WEO	Ward Executive Officer

## **EXECUTIVE SUMMARY**

Pamoja Tuwalee is a five year USAID funded program implemented by four partners in five zones namely Coast, Central, Lake, Northern and Southern. FHI360 covers the Coast zone which includes the regions of Dar es Salaam, Morogoro and Coast in the mainland, Unguja and Pemba islands in Zanzibar. The broad goal of the program is to improve the quality of life and wellbeing of Most Vulnerable Children (MVC) and their households by empowering households and communities to provide comprehensive and sustainable care, support and protection.

In quarter four - July-September 2012, the program continued to implement different activities that attributed to the realisation of the expected results as stipulated in the four objectives of this program.

Under objective one, the program maintained the effort from previous quarters in enhancing the capacity of Local Government Authorities (LGAs) to care, support and protect MVC. More LGAs, MVCCs and community members showed their potential in supporting, caring and protection for MVC through their in-kind and financial contributions. These includes facilitation of IPG meetings, MVC fund by MVCCs totalling TZS 5,138,950 and land allocated to MVCCs to cultivate food crops to support MVC households.

Under objective two a number of activities were implemented to reduce the economic vulnerability of families and empower them to provide for the essential needs of the children in their care through: SILC where a total of TZS 55,574,600 was saved and TZS 3,071,200 spent to respond to various needs of MVC. This was coupled with integration of household economic strengthening activities with complementary interventions, such as home gardening, local chicken rearing and basic business skills to 487 caregivers (175M, 312F).

Objective three activities were designed to increase MVC Household Access to Comprehensive Care for MVC. During this reporting period, the program managed to support 30,538 MVC (15,404M, 15,134F) with a minimum of one core service including 3542 MVC (1777 M and 1765 F) provided with educational support and 5,140 MVC (2596 M and 2544 F) primary health care support. Through referrals and linkages by sub grantees, MVCCs and volunteers the programs has been able to support MVC and their household's food and nutritional services.

Also, to improve the resilience, livelihood and self-care skills a number of activities were accomplished. These include reaching MVC through children clubs. Psychosocial support was provided to MVC during children club sessions aimed to meet children's emotional, social, mental and spiritual needs which are essential elements of development and wellbeing of a child. This quarter, 5,417 MVC (2,576M, 2,841F) were reached. At the same time, as a result of care givers training on disabled, a cumulative total of 456 MVC (224 Male and 232 Female) were identified and support provided according to their specific needs.

## **REGIONAL IMPLEMENTATION REPORT**

### **INTRODUCTION**

Pamoja Tuwalee is a five year program beginning June 2010 to May 2015. The program is funded by the President's Emergency Plan for AIDS Relief (PEPFAR) through the United States Agency for International Development (USAID). The program is implemented by four partners in five zones namely Coast, Central, Lake, Northern and Southern. FHI360 covers the Coast zone which includes Dar es Salaam, Morogoro and Coast regions in the mainland, Unguja and Pemba in Zanzibar. The broad goal of the program is to improve the quality of life and well-being of Most Vulnerable Children (MVC) and their households by empowering households and communities to provide comprehensive and sustainable care, support and protection.

The Coast zone is bordered by Indian Ocean on the East Coast and regions of Iringa, Dodoma, Tanga and Lindi on the other sides in mainland Tanzania. Unguja and Pemba are islands, surrounded by the Indian Ocean. The program target was to cover all 26 districts in the zone. However, it was noted that PASADA who is a major partner and that receives funds from USAID operates in Dar es Salaam hence we agreed to leave Temeke Municipal to her. In Coast region, the process for implementation of the program in Mafia district through their Mafia Parish which is a parish under Arch diocese of Dar es Salaam. To date, the program has covered a total of 25 districts, two in Dar es Salaam, six in Morogoro, seven in Coast and 10 in Zanzibar.

The projected population in 2011 in the whole Coast zone is estimated at 7,759,3101. Dar es Salaam has the highest number of people (3,194,903) followed by Morogoro (2,162,197), Zanzibar islands (1,315,522) and Coast region (1,086,658). With the estimated proportion of children (0-18years) being 51% of the general population, this equate to an estimate of 3,957,248 children in the Coast zone. The national census conducted in August 2012 will provide accurate data of the current population and percentage of children. HIV and AIDS prevalence is highest in Dar es Salaam, estimated at 9% and its adverse effects of which have left many households economically unstable and many orphaned children. This is followed by Coast region with a prevalence of 7%, Morogoro 5% and Zanzibar with a prevalence of 1%.

In this reporting period, the program reached more MVC (30,538 compared to 17,399 last quarter) with at least one core service. The annual achievement for this FY 2012 is 44,887 MVC, equivalent to 104% against the target of 43,185.

Table 1: Program Geographical Coverage and MVC Reach

Region	Dar es Salaam	Coast	Morogoro	Zanzibar	Total
Total # of Sub grantees per region	2	3	3	2	10
Total # districts	3	7	6	10	26

18+ years	563	1569	398	563	3093

## PROGRAM ADMINISTRATION AND MANAGEMENT

### Staffing

During the reporting period, five new staff were recruited to the program: One Capacity Building Manager; Grants Officer for Morogoro region; and three drivers for Dar es Salaam, Coast and Morogoro regions. The former two are replacements while the latter are new positions as the program procured new vehicles for the regional offices. Efforts are underway to recruit a Senior Technical Officer for Monitoring and Evaluation to replace the one who left in June 2012.

### Awards.

In this reporting period, there was an increase of 20% on fund disbursements and 26% on sub grantee spending when compared to the last quarter. Funds amounting to TZS 287,536,773 was disbursed to the 10 CSO partners (sub grantees) for program implementation. This adds to TZS 977,414,773 disbursed in FY 2012 - an increase of TZS 861,550,373 (744%) from TZS 115,864,400 disbursed last year. The huge increase is due to the increased number of sub grantees from 2 last year to 10 and the geographical coverage from 2 districts to 25. The cumulative disbursement to sub grantees is TZS 1,093,279,173 to date.

**Table 2: Fund Disbursed to Subgrantees and Subgrantee Expenditure - July to Sept 2012**

Faraja Trust Fund	16,990,000	16,919,700
Roman Catholic Diocese of Mahenge	20,565,000	33,494,525
Huruma AIDS Concern and Care (HACOCA)	17,810,000	23,815,000
Kifaru Community Development in Tanzania (KICODET)	41,425,500	44,605,854
Baraza la Misikiti Tanzania (BAMITA)	40,164,773	24,553,600
Jipeni Moyo Women and Community Organization (JIMOWACO)	44,270,000	50,807,068
Roman Catholic Archdiocese of Dar es Salaam	18,769,500	23,801,600
Walio Katika Mapambano na UKIMWI Tanzania - WAMATA Dar	24,028,500	23,740,500
Walio Katika Mapambano na UKIMWI Tanzania (WAMATA) Pemba	23,009,500	23,085,000
Zanzibar Muslim Women Association to Support Orphans (ZAMWASO)	40,504,000	40,694,685
<b>Total</b>	<b>287,536,773</b>	<b>305,517,532</b>

### ***Quarterly Report – July to Sept 2012***

As indicated in the table above, total funds transferred to Sub grantees is less than the total funds that was spent during the quarter, this is due to the fact that, sub grantees had a balance of TZS 85,270,474 carried forward from the previous quarter.

During the reporting period, program staff - Senior Finance and Senior Grant Officers, along with the Regional Grants Officers conducted training on compliance to the sub grantees staff. The training aimed at ensuring that sub grantees comply with the requirements of the sub agreements, which are in accordance with the donor Rules and Regulations. The issue of donor concern on fraud among USG partners / sub and sub sub partners was clearly covered and its possible consequences, the importance of compliance was re-emphasized. The program will continue to emphasize the message on compliance to sub grantees on regular basis in order to ensure they do not overlook it due to ignorance.

In this fourth quarter of FY 2012, the geographical coverage for the Roman Catholic Archdiocese of Dar es Salaam, a local partner for Ilala district was extended to include Mafia district as well. The RC Archdiocese will implement the program in Mafia district through Mafia Parish. This decision was reached after a prolonged and unfruitful search for an implementing partner in Mafia. The efforts to engage the Mafia District Council for the purpose ceased after realizing that it would be difficult for them to meet some of the key requirements, specifically opening a separate bank account for the Pamoja Tuwalee project funds as per donor requirement.

The sub agreement with COUNSENUth who is our technical partner on Nutrition was not executed. This has been held off to first synchronize the TA that we need from them with their role in FANTA III program where they are also a partner.

### **Planning and Budgeting for FY 2013**

In this quarter IV, the program prepared its national plan and Budget for FY 2013 and submitted the draft to the donor. This was done by Pamoja Tuwalee headquarter and regional staff. Input for the same was provided by sub grantees during supportive supervision and quarterly reporting. Also, to ensure alignment with donor and government in program implementation, inputs to the process were drawn from policies and guidelines by the key stakeholders, in particular GoT and USG. These included the National Costed Plan of Action II; the new PEPFAR Guidance for Orphans and Vulnerable Children Programming; the Law of the Child Act 2009 among others.

Also, the program facilitated the 10 sub grantees to prepare their annual work plans and budget for FY 2013. As per previous years, the process was done in a participatory way and it started with experience sharing; reflection on progress, challenges and strategies to address the challenges amongst sub grantees. The sub grantees' draft work plans and budgets developed are being reviewed by the Pamoja Tuwalee/FHI 360 program staff and will be finalized in the next quarter and amendments to the sub agreements will be done accordingly.

## **ACTIVITIES ACCOMPLISHED**

### **Objective 1: Increasing the Capacity of Communities and Local Government to Meet the Needs of MVC and their Households**

The program has continued to reinforce its relationship with the Local Government Authorities during this reporting period. It has been the period of follow-up on utilization of funds per various commitments made by the LGAs from the previous quarter and exploring other opportunities that would be of benefit to MVC.

#### **1.1 Mobilizing support for MVC**

This is a continuous activity. Following positive results from last quarter, the program has anchored its effort on raising the awareness of the three targeted institutions (community members, government, public and private institutions) to increasingly participate in care, support and protection of MVC.

However, there has been slow implementation of some of the planned activities under this sector by WAMA Foundation. Being a technical partner on this area, it lagged behind in leading and realising the program activities that would have attributed to increased MVC support. . While discussions are under way with WAMA Foundation leadership on what would be the best alternative to ensure that this activity is accomplished.

**1.1** Eleven MVCCs in Kinondoni Municipal council in Dar es Salaam made contributions in cash and in-kind to support 245 MVC (114M, 131F). The support covered school fees, scholastic materials, food, medical bills and exam fees. Also, 18 MVCCs in Mkuranga and Rufiji in Coast region established MVC farms to cultivate cassava/beans; established OVC funds; poultry keeping to generate income for MVC support; and renovation of MVC houses. In Rufiji Ikwiriri Kaskazini MVCC established tailoring group as IGAs for OVC support. Also, Mitengwe and Kibuta Village authorities, at Mzenga ward in Kisarawe District allocated 2 acres of land for MVCC to cultivate food crops for MVC support.

#### **1.2 : Strengthen Local Government Authorities to implement NCPA/ZCPA**

Pamoja Tuwalee recognizes the need to continue strengthening and nurturing relationship with the government towards ensuring maximum support for MVC as well as cementing the foundations for program sustainability. During this reporting period, we continued to facilitate LGAs to conduct the Zonal / District Implementing Partners Group (ZIPG / DIPG) meetings in Pemba and Unguja, Kilombero and Rufiji. In Morogoro MVC stakeholders used the opportunity to share work plans and activities which facilitated MVC referral among stakeholders, while in the other districts program progress and

challenges encountered were shared. In the remaining districts, the IPG meetings did not take place during this quarter due to the interference of the National census exercise.

**1.2.1: Providing Technical assistance to LGAs during their annual planning and budgeting process and advocate for MVC support**

Apart from pressing for more resources allocation by the respective LGAs, in this reporting period, more follow up was made on the implementation of MVC support committed in the approved MTEF and it was established that: In Morogoro, Mvomero district has utilized about TZS 13,846,500 for MVC activities, while in Kilosa district they utilized TZS 16,230,000 for the same.

Also, during the reporting period Kilosa and Mvomero District Councils budgeted and approved expenditure of TZS 30,076,500 to support 1,412 MVC (750 male and 662 female) in primary and secondary schools with fees and scholastic materials. Cumulatively, the two LGAs utilized a total of TZS 57,248,500 for supporting secondary and primary school MVC.

**Table 3: Summary of Implementation of MTEF Commitments by District Councils – July to Sept 2012**

S/N	District	CONTRIBUTION	REMARKS
1	Kilosa	Educational support to 262 MVC (113M, 149F)	Contributed TZS 16,230,00
2	Mvomero	Educational support to 1,150 MVC (637M, 513F)	Contributed TZS 13,846,500
3	Kilombero	Facilitated and hosted third DIPG meeting	
4	Ulanga	Supported identification of MVC which were done in 10 wards.	Provided venue during ward facilitators training and MVCC training, vehicle, fuel and per diems of a driver, with the value of TZS 2,730,000.

The above contributions are attributed to the positive collaboration and sense of ownership by LGAs instilled by the program from the very beginning through continuous awareness raising and involvement of district council staff such as DSWOs and DCDOs in program activities; and advocacy for allocation of budget for MVC interventions in the councils MTEF. Although this amount is still low, it is a positive indicator as the program strives with transition of interventions to the government in the long run.

**1.2.2: Provide TA to District Social Welfare Officers to implement MVC care and support.**

Observed gaps during previous quarters build a basis of Technical Assistance (TA) provided to DSWOs to ensure provision of quality and sustainable services to MVC. In this reporting period TA was provided as follows:

- 6 DSWOs (3M, 3F) from Coast Region and 10 DSWOs from Zanzibar were trained on psychosocial support intervention that focused on how to apply Journey of Life (JoL) – an approach that enables communities to identify the needs of MVC and mobilize resources to address those needs.
- Involvement of LGA staff such as DSWOs, DAO, District Planning Officer and DCDOs in the MVC Identification exercise that took place in Kibaha Town, Ulanga and Mafia districts was another opportunity of strengthening and building their capacity on that area.
- DSWOs from all 25 program districts were oriented on volunteers care taking skills

**1.2.3: Strengthen supportive supervision.**

Supportive supervision is one of the approaches used in monitoring the program progress as well as mentoring and coaching the staff / groups being visited. This is done at different levels - program head office, regional offices and sub grantee levels It is an avenue that gives room to see the best practices, challenges encountered, and discussion on possible solutions as well as cementing the sense of ownership by all parties. OVC focal persons, Volunteers and MVCC members get a chance to articulate the program interventions, their responsibilities and clarification on issues that might be unclear in implementation of the program. Also, quarterly joint supportive supervision with DSWOs is encouraged to promote ownership by the LGAs.

During the reporting quarter, supportive supervision was done by all sub grantees at the community level, these were used for mentoring / coaching volunteers on various areas such as data collection, managing children clubs, and how to identify economic opportunities within MVC households and advising accordingly. Various sites and individuals were visited. Also, joint supportive supervision with DSWOs was done in six districts of Morogoro municipal, Morogoro rural, Kilombero, Ulanga, Mkuranga and Kisarawe. In the remaining districts, this could not be done due to unavailability of DSWOs who were engaged in other duties and in particular the National census exercise.

During the supportive supervision, volunteers, MVCCs, children clubs, SILC groups, government officials, MVC households and caregivers were visited and below are the key observations and recommendations provided:

**Dar es Salaam region**

- Most of the visited MVCCs are not meeting regularly and their record keeping is still not satisfactory; some members are able to express themselves freely and demonstrate their knowledge on their roles and responsibilities. *MVCCs were encouraged to meet regularly and sub grantee staff urged to coach them on record keeping.*
- At the community visits at Mwinyijuma, Msolomi, Kambangwa, Msisiri A, Msisiri B, Bwawani and Kwa Kopa street at Mwananyamala ward it was noted that involvement of private individuals is still very low - *MVCC members were advised and agreed on different strategies like involvement of other stakeholders within the streets such as hotels, faith based organizations, garages and other offices surrounding the area to support MVC. Also, they were advised them to involve local government leaders in all their initiatives.*
- Sharing information among sub grantee staff was also a challenge and this may sometimes lead to slow implementation of program activities. *Project coordinators were requested to ensure they share information accordingly and timely with focal persons to avoid delays in implementations. A quick orientation was done on how to write trip reports and reconcile narrative report with financial report.*

**Morogoro region**

- Morogoro is no exception to child abuse as established by the VAC Study of 2009. In efforts to ensure child protection, *visited MVCC in Morogoro were requested to report child abuse issues/cases that are happening in their villages to SWOs who will take it up with the relevant parties to identify the perpetrator, ensure the survivors gets the required services and that the perpetrator is identified and punitive measures taken accordingly.*
- MVC that are HIV positive were linked to care and treatment clinics and home based care for treatment and close follow up respectively. *Volunteers should intensify efforts on this.*
- *Caregivers were encouraged to join SILC groups so that they acquire soft loans to help them establish small businesses and meet the MVC basic needs.*
- Some MVCCs were not utilizing the established funds to support OVC as they wanted it to first grow into larger amounts. *MVCC were encouraged to provide direct support to MVC using MVC funds established by communities.*

**Zanzibar**

The two sub grantees in Zanzibar had the privilege to be visited by USAID and CDC staff accompanied by program management staff. During this rare supportive supervision, the team did manage to visit Unguja

and Pemba and had the following comments aiming at improving the Sub Grantees and Districts engagement and also community sustainability of the program:

- *Encouraged on provision of need specific package to the OVC and household that really focuses on solving the core of the problem instead of blanket package i.e. “one size fits all”.*
- *Encouraged collaboration and coordination among sectors and programs*
- *Encouraged integration of services that add value into the existing groups like SILC and MVCCs where the participants will have an access to different trainings such as family planning, HIV and AIDS education and Parenting skills.*
- *Encouraged DSWOs to assume their role in coordination MVC stakeholders and support to implementers.*
- *Sub grantees to provide meaningful support to volunteers and MVCCs and make sure compliance is observed and to make sure they never engage on fraud.*
- *Urged sub grantees to make timely accountabilities with all the required documentation to ensure timely funding for uninterrupted program implementation.*
- *Sub grantees to promote the program through documentation and sharing of best practices and success stories*
- *Sub grantees to put more efforts in supporting establishment and utilization of OVC funds and SILC.*
- *Sub grantee to support older OVC in vocational training and in real engagement that will make a difference in their lives.*
- *To collaborate with MEASURE Evaluation to pilot in North B the establishment of MVC Database at the district level.*
- *To facilitate formation and strengthening of IPGs at District level rather than having them only at Zonal level.*

### **1.3 : Provide TA to LGAs to manage the MVC DMS and use data for planning and decision making**

Some support has been provided to the district councils on DMS including training of data clerks and provision of computers. However, as mentioned in the previous report, there is still more to be done for

the districts to take charge and own this database. Although the database evaluation by DSW indicated some gaps that need to be addressed, while awaiting a revised version, the program will continue to encourage the district councils to own the database and use its data for planning purposes. Also, as already mentioned above, we will work with MEASURE evaluation to pilot establishment of District database in Zanzibar. Currently, MEASURE is assisting the Zanzibar DSW to revive the process of establishing MVC database that was halted due to the demise of the consultant for the same.

**1.4: Strengthen MVCCs to Lead Community Support for MVC.**

MVCC is a key structure in spearheading and coordinating MVC support at community level, hence, building their capacity is one of the major roles of the program. To that effect, in this reporting period, the following activities were undertaken:

**1.4.1: Develop and implement capacity-building plans for existing MVCCs.**

During working with the MVCCs in various areas, it was learnt that the poor functioning of the MVCCs was caused by a number of reasons including poor knowledge on roles and responsibilities as well as ability to plan and execute purposeful actions. Last quarter, the program trained 460 MVCCs on their roles and responsibilities. Among the deliverables was the development of a work plan by each MVCC. Sub grantees and regional offices supported to make sure that the developed work plans are realistic. This quarter, follow up on the implementation of the plans was done in which some progress was noted: In Pemba, the visited 6 MVCCs were doing well and had established initiated OVC funds that had supported a total of 35 MVCs (21 M 14 F) with scholastic materials and food. In Unguja, 12 out of 17 MVCCs visited had started to implement their plans and established 12 OVC funds. Seven MVC had been supported by the established OVC funds while the plan is to support others with scholastic materials soon when the new academic year starts.

MVCCs were urged to assume their coordination roles that include OVC register updating and mobilization of resources for OVC support.

**1.4.2: Advocate for membership of current community volunteers on MVCCs.**

Active MVCC is a function of the type of members in it. Building on the previous experience it has been observed that involvement of community volunteers as a member of MVCC has contributed on the activeness of the committees. Volunteer participation can support good planning and execution of activities, reporting and coordination among other things. Although there was a considerable drop out of community volunteers in Morogoro and Coast as they decided to continue serving PLHIV under the HBC program, the proportion of volunteers who are members of MVCC remains the same as that of last quarter i.e. 76% per table 4 below. This is due to the continued efforts to advocate for volunteer

membership in MVCCs that resulted in 106 volunteers becoming members of MVCC in this fourth quarter – these counteracted the drop-outs, hence maintaining the level of last quarter. Since the program has enrolled new volunteers to replace the drop-outs, we will continue to sensitize MVCCs to replace those that dropped.

**Table 4: Current status of volunteers in the program**

Districts	Sub Grantee	Current number of volunteers			Volunteers who are MVCC members			% of volunteers who are MVV member by Sept	% of volunteers who were MVCC member by the end of June
		M	F	Total	M	F	Total	Total	
Ulanga & Kilombero	RC-Mahenge	30	35	65	28	34	62	95%	58%

### 1.4.3: Support creation of MVCCs where they do not exist.

In complimenting government efforts to support MVC, during the reporting period the program facilitated formation of 105 new MVCCs making a total of 788 existing MVCCs in the program. This was a result of MVC Identification exercise which was done in collaboration with the Department of Social Welfare (DSW). The exercise covered 52 streets within 11 wards in Kibaha Town, 30 villages within 10 wards in Ulunga district, and in 23 villages within 8 wards in Mafia district. The MVC Identification process started with advocacy meeting with District Council Senior Management Team (SMT) to inform them on the exercise. During the meeting the following issues were agreed on:

- Council to allocate budget for MVC support
- Council to coordinate MVC stakeholders through established IPG forum
- Every department should treat MVC as a cross cutting issue and should allocate budget for supporting OVC and their households
- Follow up on MVC issue to be one of the activities during supportive supervision by heads of department.
- Inclusion of action plan for MVC into district council work plan and eventual budgeting for it.

As per National guidelines, the exercise was spearhead by the National facilitators and conducted in collaboration with District facilitators and community leaders. At the village level, community members were fully involved in the process including the selection of MVCC members. Noteworthy is the collaboration shown by DED offices by availing facilitators and their teams participating in the advocacy meeting at the district level. In Ulunga, went further to support the exercise by providing one vehicle, 200 liters of fuel and drivers per diems.

As reflected below, gender balance was observed in the selection of MVCC members – 54% males and 46% females. Each of the 105 newly established MVCCs developed their action plan and also managed to establish MVC fund as detailed on table 5 below:

**Table 5: Summary of MVC Identification Results by District**

District	MVC Identified			MVC Households	MVCCs Formed				OVC Funds Established		
	M	F	Total		# of MVCC	M	F	Total	#	Cash Contribution in TZS	Pledges in TZS
<b>Mafia</b>	621	701	1322	633	23	116	114	230	1	42,000	-

<b>Kibaha town</b>	2624	2666	5290	2657	52	295	225	520	-	-	-
<b>Ulanga</b>	868	748	1616	1208	30	181	167	348	12	307,450	342,200
<b>TOTAL</b>	<b>4113</b>	<b>4115</b>	<b>8228</b>	<b>4498</b>	<b>105</b>	<b>592</b>	<b>506</b>	<b>1098</b>	<b>13</b>	<b>349,450</b>	<b>342,200</b>

#### 1.4.4: Support local authorities to establish village / shehia-level funds to support OVC

Empowering community to own and sustain OVC support is the focus of the program and to ensure that, among the approaches used is facilitation of communities to establish and strengthen OVC funds. Currently, this fund is providing services which are not offered by the program such as food, shelter and medication as well as cater for emergency issues. In some communities, it also covers services provided by Pamoja Tuwalee such as education support but due to meagre funds, not adequately met. Villagers/community members have shown commitment in response on supporting MVC. This is evidenced by establishment of OVC funds and use of the same to support MVC. To date, a total of 325 OVC funds have been established.

In quarter four, various activities were undertaken in Zanzibar, Mkuranga and Rufiji (Coast) and Kilombero (Morogoro) as detailed below:

- In Zanzibar, ZAMWASO managed to establish one new OVC fund in Central District. The sub grantee supported the established MVCC-OVC funds to implement their plans including resource mobilization and support to OVC.
- 18 MVCCs in Mkuranga and Rufiji established OVC farms to cultivate cassava/beans, established OVC funds, poultry keeping and rehabilitation of OVC households.
- In Mkuranga, Mkuruwiri MVCC managed to advocate to village authorities to allocate funds for MVC support. The village authority promised to contribute TZS 100,000 towards OVC fund.
- Follow-up on food collection campaign launched by Kilombero district, whereby villagers, MVCC members and village leaders agreed on amount of barley that every household should contribute – ranging from 2 to 7 kilograms per household. The process of food collection has started and collected barley is expected to be used as food support to child headed households and MVC identified to be in need.
- Machipi MVCC in Kilombero district initiated a garden of vegetables, thus far they have earned TZS 42,000 and they are still harvesting and selling vegetables. The proceeds earned has been deposited into OVC fund.
- Ikule MVCC in Kilombero district collected 250 kilograms of barley for food storage and villagers contributed TZS 68,000 for MVC fund.

- Chita MVCC in Kilombero district harvested 320 kilopgrams of barley and Njage MVCC has established cassava and maize project.
- As already reported, 12 MVCCs in Ulanga district established MVC fund and a total of TZS 307,450 was contributed in cash and TZS 342,200 as pledges. Mkula MVCC in Kilombero district submitted to the District Agricultural Development Plans (DADPs) a proposal on establishing a barley farm estate. This has bear fruits and a total of TZS 5,700,000 has been deposited to Mkula MVCC account by DADPs for implementation of the proposal.
- Makanga MVCC in Ulanga district harvested cassava with estimated value of TZS 84,000 which they used to support 84 (39 male and 45 female) MVC.
- Dakawa village council in Mvomero ward promised to contribute TZS 800,000 to MVC fund which will be used to support 100 MVC.

#### **1.4.5: Building capacity of MVCCs in carrying out their responsibilities.**

During the reporting period the program continued to support the government to spearhead the support of MVCC. The 105 newly formed MVCC were trained for two days and were able to acquire skills on principles of good governance, managing and controlling funds and resource mobilization. The other existing MVCCs continued to get support from sub grantee staff and DSWOs during supportive supervision.

The program will continue to make close follow up to all trained MVCCs on implementation of their respective plans drawn at the end of training and those of the subsequent periods.

#### **1.4.6: Support savings, income-generation and food security activities among MVCCs.**

There have been deliberate efforts to ensure that MVC care givers and the surrounding communities benefit from savings and credit scheme known as SILC. This has been done through the establishment of SILC groups and training of community resource persons to ensure continuous availability of technical support to beneficiaries. In this reporting period 35, CRPs (17 male and 18 female) from Morogoro were trained and in turn they established 24 SILC groups with a total of 606 (130 male and 476 female) members. Among these, 204 (33%) are MVC caretakers, 21 (3 %) volunteers and 36 (6%) MVCC members.

Integration of household economic strengthening with other child focused interventions was well executed in this reporting period. Basic business skills training was conducted to MVC caregivers in Coast, Morogoro and Zanzibar as well as trainings on poultry keeping and home gardening. The trainings aimed at increasing availability of nutritional food within MVC households and proper utilization of the same. Also, building the resilience or stability of the MVC households - see section 2.2.2 for further information.

### **1.5: Strengthening local CSO partners to support MVC services**

The key role of the sub grantees is to provide community level services to MVC and their households through MVCCs and community volunteers. Hence, adequate knowledge and competency among sub grantees is essential for quality services to MVC. This calls for capacity building of sub grantees and other community level institutions. To that effect, Pamoja Tuwalee/FHI360 invested in the area through various trainings conducted during this reporting period such as: Grants and finance training to project Coordinators and Accountants; Journey of Life approach to Focal persons; SILC and MIS to Focal persons and Data clerks; and others as detailed below.

#### **1.5.1: Develop a comprehensive care support system and provide training to local CSO partners to implement it in collaboration with OVC/MVC households**

##### **1.5.1.1: Training of service providers on technical and management issues.**

Following supportive supervision, monthly and quarterly reports review and the program work plan; different trainings were conducted during this reporting period to government officials (especially DSWOs), CSOs program staff, MVCCs, volunteers and other relevant stakeholders. All that aimed at improving the performance in the implementation of the program. Below are the details:

##### **ZINDUKA ToT Training**

Integration of HIV prevention within MVC interventions is essential in as one of the strategies to assist older MVC from indulging into risky behaviors that may lead to HIV infection. One of the Pamoja Tuwalee program deliveries is to ensure that MVC have access to HIV/AIDS education and in particular knowledge on HIV prevention. To strengthen the capacity of our sub grantees on this area, the program in collaboration with FHI 360 UJANA project, gave room to two program staff (YAM OVC FP and Pamoja Tuwalee/FHI360 M and E officer) to attend ZINDUKA training. The ZINDUKA through SOKA project is a program rooted from the concept of intervention through sport for development. Through the training, the participants had opportunity to learn how to integrate ZINDUKA activities on OVC children club sessions and learn from experience and achievements of other partners who are implementing ZINDUKA. At the end of the training, the following were the agreed action plans: Dar Es Salaam Archdiocese - YAM to adopt ZINDUKA teaching modalities in integrating OVC children clubs; and OVC focal person with support from FHI360 M&E Officer to integrate Zinduka interventions to 2 groups of 40 children out of 2 children clubs in Kariako and Buguruni wards. To date 3 ZINDUKA sessions have been integrated into one children club through which 30 children (12 M, 18 F) were provided with HIV prevention knowledge. Efforts are underway to scale integration of ZINDUKA into other children clubs.

### **Study tour to Ethiopia**

This was a study tour organized by DAI IMARISHA with the objective of enabling staff to visit a few interesting and innovative economic strengthening programs that could provide insight, new knowledge and inspiration to implementers of economic strengthening programs in Tanzania. Two staff under Pamoja Tuwalee/FHI360 program (WAMATA OVC FP and FHI360 STO on ES) had an opportunity to participate in this study tour. Among the programs that were visited are:

- The Productive Safety Net Program - a cash for work program
- Learning more about the Economic Strengthening (ES) Agent model that is used by LGAs in Ethiopia
- PEPFAR supported Land O'Lake dairy program - a dairy cooperative program for PLHV and OVC households
- Urban Gardens Program, a large urban agriculture program focused on households with OVC managed by DAI
- Transaction Program which works on youth HIV prevention and economic strengthening
- Linkages of ES programs to nutrition- still being developed

After this study tour, the following was agreed as action plan: WAMATA Dar es Salaam to select areas and schools to work with; to facilitate establishment of urban gardening to the selected schools; and to facilitate scale up of urban gardening to Ilala. The progress to date - WAMATA has identified three secondary schools, one primary school and one vocational training center, with 120 household care givers to start to practice urban gardening in Kinondoni Municipal council. Out of these, 21 female household caretakers have already started practicing urban gardening. This will help them to improve their nutrition status as well as their income once they sell the excess harvest. The program will follow up with the remaining 99 households to encourage and facilitate them to start gardening.

### **Journey of Life (JOL)**

This was a seven day training to 28 participants (15F, 11 M) who comprised of OVC Focal persons and DSWOs. This training aimed at building the capacity of participants to mobilize community members around children issues and to develop community action plans to support children needs; build capacity of participants in facilitating community conversation on issues of MVC. Participants drew the action plan where all of them intend to mobilize community using JOL in at least 2 wards by the end of Dec 2012.

### **Orientation to TOTs for Volunteer Training.**

This training was the response on newly recruited volunteers need for skills development and the need to strengthen the capacity and sharpen skills of the existing ones. It was a three day orientation

attended by participants from different regions and institutions. These included 20 (9 M and 11F) national facilitators including some from Sub grantees and DSWOs). The oriented trainees' action plan was for them to arrange themselves and be available to facilitate volunteers training the following days. These TOTs were utilized to train volunteers as reported under section 2.1.1 of this report.

### **1.6 Facilitate Meaningful Participation of Business Community in MVC Support.**

Following last quarter commitment, it was important to see the result of the work already initiated in collaboration with WAMA Foundation. However, it has been very unfortunate that this reporting WAMA Foundation could not execute most of what were planned. Pamoja Tuwalee/FHI360 Management is following up with WAMA Foundation leadership to resolve this. At the same time we are exploring alternatives to make sure that planned activities are executed to reach the program objective. Also, we will continue advocating for OVC support at community level - in Dar es Salaam, through regional team and sub grantee office, one community member (the owner of tailoring center) agreed to support tuition fee of 2 MVC who are tailoring trainees from Mwananyamala. It is a 6 month course costing TZS 350,000 each, hence a total of TZS 700, 000. This is attributed to advocacy work that is done by the program.

#### **1.6.1. Map businesses and companies at the district level within Coast zone.**

In January 2012 Program in collaboration with WAMA conducted mapping exercise of potential business partners in 6 districts of Coast region. During this quarter, WAMA Foundation in collaboration with sub grantee staff conducted meetings with selected 9 MVCCs in Kibaha, Bagamoyo and Kisarawe districts. The meetings aimed at introducing the identified business partners to MVCC and discuss mechanism which will be used to ensure accountability, feedback after provision of support and who will be the contact person for communicating with private partners. During the meetings, MVCCs were able to mention some of potential private partners who could also be involved and it was found that, some of MVCCs in Bagamoyo and Kibaha have already started mobilizing business people in their villages in supporting MVC, while some MVCCs acknowledged existence of those people but never involve them in supporting OVC.

After the meeting WAMA informed the MVCCs that, the next step is meeting with the identified private partners to dialogue further and brainstorm on available resources and the modalities to tap them for MVC support.

### **1.7. Improve Coordination among and across sector and zones**

Pamoja Tuwalee/FHI 360 program has been a player in promoting coordination, collaboration, linkages and partnership among MVC stakeholders within and across sectors (government, communities, CSO, donor and private sector). In the reporting quarter, various activities were performed to that effect as elaborated below.

**1.7.1. Support coordination and networking among MVC and HIV implementing partners at the district level.**

While in some districts IPGs were already starting to function after the establishment during the previous quarters, Dar es Salaam IPGs could not meet on this reporting period as earlier reported due to interruption of national census. In Zanzibar, Zonal IPGs (one each in Unguja and Pemba) proved to be platforms that enhance coordination among MVC stakeholders and referrals for comprehensive care and support to OVC among members. Program committed to work closely with DSW to establish IPG in Districts in response to the need for the same aired by the respective District Commissioners and embraced by the Director for the Zanzibar DSW. We will start with four districts in FY 2013 and scale up to the remaining six in FY 2014.

During this quarter, JIMOWACO in Coast region in collaboration with DSWO and DCDO established an IPG forum in Rufiji district. The forum involved different OVC stakeholders including DSWO, DCDO, and District Education Officer, Mental Health Officer from the district hospital, orphanage, WWF, Eastern Selous and 8 CSOs operating within the district. A total of 14 participants (8M, 6F) attended. Issues discussed were importance of IPG and the Terms of Reference (ToR) for IPG. Also, experience from the National IPG was shared to give members a better picture of what the forum entails. Members agreed to convene the next meeting in early November 2012.

**Objective 2: Increase the capacity of households to protect, care for and meet the basic needs of OVC in a sustained way by improving their caretaking, livelihood and health seeking skills.**

The program strategic approach continues to focus on strengthening the capacity of MVC households to be able to provide sustainable and quality care, support and protection to their children. It builds from the needs assessment conducted in Dar es Salaam in year one of the program and the findings of baseline assessment of child wellbeing and needs of MVC conducted in year two. The program has emphasized strengthening the capacity of care takers, volunteers, MVCCs, SILC community resource person and other community leaders through trainings, mentoring and coaching through home visits. These key people are empowered on different areas such as psychosocial support, economic strengthening, food and nutrition and savings and credit scheme. The following are specific activities conducted during this reporting period.

**2.1: Provide training for household caretakers in caretaking skills, PSS and reducing stigma/discrimination.**

**2.1.2 Volunteer Training**

The program in collaboration with the Department of Social Welfare organized and conducted care taking skills training to 315 (138 Male and 177 Female) volunteers, most of whom were the newly recruited. The objective of the training was to strengthen their capacity to provide comprehensive care,

support and protection to MVC and their households. The training lasted for five days and its contents were: Definition of a volunteer; roles and responsibilities of families, local government and other stakeholders in providing care and support to MVC; Food and Nutrition; Basic concept and information on HIV/AIDS; The Law of the Child Act 2009 and the concept of child protection; Life skills; Economic strengthening and monitoring and evaluation. The training used standardized training manual that was developed by Pamoja Tuwalee Program in collaboration with DSW. Some of the trained volunteers managed to transfer the skills to 4140 during this reporting period. The program anticipates that community volunteers will continue to transfer different skills during home visits, children clubs and other community forums. The facilitators of the training were National facilitators who got the prior orientation to the enriched manual through Pamoja Tuwalee as reported under 1.5.1.1 above.

## **2.2 Provide training and other support to increase savings and improve livelihood for MVC households**

Economic strengthening remains fundamental for improving economic status of MVC households. The program continued to build on previous efforts of training Community Resource Persons (CRP) and the introduction of savings and credit scheme famously known as SILC. The trained 128 CRPs in collaboration with community volunteers, members of MVCC and other community leaders played a major role in sensitizing MVC care takers and other community members to establish and join SILC groups so that they contribute towards a common fund and borrow from the same at affordable low interest rate and engage in income generating activities. During this reporting period, a total of 59 SILC groups were formed with contributions of TZS 55,574,600 out of which TZS 3,071,200 went to OVC funds. Cumulatively, there are 137 SILC groups to date with a total savings of TZS 184,866,300 (about US \$116,635) – **Appendix IV**. This includes TZS 12,562,500 (US \$ 7,926) set aside by the groups to cater for OVC needs.

Also, in this reporting period, the program had reached 3906 MVC households with ES support. This is 104% achievement over the annual target of 3750. The surpassed target is attributed to the extra efforts the program made that motivated more OVC households to join community savings and lending groups. This target includes 1,239 OVC caretakers and 130 older OVC who have joined community savings and lending groups that have started to show some remarkable impact in improving their lives.

The program in collaboration with its ES technical partner DAI IMARISHA organized and facilitated the following activities for improving MVC household economic status.

### **2.2.1: Training on Local Chicken Rearing**

A total of 163 participants (60 Male and 103 Female) were trained on rearing of local chicken with the aim of strengthening the capacity of MVC care givers and other program beneficiaries to transform local poultry keeping into an economic activity that can generate income and thus improve economic status of MVC households. Content of the training included: Introduction of Economic strengthening, Introduction of local chicken production, Construction of local chicken houses, Local chicken feeds,

Incubating and keeping eggs, Local chicken diseases and how to prevent them using vaccination, the practiced vaccination process and record keeping.

Generally, there was active participation from the trainees through questions and discussions during sessions. The attendance of women was higher compared to men. This was noted as positive especially for female because it can both provide income as well as nutrition and a chance for them to do home chores including caring for children since it is nearer home. On top of that it can enable women manage this project at the same time attend other households chores.

**Trainee caregivers practicing how to vaccinate chicken**

### **2.2.2: Home Gardening**

A three day training on home gardening was conducted to a total of 172 (54 Male and 118 Female) participants. Emphasis of the training focused on organic agricultural products; preparation of composite manure; retaining rain water; and food and nutrition. As a strategy to reach more households, at the end of training it was agreed that each participant would work with at least 3

neighbours as they start their IGAs within the area trained. The government agriculture extension workers will monitor and support the trained care givers to use the acquired knowledge and skills.

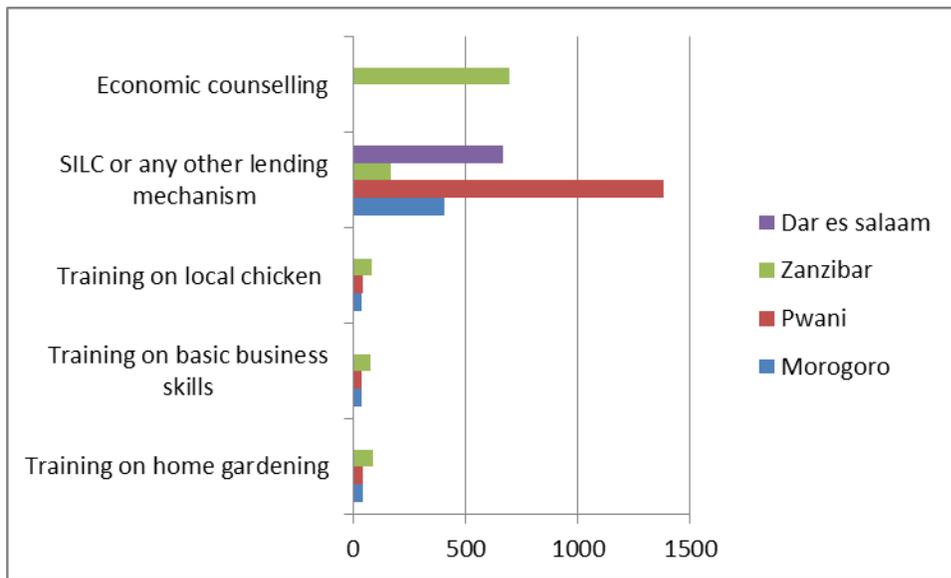

### 2.2.3 SILC Monitoring Information System (MIS)

Again with DAI IMARISHA, the program organized for Monitoring Information System (MIS) training. This was a five day training and a total of 34 participants attended. These included OVC Focal Persons and Program Staff. The objective of this training was:

- To enable participants learn and make use of SILC Portfolio: collection, processing, analysis and interpretation of data.
- Discuss with participants on the role of management information system and Facilitate sub grantees to provide feedback to management, community with the aim of improving their performance.

It is expected that after the training the sub grantees are able to set up MIS software, enter data and edit; and are able to detect error and able to clean before reporting

### Summary of economic strengthening support provided by region

### 2.2.4 Other Support services provided to MVC households

The program realize the great importance of strengthening the capacity of care takers on economic as well as on non-economic areas in strengthening the capacity of MVC households. To fulfill this, the program has continued to strengthen the capacity of caretakers on different areas such as care taking

skills, nutritional education, primary health care and psychosocial support. By the end of this reporting period, a cumulative total of 4140 care givers have been provided with various skills as summarized below.

**Table 6: Summary of type of support and number of MVC households supported.**

Type of support	No of care givers benefitted	Means of Support Delivery	Source of support/service
<b>Care taking skills</b>	2766	Provided by volunteers and OVC Focal Person to care givers during home visits	Volunteers
<b>PSS</b>	783	Provided by volunteers and OVC Focal Person to care givers during home visits	Volunteers
<b>Food and nutrition education.</b>	340	Provided by volunteers and OVC Focal Person to care givers during home visits	Volunteers
<b>Health care</b>	248	Provided by volunteers and OVC Focal Person to care givers during home visits	Volunteers and OVC Focal Person
<b>Food provision with a value of TZS 42,000</b>	3	Provided by volunteers and OVC Focal Person to care givers during home visits	Tupendane SILC group
<b>Total</b>	<b>4140</b>		

### **2.3 Regular CRP Meetings.**

During this reporting period the program successfully managed to facilitate CRP quarterly meeting sin all three regions of Morogoro, Coast, Dar es Salaam and Zanzibar. The forum aims at bringing together CRPs within the region to share experiences as well as challenges encountered and suggest possible solutions for improvement of their work. Key issues discussed during their meeting include: Improving record keeping, calculating and dividing shares to group members and improving involvement of community leaders in sensitizing MVC care takers to join SILC Groups. Also, in Zanzibar the forum was used as mentoring platform by DAI IMARISHA. The major challenge encountered is for MVC care takers who cannot afford to buy shares as well as contribute for OVC funds. The program will encourage them to form groups and contribute the little that they have as this will instill a sense of ownership even for future funds that they might get from the program or other sources to augment their capital fund.

## **2.4: Facilitate access to community health insurance scheme for MVC Households**

In order to ensure that MVC and their households access health services, the program continued to follow up on different initiatives started since last quarter. These include the discussion with National Health Insurance Fund (NHIF) in Ilala and Kinondoni Municipal councils. To date, Ilala Municipal Council has officially launched Tiba Kwa Kadi (TIKA), while Kinondoni managed to conduct two preparatory meetings and the technical team is currently working on proposed by-laws that will be submitted to full council for Approval. Upon Approval Kinondoni MVC and their households will be enrolled in TIKA and access health services. The followings are specific activities accomplished this quarter:

The program through Baraza La Misikiti Tanzania (BAMITA) in Kisarawe facilitated 600 MVC (293 Male and 307 Female) to access health services through CHF, while KICODET facilitated 145 OVC (83M, 62F) with health insurance in Kibaha. Through OVC funds 2 MVCCs in Mkuranga supported 36 OVC (16M, 20F) with CHF cards worth TZS 180,000 which will help them and their families access health services. In Morogoro, a total of 1,585 MVC in need of health support have been identified and the process to provide them will start soon in next fiscal year.

Currently, there is no National health insurance scheme in Zanzibar but all people are entitled and have access to free medical services, however, experience indicates shortage of drugs and medical tests. Our local implementing partner WAMATA in Pemba established an arrangement of depositing some cash at a private hospital which have consistent medical supplies and quality medical services and initiated a referral network for the services not accessed by MVC. During this reporting period, WAMATA managed to pay for 150 (78 male and 72 female) using pre-paid pharmacy arrangement. A total of 17 (6 male and 11 female) were given treatment, drugs and medication. This makes a total of 931 MVC supported with CHF in FY 2012.

## **2.5 Facilitate establishment of Community Child Protection structures**

### **2.5.1 Facilitate establishment of One Stop Center in Ilala Dar es Salaam**

The proposed one stop center is one of the child protection initiatives to help victims of abuse and survivors of GBV access friendly services under one roof. Following various meetings the program had with different stakeholders during last quarter, the program during this reporting period successfully organized and conducted stakeholders meeting. This was in response to request made by the same stakeholders to have a joint meeting. Participants of the meeting were: Tanzania Police Force senior officials, Senior Management Team from Ilala Referral Hospital, Court of Appeal Representatives, Ilala Magistrates, representatives from Juvenile Court, District Social welfare officers, representatives from the Department of Social Welfare in the Ministry of Health and Social Welfare, representatives from the Ministry of Community Development, Gender and Children (MCDGC). The meeting was officiated by the Permanent Secretary of the MCDGC. During the meeting participants were able to share their experiences and facilitated to come up with sector action plan. Different contributions from participants indicated the general acceptance and willingness to support the establishment of one stop center at Amana Referral

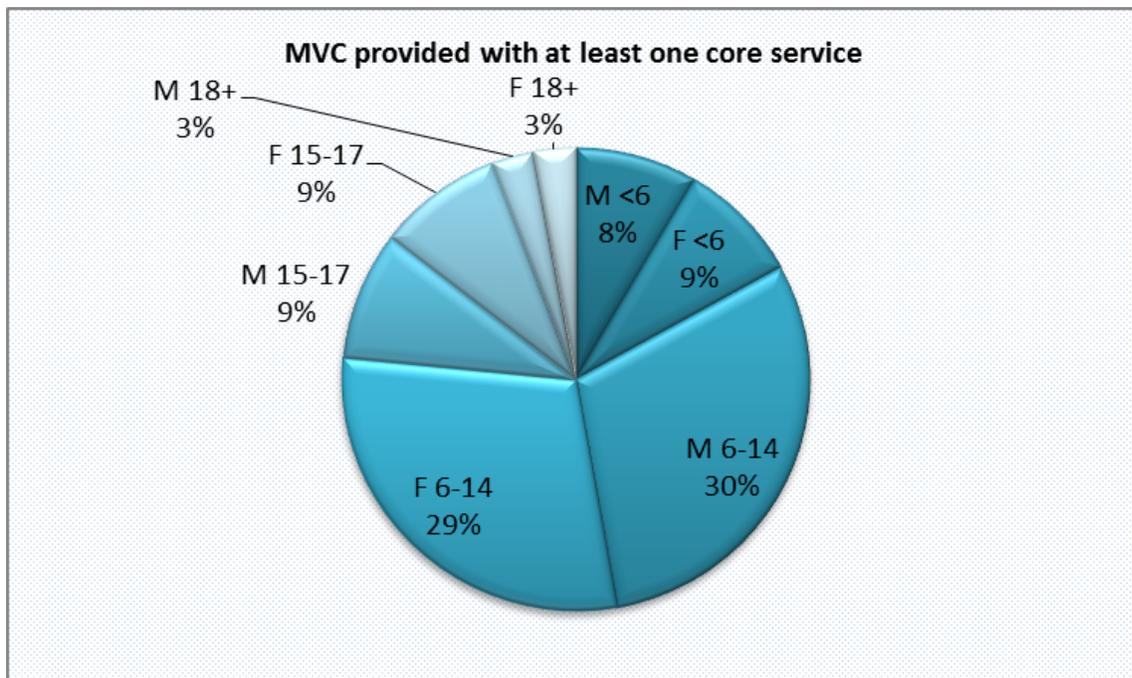

Hospital. Some partners like Regional Police Commander of Temeke and Kinondoni committed to provide 40 Inch container to add on the space and some furniture for the same.

**Objective 3: Increase MVC Household Access to Comprehensive Care for MVC.**

During this reporting period, sub grantees through community volunteers provided services to MVC and their households directly or through linkages and referrals to other service providers. Details of the services provided are as follows:

**3.1 Provision of core, age appropriate package to MVC**

During this quarter, a total of 30,538 MVC (15,404M; 15,134F) were served with a minimum of one core service, an increase of 75% from the last quarter total of 17,399 (9075 Male and 8324 Female). The cumulative annual total of MVC who received a minimum of one core service is 44,887 (23,035 Male and 21,843 Female). This is equivalent to 104% of the 43,185 annual program target and 78% higher than last year achievement of 25,198. This is attributed to the expansion in coverage and subsequently the number of implementing sub grantees.

Compared to the last reporting period, the number of MVC who received a minimum of one core service has increased by 5% for age group of 15 -17 (from 22% to 29%). This is attributed to the program deliberate efforts to equip older OVC with vocational skills both formal and informal. Similarly for MVC aged 18+ there was increase from 4% to 6%. Also, the increase of 4% (from 13% last quarter to 17% this quarter) for < 6 years is noteworthy as this was the most underserved age group by MVC programs including Pamoja Tuwalee – last year, we served only 9% (2253) under this category.

### 3.1.1 Provision of education support and vocational training

The program through sub grantees has been providing direct support to MVC through linkages with other sources and partners such as MVCCs, LGAs, SILC groups and other MVC implementing partners. A total of 3542 MVC (1777 Male and 1765 Female) were reached with educational support during this reporting period. Out of these, a total of 1881 (1012 Male and 869 Female) received school uniforms and scholastic materials, 127 MVC school fees, while 1534 received follow-up support to monitor their progress in school and where necessary were counseled accordingly. Those who received support through program funds were 3410 MVC and the remaining 132 MVC through MVCC and OVC funds as detailed in **Appendix VI**.

**Table 7: MVC enrolled in vocational centers**

Region	District	M	F	Total	Description of the service
<b>DSM</b>	Kinondoni	48	23	71	School fees to MVC in Vocational training centre
<b>DSM</b>	Kinondoni	35	43	78	Scholastic materials ( 20 school bag, 26 MVC with school uniform, 27 shoes and 5 school fees)
<b>DSM</b>	Kinondoni	0	13	13	Linked at Magomeni Catholic parish tailoring school to pursue tailoring course
<b>Zanzibar</b>	Pemba	7	14	21	Provided with start-up kits which include 15 sewing machines, two sets of carpentry, four tool boxes for garage)
<b>Zanzibar</b>	Unguja	14	6	20	Linked at Vocational training centre ( out of this MVC 10 were provided with start-up kits which include sewing machine and other accessories)
<b>Morogoro</b>	Ulanga	9	13	22	MVC were provided with start-up kit ( 13 sawing machine, tool box and carpentry tool kit )
<b>Pwani</b>	Mkuranga	28	21	49	Linked to vocational training centre and they were supported with sewing machines, electricity and garage tool box Linked to vocational training centre and they were supported with sewing machines, electricity and garage tool box

### **3.1.2 Nutritional Support**

Through referrals and linkages by sub grantee staff, MVCC and volunteers the programs has been able to support MVC and their household with food and nutritional services. Emphasis was given during MVCC and volunteer training to ensure practical plans are developed to address food and nutritional shortage among MVC households. During this reporting period 84 MVC (39 male and 45 female) in Ulanga district were given food support by Makanga MVCC. More MVCC continue to collect food from the villagers so that MVC in need can be supported. Using 75 caregivers (21 male and 54 female) trained by Tanzania Agricultural Productivity Program (TAPP) in Mvomero district are at the initial stage on establishing home sack gardening.

As already reported under section 1.4.4: in Coast one MVCC in Mkuranga managed to establish vegetable garden. Also nine acres (2 in Kisarawe and 7 in Mkuranga) of land were allocated to MVCC by village authorities for cultivation of food crops for support of OVC; and in Dar es Salaam, the introduction of home vegetable gardening has been received well by most MVC care takers. To date, a total of 18 MVC households have managed to start home vegetable gardens in Gulukakwalala (Gongo la Mboto), Mtambani and Miembeni (Vingunguti ward) in Ilala district.

WAMATA in Ilala district provided nutritional counseling to 60 MVC households in 15 Kilongawima, 12 Mtongani and 33 Mwanayamala Msisiri B in Kinondoni district. A Good Samaritan donated rice, flour, cooking oil, beans and soap worth TZS 264,000. This was used to support OVC.

The annual cumulative total reached with food support and nutritional counseling at the end of this reporting period is 19,002 MVC – equivalent to 97% of the annual target of 19,615. The program managed to achieve the set target based on its efforts to build the capacity of volunteers and MVCC members who in turn continued to provide nutrition counseling, training on home gardening, poultry keeping and food preparation and preservation to OVC and their households.

### **3.1.3 Support access to Primary Health Care**

For this reporting period a total of 5140 MVC (2596 Male and 2544 Female) received primary health care support compared to 5762 MVC reported last quarter. The following are the details:

In Pemba, WAMATA supported a total of 1479 MVC (758 Male and 721 Female) with counseling on personal hygiene and environmental health, HIV and AIDS education. This included visit to the households of 9 MVC (6 Male and 3 Female) who are HIV positive and discuss with care givers about proper care and support to their MVC and adhering to Care and Treatment services. Also, through children clubs community volunteers provided health education related to good health practices such as hand washing using running water and personal hygiene to prevent themselves from diarrhea and other infectious diseases.

ZAMWASO in Unguja provided health care counseling to 1470 OVC (752 male, 718 female) and their families. Issues of environmental sanitation, reproductive health, HIV/AIDS education and personal hygiene were discussed and emphasized.

In Morogoro, RC Mahenge continued to follow up on Ibrahim and Mussa, orphans rescued from their negligent mother and kept at an orphanage center of Herald of Good Hope, A divine Mercy Home of Orphanage and aged people. The good relationship established between the orphanage center, the program and CTC staff has helped Ibrahim and Mussa to continue adhering to Care and Treatment services. Also, we will continue to urge volunteers to ensure HIV+ MVC are linked with Home Based Care and Care and Treatment service providers.

WAMATA in Dar es Salaam provided PSS to 98 (61 Male and 37 F) MVC and health education with emphasis on how to wash hands, use of mosquito nets and environmental cleanliness. This was done during home visits by volunteers and focal persons. The plan is to utilize volunteers meeting for more instructions on WASH (Water Sanitation Hygiene) for cascading of the same to the beneficiaries.

### **3.1.4 Child Protection**

Child Protection remains to be one of the program focus area. This fact is based on the increasing cases of child abuse but echoed with the findings of Violence Against Children (VAC) report. Responding to the government efforts as well as the findings of the study, the program did the following during this reporting period:

Through local implementing partners RC Archdiocese of Dar es Salaam - YAM and WAMATA in collaboration with Kinondoni and Ilala municipalities conducted one day awareness that was followed by training of child protection teams. A total of 47 participants (24 Kinondoni and 23 Ilala) participated in the trainings. Content of the training covered Child Protection concepts (principles and basics); Protective environment for children (legal, policy and Institutional framework); Intervention to protect children from violence, abuse, neglect and exploitation; Protection of children in the justice system; and child protection and monitoring and evaluation.

At the end of the training both teams developed their work plans that will guide them in performing their roles.

Also, during this reporting period, a total of 152 MVC (86 Male and 66 Female) in Kilombero district were oriented on different kinds of child abuse such as physical abuse, sexual abuse and emotional abuse so that they aware and in a position to report any kind of child abuse that comes across.

In addition, 30 Volunteers (13 Male and 17 Female) were sensitized on issues related to child protection and were tasked to continue the sensitization to other community members. Trained volunteers were requested to report any child abuse cases that will occur in operational areas

### **3.1.5 Psychosocial Support**

Psychosocial support is one of the key services that help MVC and their households to build resilience. It helps children deal with grief and bereavement and with the stigma, discrimination and maltreatment surrounding their lives. It is through Psychosocial support services provided to them that they develop coping mechanism. The program has continued to provide psychosocial support to MVCC and their households during home visits and during children club sessions. At the end of this reporting period, a total of 11,499 MVC (5675 Male and 5824 Female) had been reached with psychosocial support.

**Objective 4: Empowering particularly females to contribute to their own wellbeing by improving their resilience, as well as their livelihood and self-care skills.**

### **4.1 Establishing and Managing Children Clubs**

Psychosocial support is provided to OVC during children club sessions. Children club sessions are facilitated using children club guide developed by the program. During club sessions, club attendants are able to identify children with psychosocial problems and in collaboration with other stakeholders develop appropriate intervention. Other partners involved include teachers, religious leaders, community leaders and health workers.

*Focal person in Kinondoni during follow up on MVC school progress*

During this quarter, the program facilitated formation of seven new children clubs (3 Morogoro, 1 Coast and 3 Dar es Salaam) making a total of 170 children clubs to date with a total of 5417 MVC (2576 Male and 2841 Female). Most of the clubs conduct at least one session per month. As one of the strategy to motivate more children to attend, the program to provide playing materials.

**Table 8: Cumulative summary of Children Clubs by Region**

Region	Number of clubs	Number of children participating in the clubs during the reporting period of July to September 2012		
		Male	Female	Total
Zanzibar	22		277	297
Morogoro	57		967	1081
Dar es salaam	29		444	461
Coast	62		888	1002
<b>Grand Total</b>	<b>170</b>		<b>2576</b>	<b>2841</b>

#### **4.2 Provide disabled MVC with accurate and appropriate information about their rights and HIV/AIDS.**

Disabled MVC is one of most disadvantaged group that has captured program attention. During this reporting period, we managed to identify MVC with different types of disability. A cumulative total of 456 MVC (224 Male and 232 Female) have been identified. Among them, 36 MVC (10 Male and 26 Female) are gender based victims. Responding to the identified needs, the program provided information on their rights to 126 (74 Male and 52 Female) disabled MVC. Another 35 (10 Male and 25 Female) who are gender based survivors were provided with counseling support during this reporting period.

Also, ZAMWASO in Zanzibar was able to support four disabled MVC families (3 Male and 2 Female) with capital worth TZS 800,000 to start economic activity that will enable run the business in a home setting so that one can tend to the disabled child at the same time.

#### **4.3 Services provided to child headed MVC**

During this quarter, the program identified a total of 60 (45 Male and 15 Female) child headed households. Among the identified, a total of 42 households were provided with various services including PSS, education, health care and economic strengthening.

## **5. Meeting with Stakeholders**

**Monthly MVC Implementing Partners Group (IPG), Child Protection Working Group (CPWG) and Social Protection/Social Welfare Working Group (SP/SW WG):** As reported in the previous reports, the program has continued to attend the monthly IPG and CPWG meetings for the purpose of sharing experiences as well as progress made by each MVC implementing partner. These meetings are organized in order to improve coordination of interventions on care, support and protection to MVC.

**Police-Partner Coordination Group on GBV and Child Protection:** The Tanzania Police Force (TPF) has undertaken significant steps to strengthening their response to cases of GBV and child abuse, mainly through Tanzania Police Female Network. Some of the steps include establishment of Gender and Children Desks, training their officers on how to better handle cases of GBV and child abuse, and supporting the establishment of drop-in centers. Building on this, the Police Force has developed a Priority Response Work Plan for the prevention of GBV and violence against children 2011-2013.

The proposed new strategic plan provides an opportunity for the police and other development organizations engaged in relevant activities to work together in a more coordinated manner. Pamoja Tuwalee / FHI 360 was among the partners invited and participated in developing the Standard Operating Procedures for this.

**Law of the Child Act 2009:** This was a meeting organized by the Ministry of Community Development Gender and Children (MCDGC) to discuss on taking the Law of the Child Act from paper to practice. Participants of the meeting were Ministry of Health and Social Welfare, specifically the Department of Social Welfare, Ministry of Constitutional Affairs and Justice, Registration Insolvency and Trusteeship Agency (RITA), The National Forum for Child Rights and Pamoja Tuwalee program /FHI360. The latter had an opportunity to share the concept of One Stop Center, and all participating agencies embraced the idea and promised cooperation.

**One Stop Center Implementers Meeting:** The meeting was hosted by Save the Children in Dar es Salaam. Other participants were UNICEF, Marie Stopes, UNWomen, UNFPA, Tanzania Police Force, the Department of Social Welfare and Pamoja Tuwalee program/FHI 360. The discussion focused on guidelines for establishment of One Stop Center. Participants were able to share their plans as well as progress on implementation of One Stop Center.

## SUCCESS STORY

### ***INTERNAL SAVINGS AND LENDING COMMUNITIES (SILC) IMPACTS ASIA'S LIFE***

“In the past one and a half years, my life was completely different, life was too tough. I and my two children could sleep without a meal but now we are affording three meals a day” – this was Asia’s opening statement after being asked by a program staff on whether Savings and Internal Lending Communities (SILC) group has contributed anything in her life.

Asia Yusufu (34 years), is a single mother with two children (Said (7) and Mwajuma(4) living in Chanika in Kinondoni district, Dar Es Salaam Region. Before she was selected to a member of Chanika Most Vulnerable Children Committee (MVCC) and Community Resource Person (CRP) for SILC group under Pamoja Tuwalee program, she was running a small business to generate income for supporting her family. However, that business could not grow because of little capital. “I thank Pamoja Tuwalee project, now I can access loan at a very low and affordable interest rate and I can save my own money which I can plan for. Before, I was participating in other credit schemes that did not help me much as the interest rates were high and I had to live with tension when I thought of paying back.”.

Since September 2011 when Asia was selected to be a CRP in which she received the training organized by Pamoja Tuwalee Program implemented by Archdiocese of Dar es Salaam Youth Alive Movement (YAM), she became active in establishing SILC groups and encouraging more women and other community members to join the groups. SILC group members decide on the value of share which every member has to buy at least once every week; facilitate savings and credit to group members and every group member has to make a commitment on what she/he will do at the end of the circle (every circle takes between 9 to

12 months) when shares are re-valued and divided among members based on the shares of each.

Asia borrowed TZS 100,000 after the first month of her SILC group take off and she used that as a capital to start a restaurant business. She continued to save while repaying the loan.

She also used part of the profit to provide for her family and made bricks for her house as the old one was in a bad shape and every time the rainy season started she had to go to her neighbour to keep her children out of the leaking roof. At the seventh month, she demolished her old house and started construction of a two room house. At the end of the first circle of her SILC group in August 2012, she received TZS 250,000. Asia used part of the money to roof her house and make some simple doors and windows.

Asia is very grateful to Pamoja Tuwalee program for the opportunity provided not only to her but to the community members she is serving. She repeats the first statement in her closing remarks when she was asked if she has any further comments after the 30 minute talk.

She says “My life has completely changed, imagine from sleeping without a meal to three meals a day”. “Now I don’t have to run to neighbours when it rains and also I can afford medical treatment to my children and I believe they will have better education as my restaurant continues to grow, only what I can say is thank you”. She added.

### **CHALLENGES**

WAMA the technical partner for advocacy campaign has not been able to perform as per plan and agreement. This has resulted into delay to launch the advocacy campaign that scheduled to happen in year two.

The cost sharing idea for MVC household to access CHF card has remained to be a challenge. Most of the MVC household’s members are surrounded with severe poverty that becomes a challenge for them to get money for photo. The little amount of money they get they spend for their survival.

### **KEY PLANNED ACTIVITIES FOR THE NEXT QUARTER**

- Official Launching of One Stop Center and One stop Center
- Facilitate MVC identification exercise in Zanzibar and Rufiji
- Facilitate formation of four child protection team in Morogoro and Coast.
- Organize and facilitate MVCC and volunteers training
- Continue to strengthening District Implementing Partners group forum (DIPG)
