

Most Women Can Safely Use OC Pills

You should NOT use the Pill if you:

May be pregnant

Gave birth in the last 3 weeks

Are breastfeeding a baby less than 6 months old

Have high blood pressure

BOTH smoke cigarettes **AND** are 35 or older

Have severe headaches

Ever had breast cancer

Had blood clots in your legs or lungs

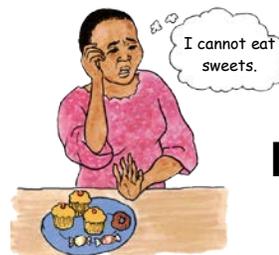

Have liver or gallbladder disease

Had a stroke or heart attack

Have been told by a doctor that you have lupus

Have diabetes

Take medicine for tuberculosis, seizures, or HIV/AIDS

Do you think you can use OC Pills?
