

# Integrated Community Case Management of Childhood Illness

[CCMCentral.com](http://CCMCentral.com)

CCMCentral.com is a product of the global iCCM Task Force. The website aims to centralize resources, provide examples of best practices and give access to tools on planning, implementation, monitoring and scale-up of community case management of childhood illness. It hosts discussions and houses the documents of the seven iCCM Task Force subgroups. The website is currently managed by USAID's global flagship Maternal and Child Survival Program (MCSP).

Information and resources on:

- Benchmarks and Indicators
- Country Implementation
- iCCM Symposium
- iCCM and the Global Fund
