "working well" after one year.

CC 1.1 Indicator: Trainees

Title of the performance indicator: People who received training within the framework of an ICDF activity.

Unit of Measure: Number of trainees

Table 20. Target and results of the trainees indicator (October – December 2009)

Milestones	Total 2006	Total 2007	Total 2008	Calendar Year 2009					Total 2010	Total LOP

Total	**2,582**	**21,514**	**9,249**	572	1,481	1,115	881	**3,168**		**36,513**

All ICDF community development projects include a training component in which beneficiaries learn to maintain, administer and operate infrastructure, services and/or equipment that they have acquired under the program. The different types of training offered include operation and maintenance, health and hygiene practices, basic accounting as well as administrative skills. Under the same principles, training is offered within the economic development projects in the areas of production and business management. In addition, the ICDF project portfolio also includes a number of subawards where training and/or institutional strengthening activities are not just a complementary component, but the focus of the project.

The ICDF had 881 trainees this quarter. Of these, 518 correspond to the TC and 363 to the Yungas. Twenty-two percent of trainees participated in community development projects while 78 percent were involved in economic development activities. The majority (466) of the trainees were palm heart producers and TAC students who participated in the trainings provided as part of institutional strengthening of UNAPPAL.

Bolivian Cancer Foundation volunteers register women for the cancer prevention and detection campaign that took place in La Asunta.

In the Yungas, the majority of trainings formed part of community development projects. An important amount of women and men from La Asunta were trained as a part of the Cervical and Breast Cancer Prevention and Early Detection campaign. Additionally, students and schoolteachers from six schools in the Yungas were trained in creative writing and painting as part of the Short Story, Poetry and Painting contest.

CC 1.2 Percent of counterpart by component

The counterpart contributions for the calendar year have not yet been fully booked and will be reported the following quarter.

CC 1.3 Indicator: sub-grant initiatives still functioning well one year after completion

Title of the performance indicator: Relevant sub-grant initiatives still functioning well one year after completion

Unit of Measure: number of sub-grant initiatives

Field visits were made to 16 projects that were completed more than a year ago in order to determine whether they are still functioning well. A methodology, including survey forms, interviews with community members and on-site inspection of the completed project, was specifically designed to measure this indicator.

The purpose of this indicator is to measure the factors that determine the current or future sustainability of each completed project. In the case of the water systems, for example, the inspections look at whether the system is functioning properly by visiting the participating families' homes to see if there is a continuous supply of water, and whether the system is able to supply all the users, as per the regulations. They also verify that the management and administration arrangements set up to provide the water supply service, carry out maintenance and operate the system are functioning as envisaged.

As a result of the field visits during the period, it was determined that 100 percent of the 16 selected completed projects that have been operating for a year or more are functioning well and providing benefits to users as initially intended. Next quarter another group of projects will be evaluated accordingly.

IV. LOOKING FORWARD

The following activities are planned for the next quarter:

- Conclude various high impact projects in potable water, transportation infrastructure and health and education in six municipalities in the Yungas.
- Launch a Leishmaniasis Prevention Campaign in coordination with the Palos Blancos Hospital and the National Leishmaniasis Prevention Program.
- Transplant all of the remaining coffee seedlings in La Asunta. Additionally, begin the Coffee Census in La Asunta to gather data on the number of producers and crops in the area.
- Implement 30 parcels of export-quality stevia and begin the first export-quality harvest in La Asunta.
- Create a series of manuals on field school strategies and practices for coffee, stevia, and plantain production and beekeeping. These manuals will be designed for and handed over to producers.
- Develop a forest management strategy for the *Zona Tradicional* in coordination with the municipal governments of the zone.
- Begin construction of the Coroico landfill. This construction project will be accompanied by trainings on the use and administration of the landfill as well as awareness campaigns directed at the general population of Coroico.
- Begin implementation of 13 recently approved community development projects in the municipality of Palos Blancos, including four potable water projects.
- Conclude teacher housing in the Central Bolívar in the municipality of La Asunta.
- Conclude construction of the Touristic Sports Complex in the community of Anacuri in the municipality of Coripata.
- Complete the block of student dormitories at the UAC-CP.
- Present the results of the final phase of the mid-term evaluation.

V. FINANCIAL INFORMATION

During the reporting period, ACDI/VOCA expended approximately $1,693,693. Of this amount, a total of $1,046,885 of subaward disbursements was made, bringing the total subaward disbursements to $16,811,971 through December 31, 2009. A budget pipeline report showing project expenditures for the reporting period is provided in Annex 1 along with a copy of Standard Form 425.

At present, a total of $19,366,571 has been designated to the 585 projects in the current subawards pipeline. Taking into consideration the funds assigned to the UAC-CP, TAC, *Mancomunidad de los Yungas* and GIS/Data Collection/Studies sub-grant activities ($628,470), a total of approximately $19,995,041 (98 percent) of the total $20,554,589 subaward fund has been committed to date.

Table 22. Financial Distribution by status: Total portfolio

Status	Allotted Amount		
	Community Development	Economic Development	Total
Design	797,900		797,900
Procurement	603,600	261,900	865,500
Implementation	1,869,246	2,270,020	4,139,266
Completed	10,273,719	3,290,186	13,563,906
Total	**13,544,465**	**5,822,107**	**19,366,571**

The distribution of the committed ICDF budget is appropriate for this point in the LOP. Currently, 69 percent corresponds to projects that have already been completed. Twenty percent of the budget corresponds to projects being implemented, and nine percent to those in the design or procurement stage. Two percent of the budget remains to be allocated.

According to the ICDF's implementation plan, by the end of March 2010, 85 percent of the budget will correspond to completed projects. At that time, the ICDF expects to have designated all remaining funds, and dedicate all efforts to project implementation and a technical as well as administrative close-out process.

Table 23: Financial Distribution by Portfolio and Sub-portfolio

Portfolio	Sub-Portfolio	Committed funds $US
Community Development	Potable Water	3,701,808
	Education	3,468,737
	Sanitation	2,455,774
	Community Infrastructure	1,953,819
	Health	889,860
	Institutional Strengthening	400,829
	Training and Human Development	341,716
	Various	179,921
	Environment	152,000
Community Development		**13,544,464**
Economic Development	Agriculture	1,792,027
	Processing	745,511
	Technical Training	690,733
	Transportation Infrastructure	822,440
	Animal Husbandry	820,874
	Poultry Production	221,000
	Services	152,281
	Tourism	191,344
	Productive Infrastructure	203,314
	Various	182,583
Economic Development Total		**5,822,107**
Total general		**19,366,571**

The ICDF has committed 70 percent of resources for the community development portfolio to potable water, education, sanitation, health and community infrastructure projects. This distribution of resources is consistent with the goal of reducing structural poverty in the target regions. The resources committed for economic development projects represent 30 percent of the total committed funds. Activities that promote new agricultural activities, including stevia, palm heart, coffee and plantain production, are especially significant in contributing to the goal of a diversified and sustainable economy in the two target regions.

ANNEX II. Success Stories

For the First Time in the History of La Asunta, Fresh Local Eggs Are Sold Daily

Julio Zambrana in his henhouse.

The Integrated Community Development Fund (ICDF), a program funded by USAID, coordinated with the Plurinational State of Bolivia and implemented by ACDI/VOCA, supports 24 different microenterprises in the municipality of La Asunta with the objective of improving and diversifying the local economy. Mr. Julio Zambrana is one of La Asunta's most successful up and coming small business owners. He is the dedicated owner of an egg farm that is home to 500 hens that provide the area with over 400 fresh eggs daily.

"At first, I didn't think to have an egg farm on this piece of land; I wanted a little farmhouse where I could raise a few different animals- some chickens, a few pigs…" relates Mr. Zambrana. "But when the opportunity to work with ACDI/VOCA presented itself, I didn't think twice!"

"I waited quite a while for the first egg to be laid," Mr. Zambrana continues, affectionately stroking one of his hens. "First I had to complete several courses, including one course that I traveled to Cochabamba for," he says quite proudly. "At the end of February [of 2009], the infrastructure was completed and the hens arrived. First I had to feed them and care for them. We waited a long time until finally, on the beginning of July, the first egg came and we were very happy. By mid-July, production levels rose to fifty percent and by the beginning of August, production was at 97 percent, which means that on average, almost all of the hens are laying one egg per day each!"

In addition to providing Julio Zambrana and his family a stable and reliable source of income, the egg farm supplies the population of La Asunta with a healthy, ecological and fresh source of nutrition. Not so long ago, the people of La Asunta consumed eggs that arrived from as far away as Cochabamba and Santa Cruz. During the rainy season, it is common for certain food products such as eggs, chicken and beef to be scarce; if they arrive at all, their quality has been compromised by the long trip. Now, for the first time, the people of La Asunta can enjoy fresh eggs daily.

"There's plenty of business, I can't complain about that. Sometimes I'll start out with more than 400 eggs in the morning and by the afternoon I've sold all of them. Some people don't believe me but I tell them that I take care of the hens on my own farm. They don't believe me, but then they come and tell me that the eggs are very fresh and tasty, that they have a special flavor, that they're different from the eggs that come from the city. My eggs are very delicious and natural. I give the hens banana and potato leaf to supplement their feed," he relates with a smile, sharing his secret.

Before setting up his egg farm, Mr. Zambrana worked in the fields. But he says he doesn't miss that type of work. "Working on my egg farm is much lighter work compared to working in the

field. I just have to come to check on the hens, keep everything clean, give them food and collect the eggs."

Mr. Zambrana with his 500 laying hens.

Right now, Mr. Zambrana is looking into the possibility of expanding his business. "This project with USAID has helped me to have a vision. Now I know how to manage an egg farm; I've learned a lot and now I would like to have as many as 1,000 hens because I wouldn't have to spend too much more time, but I would obviously earn a great deal more. I've presented the idea to the bank. I have to go back with two co-signers and then I can take out a loan for up to $10,000 to build a second henhouse. Right now I sell the eggs for 70 cents [about US$0.10] each on average, but if I can produce more eggs, I can lower the price and be that much more competitive in the market. One advantage I have is that I produce and sell the eggs myself, while those bringing in eggs from the city have to pay the intermediary. I can work directly with the consumer," explains Mr. Zambrana.

Everything suggests that Mr. Zambrana's business will continue being one of the ICDF's model microenterprises. Thanks to his hard work, he's made the most of the knowledge and support offered by the ICDF, and is empowered to expand his business. His egg farm has increased his family income, satisfies a local demand with an ecological product, is sustainable and contributes to food security in the region of La Asunta. Mr. Zambrana's is one of more than 50 farms that have received ICDF support in the Yungas of La Paz. On average, these farms generate 8,775 Bolivianos (US$1,241) in monthly sales.

Human Development and Youth Leadership in the Yungas of La Paz: Helping the Leaders of Tomorrow Develop Goals Today

María Inés Choque, left, and Yovana Choque, right, both Palos Blancos High School students and participants in the Human Development and Leadership workshop.

"This workshop has been very useful for all of us; it's taught us a lot that we can take with us throughout our lives. [The workshop facilitator] talked to us about real issues, he gave us advice about how to be a good leader in the future and present as well," relates María Inés Choque, senior class president at Palos Blancos High School. Her classmate and best friend, Yovana Choque, adds, "As members of the graduating class, we're heading out into the world, and many of us have made the decision to move forward and be leaders in our families, in society and our school, and the workshop offered us a lot of tools in that respect."

María Inés and Yovana are two of the 613 students that participated in workshops as part of the project, "Human Development and Youth Leadership in the Yungas of La Paz." This project was implemented in 19 different high schools in seven different Yungas municipalities (Coroico, Coripata, Palos Blancos, Chulumani, Irupana, Yanacachi and La Asunta) during 2009. Additionally, in order to ensure the sustainability of the project, 116 teachers, principals and municipal board of education authorities participated in a "train-the-trainer" course. "Human Development and Youth Leadership in the Yungas of La Paz" is just one of many community development projects implemented by the Integrated Community Development Fund (ICDF). The ICDF is funded by USAID/Bolivia and implemented in close coordination with the Plurinational State of Bolivia by ACDI/VOCA.

In each high school, groups of 25 high school seniors attended eight hours of workshop classes a day for three days. Though the workshop schedule might appear a bit intense, Yovana insists, "Far from being tiring, those eight hours were very productive for us." The young woman continues, "For example, we made and performed a little play where we talked about leadership, about the different types of leaders. And we decided that the leader who is always consulting the people is the most important, because everyone gets to be part of the decision-making, not only him."

Covering diverse sub-topics such as the environment, gender equality, and choosing a vocation, the workshops were designed to build leadership skills and help orient those who are about to graduate from high school to establish goals for their adult lives. Self-esteem became an important theme. María Inés explains that she learned that, "If we want to achieve, first we have to value ourselves and raise our own self-esteem" Yovana continues, "We looked at our own realities and compared them with what is happening in Bolivia. We looked at how there are people that don't value themselves, for example, because they have dark skin. The workshop

helped a lot of us to realize that just because you're from the country doesn't mean that you can't do what other people can. We're all equal; as people we all have the same tools to succeed."

The two young women emphasize that the workshop showed them that success is possible if one plans well and sets personal goals. According to María Inés, "The courses taught us how to be a winner in life, how to have and devise goals and to have a purpose." When asked about her plans for the future, Yovana replies confidently:

> "Like I learned in the workshop, to triumph in life you have to dream big, and that is what I, personally, am doing. Anything is possible: if you believe that you are capable, you can achieve it. What I want is to be a journalist. I like to discuss, to ask questions. What I learned in the workshop is that I should do what I really enjoy, because if you work in something you don't like, you're not going to succeed. And I see journalism as something I could really enjoy doing."

Like many of their public high school classmates, María Inés and Yovana will be the first in their families to attend university. These young people recognize the sacrifices their parents have made in sending them to school so that they could have more opportunities to study and advance in life. In the case of many students, this reality motivates them to continue their studies and build a better life for themselves, "a better life in every sense of the word," as María Inés notes.

Yungas teachers and principals are trained to facilitate the "Human Development and Leadership" course.

The participating students expressed their gratitude to USAID for the opportunity to take part in the workshop that they claim motivated them to search out the future they always wanted. Yovana confides, "Before these workshops, I lived in a world where I couldn't realize my dreams." Armed with the confidence the human development and leadership workshops helped to inspire in them, the participants will soon have their chance to build the lives they want when they graduate in December.

USAID supports community development and economic development projects in the Yungas of La Paz through the ICDF. These activities form part of USAID's contribution to the Plurinational State of Bolivia's *Plan Nacional de Desarrollo con Coca* (PNDC) or National Development Plan with Coca.

Fico's Chicken Farm: a Business That Grows

Ms. Quispe examines and feeds her chicks.

The Integrated Community Development Fund (ICDF), a program funded by USAID, coordinated with the Plurinational State of Bolivia and implemented by ACDI/VOCA, supports more than 20 different microenterprises in the municipality of La Asunta with the objective of improving and diversifying the local economy. Zenobia Quispe, a young mother of six, is the proud co-owner of the ICDF-assisted Fico's Poultry Farm.

"I've raised chickens in the past. At times I had as many as 100 and I made some income from it", relates Ms. Quispe. "But I didn't make enough to be able to stop working in the fields as well, and I prefer to be able to stay close to my children, because they are still quite little," she explains.

The chicken farm that Ms. Quispe runs with her husband, Federico Mamani, is equipped with two chicken houses. They had already begun building the first infrastructure themselves when they received word that they could apply for a grant to support a microenterprise project through the ICDF. They continued work on the first house, and responded to the ICDF request for proposals in order to receive assistance to establish the second one. "The only thing left to do is lay the cement in the other chicken house, and we're working with the ICDF agronomist on a production plan. We start with the smallest chickens in one of the houses and when they grow a bit we'll move them to the other one, and then bring in more small ones, so that we always have different sized chickens that are ready to sell in different groupings," explains an enthusiastic Ms. Quispe.

"I'm already looking forward to Carnaval, which is when these chicks will be full grown and we will have lots of sales. And after that comes Holy Week, when there is always a good demand for fresh chicken around here. Usually people have to buy chicken brought in from Cochabamba or even Santa Cruz, and it never arrives very fresh because of the journey."

Ms. Quispe outside the chicken house built and equipped with ICDF assistance.

Ms. Quispe, who is in charge of the poultry farm full time while her husband works in the fields, explains that the support offered by the ICDF consisted in trainings and technical assistance in addition to the construction and equipping of the chicken house: "We took courses…not only in how to raise chickens, but also on how to manage a business. I learned a lot from that, and we're going to do even better than what we expected." Before saying goodbye, she says with a smile, "Come back right before Carnaval to see how the chickens have grown!"

Chicken farms like Ms. Quispe's can produce up to six cycles of 500 chickens per year. In La Asunta, one kilogram of poultry is sold for between 13 and 15 Bolivianos (US$1.84-$2.12), which means that Ms. Quispe's family generates more than 75,000 Bolivianos (US$10,608) in sales annually. Ms. Quispe's is one of more than 18,500 Yungas of La Paz families that have benefited from the wide range of economic and community development projects implemented by the ICDF.

Discovering the Value of Honeybees in La Asunta

A honey producer in La Asunta checks on his hives.

"To work with honeybees, you have to put in time and you have to know a lot about them. The agronomists taught us all we need to know. Some of the people that signed up were afraid of the bees: 'they're going to sting me,' they said, and lost interest. But I don't have any problems; my little bees know me now and once they know you they don't sting you," tells Marcela Mamani Quispe. Ms Mamani Quispe is one of twelve associates that form the Beekeepers Association in the community of the 1 de Julio in the municipality of La Asunta.

In three different communities (1 de Julio, Pichari and Puerto Aroma) in the municipality of La Asunta, participants in beekeeping promotion activities received a joint total of 165 bee colonies, equipment and trainings. More than 140 additional colonies are ready to be turned over to 40 families in three other communities (Bolívar II, Bolívar III and Bolívar IV) in La Asunta. The beekeeping promotion project forms part of the Integrated Community Development Fund (ICDF), a program funded by USAID/Bolivia and implemented by ACDI/VOCA in coordination with the Plurinational State of Bolivia's Vice Ministry for Coca and Integrated Development.

Over the course of several months, participants attended training sessions that were guided by a Field School methodology, which combines theoretical and practical workshops. The practical workshops took place on the participants' plots, where they were able to practice and learn by working with a single beehive.

Ms. Mamani Quispe explains: "The agronomist has been with us all along the way and has taught us everything. First he gave us one box to practice on and then each family had five and now we have ten. We just harvested the honey and have done very well. I got about 30 kilograms of honey from each beehive, and there is a lot of demand. My son took the honey to the market and without any problems he sold everything in one day and for 35 Bolivianos (US$ 5) per kilogram".

Narcisco Quispe beside his beehives.

Making the most of their experience, the participants in the beekeeping community formed their own association with an average of fifteen members that produce honey and honey byproducts. Narciso Quispe, an associate from the community of Pichari, highlights that the trainings formed an integral part of his and his associates' development as beekeepers:

> "We're not going to fail because we have taken practical courses. We weren't just taught how to manage our bees; they also explained to us how to make our business profitable. We're going to see if we can harvest honey by giving the bees food during the months when there is

> usually no flowering. There is plenty of demand in La Asunta- we've done very well. We're very content with the trainings and technical assistance we've been offered."

During the trainings, participants learned that honey is not the only product that can be harvested from their colonies. In fact, there are several interesting honey byproducts that have sales potential on the national and international market. "We have plans to harvest propolis, royal jelly and pollen for export; these products get a good price and we've already been taught how to process them," reveals Ms. Mamani Quispe. The up and coming beekeepers of La Asunta have all the tools and knowledge they need to go forward and generate needed extra income for their families.

Each producer that successfully completes ICDF field school trainings receives at least five hives. Considering that a single hive is capable of producing 70 kilograms a year, a participating family can generate annual sales worth more than 12,000 Bolivianos (US$1,697). The ICDF offers technical training and assistance as part of all the economic and community development projects that it implements. The ICDF supports more than 10 groups of beekeepers in the Yungas of La Paz.

A Health Center for Sararía and Ten Neighboring Communities

Nurse Mamani in the doctor's office.

Before 2008, when the Sararía Health Center was only a health post with no delivery room and no doctor or registered nurse, women in the area gave birth at home or had to take a 45-minute taxi ride along dirt roads to get to the nearest health center. Today, the new health center is amply equipped with a doctor's office, delivery room, delivery recovery room with a private bathroom, a laboratory, small pharmacy and a dentist's office. During its first year functioning as a health center, the staff delivered more than 35 babies.

Sararía is located on the border of the municipalities of Palos Blancos and Caranavi in the Yungas of La Paz. Due mostly to the thriving production of papaya, rice and cocoa, the area has a growing population of over 2,000 people. Community leaders and other stakeholders as well as the municipal government prioritized the construction of the health center. In addition to being an unsatisfied community need, building a health center was important due to the fact that the old health post had structural problems that constituted a risk for patients and staff alike.

In 2007, the construction and equipping of a new health center in Sararía was initiated by the Integrated Community Development Fund (ICDF), a program funded by USAID/Bolivia, coordinated with the Plurinational State of Bolivia and implemented by ACDI/VOCA. Due to the extremely poor condition of the old health post, the decision was made to construct and equip an entirely new building. In 2008, the new health center was opened and is currently run by one primary care physician and a full-time registered nurse. Nurse Ester Mamani informs that the Sararía Health Center serves 11 communities. As well as having set operating hours and offering 24 hour emergency medical attention, the center also opens its doors Sundays in order to, "receive the people that come down from their *pueblos* to be seen by the doctor."

Nurse Mamani heading towards the delivery room.

Due to the new and pre-existing healthcare programs covered by the national government, the Sararía Health Center treats its fair share of patients. Nurse Mamani explains that, thanks to the Universal Maternal and Infant Health Insurance (*Seguro Universal Materno Infantil* in Spanish, SUMI) and the Juana Azurduy Subsidy, pregnant and nursing women visit the health center for their prenatal and post-partum check-ups and bring in their children less than two years of age. The center also offers vaccinations and is preparing a small campaign to encourage the elderly population to take advantage of the government-sponsored Senior Citizen Health Insurance program (*Seguro de Salud para el Adulto Mayor* in Spanish, SSPAM). Ms. Mamani explains, "Now we're going to be working a lot with the older members of the community. They have to go get registered with the municipal government in Caranavi and then they can come and get their medical attention free of charge, and their medications as well."

Additionally, the health center provides trainings on various themes like sexual health and family planning, tuberculosis, malaria and other tropical disease prevention. From the many informative and educational posters that decorate the walls, one can see that the nurse and doctor in charge are highly attentive to the community's needs, and greatly value education and prevention. According to the nurse, their work over the past year has paid off:

> "At first, people weren't used to having a health center. They didn't understand that there are set hours of operation and that, after a certain hour, they should only come if it's a real emergency. Or in the case of expecting mothers, they would come when they were already going into labor. But now we're seeing more women coming to all their prenatal checkups, which is so much better."

A new mother who had come with her partner and newborn assured that she was well cared for during her stay in the maternity ward just two weeks before. Her partner comments, "The room is very modern and clean, and also private; for that we're happy and thankful."

Building a Successful Small Business: A Carpenter's Shop in La Asunta

Andrés and Isabel in their carpentry shop.

Inside his centrally located carpentry shop in the young and rapidly growing Yungas town of La Asunta, Andres Callancho shows off his workmanship: night tables, dressers, bookshelves and bureaus. "I started this business from nothing," explains the young carpenter. "I always wanted to work as a carpenter but couldn't find a way. Then, in December 2007, USAID and ACDI/VOCA presented me with the opportunity to make my dream a reality."

The Integrated Community Development Fund (ICDF) is financed by USAID/Bolivia, coordinated with the Plurinational State of Bolivia and implemented by ACDI/VOCA in Bolivia. Within its economic development portfolio, the ICDF supports more than 150 small businesses initiatives in the Yungas of La Paz region, including 25 in the municipality of La Asunta. In 2007, the ICDF invited community members to develop and present business plans for a microenterprise assistance project. Thanks to Andres' efforts and the fact that there was an unsatisfied need for carpentry work in the zone, his microenterprise was one of the 25 awarded grants by the ICDF. Thanks to Mr. Callancho's carpentry shop, which is the only one in the town of La Asunta that makes furniture in addition to windows and doors, community members don't have to have furniture brought in from La Paz or other cities. Andrés and his two employees spend their days making a variety of furniture items, in addition to windows and doors.

An employee at work in the shop.

Andrés explains, "The ICDF's support consisted of the construction of the workshop, the machines and training. The members of the ICDF team are always visiting me and helping me along. And I put in a cost-share for the project as well." All small business owners that receive ICDF support commit to providing a cash cost-share worth 35 percent of the project's total value.

Isabel, Andres' wife, says that she is very happy with the carpentry shop: "Before, I had to go work in the fields. I have two young children and my plots were very far away. So I couldn't be with the little ones; I would have to leave them for two or three weeks at a time, especially during the rainy season. Now I tend to the shop selling the furniture. I'm so happy because I can work and be with my children at the same time."

Since there has been a steady demand for his products, Andres has hired employees, which means the income generated by his business is benefiting additional families. He realizes that carpentry work requires practice and dedication. "This business is going to get bigger little by little. You have to spend money to make money, buy more materials, invest your time as well and find clients. But in the long run, it's going to grow a lot. It's a business with a future," assures Andrés. This carpenter's shop is one of eight supported by the ICDF in the Yungas.
