OVERVIEW OF THE COLLECTION

- Repository Name:** Washington State University Libraries
Manuscripts, Archives, and Special Collections
Holland and Terrell Libraries
Pullman, WA 99164-5610 USA
(509) 335-6691
<http://www.wsulibs.wsu.edu/holland/masc/masc.htm>
- Collection Number:** Archives 26
- Title:** Pakistan Project (WSU-AID Contract) Records
- Dates:** 1952-1972 (inclusive)
- Quantity:** approximate 50,000 items
54 linear feet
108 containers
- Summary:** Includes budget and other reports, contracts, audits and other administrative and financial files; annual reviews, correspondence of various kinds, student reports and other personnel records, news clippings, press releases and other printed materials of a public relations nature.

HISTORICAL NOTE

Washington State University's Pakistan Project was one of over seventy similar projects which were carried out throughout the world by American land-grant colleges under contract to the United States Agency for International Development, its predecessor agencies, and the various host countries. One of the longest running, the WSU project first came under consideration in 1952, was contracted for and implemented in 1954 and continued active under several successive contracts until 1972. Initially the project consisted of a series of broad ranging advisory services to the University of the Punjab at Lahore; after 1961 the emphasis changed to the development of the new West Pakistan Agricultural University at Lyallpur. With the completion of the Lyallpur project in 1969, a new contract was negotiated to continue certain technical projects at WPAU until 1971 after which the project was terminated.

The organization and methods of the WSU Pakistan Project changed considerably between 1954 and 1971 as experience brought about increasing sophistication. What was at the beginning essentially an educational "exchange" program eventually was to become a concerted effort to apply subtle theories of public administration and economic development. Evolving from this experience was an arrangement which structured the project into several sub-projects, such as agricultural economics, plant pathology, genetics and rural sociology. Lead by various staff members from WSU and other American universities, these sub-projects brought together students, equipment, literature and staff at the two Pakistani nationals at various American universities with the intention of their returning to control these sub-projects. The over-all project was headed in Pakistan by a Chief of Party who was the executive officer for the entire project. In the United States, the contract was administered by the Office of Campus Coordinator essentially serving a staff office, preparing budgets, keeping records, making reports and overseeing the Pakistani participants attending American universities. Some evaluation of the workings success and shortcomings of the program can be found in Theodore E. Doty's Washington State University in West Pakistan 1954-1969: An Evaluation of Technical Assistance to Higher Education for Agricultural and Economic Development, a WSU doctoral dissertation in Agricultural Economics written by one-time Campus Coordinator of the Pakistan Project (1971).

ARRANGEMENT

As the WSU Pakistan Project had administrative offices in both Pakistan and the United States, underwent considerable changes in emphasis over time and was generally administered through coordination of persons; its papers, of necessity, were not filed according to strict organizational arrangement. Instead the working order most often used was a dossier type of arrangement. With the closing of the files, this material has been combined into an arrangement of three series (and nine sub-series), which substantially follow functional lines and which are described below in the series description. The arrangement of individual folders within the various series is described in the container list.

USE OF THE COLLECTION

Restrictions on Access

The Collection is open for research use.
