USG Strategy and USAID's Activities in the Health Sector

USG Strategy Priorities	USAID Intermediate Results (IR)	USAID Activities
Expand access to basic package of services	Access to essential health, nutrition, and family planning services increased	Expand support for prevention and care services in priority corridors by establishing functioning MOH Health Networks
		Continue support to the MOH Departments for services for vulnerable populations outside priority corridors
		Immunization, TB, cholera, and family planning via MOH in PaP
Establish disability care	Services for Persons with Disabilities (PWD) increased	Establish 4-6 service centers for persons with disabilities
		Train paramedical rehabilitation staff
		Strengthen the Ministries of Health and Social Affairs to support persons with disabilities
		Train organizations for PWD in advocacy and support
Increase support to the Ministry of Health (MOH) to build its capacity to govern and manage the health system	Ministry of Health capacity to manage healthcare delivery strengthened	Establish MOH Services Contracting Unit
		Strengthen MOH systems and policies for human resource planning, deployment and management
		Improve medical product and commodity logistics system
		Assist MOH with health financing policies and structures
		Institutionalize capacity to improve quality of health care
		Improve disease surveillance & health information systems
		Provide assistance for workforce development
Rebuild public health infrastructure in earth-quake zone and USG development corridors	Treated as a cross-cutting through each of the other intermediate results	Repair or construct key facilities damaged by earthquake
		Construct or renovate 11-15 health facilities

The centerpiece of new USAID health programming will support GOH in planning, managing and acquisition of health services. A key feature, USAID hopes to negotiate a **Fixed Amount Reimbursement Agreement (FARA)** with the GOH.

Additional procurements will be made to 1) strengthen the technical and management functions of GOH institutions and NGOs carrying out service delivery assistance, and 2) monitor performance and certify payments made through partner country systems.

Check USAID Business Forecast for updated information.
