Governance*

USAID
FROM THE AMERICAN PEOPLE

Suggested citation: Health Policy Project. 2013. *Directory of Health Policy Institutions in Kenya: Strengthening Health Policy, Finance, and Governance*. Nairobi: Futures Group.

The Health Policy Project is a five-year cooperative agreement funded by the U.S. Agency for International Development under Agreement No. AID-OAA-A-10-00067, beginning September 30, 2010. The project's HIV activities are supported by the U.S. President's Emergency Plan for AIDS Relief (PEPFAR). HPP is implemented by Futures Group, in collaboration with CEDPA (part of Plan International USA), Futures Institute, Partners in Population and Development, Africa Regional Office (PPD ARO), Population Reference Bureau (PRB), RTI International, and the White Ribbon Alliance for Safe Motherhood (WRA).

The information provided in this booklet is not official U.S. Government information and does not represent the views or positions of the U.S. Agency for International Development or the U.S. Government.

Acknowledgements

The Health Policy Project/Kenya gratefully acknowledges the efforts of Robinson Kahuthu and Lucy Nkirote to collect, compile, and verify information from the organisations that agreed to participate in this directory. The project is thankful for the valuable guidance provided by the Ministry of Medical Services and the Ministry of Public Health and Sanitation to identify and collect information from organisations specializing in health policy, finance, and governance.

The project also thanks Margaret Dadian, Nicole Judice, Pol Klein, Aria Gray, Lori Merritt, Stephen Muchiri, Tyler Bradford, and Lory Frenkel for contributing to the production of this directory.

Preface

The Health Policy Project (HPP), a global partnership funded by the U.S. Agency for International Development and managed by Futures Group, works with the Kenyan government to strengthen national and local capacity in health policy, financing, governance, and advocacy.

An important capacity-building activity is to identify Kenyan organisations and consulting firms—both private and parastatal—that focus on key policy, governance, and finance issues in health. In 2012, HPP/Kenya undertook a structured inventory of Kenyan institutions that work in these fields. After a comprehensive search, the project identified 14 such organisations, whose capabilities and accomplishments are described in this directory.

The directory—which will also be developed as a web-based resource later in 2013—is designed to make government agencies, development partners, and other local and international organisations aware of Kenyan institutions with the skills and experience to support their needs.

The directory will also promote information sharing among the institutions it lists, as well as collaboration and partnerships, both international-local and local-local. These kinds of synergies enable institutions to avoid duplication of efforts already undertaken by others.

This directory will be updated periodically with new information at www.healthpolicyproject.com/index.cfm?id=Kenya-Directory.
