MOFTER PROPOSED TASKS LIST

REAP constructed the following proposed energy sector list of task areas for MOFTER from the Energy Community Secretariat's Annual Work Plan¹ and from items that REAP thinks are important.

1. BiH obligations regarding the implementation of Acquis as presented in the annual report of the Energy Community Secretariat and Consultant's report²
2. Gas Law
3. Security of Supply and BiH Energy Strategy
4. Implementation of the Third Liberalization Package
5. Market Opening
 - a. Wholesale regional Market – Action Plan for BiH
 - b. Policy paper on impediments and preconditions for successful market functioning
 - c. Export Fee
 - d. ISO-Transco relations regarding preconditions for Market opening
6. *Renewables (not in the REAP SOW)*
7. *Energy Efficiency (not in the REAP SOW)*
8. Procurement Law
9. *Environment and climate changes (not in the REAP SOW)*
10. Regional activities- coordination and participation
 - a. Coordinated Capacity Allocation – ISO - SERC
 - b. *The implementation of the list of Generally Applicable Standards (not in the REAP SOW)*
 - c. *Development of energy infrastructure (not in the REAP SOW)*
 - d. *Implementation of the competition law into energy sector (not in the REAP SOW)*
 - e. *Regional Energy Strategy (next meeting on February 28 2012) (not in the REAP SOW)*

The mandate of the Regional Energy Strategy Task Force is to elaborate a comprehensive strategy, covering:

- i. Demand for new power generation capacity to cover the increasing electricity demand
- ii. Maintaining the level of security for electricity supply in view of the need for decommissioning of obsolete and polluting power units;

¹ <http://www.energy-community.org>

- iii. The drive for decarbonisation of the energy supply in the Energy Community
- iv. Increasing energy efficiency and incorporating this response in demand planning
- v. Potential for development of RES, support schemes and realistic investment plans.
- vi. Potential for larger gas penetration in the Western Balkans due to the construction of new pipelines.
