PREFACE

The 2007 edition of *Latin America and the Caribbean: Selected Economic and Social Data* (the LAC Databook) includes the most recent data at the time of publication from a multitude of official country sources and leading international institutions. The Bureau for Latin America and the Caribbean of the U.S. Agency for International Development presents this databook with the goal of gathering and presenting the most up-to-date information possible from numerous reliable sources. Data tables provide statistics useful for regional analysis, and summary charts are presented throughout the book. The presentation of many of the tables and figures in the LAC Databook allows for comparisons to be made across both countries and time. If interpreted with care, the data in this publication can present a useful picture of the state and progress of socioeconomic development in Latin America and the Caribbean.

The public can access and query the database that underlies the LAC Databook on the Internet at http://qesdb.usaid.gov/lac. Whereas the LAC Databook is a publication that is produced annually, the information presented in it is drawn from a publicly available database that is continuously updated. A link to the online database is provided on the USAID website. From www.usaid.gov, select "Latin America and the Caribbean" under the "Locations" heading. Then select "Economic and Social Database" in the sidebar at the top right of the page. At the LAC Databook's website, users can construct their own data tables that can be viewed in html, and saved in spreadsheet, and text formats. Users can also download PDF copies of this print edition. Like this print publication, the online database is organized by sector.

This publication benefits from the contributions of several individuals. Barbara Rippel contributed to the chapters on international trade. Charisse Adamson provided contributions to Chapter One. Jennifer Powell, Andrew Batchelor, Kimberly Smith, Sarah Lane, and John Gold updated data source files. Ramsay Teviotdale assisted with publication. Frank Martin, Team Leader of Economic Analysis and Data Services, was responsible for final review and editing.

The LAC Bureau welcomes comments and suggestions about the contents and format of this book. Please direct correspondence to:

Note on Statistics in the LAC Databook

Table Format

Tables are numbered by section and display the table name and data unit when appropriate. For most tables, countries are listed alphabetically within the appropriate sub-region of Latin America and the Caribbean (i.e. Caribbean, Central America, and South America). Sub-regional headings, as well as totals and averages are listed below each list of corresponding counties. Note that several countries located in Central and South America (Belize, Guyana, Falkland Islands, French Guiana, and Suriname) have been placed in the Caribbean sub-region for the purposes of this analysis. An explanation of the geographic breakdown employed in the 2007 LAC Databook follows.

Rationale for LAC Geographic Breakdown

The LAC Bureau's rationale for placing Belize, Guyana, Suriname, and French Guiana in the Caribbean sub-region is based not on geography but on economics (trade relations), politics (international relations), and culture (European heritage). Belize, Guyana, and Suriname define themselves as Caribbean as they are members of CARICOM (the Caribbean Community). Belize and Guyana also share membership in CARICOM with ten other ex-British colonies in the Caribbean/Atlantic area. Suriname and French Guiana are politically related to The Netherlands and France, respectively, as are a number of islands in the Caribbean. Guyana, Suriname, and French Guiana are oriented more to Europe and to the Caribbean—economically, politically, and culturally—than to the ten South American countries whose European heritage lies in the Iberian peninsula. Similarly, Belize is oriented more to the Caribbean region and to Europe than to the other six countries of Central America.

The same rationale applies to the Falkland Islands, which are remote from the Caribbean, but oriented much more toward Europe than to South America.

Data Standards and Methodology

The 2007 edition of the LAC Databook, like earlier editions, relies on national estimates reported by U.S. and foreign government agencies, and internationally recognized organizations. As such, the veracity of this report depends on the standardization and consistency of data produced by these offices.

Even when standardized international sources are used, a number of problems remain for any user of statistical data. Despite the considerable efforts to collect, process, and disseminate social and economic statistics and to standardize definitions and data collection methods, limitations remain in the coverage, consistency and comparability of data across time and countries. Also, significant shifts and breaks in statistical series can occur when statistical bodies and research institutions update or alter their estimates using new sources of data, such as censuses and surveys. Discrepancies in data presented in different editions of the LAC Databook reflect updates by countries as well as revisions to historical series and changes in methodology. Thus readers are advised to compare data series between editions of the LAC Databook with caution.

Series Duplication

The LAC Databook functions as a survey of the most current, reliable statistics on the state of development in Latin America and the Caribbean. As such, in some instances, the same indicator is presented more than once, using different sources. This is the case for the population, poverty, and gross domestic product series and for many of the regional comparison indicators as well. This method, along with detailed technical notes for each indicator, allows readers to choose what they consider to be the most accurate data set based on source, definition, and methodology, and the purpose for which they are seeking the data.

Conventions

As used in this publication, the term "country" does not in all cases refer to a territorial state entity as understood by international law and practice; the term also covers some non-sovereign territorial entities for which statistical data are maintained and provided internationally on a separate and independent basis.

Unless otherwise stated, all dollar amounts are expressed as current U.S. dollars.

Millions and billions of U.S. dollars are represented by US$m and US$b, respectively. Millions and billions are represented by "m." and "b." respectively.

Due to space limitations some figures are not represented in their full form. In these cases, the respective column heading will include a notation (in parentheses) indicating the number of zeros that follow the number in question.

Acronyms

DAC	Development Assistance Committee

1 Overview

OVERVIEW

The Bureau for Latin America and the Caribbean of the U.S. Agency for International Development presents *Latin America and the Caribbean: Selected Economic and Social Data 2007* for the purpose of informing development practitioners, students, and member countries as they analyze the state and progress of the region's development. Drawing from a wide range of governmental and international sources, this annual compilation provides its users a single reference that contains over 250 statistics on the economy, poverty trends, governance, social sectors, and foreign assistance received.

Although the economy of Latin America and the Caribbean has increased by 19.8% since 2002, its economic performance continues to lag behind that of other regions in the world. The statistics presented in the LAC Databook show that despite continued growth of per capita GDP in 2006, unevenness and inequality continue to characterize the region's growth and development. Much of the higher economic growth has been concentrated in those countries, such as Venezuela and Chile, that have been able to benefit directly from growing global demand for basic goods and natural resources.

The growth in world demand for commodities—oil, sugar, minerals, etc.—coincided with the region's rising terms of trade to lead to greater inflows of foreign exchange. Consequently, national incomes and government revenues grew. This allowed some countries to restructure their foreign debt and reduce, to an extent, their vulnerability to external macroeconomic shocks. However, it is important to note that debt stocks in the region still remain considerably large. The rise in government revenues led to fiscal surpluses that enticed greater public expenditures. Inflation has remained low and fallen in several countries, indicating moderated macroeconomic volatility. The current economic situation has therefore opened a window of opportunity for some countries to reinforce their ability to weather future macroeconomic crises and to alleviate poverty and social, economic, and democratic inequality.

Though the region's economic situation has improved recently, uneven economic progress and persistently weak political and governance institutions are undermining the ability of governments to deliver services and stimulate economic growth that can be shared broadly by citizens. Frustration with government's ability to deliver on democracy in an open, transparent, and accountable manner is eroding citizen trust in government. While the LAC region in aggregate has demonstrated improvement in various dimensions of governance, such as government effectiveness, statistical indicators of political stability and rule of law have lost ground from previous years. While improving, control of corruption in the region lags other indicators of economic and democratic freedom, leaving corruption a significant inhibitor of economic and social progress in the region. Data in this book also reveals that political and civil freedoms are perceived the highest in the Caribbean compared to the rest of the region while a mixed track record is evident in Central America.

A mixed record is also apparent in the delivery of quality education in the region. For example, there is a large degree of divergence between countries on girls' primary education. The average LAC country has improved the percentage of girls completing primary school by 2.2 percent since 1999; however, several countries—mostly in Central America—have seen a drop in completion rates. In South America there is a downward trend in female enrollment at the secondary and tertiary levels that is in contrast to trends in Central America and the Caribbean. In addition, girls continue to represent less than half of primary school enrollment in almost every LAC country.

Wide disparities also exist in the health care systems within the region. Fifty percent of healthcare expenditures in most LAC countries are paid privately. As a result of persistent poverty and limited public resources used to finance health care systems, major gaps in access to public services and the quality of care continue to characterize LAC countries. For example, Bolivia is able to immunize only 64% of its children. Almost two million adults and children in the region are living with AIDS, and the HIV prevalence rate in the Caribbean continues to be far above the rest of the LAC region. According to the Organization for Economic Cooperation and Development, multilateral and bilateral donors have provided the region with over $3 billion in health related assistance since 1999. Despite this foreign assistance, challenges still exist in the region's health care sector.

Total official assistance to the region has amounted to over $50 billion since 1999, $7.9 billion of which has gone toward debt restructuring, forgiveness, and relief. The United States since 2003 continues to be the top official donor to the LAC region. However, official foreign assistance continues to be overshadowed by private foreign investment, which grew more than 12% to over $70 billion in 2005. Foreign direct investment has recently increased in most of the region's countries but it remains below the peak set in 1999. Of all private investment originating from the United States, an increasing share now flows to LAC as income earned by U.S. investments in the region also has risen.

Sources and Technical Notes – Overview

Figures

Real GDP Growth

Source International Monetary Fund (IMF), *World Economic Outlook,* April, 2007.

For detailed tables, see Chapter 7.

Foreign Direct Investment

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

For detailed tables of foreign investment in LAC, see Chapter 10.

Geographic Composition of LAC Exports and Imports
and
Total Exports and Imports

Source IMF, *Direction of Trade Statistics* CD-ROM, September, 2007.

Note Representations of China only include mainland China (P.R.C.).

For detailed tables of LAC trade data, see Chapters 8 and 9.

Inflation

Source IMF, *World Economic Outlook,* April, 2007.

For detailed tables, see Chapter 7.

Total Debt and Service Payments

Source IMF, *World Economic Outlook,* April, 2007.

For detailed tables, see Chapter 7.

Table 1.1

Regional Economic Indicators

Sources Population: US Bureau of the Census, International Database, (online) as of March, 2007, Washington, DC. Macroeconomic data: IMF, *World Economic Outlook,* April, 2007. Investment data: World Bank, *World Development Indicators* (online version) as of July, 2007.; and U.S. Department of Commerce, Bureau of Economic Analysis, *US Direct Investment Abroad* (online) as of July, 2007. Merchandise Trade data: IMF, *Direction of Trade Statistics* CD-ROM, September, 2007. External debt: IMF, *World Economic Outlook,* April, 2007.

Note *GDP per capita*, *Real GDP per capita growth*, and *PPP GDP per capita growth* are calculated based on original source data. Inflation is average annual percent, not end-of-period.

Table 1.2

Profile of Human Development

Source *Human Development Report 2006*, UNDP, United Nations, New York, NY, 2006.

Definitions *Human Development Index (HDI)* Published by the UNDP, this is a measure of social and economic progress. The HDI is based on three indicators: longevity, as measured by life expectancy at birth; educational attainment, as measured by a combination of adult literacy (two-thirds weight) and the combined first-, second-, and third-level gross enrollment ratio (one-third weight); and standard of living, as measured by real GDP per capita in purchasing power parity dollars (PPP$). *HDI Rank* Rankings are made using HDI values to the sixth decimal place. *Gender Development Index* Measures achievements in the same dimensions as the HDI but captures inequalities in achievement between men and women. The GDI is the HDI adjusted downward for gender inequality so that the greater the degree of gender disparity in human development, the lower the GDI would be relative to the HDI. Therefore, a country with a high HDI and low GDI would imply a high degree of human development, but that most of that development accrues to men more than to women. *GDP Per Capita in purchasing power parity dollars (PPP$)* The market value of total output of goods and services for final use produced by an economy, divided by its population, and converted into U.S. dollars on the basis of the purchasing power parity of its currency. The *purchasing power parity* of an economy's currency reflects the number of units of that currency required to purchase the same (or similar) representative basket of goods and services that a U.S. dollar (the reference currency) would buy in the United States. *Life Expectancy At Birth* The average number of years a person can expect to live at current levels of mortality. *Adult Literacy Rate* reflects the percentage of people aged 15 and above who can, with understanding, both read and write a short, simple statement about their everyday life. *Gross Enrollment Ratio* is the number of students enrolled in a level of education, whether or not they belong in the relevant age group for that level, as a percentage of the population in the relevant age group for that level. As such, a high ratio does not necessarily indicate a successful school system because the gross enrollment ratio includes overage and underage enrollments.

Table 1.3

Population

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition Total population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship—except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin.

Table 1.4

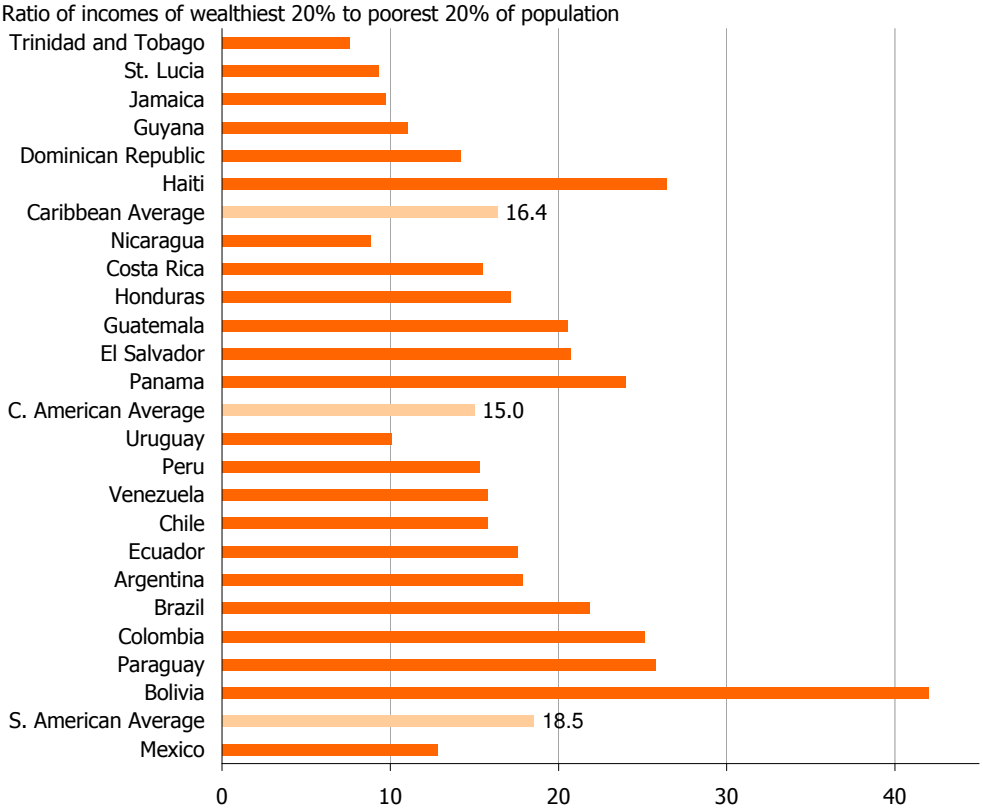
Population Growth Rate

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Notes Growth rates were calculated using the geometric mean, which is based on end-points: $[((\textit{last year}/\textit{first year})^{(1/(\textit{last year} - \textit{first year}))})-1] \times 100$. For instance, $[((2005/1990)^{(1/15)})-1] \times 100$ = average annual growth for 1990-2005.

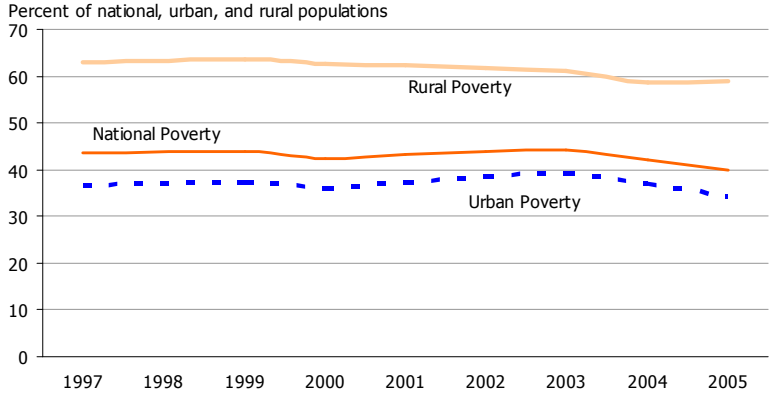
Income Inequality in LAC

Ratio of incomes of wealthiest 20% to poorest 20% of population



Poverty Trends in Latin America

Percent of national, urban, and rural populations



Income Inequality in USAID Presence Countries

Ratio of incomes of wealthiest 10% to poorest 10% of population, regional averages

Sources and Technical Notes – Poverty

Figures

Incidence of Poverty

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Notes The ratio of income by wealth group provides a method of indicating income inequality. The ratio is formulated by dividing the wealthier group's income share by the poorer group's income share. Higher ratios therefore indicate greater income inequality.

* Except for Mexico, members of the OECD are not countries in which USAID has a presence; but are provided for reference to indicate developed countries.

Poverty Over Time in Latin America

Source UN Economic Commission for Latin America and the Caribbean (ECLAC) (online version) as of April, 2007.

Table 2.1

Incidence of Poverty

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Poverty headcount, rural (% of population)* The percentage of the rural population living below the national rural poverty line. *Poverty headcount, urban (% of population)* The percentage of the urban population living below the national urban poverty line. *Poverty headcount, national (% of population)* The percentage of the population living below the national poverty line. National estimates are based on population-weighted sub-group estimates from household surveys. *Population below $1 a day (%)* The percentage of the population living on less than $1.08 a day at 1993 international prices (equivalent to $1 in 1985 prices, adjusted for purchasing power parity). Poverty rates are comparable across countries, but as a result of revisions in PPP exchange rates, they cannot be compared with poverty rates reported in previous editions for individual countries. Data showing as 2.0 signifies a poverty rate of less than 2.0 percent. *Population below $2 a day (%)* The percentage of the population living on less than $2.15 a day at 1993 international prices (equivalent to $2 in 1985 prices, adjusted for purchasing power parity). Poverty rates are comparable across countries, but as a result of revisions in PPP exchange rates, they cannot be compared with poverty rates reported in previous editions for individual countries. Data showing as 2.0 signifies a poverty rate of less than 2.0 percent. *Poverty gap at $1 a day (%)* The mean shortfall from the poverty line (counting the non-poor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. Data showing as 0.5 signifies a poverty gap of less than 0.5 percent. *Poverty gap at $2 a day (%)* The mean shortfall from the poverty line (counting the non-poor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. Data showing as 0.5 signifies a poverty gap of less than 0.5 percent.

Table 2.2

Distribution of Income or Consumption – World Bank

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Gini index* provides a convenient summary measure of the degree of inequality. It is an index that varies between 0 and 100, where 0 corresponds to absolute equality (i.e. everyone has the same income) and 100 to absolute inequality (i.e. one person has all the income, while everyone else has zero income). *Percentage share of income or consumption* is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Notes Figure depicts regional averages of the distribution of wealth described in the table. Inequality in the distribution of income is reflected in the percentage share of either income or consumption accruing to segments of the population ranked by income or consumption levels. Income and consumption data come from nationally representative household surveys. As these surveys differ in method and in the type of data collected, the distribution indicators are not strictly comparable across countries.

Table 2.3

Income Inequity - Gini Index – UN Economic Commission for Latin America and the Caribbean

Source ECLAC, *Base de Estadísticas e Indicadores Sociales* (online) as of July, 2007.

Definitions *Gini index* as noted above, measuring the distribution of household income.

Notes To maintain scale with legacy presentations, original data has been multiplied by 100 for this presentation. Figures for periods labeled 1989-92 and 1993-96 represent the most recent year reported for each representative period.

Table 2.4

Nutritional Poverty

Source ECLAC, *Base de Estadísticas e Indicadores Sociales* (online) as of July, 2007.

Notes Regional average for LAC is reported per the original source. Sub-regional averages are calculated as unweighted averages of respective countries. The per capita dietary energy supply used corresponds to a three-year rather than annual average in order to even out the effect of errors in the annual food stocks data that are used. Furthermore, only household survey data grouped by income/expenditure classes are used, thus removing the effect of seasonal and other short-term variations that the household level data are subject to. As a consequence, estimates refer to the average condition during the given three-year period, and the effects of seasonal and other short-term variations in food availability are not considered.

Sources and Technical Notes - Health

Figures

Prevalence of Undernourishment

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition Population below minimum level of dietary energy consumption (also referred to as *prevalence of undernourishment*) shows the percentage of the population whose food intake is insufficient to meet dietary energy requirements continuously.

Notes Regional groupings are un-weighted averages.

Health Expenditures

Source World Bank, *World Development Indicators* (online version) as of as of July, 2007.

Definitions *Public health expenditures* consist of recurrent and capital spending from government (central and local) budgets, external borrowings and grants (including donations from international agencies and nongovernmental organizations), and social (or compulsory) health insurance funds. *Private health expenditures* include direct household (out-of-pocket) spending, private insurance, charitable donations, and direct service payments by private corporations.

Note Regional groupings are quoted from source.

Table 3.1

Infant Mortality Rate

Source U.S. Bureau of the Census, International Database, (online) as of March 2007, Washington, DC.

Definition *Infant mortality rate* the probability of dying between birth and one year of age. It is expressed as the number of deaths under one year of age per 1,000 live births per annum.

Table 3.2

Mortality Rates

Source U.S. Bureau of the Census, International Database, (online) as of March 2007, Washington, DC.

Definitions Probabilities are expressed as a rate per 1,000. *Under-5 mortality rate* the probability that a newborn baby will die before reaching age five if subject to current age-specific mortality rates. *Under-14 mortality rate* the probability of a child dying between the ages of 5 and 14 years.

Table 3.3

Life Expectancy at Birth

Source U.S. Bureau of the Census, International Database, (online) as of March 2007, Washington, DC.

Definition *Life expectancy at birth* is the average number of years a person can expect to live at current levels of mortality.

Table 3.4

Reproductive Health

Sources US Bureau of the Census, International Database, (online) as of March 2007, Washington, DC; and, Population Reference Bureau, *Women of Our World 2005*.

Definitions *Total fertility rate* is the average number of children a woman would bear in her lifetime at current age-specific fertility rates. Age specific fertility rates are expressed as children per 1,000 women in each group. *Lifetime risk of maternal death* is the probability that a woman will die during her lifetime from causes related to pregnancy and delivery. The measure combines the probability of becoming pregnant and the risk of death from each pregnancy (as measured by the 2000 maternal mortality ratio).

Table 3.5

Disease Prevention

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions Immunization rates are the percentage of children aged 12-23 months who received respective vaccinations before one year of age. Children are considered to have received adequate *Measles immunization* after receiving one dose of vaccine; and *DPT immunization* (diphtheria, pertussis [or whooping cough], and tetanus) is considered adequate after three doses of vaccine.

Note Figures depict the minimum immunization rates (i.e., poorest performers), the average rates, and the maximum rates (i.e., best performers) for each year among all countries reported in the data table. E.g., Examining Measles Immunization in 1985 shows the poorest performance was 21%, 61% was the average, and the highest immunization rate was 93%. In 1995, the minimum was 49%, the average was 87%, and the maximum was 99%.

Tables 3.6 - 3.7

HIV/AIDS Prevalence

Sources United Nations Joint Program on HIV/AIDS (UNAIDS) and the World Health Organization (WHO), *Report on the Global HIV/AIDS Epidemic 2006*.

Definitions *AIDS deaths Adults & Children* is the estimated number of adults and children who died of AIDS. Owing to under-reporting of deaths, these case fatality rates are lower than the true values. *Reported cumulative cases Adults & Children* is the total number of AIDS cases in adults and children officially reported by the country since the beginning of the epidemic. D*eaths, children estimated range* is the estimated number of children (under age 15) who died of AIDS. Depending upon the reliability of the data available, there may be more or less uncertainty surrounding each estimate. Therefore, both low and high estimates are presented. The wider the range between the low and the high, the greater the uncertainty surrounding the country's estimates, which in turn depends mainly on the quality, coverage and consistency of the country's surveillance system. *AIDS orphans* is the estimated number of children aged 0-14, as of end 2001, who have lost one or both parents to AIDS. *Estimated number of people living with HIV/AIDS* include all people with HIV infection, whether or not they have developed symptoms of AIDS, alive at the end of 1997 and 2003. *Adults (15-49)* is the estimated number of adults living with HIV/AIDS includes all people with HIV infection, whether or not they have developed symptoms of AIDS, that are alive at the end of the year of reporting. *Adult rate* is the estimated number of adults living with HIV/AIDS divided by the adult population. *Women (15-49)* is the estimated number of women (aged 15-49) living with HIV/AIDS. *Children* is the estimated number of children (under age 15) living with HIV/AIDS.

Notes Figure depicts the average prevalence rate of HIV/AIDS among the regions within LAC , which are displayed in table. The global HIV epidemic currently involves two viruses: *HIV-1 and HIV-2*. Data in this table refer to both viruses. HIV-1 is the dominant type worldwide. HIV-2 is found principally in West Africa, but cases have been reported in East Africa, Europe, Asia, and Latin America. While the means of transmission for the two viruses are the same, HIV-2 appears to be less easily transmitted than HIV-1 and the progression from HIV-2 infection to AIDS appears to be slower than that for HIV-1. *AIDS* is a late-stage infection characterized by a severely weakened immune system that can no longer ward off life-threatening infections and cancers.

Sources and Technical Notes – Education

Figure

Female Secondary & Tertiary Enrollment Rates

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition *Gross enrollment ratio* is the ratio of total enrollment, regardless of age, to the population of the age group that officially corresponds to the level of education shown. *Tertiary education*, whether or not to an advanced research qualification, normally requires, as a minimum condition of admission, the successful completion of education at the secondary level.

Improvement in Female Primary Completion Rate

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Note All countries' current female completion rates are compared to the LAC region's average completion rate in 1999. All countries are compared using the latest available data, which is 2005, except for the following: [1] 2001, [2] 2004.

Table 4.1

Literacy

Sources *Adult Literacy Rates:* UN, *Human Development Report 2006. Youth Literacy Rates*: UNESCO through the USAID *Global Education Database* (Online version) as of June, 2007. *Ratio of Young Literate Females to Males*: World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition *Adult literacy rate* is the percentage of people aged 15 and above who are literate. *Youth literacy rate* reflects the percent of people between the ages of 15 and 25 who are literate. Survey year indicates the year the data was collected. *Ratio of young literate females to males* indicates the ratio of young literate females to males ages 15-24 who can, with understanding, read and write a short, simple statement on their everyday life; expressed as a percentage.

Note The definition of literacy varies by country.

Table 4.2

Public Expenditure on Education

Source *Total Expenditures (% of GDP):* UNESCO through the USAID *Global Education Database* (online version). *Public expenditure (% of Total Government Expenditure):* UN Economic Commission for Latin America and the Caribbean (ECLAC) (online version) as of April, 2007. *Total Expenditure per Pupil:* UNESCO through the USAID *Global Education Database* (Online version) as of June, 2007.

Definitions *Education Expenditure* is defined as expenditure on the provision, management, inspection and support of pre-primary, primary and secondary schools; universities and colleges; vocational, technical and other training institutions; and general administration and subsidiary services.

Note Figure depicts the percentage growth rate from 2000 to 2004 of both public expenditure as a percent of GDP and per pupil spending as a percent of per capita GDP. The asterisk denotes the percentage change is calculated from 2000 to 2003. Uruguay experienced 0% growth in public expenditure in the indicated period.

Table 4.3

Gross and Net Enrollment Ratios

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Gross enrollment ratio* is the number of students enrolled in a level of education, whether or not they belong in the relevant age group for that level, as a percentage of the population in the relevant age group for that level. *Net enrollment* is the number of students enrolled in a level of education who belong in the relevant age group, as a percentage of the population in that age group.

Estimates are based on World Bank's classification of education levels, as follows. *Preprimary* provides education for children not old enough to enter school at the primary level. *Primary* provides the basic elements of education at elementary or primary schools. *Secondary* provides general or specialized instruction at middle, secondary, or high schools, teacher training schools, and vocational or technical schools. This level of education is based on at least four years of instruction at the primary level. *Tertiary* requires, as a minimum condition of admission, the successful completion of education at the secondary level or evidence of attainment of an equivalent level of knowledge and is provided at universities, teachers colleges, and higher-level professional schools.

Notes Net enrollment rates higher than 100% are due to inconsistencies between enrollment and population data.

Table 4.4

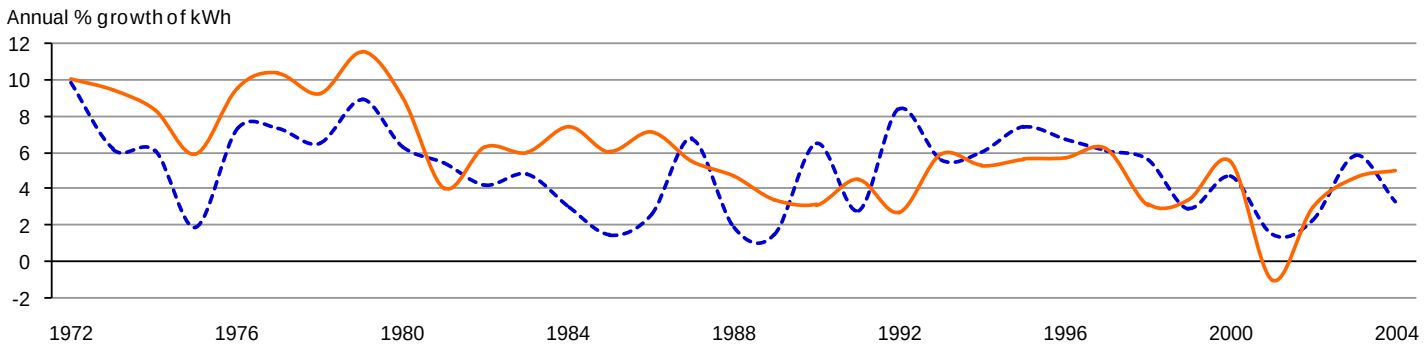
Women and Education

Source *Teachers (Primary and Secondary Education):* UNESCO through the USAID *Global Education Database* (Online version) as of June, 2007. *Pupils (Primary and Secondary Education):* World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Primary* education provides the basic elements of education at elementary or primary schools. *Secondary general education* is defined as general instruction at middle, secondary, or high schools. This level of education is based on at least four years of instruction at the primary level. *Female teachers as a percentage of total teachers* includes full-time and part-time teachers. *Female pupils as a percentage of total school age population* includes enrollments in public and private schools but may exclude specialized schools and training programs.

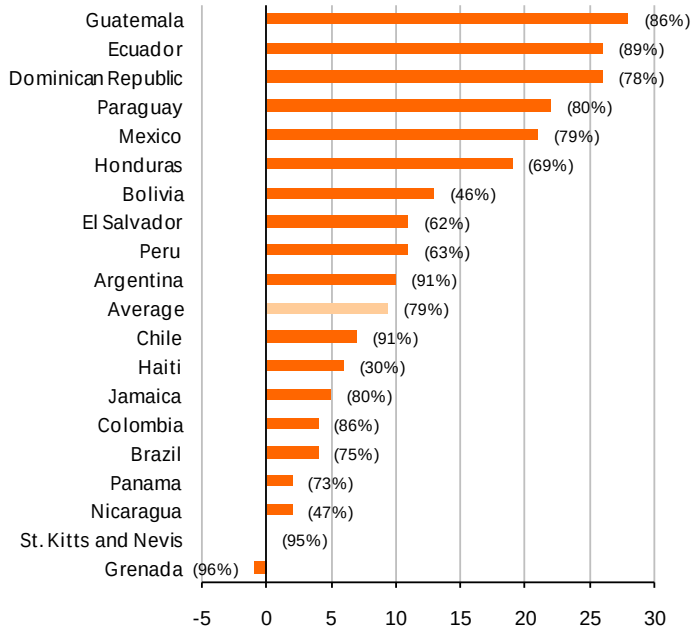
5 Environment

Electricity Production and Consumption Growth in LAC



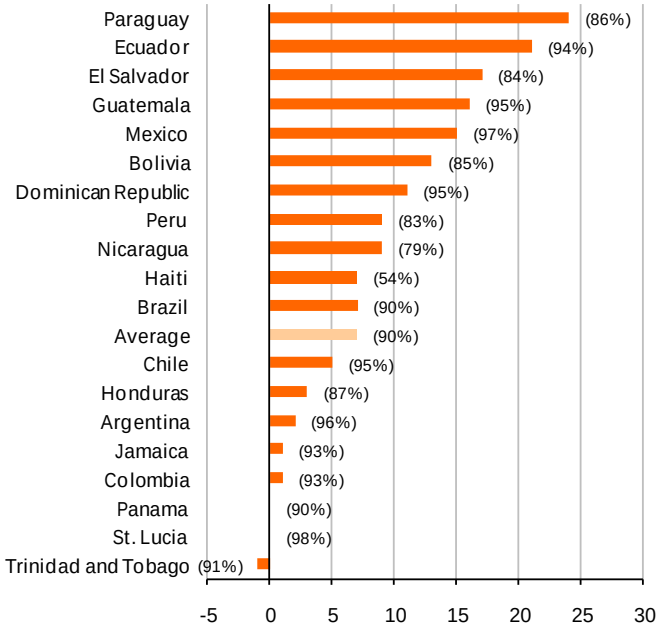
Increase in Access to Sanitation Services (and current level of access)

1990-2004 increase in population percentage with access to facilities

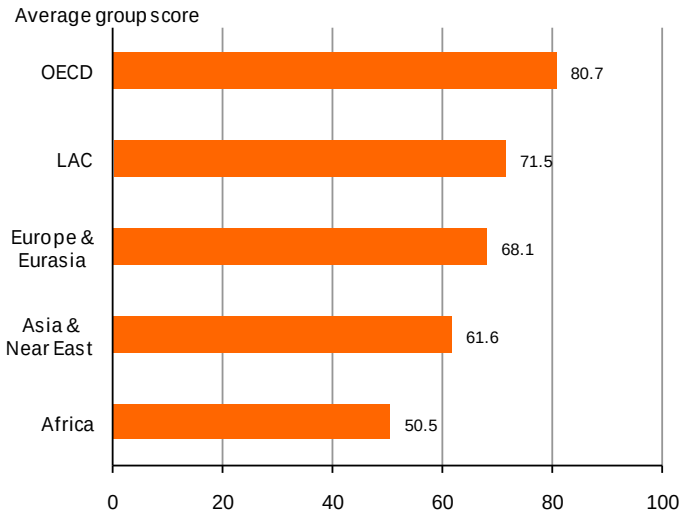


Increase in Access to Improved Water Sources (and current level of access)

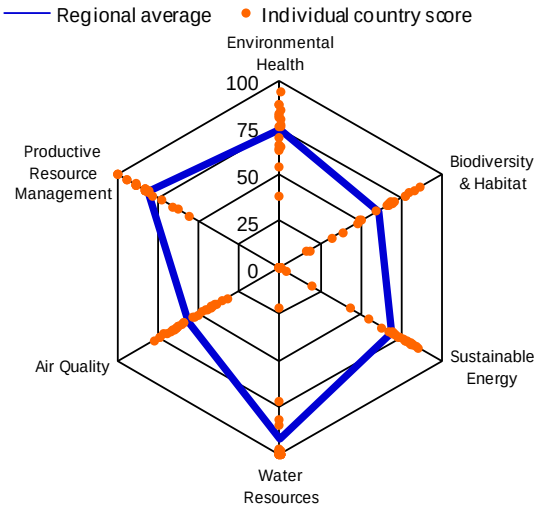
1990-2004 increase in population percentage with access to facilities



Environmental Peformance Index (2006)



Environmental Peformance in LAC (2006)



Environmental Performance scores range from 0 to 100. Higher scores are better. See technical notes at end of chapter.

Sources and Technical Notes - Environment

Figures

Electricity Production and Consumption Growth

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Electricity consumption* the annual total of Kilowatt Hours demanded per year. *Electricity production* the annual total of Kilowatt Hours indigenously produced per year.

Increase in Access to Sanitation Services and Improved Water Sources

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition *Access to sanitation services* the percentage of the population with at least adequate excreta disposal facilities (private or shared, but not public) that can effectively prevent human, animal, and insect contact with excreta. Improved facilities range from simple but protected pit latrines to flush toilets with a sewerage connection. To be effective, facilities must be correctly constructed and properly maintained. *Access to improved water sources* the percentage of the population with reasonable access to an adequate amount of water from an improved source, such as a household connection, public standpipe, borehole, protected well or spring, and rainwater collection. Unimproved sources include vendors, tanker trucks, and unprotected wells and springs. Reasonable access is defined as the availability of at least 20 liters a person a day from a source within one kilometer of the dwelling.

Environmental Performance Index (2006)

Source Esty, Daniel C., Marc A. Levy, Tanja Srebotnjak, Alexander de Sherbinin, Christine H. Kim, and Bridget Anderson (2006). *Pilot 2006 Environmental Performance Index.* New Haven: Yale Center for Environmental Law & Policy.

Definition *Environmental Performance Index* is an index centered on measuring the broad environmental protection objectives of 1) reducing environmental stresses on human health, and 2) promoting ecosystem vitality and sound natural resource management (higher is better). The index is scaled to a range of 0 to 100, so that higher numbers are better and is the average of six policy indicators, which are detailed in the figure *Environmental Performance in LAC (2006).*

Environmental Performance in LAC (2006)

Source *Ibid.*

Definition *Environmental health* is the weighted average index of child mortality, indoor air pollution, drinking water, adequate sanitation, and urban particulates. *Biodiversity and Habitat* is the weighted average index of water consumption, wilderness protection, ecoregion protection, and timber harvest rate. *Sustainable energy* is the weighted average index of energy efficiency, renewable energy, and Carbon Dioxide relative to GDP. *Water Resources* is the weighted average index of Nitrogen loading and water consumption. *Air Quality* is the weighted average index of urban particulates and regional ozone. *Productive Resource Management* is the weighted average index of timber harvest rate, agricultural subsidies, and over fishing. All indices range from 0-100 where higher is better.

Table 5.1

Threatened Species and Protected Marine Areas

Sources *Animal Species and Plant Species Threatened, Protected Marine Areas* United Nations Environmental Program (available online at http://geodata.grid.unep.ch/) as of March, 2007. *Protected Area % of Surface Area* Population Resource Bureau, *PRB 2006 World Population Data Sheet: International Migration Is Reshaping United States, Global Economy*, September 2006. *Protected Areas* World Resources Institute (online version) as of January 2007.

Definitions *Animal species threatened* and *Plant species threatened* the number of respective species listed in the IUCN Red List of Threatened Species in 2003. *Protected Marine Areas* those areas under IUCN Categories I-VI as listed in the World Conservation Monitoring Centre Protected Areas Database. The value listed is as of 2002. *Protected Areas in number and hectares* reflect data as of 2005. *Protected Area % of Surface Area* values reflect data as of 2006. It is the percentage of a country's total surface area nationally designated as protected under one of several categories designated by the World Conservation Union (IUCN). The categories are: a strict nature reserve, a wilderness area, a national park, a natural monument, a habitat or species management area, a protected landscape or seascape, and/or a managed resource protected area, as well as nationally designated protected areas for which no IUCN category has been defined or provided by a national agency. The total surface area of a country includes terrestrial area plus any territorial sea area (up to 12 nautical miles).

Table 5.2

Land Resources and Use

Sources *Land area and Forest* Area World Bank, *World Development Indicators* (online version) as of July, 2007. *Agriculture, Pasture, Arable Crop* United Nations Environmental Program (online at http://geodata.grid.unep.ch/) as of March, 2007.

Definitions All statistics are measured relative to a country's total land area. *Agricultural land* equals the sum of *Arable land and permanent crops* with *Permanent pasture* land. *Other land* is the total land area that is not *Arable land and permanent crops* the sum of arable land and land under permanent crops. *Other land use* is calculated as 100 minus *Arable Land and Permanent Crops. Permanent pasture* an established plant community in which the dominant species are perennial grasses, there are few or no shrubs, and trees are absent. *Forest area* is land under natural or planted stands of trees, whether productive or not. Graphically represented that is:

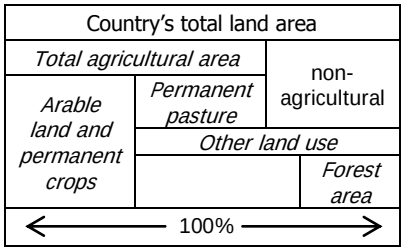

Table 5.3

Agriculture and Aquaculture

Sources World Bank, *World Development Indicators* (online version) as of July, 2007; United Nations Environmental Program (http://geodata.grid.unep.ch/) as of March, 2007, and Esty, Daniel C., Marc A. Levy, Tanja Srebotnjak, Alexander de Sherbinin, Christine H. Kim, and Bridget Anderson (2006). *Pilot 2006 Environmental Performance Index.* New Haven: Yale Center for Environmental Law & Policy.

Definitions *Agricultural production index* is a price-weighted sum of a country's total net agricultural production during a calendar year. The per capita net production of a country's agricultural sector, excluding production of seed and feed and intermediate agricultural inputs: Each year's figure is the ratio of that year's production relative to the average production during 1999-2001, multiplied by 100. *Food production index* excluding, coffee and tea, the per capita production of a country's agricultural products that contain nutrients. Calculated relative to the 1999-2001 period and multiplied by 100. *Fertilizer* refers to nitrogenous, phosphate and potash fertilizers. *Agricultural subsidies* are the value of agricultural payments that have been linked to more intensive agricultural production patterns and associated environmental damages; adjusted for environmental payments as percent of agricultural value added (%). Some countries may have negative values representing either net taxes or administered prices. *Over Fishing* is a score between 1 and 7 with high scores corresponding to over fishing (1 = no over fishing). *Nitrogen Loading* is an average nitrogen concentration in a country's water bodies (milligrams per liter). *Organic Water Pollutants* are measured by biochemical oxygen demand, which refers to the amount of oxygen that bacteria in water will consume in breaking down waste. This is a standard water-treatment test for the presence of organic pollutants.

Notes *Agricultural production index* and *Food production index* reliability is limited by the accuracy and precision of production and price data as production data is derived rather than directly measured. Presented figures are calculated using the FAO's method.

Table 5.4

Water Use

Sources United Nations Environmental Program (http://geodata.grid.unep.ch/) as of March, 2007; *Available Freshwater and Groundwater* International Earth Science Information Network (CIESIN) at Columbia University, and the World Economic Forum and Yale University (online version) as of April, 2005.

Definitions *Water use* is the annual gross quantity of water produced and used from conventional and non-conventional sources for agricultural, industrial, and domestic purposes, but excluding uses that are typically non-consumptive, such as energy, mining, recreation, navigation, fisheries and the environment. *Domestic* usually is computed as the total amount of water supplied by public distribution networks, including connected industries. *Industry* refers to self-supplied industries that are not connected to any distribution network.

Notes *Agricultural use* usually refers to livestock and irrigation; however some countries categorize livestock under domestic use. Therefore, inter-country comparisons should be done with care. Figures display the total per capita water availability measured as the sum of internal renewable water per capita (average annual surface runoff and groundwater recharge generated from endogenous precipitation, taking into account evaporation from lakes and wetlands) and per capita water inflow from other countries. These data were derived from a special run of the WaterGap 2.1 gridded hydrological model in order to derive country-level estimates.

Table 5.5

Water Resources

Sources *Improved Drinking Water Coverage* Millennium Development Goals Indicators (online version) as of March, 2007. *Internal Groundwater Recharge and Natural Renewable water* United Nations Environmental Program (http://geodata.grid.unep.ch/) as of April, 2006; and IMF, *World Economic Outlook*, March, 2007. *Water Poverty Index* World Resources Institute (online version) as of January, 2007.

Definitions *Improved drinking water coverage* the percentage of people with reasonable access to an adequate amount of water from an improved source, such as a household connection, public standpipe, borehole, protected well or spring, and rainwater collection. Unimproved sources include vendors, tanker trunks, and unprotected wells and springs. Reasonable access is defined as the availability of at least 20 liters a person a day from a source within one kilometer of the dwelling. *Internal groundwater recharge* the total volume of water entering aquifers within a country's borders from endogenous precipitation and surface water flow. *Natural renewable water* the sum of internal and external renewable water resources. It corresponds to the maximum theoretical amount of water available for a country in an average year. *Water Poverty Index* (WPI) measures, for a given country, the impact of water scarcity and water provision on human populations. WPI is a number between 0 and 100, where a low score indicates water poverty and a high score indicates good water provision. WPI is the culmination of an interdisciplinary approach that combines both the physical quantities relating to water availability and the socio-economic factors relating to poverty to produce an indicator that addresses the diverse factors that affect water resource management.

Table 5.6

Energy Use and Supply

Source World Bank, *World Development Indicators* (online version) as of July, 2007; and United Nations Environmental Program (http://geodata.grid.unep.ch/) as of March, 2007.

Definitions *Energy production* refers to primary electricity as well as forms of primary energy—petroleum (crude oil, natural gas liquids, and oil from non-conventional sources), natural gas, solid fuels (coal, lignite, and other derived fuels), and combustible renewables, and waste. *Energy use* is the apparent consumption of commercial energy, which is equal to native production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport. *Energy imports* are calculated as the difference between energy use and energy production; a negative number indicates a net exporter of energy. *Energy supply per $1000 GDP* the ratio of energy use per unit of gross domestic product measured in terms of purchasing power parity (PPP). Total primary energy domestic supply is calculated as production of fuels + inputs from other sources + imports - exports - international marine bunkers + stock changes. It includes coal, crude oil, natural gas liquids, refinery feedstocks, additives, petroleum products, gases, combustible renewables and waste, electricity, and heat. Domestic supply differs from final consumption in that it does not take account of distribution losses. The supply and use of energy commodities are converted to Kg oil equivalent using standard coefficients for each energy source. *Private energy sector investment* covers infrastructure projects in energy (electricity and natural gas transmission and distribution) that have reached financial closure and directly or indirectly serve the public. Movable assets and small projects such as windmills are excluded. The types of projects included are operations and management contracts, operations and management contracts with major capital expenditure, greenfield projects (in which a private entity or a public-private joint venture builds and operates a new facility), and divestiture.

Notes Figure displays private energy sector investment for selected LAC countries. Data source reports $0 investment in Venezuela in 2005.

Table 5.7

Electricity Production by Source

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Electricity production* is measured at the terminals of all alternator sets in a station. In addition to hydropower, coal, oil, gas, and nuclear power generation, it covers generation by geothermal, solar, wind, and tide and wave energy, as well as that from combustible renewables and waste. Production includes the output of electricity plants that are designed to produce electricity solely as well as that of combined heat and power plants (i.e., cogeneration plants). *Electric power transmission and distribution losses* include losses in transmission between sources of supply and points of distribution and in the distribution to consumers, including pilferage. Production less transmission and distribution losses, own-use, and transformation losses is equal to end-use electricity consumption.

Notes *Natural gas* refers to natural gas but excludes natural gas liquids. *Oil* refers to crude oil and petroleum products. Figure depicts the aggregate regional power losses from 1971 to 2004 per the World Bank, *World Development Indicators* (online version) as of July, 2007.

Table 5.8

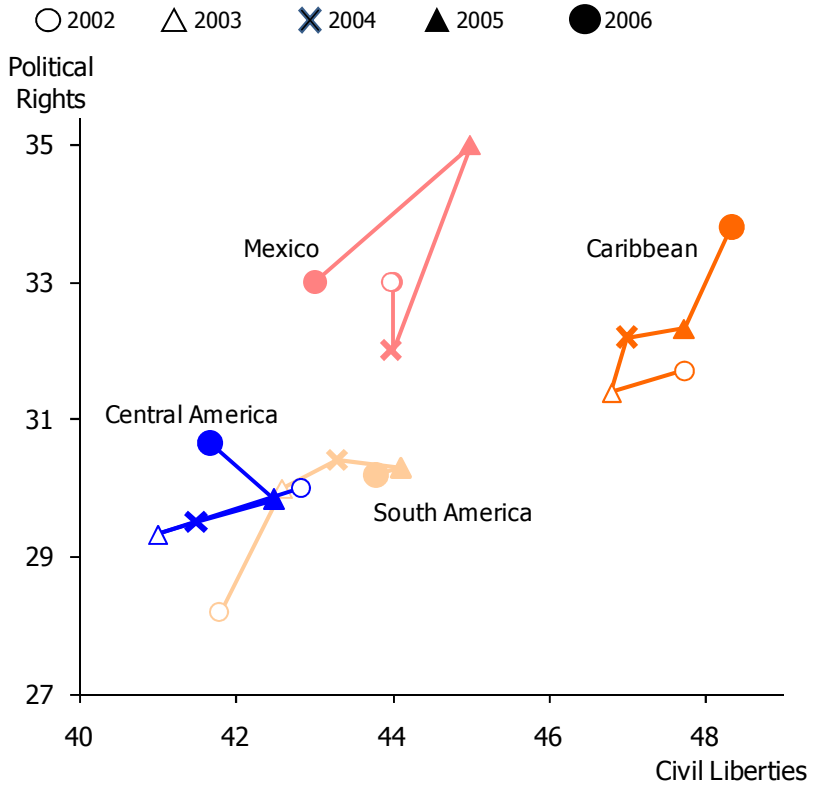
Carbon Dioxide Emissions

Source Carbon Dioxide Information Analysis Center, *Trends Online: A Compendium of Data on Global Change*. Oak Ridge National Laboratory, US Department of Energy, Oak Ridge, Tennessee, as of August, 2007.

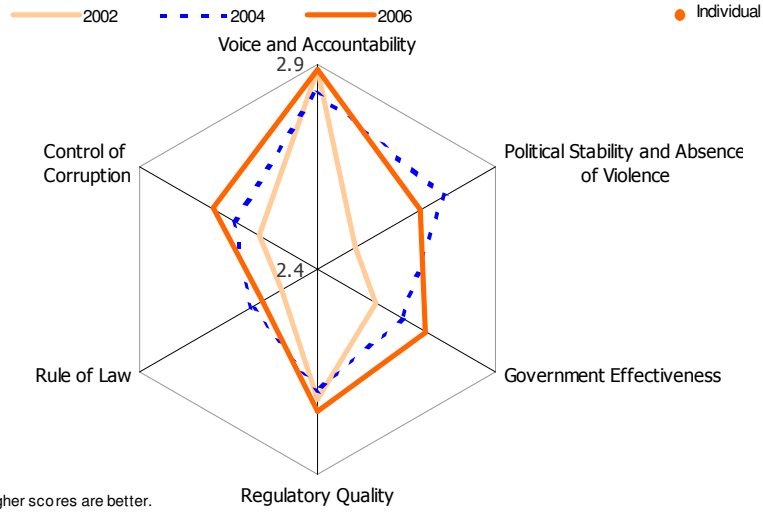
Definitions *Emissions* materials (gases, particles, vapors, chemical compounds, etc.) that come out of smokestacks, chimneys, and tailpipes. *Fossil fuel* any hydrocarbon deposit that can be burned for heat or power, such as petroleum, coal, and natural gas. *Flaring* the burning of waste gases through a flare stack or other device before releasing them to the air.

Note Missing values indicate that no emissions were measured or estimated.

Aggregate Freedom Scores



Governance Indicators in the LAC Region



Higher scores are better.
See technical notes at end of chapter.

Economic Freedom in the LAC Region (2007)

Sources and Technical Notes - Democracy

Figures

Aggregate Freedom Scores

Source Freedom House*, Freedom in the World 2007,* Washington, DC, 2007.

Notes The constellation chart depicts each sub-region's Political Rights score and Civil Liberties score for each of the four years. Countries' Political Rights and Civil Liberties' scores are aggregated to form their respective Freedom Ratings, which are displayed in Table 6.1.

Governance in the LAC Region

Source Kaufmann, Daniel, Kraay, Aart and Mastruzzi, Massimo, "Governance Matters VI: Governance Indicators for 1996-2006" (July 2007). World Bank Policy Research Working Paper No. 4280 Available at SSRN: http://ssrn.com/abstract=999979

Notes Original scores, which are scaled to a range of -2.5 to 2.5, have been re-scaled to a range of 0 to 5, with higher scores indicating better outcomes. Associated confidence intervals are not reported here, but are included in the original source material. Figure depicts the unweighted average scores of all LAC countries. See the note to Table 6.5 for definitions of indicators.

Economic Freedom in LAC

Source The Heritage Foundation*, The Index of Economic Freedom 2007*, Washington, DC, 2007.

Notes Heritage Foundation's Economic Freedom scores are displayed such that 100 indicates 'most free', whereas 0 represents a complete lack of freedom. Therefore, the further a point is away from 0, the more freedom is indicated. Figure depicts the unweighted average scores of all sub regions within LAC countries, as well as dot points for each country in the region. See Table 6.4 and its note for related definitions and corresponding country data.

Table 6.1

Freedom Ratings

Source Freedom House*, Freedom in the World 2007,* Washington, DC, 2007.

Definition As defined by Freedom House, *freedom* encompasses two sets of characteristics grouped under political rights and civil liberties. *Political rights* enable people to participate freely in the political process. In this case, political process refers to the system by which the polity chooses the authoritative policy makers and attempts to make binding decisions affecting the national, regional or local community. A system is genuinely free or democratic to the extent that the people have a choice in determining the nature of the system and its leaders. *Civil liberties* are the freedoms to develop views, institutions, and personal autonomy apart from the state. Freedom is rated from 1 to 3, where 1=free, 2=partly free, and 3=not free.

Notes Regional averages are not weighted.

Table 6.2

Political Rights

Source Freedom House*, Freedom in the World 2007,* Washington, DC, 2007.

Definition *Political rights* enable people to participate freely in the political process. In this case, political process refers to the system by which the polity chooses the authoritative policy makers and attempts to make binding decisions affecting the national, regional or local community. A system is genuinely free or democratic to the extent that the people have a choice in determining the nature of the system and its leaders. Political rights are rated between 1 and 7, where 1 is the highest degree of freedom and 7 is the lowest degree of freedom.

Notes Regional averages are not weighted.

Table 6.3

Civil Liberties

Source Freedom House*, Freedom in the World 2007,* Washington, DC, 2007.

Definition *Civil liberties* are the freedoms to develop views, institutions and personal autonomy from the state. Civil Liberties are rated between 1 and 7, where 1 is the highest degree of freedom and 7 is the lowest degree of freedom.

Notes Regional averages are not weighted.

Table 6.4

Economic Freedom

Source The Heritage Foundation*, The Index of Economic Freedom 2007*, Washington, DC, 2007.

Definition *Economic Freedom* refers to absence of government coercion or constraint on the production, distribution, or consumption of goods and services. It is the unweighted average of 10 individual factor scores that range from 0 (total lack of freedom) to 10 (most free): 1) *Trade policy*, based on average tariff rates; 2) *Fiscal Policy*, based on income and corporate tax rates; 3) *State Intervention* in the Economy, based on government consumption as a percentage of GDP and size of the state-owned sector; 4) *Monetary Policy*, based on average inflation rate; 5) *Capital Flows* and Foreign Investment, based on an assessment of the limitations or supports for foreign investment; 6) *Financial Policy*, based on a sliding scale that measures the relative openness of a country's banking system; 7) *Labor Policy*, based on an assessment of labor policies such as minimum wage laws and regulatory burdens on hiring; 8) *Property Rights*, based on an assessment of the government's protection of private property rights; 9) *Business* Freedoms, based on the perceived burden of regulation, levels of corruption, and uniformity of application; 10) *Corruption*, based on an estimate of the size of the black market as a percentage of GDP.

Notes Table presents the original data source's refinements and updates of previously published data. Regional averages are not weighted.

Governance Matters Indicators

Source Kaufmann, Daniel, Kraay, Aart and Mastruzzi, Massimo, "Governance Matters VI: Governance Indicators for 1996-2006" (July 2007). World Bank Policy Research Working Paper No. 4280 Available at SSRN: http://ssrn.com/abstract=999979

Definition *Calculated average* is the unweighted average of each country's or sub-region's scores in the following indicators: *Voice and Accountability* measures the extent to which citizens of a country are able to participate in the selection of governments. *Political Stability* measures perceptions of the likelihood that the government in power will be destabilized or overthrown by possibly unconstitutional and/or violent means, including domestic violence and terrorism. *Government Effectiveness* combines responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. *Regulatory Quality* focuses more on the policies themselves, including measures of the incidence of market-unfriendly policies such as price controls or inadequate bank supervision, as well as perceptions of the burdens imposed by excessive regulation in areas such as foreign trade and business development. *Rule of Law* the extent to which agents have confidence in and abide by the rules of society. *Control of Corruption* the extent to which public power is exercised for private gain.

Sources and Technical Notes – Economy

Figures

Real Per Capita GDP Growth

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Notes Figure depicts average annual growth using constant 2000 U.S. dollars through 2005. Average annual growth is calculated using the geometric mean, which has the form $[((2005/1970)^{(1/35)})-1] \times 100$ = average annual growth for 1970-2005; and $[((2005/1990)^{(1/15)})-1] \times 100$ = average annual growth for 1990-2005.

Sectoral Growth in LAC

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Agriculture* Corresponds to ISIC (revision 3) divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. *Industry* Corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. *Services* correspond to ISIC divisions 50-99 and includes value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling.

Notes Figure depicts the World Bank's regional aggregates for the LAC region using a five-year moving average of annual percentage growth, which is the unweighted mean of the previous four periods and the current period. One characteristic of the moving average is that if the data has a periodic fluctuation, then applying a moving average of that period will eliminate that variation.

Stock Market and Economic Growth 2000-2006

Sources *Stock Market Growth* UN Economic Commission for Latin America and the Caribbean, *Economic Survey of Latin America and the Caribbean, 2006-2007*, July, 2007. *Average annual GDP Growth* IMF, *World Economic Outlook*, April, 2007.

Government Share of GDP

Source World Bank, *World Development Indicators* (online version) July, 2007.

Definitions *Government share of GDP* represents general government final consumption expenditure (formerly general government consumption), which includes all government current expenditures for purchases of goods and services (including compensation of employees). It also includes most expenditures on national defense and security, but excludes government military expenditures that are part of government capital formation.

Notes Country groups are defined as follows: The Caribbean is the unweighted average of The Dominican Republic, Trinidad and Tobago, Jamaica, St. Vincent and Grenadines, and Guyana. Central America is comprised of the unweighted average of Guatemala, Nicaragua, El Salvador, Panama, and Costa Rica. South America ex. Brazil is constituted by the unweighted average of Paraguay, Ecuador, Peru, Uruguay, Argentina, Chile, Venezuela, Bolivia, and Colombia.

Selected Definitions and Notes

Atlas Method For purposes of cross-country comparison of national incomes, the World Bank's Atlas conversion factor is used to reduce the impact of exchange rate fluctuations. This involves using a three-year average of exchange rates to smooth the effects of transitory exchange rate fluctuations. The Atlas conversion factor is the average of a country's exchange rate (or alternative conversion factor) for that year and its exchange rates for the two preceding years, adjusted for the difference between the rate of inflation in the country and that in the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). A country's inflation rate is measured by the change in its GDP deflator. The inflation rate for G-5 countries, representing international inflation, is measured by the change in the SDR deflator, (Special drawing rights, or SDRs, are the IMF's unit of account.) The SDR deflator is calculated as a weighted average of the G-5 countries' GDP deflators in SDR terms, the weights being the amount of each country's currency in one SDR unit. Weights vary over time because both the composition of the SDR and the relative exchange rates for each currency change. The SDR deflator is calculated in SDR terms first and then converted to U.S. dollars, using the SDR to dollar Atlas conversion factor. The Atlas conversion factor is than applied.

Balance of Payments The balance of payments is a set of accounts recording all flows of value between a nation's residents and the residents of the rest of the world during a period of time. More specifically, it is a double-entry accounting system that lists all flows of goods and services into and out of a country; all transfers that are the counterpart of real resources or financial claims provided to or by the rest of the world, such as donations and grants; and all changes in residents' claims on, and liabilities to, nonresidents that arise from economic transactions. The balance of payments is divided into three groups of accounts. The current account (balance) refers to the sum of net exports of goods and services, income, and current transfers. The capital account (balance) consists of some unilateral transfers including those of ownership of fixed assets, acquisition of intangibles such as patents and leases, and also debt forgiveness. The financial account (balance) refers to the sum of financial assets and liabilities including foreign direct investment, portfolio investment, financial derivatives, and reserve assets as deemed by respective monetary authorities. All transactions are recorded twice--once as a credit and once as a debit. In principle the net balance should be zero, but in practice the accounts often do not balance. In these cases a balancing item, usually net errors and omissions, is itemized separately.

For some countries, data are presented according to the methodology adopted in the IMF's *Balance of Payments Manual*, *5th edition* (1993). In other cases, the methodology is that of *the Balance of Payments Manual, 4th edition* (1977), modified to place official transfers in the capital account (as the IMF often did beginning in the 1980s).

The fifth edition redefined as capital transfers some transactions previously included in the current account, including debt forgiveness, migrants' capital transfers, and foreign aid to acquire capital goods. As such, under the fifth edition the current account balance reflects more accurately net current transfer receipts in addition to transactions in goods, services and income.

Consumer Price Index (CPI) The CPI is a price index based on surveys of the cost of a typical "market basket" of goods and services purchased. Generally, the CPI is geared toward the middle- to lower-middle-income consumer. The CPI focuses on a narrower category of goods than does the GDP deflator. While the GDP deflator is the price index of all the goods and services produced in an economy, both consumption goods and investment goods, the CPI represents the prices of only consumption goods. One problem with any fixed-bundle index as a measure of cost of living is that it does not account for substitutions that consumers might make in response to price changes. As a result, the CPI somewhat overstates changes in the cost of living.

The cost of a typical market basket of goods and services is determined by household income-and-expenditure surveys conducted approximately every 10-20 years. In some countries, however, the latest income-and-expenditure survey is more than 20 years old, thus making the market basket out-of-date and distorting consumer-price trends to an undetermined degree. Consumer price indices are based on yearly-average prices.

External Public Debt refers to debt owed to nonresidents repayable in foreign currency, goods, or services. Total external public debt is the is the sum of public and publicly guaranteed medium- and long-term debt. Public debtors include the central government, the rest of general government, and autonomous state agencies and enterprises. The debt outstanding/GDP ratio is a frequently used measure of a country's debt burden, although it does not take into account the degree of concessionality of the debt. The ratio of debt service to exports of goods and nonfactor services (the debt-service ratio), another indicator of debt burden, does take concessionality into account by relating debt-service payments to a country's capacity to generate its own foreign exchange for making these payments. Debt figures reported by the

World Bank, IMF, IADB, and countries' own official data sources often disagree on the size of the public debt and the debt-burden percentages.

GDP Deflator The GDP (gross domestic product) deflator is an overall measure of prices in an economy—a price index for GDP. It is equal to the ratio of nominal GDP to real GDP multiplied by 100. Specifically, the value of all newly produced final goods is calculated in current prices, resulting in nominal GDP. Then the same set of goods is valued at the prices that prevailed in the base year, resulting in real GDP. The ratio of nominal GDP to real GDP is the GDP deflator. The GDP deflator is the broadest based price index available—it is considered by many to be the best overall indicator of inflationary pressures in an economy.

Government Finance Reporting of Government Finance supports analysis of fiscal policy of the general government sector in a given accounting period. Transactions of government operations are therefore recorded and classified to demonstrate the effect of fiscal policy on the net worth of the general government sector, its demand for credit, and on its holdings of assets and liabilities. Statistics presented here are based on the IMF's 2001 *Government Finance Statistics Manual*, which revised the original GFS Manual by seeking to harmonize with the 1993 *System of National Accounts*.

The Statement of Government Operations records flows (as opposed to stocks) by presenting details of transactions in revenue, expense, net acquisition of non-financial and financial assets, and net incurrence of liabilities. Resulting from transactions, *Revenue* is defined as those transactions that result in an increase in net worth and *Expense* as the decrease in net worth. Revenue tends to come from three main sources: *Taxes* (compulsory transfers and fees, but not social contributions), *Social Contributions* (which can be either compulsory or voluntary and benefit both the contributor and other beneficiaries), and Other Revenue. For many governments, however, revenue is supplemented by *Grants* (noncompulsory transfers from other governments or international organizations). As grants increase the government's net worth, they are recorded as a component of Revenue. *Other Revenue* is not presented in this publication, but it can be derived by subtracting the sum of the other Revenue components from the *Revenue* total.

Expenses can be classified in two ways: by economic classification and functional classification. Economic classifications describe how (i.e., the method) the government supplies goods and services to society. *Compensation of Employees* is remuneration in cash or in kind (including social insurance contributions) to employees in return for work performed. *Use of Goods and Services* is the total value of goods and services purchased by the general government sector for use in production processes (it therefore excludes goods and services not used in production processes). *Interest* is payments paid by a debtor government on debt instruments. *Subsidies* are current transfers paid to enterprises including transfers to public corporations. *Grants* are noncompulsory transfers paid to other government units or international organizations. *Social Benefits* are current transfers paid to households (social benefits paid in kind to households are excluded). *Other Expenses* and *Consumption of Fixed Capital* make up the remainder of the Expense category—these can be derived by subtracting the presented expense categories from the *Expense* total.

Functional classifications of expense describe why (i.e., for what purpose) an expense was incurred. It is important to note that functional classifications include acquisitions of nonfinancial assets which would not be captured under the economic classification of Expense (because such an acquisition would not affect net worth). A distinction is drawn, therefore, by the use of the term *Outlay* for functional categorization. The Classification of Functions of Government (COFOG) was produced by the OECD and is used herein (see *Classifications of Expenditure According to Purpose* (New York, 2000), United Nations). All outlays for a particular function are collected in one category regardless of the method of implementation (e.g., cash transfers, vs. in kind transfers). *Public Debt Transactions* is a sub-category of the general functional category *General Public Expenses* and describes interest payments and outlays for underwriting and floating government loans but excludes administrative costs and public debt management.

Gross Capital Formation Formerly referred to as Gross Domestic Investment (GDI), this measure consists primarily of outlays on additions to the fixed assets (capital) of an economy, as well as net changes in the level of inventories. Fixed assets cover land improvements, plant, machinery, and equipment purchases, and infrastructure development and maintenance. Inventories are stocks of goods held by firms to meet temporary or unexpected fluctuations in production or sales. By adding to capital stock, investment increases an economy's capacity to grow over time. Investment is financed by savings, either national or foreign.

Gross National Income (GNI) Formerly referred to as Gross National Product (GNP), this measure reflects the total value of final goods and services produced by domestically owned factors of production. Whereas GDP measures the total value of production within the geographic boundaries of an economy—that is, by a country's *residents*—GNI measures the total value that is produced by a country's *nationals*, whether they are located inside or outside the boundaries of the particular country. Therefore, GNI will be equal to GDP plus income from abroad, minus foreign-owned production. GNI is thus used to reflect a country's total sources and uses of income, and thus the total amount of resources available to the citizens of a country.

Gross Domestic Product (GDP) GDP is a measure of an economy's total production of final goods and services for domestic consumption and investment, and for export. The value of intermediate (non-final) goods and services is not included as that would represent double-counting. Alternatively, GDP can be thought of as the sum of value added in production at each successive stage of the production-marketing chain. GDP can be used to reflect the state of production, and hence *development*, in a country.

Interest Rate Refers to payments to and by financing institutions and are arithmetic averages of monthly interest rates reported by the countries. *Deposit rate* usually refers to rates offered to resident customers for demand, time, or savings deposits. Frequently, rates for time and savings deposits are classified according to maturity and amounts deposited. In addition, deposit money banks and similar deposit-taking institutions may offer short- and medium-term instruments at specified rates for specific amounts and maturities. *Lending rate* is the bank rate that usually meets the short- and medium-term financing needs of the private sector. This rate is normally differentiated according to creditworthiness of borrowers and objectives of financing.

PPP Indicates the use of Purchasing Power Parity (PPP) rationale to convert total annual output to international dollars. An international dollar adjusted for PPP has the same purchasing power over GDP as a U.S. dollar in the United States and buys an equivalent amount of goods or services irrespective of the country. PPP rates provide a standard measure allowing comparisons of real price levels between countries, just as conventional price indexes allow comparison of real values over time. Values are in current dollars and are not adjusted for inflation. The PPP rates for each country are estimated through extrapolation and regression analysis using data from the International Comparison Programme (ICP). Computation of the PPP involves deriving implicit quantities from national accounts expenditure data and specially collected price data and then revaluing the implicit quantities in each country at a single set of average prices. PPP estimates tend to lower per capita GDPs in industrialized countries and raise per capita GDPs in developing countries (more information on ICP is available online at http://www.worldbank.org/data/).

Population Figures are mid-year estimates derived from national census data. Projections are based on information regarding mortality rates, fertility trends, and net external migration.

Public Debt Outstanding Public and publicly guaranteed debt comprising long-term external obligations of public debtors, including the national government, political subdivisions (or an agency of either), and autonomous public bodies, and external obligations of private debtors that are guaranteed for repayment by a public entity. Data are in current U.S. dollars.

Note For tables that list the source as USAID Data Services, Economic and Social Database, August, 2007, data was compiled from the following resources. **Population**: US Bureau of the Census, International Database, (online) as of March, 2007, Washington, DC. **National Accounts**: IMF, *World Economic Outlook*, April, 2007; and *International Financial Statistics*, March, 2007 (CD-ROM version), International Monetary Fund (IMF) Washington, DC. **Employment and Wages**: World Bank, *World Development Indicators* (online version) as of July, 2007. **Prices**: *International Financial Statistics*, March, 2007 (CD-ROM version), International Monetary

Fund (IMF) Washington, DC. **Balance of Payments**: *Balance of Payments Statistics*, June, 2007 (CD-ROM version), International Monetary Fund (IMF) Washington, DC. **External Debt**: World Bank, *World Development Indicators* (online version) as of July, 2007. **Government Finance**: Except where noted, *Government Finance Statistics Yearbook*, June, 2007 (CD-ROM version), International Monetary Fund (IMF) Washington, DC.

Table 7.1

Gross National Income

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Gross national income* (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. See the entry for GNI in "Selected Definitions" above for further information.

Note Figure displays 2005 GNI per capita value for selected countries using the World Bank's Atlas method, which is described in this chapter's *Selected Definitions and Notes*.

Table 7.2

Gross Domestic Product

Source IMF, *World Economic Outlook*, April, 2007.

Definitions *Gross domestic product* refers to the definition listed under "Selected Definitions" above. *Current GDP and per capita GDP* refers to valuation of GDP and per capita GDP using current US dollars. *Nominal annual growth (%)* is the growth rate from the previous year to the current year based on current US dollars. *Real annual growth (%)* is the growth rate from the previous year to the current year based on constant local currency. *Current PPP GDP and per capita GDP* is a country's GDP or per capita GDP converted to US dollars using the PPP principle (see definition for PPP above). *Annual PPP growth (%)* is the growth rate from the previous year to the current year based on PPP valuations of GDP and per capita GDP.

Table 7.3

Debt

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Total external debt* is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt. Short-term debt includes all debt having an original maturity of one year or less and interest in arrears on long-term debt. *Use of IMF credit* denotes repurchase obligations to the IMF for all uses of IMF resources (excluding those resulting from drawings on the reserve tranche). These obligations, shown for the end of the year specified, comprise purchases outstanding under the credit tranches, including enlarged access resources, and all special facilities (the buffer stock, compensatory financing, extended fund, and oil facilities), trust fund loans, and operations under the structural adjustment and enhanced structural adjustment facilities. *Long-term debt* is debt that has an original or extended maturity of more than one year. It has three components: public, publicly guaranteed, and private non-guaranteed debt. *Total debt service* is the sum of principal repayments and interest actually paid in foreign currency, goods, or services on long-term debt, interest paid on short-term debt, and repayments (repurchases and charges) to the IMF.

Note Figure depicts the weighted sum of all countries listed in Table 7.3 except those countries with missing data in any year from 1970 to 2004, which were: Grenada, St. Kitts and Nevis, and St. Lucia. The lines in the chart indicate the maximum and minimum percentages of debt service for the region.

Table 7.4

Urban Unemployment Rates

Sources *Economic Survey of Latin America and the Caribbean 2006-2007*, ECLAC, Santiago, Chile, July, 2007; *Preliminary Overview of the Economies of Latin America and the Caribbean 2004*, ECLAC, Santiago, Chile, December, 2004; and, *Economic Survey of Latin America and Caribbean 2000-2001*, ECLAC, Santiago, Chile, November, 2002.

Definition *Unemployment* is the share of the urban labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment may vary by country.

Notes 2006 figures are preliminary estimates published by ECLAC. a/ Includes hidden unemployment. b/ 1998 and before reflect official estimates of metropolitan region. c/ 1999 and before reflect national total. d/ 1999 and before reflect the metropolitan region. e/ Due to new measurement methodology starting in 2003, earlier data for this country are not directly comparable. f/ 1999 and before reflect departmental capitals. g/ Due to new measurement methodology starting in 2002, earlier data for this country are not directly comparable. h/ Reflected seven metropolitan areas until 1999; 13 areas thereafter. i/ Until 1999, reflects the urban area total;thereafter reflects Cuenca, Guayaquil and Quito. k/Data based on metropolitan Lima. l/ 1997 and forward reflect a new methodology and are thus not directly comparable to previous years. Figure depicts unemployment percentages displayed in the table.

Table 7.5

Real Average Wages

Sources *Economic Survey of Latin America and the Caribbean 2006-2007*, ECLAC, Santiago, Chile, July, 2007; *Economic Survey of Latin America and the Caribbean 2004-2005*, ECLAC, Santiago, Chile, August, 2005; and, *Economic Survey of Latin America and Caribbean 2000-2001*, ECLAC, Santiago, Chile, November, 2002.

Definition *Real average wages* reflect average wages relative to the 2000 average which is indexed to 100. Figures greater than 100 for any given year indicate higher average wages than in 2000.

Notes Figure depicts the real average wage index for selected countries, which have been rebased such that the 1990 = 100.2007 figures are preliminary estimates published by ECLAC. a / Average wages reported by persons enrolled in the social security system. b/ Manufacturing only c/ 2006 figures represent the first half of this year only. d/ Workers covered by social and labor legislation; 2003 and forward is private sector only. e/ General index of hourly wages. f/ Non-agricultural enterprises with 10 workers or more. g/ Private-sector workers in the Lima metropolitan area. Data for 2004 refers to labor income in the Lima Metropolitan area.

Country Tables (7.6 – 7.29)

Source USAID Economic Analysis and Data Services, Economic and Social Database, August, 2007.

Notes Government finance (GF) statistics for all countries report the Consolidated Central Government sector on a Cash basis *except* where noted below.

Argentina (Table 7.6) GF reports according to accrual basis starting in 2002.

Belize (Table 7.7) GF reports the Budgetary Central Government in all years.

Bolivia (Table 7.8) GF reports according to accrual basis starting in 2002.

Chile (Table 7.10) GF reports according to accrual basis starting in 2001.

Columbia (Table 7.11) GF reports Budgetary Central Government in 1996, 1997, 2001 and 2002 and uses the accrual basis starting in 2001.

Ecuador (Table 7.14) Ecuador adopted the U.S. dollar as legal tender in March 2000. All items in the National Accounts therefore depict U.S. dollars.

El Salvador (Table 7.15) El Salvador formally adopted the U.S. dollar as its national currency in 2001. All items in the National Accounts and Government Finance therefore depict U.S. dollars. GF reports the Budgetary Central Government in 1996 and 1997 and uses the accrual basis starting in 2002.

Guatemala (Table 7.18) GF reports the Budgetary Central Government in all years.

Guyana (Table 7.17) Government Finance statistics are drawn from the Central Government Cash Flow Statement: Central Bank of Guyana: *March 2007 Statistical Bulletin* and *September 2006 Statistical Bulletin*. 2006 figures are preliminary.

Paraguay (Table 7.24) GF reports the Budgetary Central Government sector.

Sources and Technical Notes – US - LAC Trade

Definitions and Notes

Source US International Trade Commission, *Interactive Tariff and Trade DataWeb*, (online at http://www.usitc.gov/) as of July, 2007.

This section presents data on US merchandise exports to and imports from the LAC region. Corresponding export and import tables reflect total trade, as well as trade by in various goods sectors. Tables 8.8 and 8.16 present data on the top products exported and imported by the US to and from the largest LAC markets.

The data in this section were compiled using SITC, Revision 3, total exports (f.a.s) and imports for consumption (customs value) data. *Standard International Trade Classification* (SITC) is a statistical classification of the products entering external trade maintained by the United Nations Statistics Division. SITC nomenclature classifies codes at the one-digit level as Sections, two-digit codes as Divisions, and three-digit codes as Groups.

Exports indicate the total physical movement of merchandise out of the United States to foreign countries, regardless of whether such merchandise is exported from within the US Customs territory of from a US Customs bonded warehouse or a US Foreign Trade Zone. This includes foreign military sales, Grant-Aid shipments under the DOD Military Assistance Program, shipments of agricultural commodities under P.L. 480 as amended, and satellites launched by US space vehicles. *Free alongside ship* (f.a.s.) *value* is the value of exports at the US seaport, airport, or border port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the US port of exportation. The value, as defined, excludes the cost of loading the merchandise aboard the exporting carrier and also excludes freight, insurance, and any charges or transportation costs beyond the port of exportation.

Imports for consumption measures total merchandise that has physically cleared Customs either entering consumption channels immediately or entering after withdrawal for consumption from bonded warehouses under Customs custody or from Foreign Trade Zones. *Customs import value* is the value of imports as appraised by the US customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended. This is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding US import duties, freight, insurance, and other associated charges.

Top traded products are based on SITC (revision 3) product divisions, i.e., 2-digit product codes and are determined based on US dollar value.

Growth rates are calculated using formulas 1 and 2. Formula 1, used to calculate the annualized growth rate (1997-2006) is a geometric mean equation, which is based on end-points. Formula 2 was used to calculate the annual growth rate (2005-2006). *Formula 1*: $[((2006/1997)^{(1/9)})-1] \times 100$ = average annual growth for 1996-2006. *Formula 2*: $[(2006-2005)/2005] \times 100$ = growth from 2005 to 2006. An asterisk (*) appears when the first or the last year's figure is zero (except those zeros that represent trade of less than $500,000) or missing.

Figures

Note *Top traded products* are those products that the United States trades the most—in terms of US dollar value—with the entire LAC region.

Trade Categories

Total exports/imports include SITC (revision 3) Sections 0 through 9, that is, all goods.

Manufactured goods include SITC Sections 5 (chemicals and related products), 6 (manufactured goods classified by material), 7 (machinery and transport equipment), and 8 (miscellaneous manufactured goods).

Capital and consumer goods include SITC Sections 7 (machinery and transport equipment) and 8 (miscellaneous manufactured goods).

Textiles, Apparel, and Footwear includes SITC Groups: 261, 263, 264, 265, 266, 267, 268, 269, 651, 652, 653, 654, 655, 656, 657, 658, 659, 841, 842, 843, 844, 845, 846, 848, and 851.

Primary products include SITC codes 0 (food and live animals), 1 (beverages & tobacco), 2 (crude, inedible materials excluding fuel), 3 (mineral fuels and lubricants), and 4 (animal and vegetable oils, fats, and waxes).

Total agricultural products include SITC Sections 0 (food and live animals), 1 (beverages & tobacco), 2 (crude, inedible materials excluding fuel), except for Divisions 27 (crude fertilizers & crude minerals) and 28 (metalliferous ores & metal scrap), and Section 4 (animal and vegetable oils, fats, and waxes). In order to align reporting methodologies with those of the general reporting community, agricultural products were re-defined starting with the 2003 edition. The present edition continues the 2003 definition.

Oil and petroleum products includes SITC Division 33 (petroleum, petroleum products and related materials).

Sources and Technical Notes – Intra - LAC Trade

Notes and Definitions

Source Except where indicated: IMF, *Direction of Trade Statistics*, CD-ROM (September, 2007). Data on Panama's total trade and bilateral trade with the United States, Japan, China, and the EU rely on an early release of the October, 2007 CD-ROM.

This section presents data on total intra-regional LAC trade in merchandise goods (i.e. trade between LAC countries). *Merchandise exports*, as defined by the IMF, include all merchandise exported to another country, except goods transported through a territory (i.e. transit trade). Included are non-monetary gold, government trade (including foreign aid programs), military goods, sales and purchases of electricity, gas, and water, postal items, and transactions representing a service installed on a support device (such as data on computer tape, movies on videotape, or film). In general, goods do not include improvement and repair trade, trade moving between countries and their diplomatic representatives abroad, and monetary transactions of gold securities, banknotes, and coins. Exports are valued on a *free on board* (f.o.b.) basis. F.o.b. valuation is the transaction value of merchandise at the frontier of the exporting country.

Notes The IMF's monthly publication *Direction of Trade Statistics* includes country-level trade data that is either estimated or furnished directly by reporting countries. The IMF continuously refines its data collection and estimation procedures as methodologies and reporting of original trade statistics improve. Each monthly edition of *Direction of Trade Statistics* consequently presents data that has been updated from the previous month, sometimes resulting in wide variations between editions. As a result, the more recent the trade data, the more subject it is to revision. Therefore, the more current the data is (i.e., the later the year), the more care should be taken with its use. The LAC Databook presents the most recently available edition of *Direction of Trade Statistics* at the time of publication. For the most recent data, visit the LAC Databook's website, which is continuously updated, at <http://qesdb.usaid.gov/lac>.

Figures for China represent only mainland China (P.R.C.).

Regional Groupings

Andean Community (Andean Pact) Bolivia, Colombia, Ecuador, and Peru.

CACM (Central American Common Market) Costa Rica, El Salvador, Guatemala, and Honduras.

CARICOM (Caribbean Community) Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, St. Kitts and Nevis, St. Lucia, St. Vincent & Grenadines, Suriname, and Trinidad and Tobago. The Bahamas is a member of the Community but not the Common Market.

European Union (EU-27) Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom.

LAC USAID-presence countries Bolivia, Brazil, Colombia, Dominican Republic, Ecuador, El Salvador, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, and Peru.

MERCOSUR (Southern Common Market) Argentina, Brazil, Paraguay, Uruguay, and Venezuela.

Non-LAC Countries All countries of the world except those located in Latin America or the Caribbean.

Other Caribbean Aruba, Bermuda, Falkland Islands, French Guyana, Guadeloupe, Martinique, and Netherlands Antilles.

World All countries of the world (i.e. exports/ imports to the world reflect a country's total exports/imports).

Figures

Imports Supplied by LAC

Source IMF, *Direction of Trade Statistics*, CD-ROM (September, 2007) and World Bank, *World Development Indicators* (online version) as of July, 2007.

Intraregional and Extraregional Exports (2006)

Source IMF, *Direction of Trade Statistics*, CD-ROM (September, 2007) and World Bank, *World Development Indicators* (online version) as of July, 2007.

Terms of Trade Index

Sources *Economic Survey of Latin America and the Caribbean 2006-2007*, ECLAC, Santiago, Chile, July, 2007.

Definition *Terms of Trade* is the indexed ratio of the price of exports to the price of imports so that higher numbers indicate the price of exports is higher than the price of imports. The index is based such that year 2000 = 100.

LAC's Trade with the World by Type of Good

Source UN Comtrade database as of February, 2007.

Definitions *Primary and basic goods* is the region's aggregate trade balance of SITC (revision 3) sections 0 (food and live animals), 1 (beverages and tobacco), 2 (crude, inedible materials excluding fuel), and 4 (animal and vegetable oils, fats, and waxes). *Finished goods* is the aggregate trade balance of SITC sections 5 (chemicals and related products), 6 (manufactured goods classified by material), 7 (machinery and transport equipment), and 8 (miscellaneous manufactured goods). *Mineral fuels, lubricants and related materials* corresponds to the region's trade balance in SITC section 3. For further detail on the SITC system and its application in the LAC Databook, see the technical notes to chapter 8.

Tables 9.1 – 9.2

Geographical Composition of LAC Exports and Imports

These tables present export and import values for merchandise trade between the LAC region and other regions of the world. Each table lists trade for both the LAC region as a whole and for the USAID-presence countries in the LAC region. All figures are reported in current US dollars.

Growth rates were calculated using formulas 1 and 2. Formula 1, used to calculate the annualized growth rate (1996-2006), is a geometric mean based on end-points. Formula 2 was used to calculate the annual growth rate (2005-2006). Formula 1: [((2006/1996)(1/10))-1] x 100 = average annual growth for 1996-2006. Formula 2: [(2006/2005)/2005] x 100 = annual growth rate for 2006.

Tables 9.3 – 9.28

Each table lists values for exports of merchandise goods from a LAC country to all other LAC countries, as well as exports to the United States, European Union, mainland China, Japan, and the World. All figures are reported in current US dollars. The intra-regional table format differs from the format found throughout most of the LAC Databook. Each LAC sub-region (Caribbean, Central America and South America) is organized according to the trade/economic groups (e.g. CARICOM) that exist in the respective sub-regions. For instances in which a country does not belong to a trade group, it is assigned to an "other" category within its sub-region (e.g. "Other Caribbean"). Sub-regional trade groups and "other" category totals, shown in bold, are not included in sub-regional sums (unless the category is an individual country). Exports to the *World* represent a country's total exports; likewise, imports from the *World* represent a country's total imports.

Notes Growth rates were calculated using formulas 1 and 2. Formula 1, used to calculate the annualized growth rate (1996-2006), is a geometric mean based on end-points. Formula 2 was used to calculate the annual growth rate (2005-2006). *Formula 1*: $[((2006/1996)^{(1/10)})-1] \times 100$ = average annual growth for 1996-2006. *Formula 2*: [(2006-2005)/2005] x 100 = annual growth rate for 2006.

Sources and Technical Notes – Investment

Figures

Top Net Recipients of FDI

Calculated, based on UNCTAD, Foreign Direct Investment Database (online) as of January, 2007.

Gross Fixed Capital Formation and Savings in LAC

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition *Gross capital formation* (formerly gross domestic investment) consists of outlays on additions to the fixed assets of the economy plus net changes in the level of inventories. Fixed assets include land improvements (fences, ditches, drains, and so on); plant, machinery, and equipment purchases; and the construction of roads, railways, and the like, including schools, offices, hospitals, private residential dwellings, and commercial and industrial buildings. Inventories are stocks of goods held by firms to meet temporary or unexpected fluctuations in production or sales, and "work in progress." According to the 1993 SNA, net acquisitions of valuables are also considered capital formation. *Gross Domestic Savings* are calculated as GDP less final consumption expenditure (total consumption).

Foreign Investment Flows

Source UNCTAD, Foreign Direct Investment Database (online) as of January, 2007.

Table 10.1

US Direct Investment Position in LAC

Source Bureau of Economic Analysis, *US Direct Investment, Capital Flows and Position* (online) as of July, 2007.

Definition *US direct investment position (on an historical-cost basis)* the book value of US direct investors' equity in, and net outstanding loans to, their foreign affiliates. Specifically, it is the ownership or control, directly or indirectly, by one US resident of 10 percent or more of the voting securities of an incorporated foreign business or an equivalent interest in an unincorporated foreign business enterprise. It measures the value of the net accumulated stock of capital (equity or debt) that US parents (companies) have provided to their foreign affiliates. The direct investment position at the end of the year is equal to the position at the end of the previous year plus the change in the position during the year. Changes in the US direct investment position result from capital flows (see Table 10.2) and valuation adjustments (which are made to account for currency-translation and other valuation changes, such as capital gains and losses).

Notes Zeros (0) represent investment between $500,000 and -$500,000.

Table 10.2

US Direct Investment in LAC – Capital Flows

Source Bureau of Economic Analysis, *US Direct Investment, Capital Flows and Position* (online) as of July, 2007.

Definition Detailed flows data are prepared only on an historical cost basis, so such estimates largely reflect price levels of earlier periods. Historical-cost estimates are not ordinarily adjusted to reflect the changes in the current costs or the replacement costs of tangible assets or in the stock market valuations of firms. Over time, the current costs of tangible assets and the stock market valuations of firms tend to increase. As a result, the historical-cost estimates of the positions are less than the current-cost and market-value estimates of the positions. C*apital outflow*s generally represent a US company's acquisition of assets abroad and occur when a US parent company increases its equity investment in one of its existing foreign affiliates or makes a new equity investment in a foreign business enterprise. *Capital inflows* decrease the US direct investment position and are thus indicated by negative figures. They arise from transactions that increase US liabilities or decrease US assets and therefore occur when a US parent company reduces its equity interest in an existing affiliate, including reinvestment of earnings (parents' claim on the current-period undistributed earnings of their affiliates) and inflows of inter-company debt (changes in net outstanding loans between parents and affiliates).

Notes Zeros (0) represent figures between $500,000 and -$500,000. The switch in capital flows from positive (i.e., outflows) to negative (i.e., inflows) between 2004 and 2005 has been attributed by the US Bureau of Economic Analysis to a sharp fall in equity capital outflows, a net inflow of debt from foreign affiliates to their US parents, and the first switch to negative reinvested earnings since 1950 that was encouraged by the American Jobs Creation Act of 2004 and concentrated in Europe and LAC. See Koncz, Jennifer L. and Yorgason, Daniel R. (July 2006). Direct Investment Positions for 2005: Country and Industry Detail. *Survey of Current Business*, 86(7), 20-35. Washington, DC: US Bureau of Economic Analysis. (Available online at http://www.bea.gov/bea/pubs.htm.)

Table 10.3

US Direct Investment Income from LAC

Source Bureau of Economic Analysis, *US Direct Investment, Capital Flows and Position* (online) as of July, 2007.

Definition *US direct-investment income (without current-cost adjustment and net of withholding taxes)* measures the return on the US direct investment position abroad. It comprises US parent companies' claims on earnings (or profits) of foreign affiliates and interest payments on loans from their foreign affiliates. It is calculated as the sum of earnings (distributed and re-invested) and interest payments (the net result of US parents' foreign receipts and payments), minus withholding taxes on interest and distributed earnings, and excludes any current-cost adjustment on earnings that account for depreciation, depletion, and exploration expenses. Negative figures could result either from losses by the US parent company or interest obligations to foreign affiliates exceeding interest due plus the share in their affiliates' net income.

Notes Zeros (0) represent investment between $500,000 and -$500,000.

Table 10.4

Total Foreign Direct Investment Inflows

Source UNCTAD, Foreign Direct Investment Database (online) as of January, 2007.

Definition Inflows of FDI in the reporting economy comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to an enterprise resident in the economy (called FDI enterprise).

Notes Zeros (0) represent investment between $500,000 and -$500,000.

Table 10.5

Total Foreign Direct Investment Outflows

Source UNCTAD, Foreign Direct Investment Database (online) as of January, 2007.

Definition Outflows of FDI in the reporting economy comprise capital provided (either directly or through other related enterprises) by a company resident in the economy (foreign direct investor) to an enterprise resident in another country (FDI enterprise).

Notes Zeros (0) represent investment between $500,000 and -$500,000.

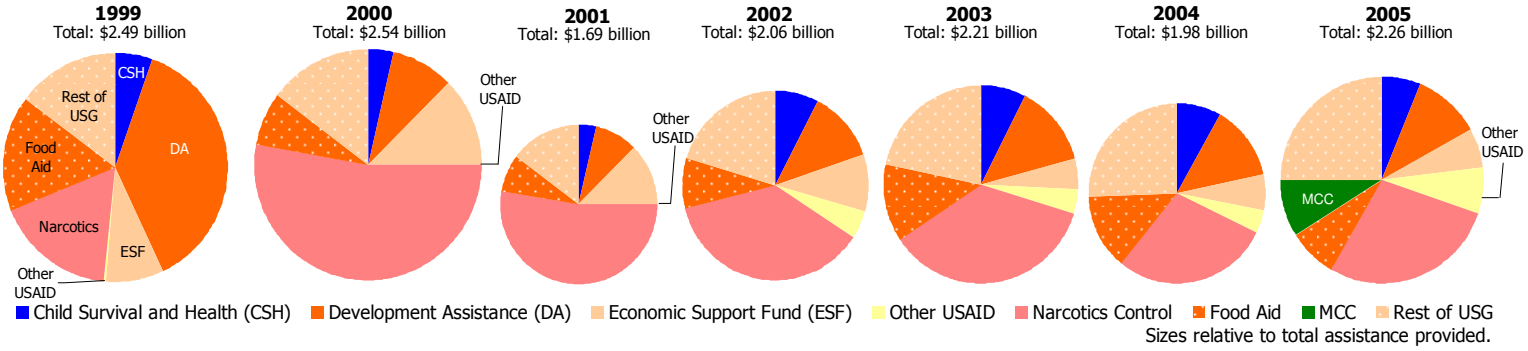
Total U.S. Assistance to LAC by Funding Account



Sources and Technical Notes – U.S. Assistance

Notes and Definitions

Source *U.S. Overseas Loans and Grants*, U.S. Agency for International Development, Washington, DC, 2006.

This section covers total commitments for economic assistance funded by USAID, U.S. Department of Agriculture (USDA), U.S. Department of State, and other U.S. Government agencies to the LAC region in each fiscal year. Commitments include loan authorizations and obligations, and grant obligations. Country-level data include some regional funds where such funds were directly allocated to field missions. Data are total obligations for each agency U.S. fiscal year, which ends September 30. *USAID* includes Economic Support Fund obligations, Development Assistance, Child Survival and Health, and other USAID assistance. *USDA* includes Food Aid and other USDA assistance. *State Department* includes the Global HIV/AIDS Initiative, Narcotics Control, Migration and Refugee Assistance, Nonproliferation, Anti-Terrorism, Demining & Related assistance, and other State Department assistance. *Other Econ. Assist.* includes Peace Corps, Department of Defense Security Assistance, other active grant programs, and inactive programs.

Figures

U.S. Economic Assistance Figures

Definition See notes and definitions for following tables for definitions of regional groups.

Notes Total assistance to Latin America and the Caribbean incorporates total USAID assistance to the Caribbean, Central America, South America, and Mexico, as well as funding for the LAC Regional Program, which provides services to these three sub-regions. Data are in constant (2005) U.S. dollars and correspond to respective U.S. fiscal years.

Total U.S. Assistance, by Region

Notes Figure displays total U.S. Economic Assistance to the world separated by region. Regional assistance is calculated as the sum of countries within each region and unspecified regional contributions in constant (2005) U.S. dollars.

Table 11.1

U.S. Assistance to the Caribbean

Definition *Caribbean Regional (RDO/C)* encompasses the following programs: Antigua and Barbuda, Grenada, Dominica, St. Kitts & Nevis, St. Vincent & the Grenadines, and St. Lucia.

Notes Data are in millions of (current) U.S. dollars and correspond to U.S. fiscal years.

Table 11.2

U.S. Assistance to Central America

Definition *Regional Office (ROCAP)* is the Regional Office for Central American programs.

Notes Data are in millions of (current) U.S. dollars and correspond to U.S. fiscal years.

Table 11.3

U.S. Assistance to South America

Notes Data are in millions of (current) U.S. dollars and correspond to U.S. fiscal years.

Table 11.4

U.S. Assistance to LAC by Region

Definition Total assistance to Latin America and the Caribbean incorporates total USAID assistance to the Caribbean, Central America, South America, and Mexico, as well as funding for the LAC Regional Program, which provides services to these three sub-regions. *Latin America Regional Program* is the office of Regional Sustainable Development (RSD) which treats sectoral issues. *Rest of USG* is the remainder of U.S. Government assistance.

Notes Figure displays the total of U.S. assistance to LAC by funding account and U.S. fiscal year. Sizes of the individual pie charts represent total annual assistance in constant (2005) U.S. dollars to depict relative differences over time. Table data are in millions of (current) U.S. dollars and correspond to U.S. fiscal years.

Sources and Technical Notes – Bilateral & Multilateral Assistance

Notes and Definitions

This section provides data on official development assistance from Development Assistance Committee members and from multilateral development institutions. *Development Assistance Committee* (DAC) member countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, and the United States. *Official development assistance* (ODA) is defined as disbursed flows to developing countries and multilateral institutions provided by official agencies, each transaction of which meets the following criteria: a) it is administered with the promotion of the economic development and welfare of developing countries as its main objective; and b), it is concessional in character and conveys a grant element of at least 25 percent.

ODA data are reported "net" after deductions for amortization payments on loans and for the impact of other measures reducing debt (e.g. forgiveness, repatriation of capital and occasionally recoveries on grants). Data on interest receipts and other debt servicing costs are not included in the statistics unless capitalized into the value of loans as part of debt rescheduling. Net disbursement flows equal total new flows (gross disbursements) in any single year minus repayments of outstanding loan obligations during that same time period. As a result net disbursements in some years can be negative. In such cases values are indicated with a minus (-) sign in the tables. Assistance from Russia is not included in any totals as a constant series of data from Russia is not available.

When ODA is specified by sector, such assistance is classified by answering the question "which specific area of the recipient's economic or social structure is the transfer intended to foster?" and not necessarily the type of goods or services provided by the donor. Not all ODA is allocable by sector, such as aid for general development purposes or general budget support. Therefore, aggregations of sector allocations may not sum to total ODA.

The LAC presents the most recently available data from its sources at the time of publication at which time the listing for "Other United Nations" donors was not reported.

Figures

Foreign Assistance in LAC

Source OECD/DAC, *International Development Statistics online database* as of December, 2006.

Top Aid Dependent Countries

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definition *Aid as % of GNI* includes both official development assistance (ODA) and official aid. Official aid refers to net aid flows from official donors to countries and territories in part II of the DAC list of recipients. Ratios are computed using values in US dollars converted at official exchange rates. Period averages are not weighted. Countries whose aid is greater than 2% of GNI are shown.

1996-2005 Cumulative Assistance in Selected Sectors

Source OECD/DAC, *International Development Statistics online database* as of August, 2007.

Definitions *Cumulative assistance* is the sum of sector-allocable net ODA from 1996 through 2005 in billions of current U.S. dollars. For definitions of sector-allocable ODA, see the technical notes for tables 12.31-42.

Table 12.1

Assistance to LAC Region

Source OECD/DAC, *International Development Statistics online database* as of December, 2006.

Definitions *1996-2005* the sum of net ODA provided from 1996 through 2005. *Share of 10-year LAC total* the percentage share of each donor's net assistance with respect to the total net assistance provided to the region from 1996 through 2005.

Table 12.2

Total Assistance Received

Source OECD/DAC, *International Development Statistics online database* as of December, 2006.

Definitions *1996-2005* the sum of net ODA provided from 1996 through 2005. *Share of 10-year LAC total* the percentage share of each recipient's net assistance with respect to the total net assistance received to the region from 1996 through 2005.

Table 12.3

Development Assistance Rankings

Source OECD/DAC, *International Development Statistics online database* as of December, 2006.

Definitions *% total* the percentage share of total bilateral net assistance that the respective donor's ODA represents.

Table 12.4

Aid Dependency

Source World Bank, *World Development Indicators* (online version) as of July, 2007.

Definitions *Aid* includes both net ODA and net official aid. Official aid refers to aid flows from official donors to countries and territories in part II of the DAC list of recipients. Ratios are computed using values in U.S. dollars converted at official exchange rates. *Aid per capita* is calculated by dividing total aid (as defined above) by the midyear population estimate.

Tables 12.5 – 12.30

Development Assistance by Recipient

Source OECD/DAC, *International Development Statistics online database* as of December, 2006.

Definitions *1996-2005* the sum of net ODA provided from 1996 through 2005. *Share of 10-year LAC total* the percentage share of each donor's net assistance with respect to the total net assistance provided to the respective country from 1996 through 2005.

Tables 12.31 – 12.42

Development Assistance by Sector

Source OECD/DAC, *International Development Statistics online database* as of August, 2007.

Definitions *Action relating to debt* includes ODA for action relating to debt, debt forgiveness, relief of multilateral debt, rescheduling and refinancing, debt for development swap, other debt swap, and debt buy-back. *Agriculture, Forestry, and Fishing* includes assistance for agricultural policy and administrative management, agricultural development, agricultural land resources, agricultural water resources, agricultural inputs, food crop production, industrial crops/export crops, livestock, agrarian reform, agricultural alternative development, agricultural extension, agricultural education/training, agricultural research, agricultural services, plant and post-harvest

protection and pest control, agricultural financial services, agricultural co-operatives, and livestock/veterinary services; as well as assistance for forestry policy and administrative management, forestry development, fuelwood/charcoal, forestry education/training, forestry research, and forestry services; and, assistance for fishing policy and administrative management, fishery development, fishery education/training, fishery research, and fishery services. *Banking & Financial Services* is assistance for financial policy and administrative management, monetary institutions, formal sector financial intermediaries, informal/semi-formal financial intermediaries, and education/training in banking and financial services. *Business & Other Services* is assistance for business support services and institutions, as well as privatization. *Communications* includes assistance for communications policy and administrative management, telecom-munications, radio, television, print media, and information and communication technology (ITC). *Education* includes assistance for/to education policy and administrative management, education facilities and training, teacher training, and educational research where the level of education is unknown. *Emergency Assistance & Reconstruction* is assistance resulting from man-made and/or natural disasters and includes assistance for material relief, emergency food aid, relief and coordination, and protection and support services, assistance for short-term reconstruction work after an emergency or conflict, disaster risk reduction activities, early warning systems, emergency contingency stocks, and contingency planning including preparations for forced displacement. *Energy* is assistance for energy policy and administrative management, power generation and non-renewable sources, power generation and renewable sources, electrical transmission and distribution, gas distribution, oil-fired power plants, gas-fired power plants, coal-fired power plants, nuclear power plants, hydro-electric power plants, geothermal energy, solar energy, wind power, ocean power, biomass, energy education and training, and energy research. *General Environment Protection* includes assistance for environmental policy and administrative management, biosphere protection, bio-diversity, site preservation, flood prevention/control, environmental education and training, and environmental research. *Government & Civil Society* includes assistance for economic and development policy/planning, public sector financial management, legal and judicial development, government administration, strengthening civil society, elections, human rights, and the free flow of information. *Health* covers assistance for health policy and administration management, medical education/training, medical research, and medical services. *Industry, Mining, and Construction* includes assistance for industrial policy and administrative management, industrial development, SME development, cottage industries and handicraft, agro-industries, forest industries, textiles, leather and substitutes, chemicals, fertilizer plants, cement/lime/plaster, energy manufacturing, pharmaceutical production, basic metal industries, non-ferrous metal industries, engineering, transport equipment industry, and technological research and development; as well as, mineral/mining policy and administrative management, mineral protection and exploration, coal, oil and gas, ferrous metals, nonferrous metals, precious metals/materials, industrial minerals, fertilizer minerals, and offshore minerals; and, construction policy and administrative management. *Population Programs* includes assistance for population policy and administrative management, reproductive health care, family planning, STD control including HIV/AIDs, and personnel development for population and reproductive health. *Tourism* includes assistance for tourism policy and administrative management. *Trade Policy and Regulations* is assistance for trade policy and administrative management, trade facilitation, regional trade agreements (RTAs), multilateral trade negotiations, and trade education/training. *Transport & Storage* includes assistance for transportation policy and administrative management, road transport, rail transport, water transport, air transport, storage, and education and training in transportation and storage. *Water Supply & Sanitation* covers assistance for water resources policy and administrative management, water resources protection, water supply and sanitation for large systems, basic drinking water supply and basic sanitation, river development, waste management/disposal, and education and training in water supply and sanitation. *1996-2005* is the sum of net ODA received from 1996 through 2005. *Share of 10-year LAC total* the percentage share of each country's net assistance in the respective sector with respect to the total net assistance received by the LAC region in the same sector.
