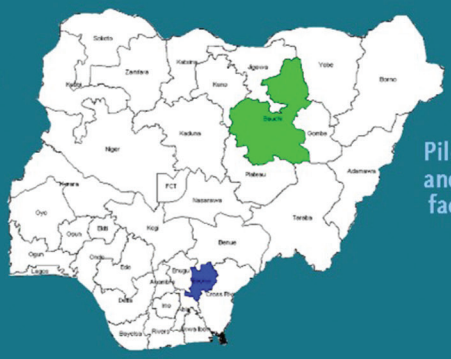
USAID | DELIVER PROJECT

FROM THE AMERICAN PEOPLE

BAUCHI & EBONYI DDIC PILOT

Direct Delivery and Information Capture (DDIC) is a model of Vendor Managed Inventory (VMI)

Two states were selected for the pilot in Nigeria

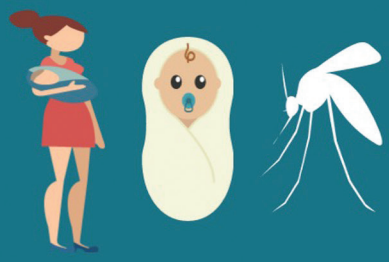


Pilot sites are hospitals and primary healthcare facilities that are road accessible

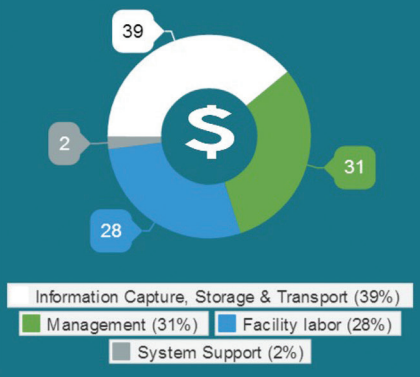
The DDIC pilot was designed in a workshop that included key State Ministry of Health officials and other stakeholders

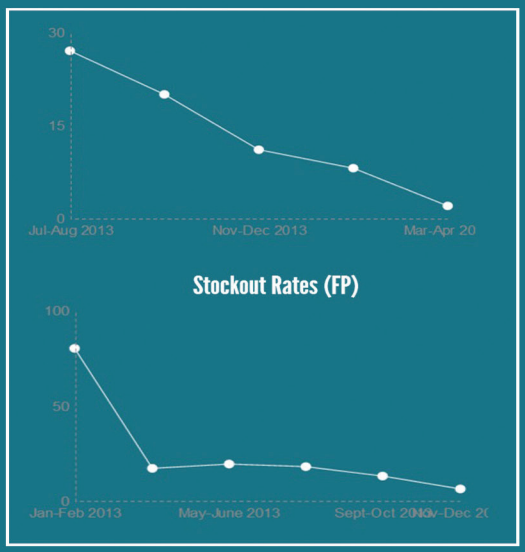
BAUCHI		EBONYI
July 2013	Launch Date	January 2013
165	Health Facilities	213
305	Total Annual Commodity Volume Delivered (m3)	129
$1,910 USD	Total Costs* per m3 of Commodity Delivered	$3,425 USD
	*Total costs include management, health facility personnel, and distribution	
$3,565 USD	Estimated Costs per m3 at Ebonyi's scale	$3,425 USD

DDIC manages and distributes anti-malarial, family planning, and maternal and child health commodities to health facilities



Functional Cost Breakdown Ebonyi





In February of 2014 the USAID | DELIVER PROJECT and its partners were recognized with an award from the Alliance for Malaria Prevention for the DDIC intervention in improving the last mile distribution of health commodities.
