

STATE COMPANY FOR INFORMATION SYSTEMS (ISC)

I. STRATEGIC PARTNERS SOUGHT

ISC is a leading information technology Iraq. It specializes in providing high standard technology software systems and services. ISC is interested in meeting with international information and technology firms in any of the following areas:

- development and supply of in-house software systems
- selling, implementing and maintaining international software and operating systems (Oracle, Linux, Microsoft, etc.)
- developing infrastructures in the rapid expansion of software and hardware used in internet and intranet systems
- participating in the Iraq E-Government national project
- assisting in penetrating the private sector
- assisting in penetrating the oil and petrochemical sectors
- establishing a licensed center for the supply, implementation and maintenance of IT and other office equipment
- establishing a fully equipped training and internet based test centre in association with international organizations that certify students in various forms of information technology, English language, etc.- for example, Oracle, Cisco, Microsoft, TOEFL, ILETS

ISC would like to explore with these firms different types of strategic partnerships ranging from development and supply of software systems, reseller agreements, licensing, training center certification, international systems (local and internet-based) and the formation of joint-ventures to develop other commercial opportunities. The company is willing and open to discuss all forms of partnering arrangement with companies that have proven, reliable, technologies and practices together with international experience and references.
