Farmers, after this, visit equipment for production vegetables and flours, (equipment for heating protection area in vegetables productions, alternatives energy source for heating area,). Big problem in our country is problem with distribution seed material from best world wide production of seed.

The first day, we was visit fair to 5 clock p.m.

The second days we come on fair in 9.30 p.m. organize in group. The farmers visit company how making irrigation equipment in different variant, type and construction. Our farmers, show big interesting for new form and type of fertilizer with high per-cent of potassium and phosphor, and microelement. With implementations on this fertilizer, our agriculture production will be with great quality and quantity.

We make contact and meeting with person (agent), from company how production "MEGAGREEN" from Croatia.

This product is organic fertilizer, production on base of nanotechnology.

In first moment, we make agree for test MEGAGREEN in our different agriculture production. This fertilizer is having a certificate from European commission for use in organic agriculture production.

The visitors show interesting for processing agriculture products, present from European company and Ministry of economy of different country. Farmers make visits on our bench, Ministry of agriculture and economy.

Newly for our farmers, is harvesting machinery for different agriculture product in vegetables production. This machine on our agriculture production is not use.

The visitors have chance for provide a specific literature on different agriculture machine, production and information, prospect and information material.

The second day from Novi Sad we departure per Skopje in 5 p.m..
