

Saving Moms and Newborn Babies from Preventable Deaths in Indonesia

*Newborn: 0-28 days old

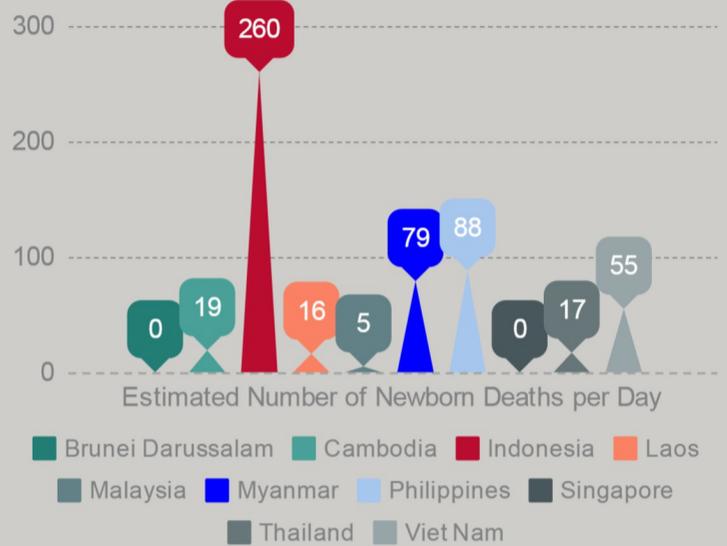

Maternal Deaths in ASEAN

42 pregnant women die each day in Indonesia

Source: UN Estimate 2014
Intecensal Survey, 2015 for Indonesia

Newborn Deaths in ASEAN

260 newborn babies die each day in Indonesia

Source: UN Estimate 2011
Indonesia Demographic Health Survey (IDHS), 2012 for Indonesia

What are the challenges?

Access to quality health facilities, including those in rural areas

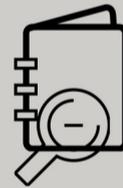

Financial barriers to access health services

Local governments programs to improve maternal and newborn health

Accountability from health providers, health facilities and hospitals to provide quality care especially during complications and emergencies

More quality and use of evidence around the cause of maternal and newborn deaths

Better coordination and referrals of mothers between health providers, communities, and hospital services during emergencies

What can we do?

Private Sector

Civil Society Organization (CSO)

Media

Government of Indonesia
