Annual Budget Submission

FY 1987

BUREAU FOR PROGRAM AND POLICY COORDINATION

OFFICE OF WOMEN IN DEVELOPMENT

JUNE 1985

Agency for International Development
Washington, D.C. 20523

1987

ACTION PLAN

PPC/WID

STRATEGY STATEMENT

The Office of Women in Development's strategies and programs for 1987 will be developed to assist A.I.D. in achieving its policy objectives for including LDC women's actual and potential roles into the mainstream of development activities.

To further this goal, the Women in Development Office will target its efforts to A.I.D.'s bureaus, offices, and missions to augment and enhance their multi-sectoral programs. This assistance will focus on agricultural development, small enterprise development, mechanisms to assure access to resources, and the transfer of technical assistance for education and skills training programs. All of these activities will be conducted within the framework of this Administration's four pillars of development: policy dialogue, private sector development, institutional development, and technology transfer.

To institutionalize the concept of integrating women into development programs, the Women in Development Office suggests certain operational and budgetary actions to accommodate technical assistance and management/administrative directives. The WID Office proposes that the following strategies and programs outlined in the Forward Plan be initiated in 1986 and be expanded upon, as appropriate, in 1987.

FORWARD PLAN

Operational Objectives

- The Office of Women in Development will continue its efforts to increase the knowledge and skills of mission, regional and central bureau personnel to appropriately address the roles of women in all Agency development activities through WID training workshops; by reviewing and assessing relevant Agency strategies and planning documents; and providing analytical and advisory assistance for sector-specific and/or region-specific gender issues.

- By drawing upon the women in development expertise found in the Title XII and NGO contracting community, PPC/WID will

continue to leverage its development assistance funds with A.I.D.'s bureaus, offices and missions to provide analytical and advisory research services relative to sector-specific and/or region-specific gender issues.

- The WID Office will streamline its project review process and consolidate its subprojects to eliminate redundancy and improve budgetary efficiency.

- PPC/WID will continue to utilize its development assistance funds to provide technical assistance to augment on-going and/or initiate new A.I.D. bureau, office, and mission projects which (a) improve women's access to resources and (b) effectively utilize women's time and talents in the development effort.

- The Office will utilize an IQC for gender specific analysis services to assist the Agency to incorporate women into the total development process. These services will include but not be limited to researching and writing women in development guidance papers for critical development sectors, and by documenting Agency attempts to integrate women into project activities.

- PPC/WID will continue its concentration on non-traditional areas of interest to women, such as agricultural development, micro-enterprise development and income generation, and credit-related programs.

- PPC/WID will increase its attempts to bring more females into A.I.D.'s participant training programs and educational activities (non-formal education, mid-level management, administrative, business, financial and marketing instruction) by utilizing development assistance funds to research the constraints to female involvement in these activities, developing recommendations to counter these constraints, and sharing this information with appropriate Agency training offices and missions.

- The Office will issue a RFP for country-specific replication of an existing micro-computer simulation model which illustrates the economic value of including women and girls in total LDC national planning efforts. This program is intended to encourage policy dialogue between LDC development planners and relevant missions in critical sectors of literacy and education, agriculture, health, and natural resource development.

- PPC/WID will continue its liaison with and participation in activities to encourage stronger measures to address women in the development concerns of the total international donor community; i.e., OECD/DAC, the U.N. system (Commission on Status of Women, ILO, FAO, UNESCO, UNDP, Voluntary Fund, ECOSOC), ADB, and so forth.

Management Steps

- PPC/WID will coordinate with those Agency training offices, as well as external institutions, responsible for the sponsorship of training programs for mission, regional and central bureau personnel, and for representatives from the PVO community, Title XII institutions, and other development organizations. This effort will also include review of participant training endeavors to increase female enrollment in Agency training programs, particularly in non-traditional sectors of agriculture and natural resource development.

- PPC/WID will continue to act as a catalyst to and provide technical assistance for A.I.D. personnel and contracting organizations to address women in development concerns, especially by leveraging its funds with other Agency bureaus, offices, and missions.

- The Office will provide macro and micro gender-specific data for Agency personnel and other development practitioners.

- PPC/WID will pursue mechanisms for reviewing unsolicited proposals by Agency and/or external review committees.

- In FY 87, PPC/WID proposes to delete one of its four subprojects, National Statistics on Women, and combine its functions for "the compilation of statistics on women" with the subproject of Strategies and Resources. The Strategies and Resources subproject includes a major series of activities including information compilation and exchange, development of case studies and workshops and projects and issue papers relating to the overall A.I.D. programming of women in development concerns.

- WID will ensure that the expenditure of grant monies for research, technical assistance, training, and evaluations properly reflect Agency and PPC/WID policies, strategies and overall objectives.

- The Office will direct project monies for sectoral assessments to measure and increase the Agency's response to integrating women in all strategies and programs.

- PPC/WID will continue its participation in international donor community efforts to improve women in development activities.

Benchmarks

- WID components are integrated into Agency training programs and new training tools are developed for Agency personnel;

- Agency strategy and planning documents reflect distinct roles and functions of LDC women as they relate to project implementation;

- research materials contain sex-disaggregated data, gender-specific, social-soundness and economic analyses;

- projects reflect overall Agency and Office strategies and objectives;

- project monies are leveraged with the missions, bureaus and offices to augment on-going and/or initiate new projects for inclusion of women as beneficiaries and agents in all phases of multi-sectoral development activities; and,

- project and fiscal management systems are simplified to accommodate operational and administrative directives.

SUMMARY OF ACCOMPLISHMENTS BASED ON FY 86 BENCHMARKS

- The WID Office has continued to train mission, regional and central bureau personnel, as well as development-related organizations and academic institution's representatives by holding two WID workshops in Washington and one in Bangkok, Thailand during FY 1985. Approximately eighty AID staff and forty NGO/University representatives attended these three workshops.

- During FY 85, an increasing number of Agency planning documents, such as CDSSs, PIDs and PPs, have reflected the distinct roles and functions of LDC women, although much remains to be done in this area. The present improvement is not the result of greater attention to these documents by WID Office staff, since this has not been possible. Instead, the improvement results from more AID direct hire staff raising the WID issues during document review sessions after they have attended the WID workshops and become familiarized with the WID issues.

  In FY 85, more Agency research materials, such as social soundness and economic analyses documents, are containing gender-specific references, but statistical data (such as educational levels and needs, credit requirements and constraints, and fuelwood collections and uses) supplied with planning documents most frequently still fail to be sex-disaggregated. This problem can most positively be addressed through increasing the WID training for the AID mission personnel, since most of the data is collected, analyzed, and presented by mission staff.

- The WID Office, however, did fund a large number of documents which have been published in FY 85 which contain sex-disaggregated data for use in program and project planning. These include the five volumes of the BUCEN-prepared Women of the World series, and the teaching module entitled "Gender Roles in Development Projects."

- The WID Office and the Agency have made progress in FY 85 in having AID's development projects reflect more adequately the Agency's WID strategies and objectives. Again, much of this progress appears to be the result of the efforts being undertaken by those AID staff members who have gone through the WID workshops and who have come to realize the significance of the WID issues to the economic success of AID's projects.

- The Office of Women in Development has been unable to improve its coverage of regional and central bureau activities during FY 85 since the Office has suffered a reduction in staff commensurate with that occurring throughout the Agency as a response to Congressional and Executive staffing pattern decisions. Thus, a great many planning documents have failed to have PPC/WID review, especially PIDs and PPs, because of the shortage of WID staff and time.

- In FY 85, the WID office has been very successful in leveraging its monies against those of other Agency bureaus and offices in order to impact on a wider range of projects. For example, PPC/WID is presently co-funding a study in entrepreneurship and micro-enterprise development in Morocco with NE/TECH and the S&T Bureau. WID also joined with NE/TECH to produce the first simulation model of women's roles in economic development, using Yemen as the test country.

IV - NEW PROJECT NARRATIVE

I. TECHNICAL ASSISTANCE AND WID CENTERS

Through the Technical Assistance and WID Centers sub-project, totaling $1,100,000, the Office of Women in Development provides monies for research, training, and technical assistance to enhance the integration of women into the Agency's multi-sectoral development programs. This is accomplished through cooperative efforts with A.I.D.'s bureaus and central offices, missions, PVOs, and Title XII and other academic institutions.

The Office will continue its efforts to integrate women into on-going A.I.D.-funded field projects by augmenting existing projects or helping initiate new endeavors to bring women's roles into the mainstream of development efforts.

These efforts will include, but not be limited to, providing technical assistance for supplementing on-site design or evaluation teams; portfolio reviews; preparing sector-specific guidance relative to gender concerns; and supporting endeavors to increase female participation in Agency training activities, as well as designing appropriate training mechanisms for both Agency and development institutions' personnel.

Further, in FY 86 the Office intends to pursue preparation of a RFP for country-specific replication of an existing micro-computer simulation model which illustrates the economic value of including women and girls in total LDC national planning efforts. This program is intended to encourage policy dialogue between LDC development planners and relevant missions in critical sectors of literacy and education, agriculture, health, and natural resource development. If possible, the Office will be interested in a major evaluation of this particular project in the last quarter of FY 87 to both determine its utility for development planners as well as to assess its replication in future years.

Additionally, the Office of Women in Development intends to utilize an IQC mechanism to provide critical technical assistance to the Agency, particularly in the areas of agriculture, natural resource development, income generating activities, and training.

II. STRATEGIES AND RESOURCES

The FY 87 request for this new consolidated sub-project is $1,050,000. These funds will be used to commission, publish, and distribute studies and materials; hold specialized seminars

and briefings on women in development topics; sponsor action-oriented research; collect and analyze data; and, exchange information with other national and international agencies, organizations, and donors involved in the women in development effort.

Additionally, the Office will continue to commission and distribute materials which include country specific studies on the status women, statistical data on women, and special research and project studies on the agricultural and income needs of rural women.

Further, this sub-project will incorporate the previous National Statistics on Women sub-project, which includes funds to assist in the compilation of an adequate data base on women in developing countries for planning, program development, project design, implementation and evaluation efforts. It is critical that the Women in Development Office continue to offer missions and bureaus relevant, country and sector-specific statistics for identifying priority groups and key sectoral and project objectives. In particular, such information, disaggregated by sex, provides data on women's participation in the informal sector, in off-farm employment, and in on-farm production and other activities. Such information can assist A.I.D. personnel in identifying possible deficiencies in project designs that can affect effective implementation at a later date.

III. WOMEN'S ORGANIZATIONS AND PARTICIPATION

The FY 87 funding request for this sub-project will be $475,000, for providing small grants to private and public organizations in implementing A.I.D.'s policy on women in development.

In particular, the Office will continue to address areas of income-generation, private sector development, agriculture development, technology transfer, and institutional development. Special attention will be given those projects which complement or expand upon the bureaus' and missions' activities. And, as with all three sub-projects, the Office will attempt to leverage these funds whenever possible, either with the Agency's on-going projects, or through matching fund mechanisms with the women's organizations themselves.

Under this particular sub-project, the Office is also interested in pursuing cooperative funding approaches with the Office of Private Enterprise Development. Women's access to work and income is crucial to their full integration into the economies of their countries. PPC/WID is, therefore, hopeful such economic development programs can be designed and/or expanded within the framework of the Administration's private sector development programs.

TABLE V NARRATIVE

PPC/WID's major effort in FY 87 will be drawn from the sub-project of Technical Assistance and Women in Development Centers in ARDN, SDA and Education. At $1,100,000, this sub-project will provide monies to augment existing, or help initiate new, women in development activities for A.I.D. missions, bureaus, and offices.

The second most important group will combine the functions of the Strategies and Resources Sub-Project with the National Statistics on Women sub-project. This new consolidated sub-project will retain the title of Strategies and Resources, but will combine the series of activities from both sub-projects; i.e., information compilation and exchange, development of case studies and workshops, and projects and issue papers relating to the overall A.I.D. programming of women in development concerns. This sub-project will total $1,050,000 in the ARDN, SDA, Population, and Education projects for FY 87.

The third group of sub-projects falls under Women's Organizations and Participation and totals $475,000. This project will continue PPC/WID's program of grants, in concert with agency objectives, to international and indigenous development groups for designing, implementing, and evaluating projects which have major women in development components.

SUMMARY

PPC/WID will retain its present four projects: (1) Agriculture, Rural Development and Nutrition (ARDN); (2) Population (POP); (3) Education (EDU); and (4) Selected Development Assistance (SDA). The following changes to each project from FY 86 to FY 87 are as follows:

	FY 86	FY 87
ARDN	510,000	900,000
POP	100,000	100,000
EDU	700,000	850,000
SDA	1,190,000	775,000
TOTAL	2,500,000	2,625,000
