FROM THE AMERICAN PEOPLE

## Regulatory and Energy Assistance

### **GAS REGULATORY AND OPERATIONAL STRUCTURE PURSUANT TO MEETING WITH DGTREN REAP ANALYSIS 4-10-09**

#### Regulator

Interacts with regional authorities linked with BiH  
Interacts with Entity authorities  
Regulates transportation linked with neighboring transportation systems  
One tariff for all transportation  
Legally independent  
Financially independent  
Authority to make decisions  
Authority to resolve disputes  
Regulates the ISO

#### ISO

Common to all TSOs  
Creates common Grid Code  
Performs the functions of one network code  
[Check functions of the Austrian ISO.]

#### Issues:

Would ISO be the country representative in international bodies and efforts like the Gas Ring?

Who would “operate” interconnects and conduct explicit auctions?

Who would create rules and be the national contact for security of supply?
