Revision No. 13. Project/Activity Title  
Agriculture Technical SupportI. BACKGROUND

This project is designed to support the agreement between the US Government and the Government of Vietnam's Ministry of Land Reform and Agriculture and Fishery Development (MLRAFD) to promote the agricultural development of Vietnam. The agricultural program seeks to achieve a balance between the accomplishment of short-run production advances for pacification and stabilization purposes, and the development of a viable Vietnamese governmental apparatus for continued long-run assistance to the agricultural sector. The purpose of this project is to provide (1) coordination, policy and operational guidance, administrative services, and technical support for the Agriculture Sector as a whole; (2) advice and guidance to Mission management on all matters coming within the purview of the Agriculture Sector, and to the MLRAFD on statistical collection and analysis; and (3) liaison and coordination with senior officers of the GVN on agricultural matters.

Field work by American and TGN agriculturists will continue to be focused more closely on agreed priority commodities (rice, livestock, feed, poultry and swine). Advisory assistance to the GVN at the Saigon level, while supporting current priorities, will also seek to develop the management capability of the GVN to conduct technical programs.

II. DESCRIPTION AND OBJECTIVESA. Program Management

Direct hire and FASA advisory, supervisory, and administrative personnel are provided at the national, regional and provincial levels as follows: (1) personnel for general management and administrative responsibilities in the USAID Office of Domestic Production for developing policy and programs to support MLRAFD institutional development at the national levels; (2) senior agriculture advisors to assist in administering the agriculture program in each region; and (3) agricultural generalists to work primarily in the designated priority provinces on the rice and protein production projects and the new land reform program.

B. Korean Agricultural Technical Group (KATG)

The Korean Agricultural Technical Group (KATG) works under contract to provide third-country technical assistance to the MLRAFD. These agriculturists and mechanics support the MLRAFD by demonstrating modern production techniques to farmers, by conducting special projects under the auspices of the Directorate of Irrigation and Rural Engineering (DIRE), and by training technicians and farmers in the use and maintenance of agricultural

machines as an activity of the Agricultural Machinery Directorate (AMD). Program development and implementation are administered by the MLRAFD with advisory support from USAID.

The KATG contract provides for a team of 32 technicians who will work in conjunction with GVN and USAID/CORDS agriculturists. The contract with KATG will also provide for contractor procurement of commodities (e.g., seeds, tools, small engines), for use in the program. In addition, the team is expected to receive substantial donations from the Government of Korea.

III. DESIGNATIONS AND RESPONSIBILITIESA. USAID

The Associate Director for Domestic Production (ADDP) will serve as primary counterpart to the Minister of Land Reform and Agriculture and Fishery Development and will work closely with him on all aspects of the USAID agricultural program. With reference to the KATG contract, he or his designee will serve as US Project Manager, in which capacity he will act as technical advisor, coordinate the USAID assistance provided for the project, and work closely with the GVN project manager in all phases of the project, including budgeting, implementing, and evaluating.

B. GVN

The Minister, MLRAFD will have primary responsibility for the overall implementation of USAID-supported GVN agricultural programs. The Secretary-General of the MLRAFD is designated GVN Project Manager for KATG Sub-Activity. It is understood that he will work closely with ADDP and KATG technicians in the attainment of project objectives.

IV. IMPLEMENTATION PLAN AND RESPONSIBILITIESA. USAID

For Program Management functions, USAID will provide administrative staff members to carry out program management functions at the Saigon level. These technicians will be supported by Vietnamese and TCN secretarial and non-professional employees. USAID also will provide field staff personnel, including regional coordinators and provincial advisors. The latter group will serve as counterparts to the agricultural service chiefs in their respective provinces. All personnel and commodity support for field personnel will be provided by CORDS. A portion of the Saigon staff and the field staff will be provided through a Participating Agency Service Agreement (PASA) with the US Department of Agriculture.

**B. GVN**

With reference to the KATC contract, the Secretary-General of the MIRAPO, as GVN Project Manager, will coordinate the GVN participation in this sub-activity as follows:

1. Prepare a detailed, time-phased Work Plan for all phases of the team's activities within 30 days of the signing of the contract. This Work Plan shall be prepared in cooperation with the USAID Contract Representative;
2. Designate at least one official of the Ministry to act as counterpart for each Korean technician assigned to work on these projects;
3. Continue to meet the normal operating costs of the project including those in support of the activity;
4. Provide interpreter services for Korean technicians as required;
5. Provide from GVN budgetary sources all locally available materials needed for support to field operations of the Korean team including the transportation, storage and proper care of these materials; and
6. Maintain in good condition all project equipment supplied by the team and provide fuel and lubricants for the operation of project vehicles.

**V. Financial Obligations**

**A. USAID**

The \$300,018 obligated on the face sheet will fund a Korean agricultural team through a contract to provide technical services in irrigation, fisheries, agronomy and equipment maintenance for the period of March 30, 1970 through March 29, 1971.

**B. GVN**

The GVN and the USAID agree to use VN\$14,000,000 of the CY70 AAC in support of the project as specified in the budget attached. These Piasters will be disbursed by the GVN according to the instructions in PIO/T

VI. REPORTING AND EVALUATION

The US and GVN Project Managers shall jointly prepare and submit to their respective agencies such progress reports and other reports as may be requested, in a format mutually acceptable to the GVN and USAID. Distribution will include DGBFA and other GVN agencies when appropriate. These reports should cover progress in the attainment of specific targets established in this Agreement and Work Plan, which is to be developed, and identify any problems or delays encountered which are deterring progress of the project. These reports should be submitted on a quarterly basis within 30 days after the end of the quarter.

VII. SPECIAL PROVISIONS

The Piaster Budget may be modified, within the limit of funds hereby approved by agreement between the GVN and US Project Managers but no budget article may be increased by more than 20% without formal amendment of this Agreement.

Revision No. 1

**I. BACKGROUND**

The development of an agricultural economics and statistics program within the Ministry of Land Reform and Agriculture and Fishery Development (MLRAFD) was started in 1957, and the Agriculture Economic and Statistics Service (AESS), was established under the MLRAFD in 1958. The function of AESS has been to provide the GVN and the general public with an accumulative source of information and published data related to agriculture, fisheries, forestry and the livestock industries. Significant experience has been gained in gathering agricultural production data, farm input and farm commodity prices; conduct of economic studies; and dissemination of information.

Notwithstanding the progress made to date, there are not enough adequately trained Vietnamese agricultural economists and statisticians to make in-depth analyses of agricultural problems, or to develop a data collection system which satisfies the informational needs of economic policy makers concerned with agricultural development in Vietnam. In addition, available data on number of farms, production of specific crops, production of animal products, production costs, consumption of food products, and other utilization of agricultural products, etc., are incomplete and often of questionable reliability.

Statistics of greater reliability and more thorough in-depth economic analyses are needed for the determination of policies conducive to the development of the agriculture sector and for the guidance of production programs.

**II. DESCRIPTION AND OBJECTIVES**

This activity is designed to assist the MLRAFD in the institutional development of the Agriculture Economics and Statistics Service, through technical advice, on-the-job and formalized training programs, to realize the following:

1. To provide a continuing flow of timely, reliable, useful data for policy makers and program administrators involved in agricultural development activities.
2. To monitor development in the agricultural sector of the economy and through analysis of these developments, make policy recommendations to appropriate officials in the MLRAFD.
3. To improve collection, reliability, and timely publication of agricultural production data, prices, production and marketing costs, and agricultural census data.

4. To cooperate and coordinate with data users in the design of agricultural surveys in order to ascertain the information needed.
5. To improve designs, methods, and procedures used in agricultural surveys, economic investigations, and associated analyses.
6. To participate more directly in agriculture planning and policy formation.
7. To develop an adequate staff of trained personnel to carry out required support activities.

**III. DESIGNATIONS**

**A. USAID**

The Chief of the Agricultural Statistics Branch/ADDP is hereby designated as the US Project Manager. In this capacity he will act as technical advisor, coordinate the USAID assistance provided for the project and work closely with the GVN Project Manager in all phases of the project including budgeting, implementing, and evaluating.

**B. GVN**

The Chief of the Agriculture Economics and Statistics Service is hereby designated GVN Project Manager. In this capacity he will be primarily responsible for the overall implementation of the program. It is understood and agreed that he will work closely with the US Project Manager and will seek and utilize the latter's technical knowledge, advice, and counsel to the maximum degree practicable to attain project objectives.

**IV. IMPLEMENTATION PLAN AND RESPONSIBILITIES**

A. Four US technicians -- 2 economists and 2 statisticians (formerly funded under Project 140-362 which was terminated 30 June 1969) -- will continue to assist in developing the capability of the Agriculture Economics and Statistics Service (AESS) of MIRAFO to provide statistical information and make economic analyses needed in making sound agriculture development policy decisions.

B. AESS statisticians and economists, with the advisory service of American economic and statistics advisors, will pursue the plan of work (AAC funded activities) during CY70 shown in Annex B.

**V. FINANCIAL OBLIGATIONS**

**A. USAID**

**1. Participants**

Participant training in statistics is provided under obligating  
PIO/P 00211.

**2. Commodities**

The dollars obligated on the face sheet are for the procurement of  
scales and miscellaneous office equipment. See ref PIO/Cs for specific details.

**B. GVN**

The DGBFA and USAID agree to use the CY 70 AAC plasters in support  
of this program for the purposes specified in the Plaster Budget attached.

**VI. REPORTING AND EVALUATION**

The US and GVN Project Managers shall jointly prepare and submit to  
their respective agencies quarterly progress reports and other reports as  
may be requested, in a format mutually acceptable to the GVN and USAID.  
These reports shall be submitted within 15 days of the end of each quarter.  
Distribution will include DGBFA and other GVN agencies when appropriate.  
These reports should cover progress in the attainment of specific targets  
established in this Project Agreement and Work Plan, and identify any  
problems or delays encountered which are deterring progress to the project.

**VII. SPECIAL PROVISIONS**

A. The local currency budget shown in Annex C to this Agreement may  
be modified, within the limits of total funds hereby approved, by agreement  
between the GVN and USAID Project Managers, but no budget article as  
mentioned in the budget may be increased by more than 20 percent without  
formal amendment of this Agreement.

Agriculture Technical Support  
(Agr Econ & Sta)WORK PLAN

1. Rice Crop Forecast: A forecast of the 1970-71 rice crop -- hectares planted and production estimates by provinces will be prepared for release on November 1.
2. Rice Stocks and Marketing Survey: This survey, to be conducted quarterly (only the last 3 quarters in CY70), is designed to provide estimates by province of paddy and rice held on farm and in off-farm storage in surplus rice producing areas. The survey also will cover farmer and tradesmen marketing intentions.
3. Livestock and Poultry Production Survey: This survey will be conducted in 22 provinces to provide production data as well as classification data by age and sex for major livestock species and poultry. Target Date: July-August, 1970.
4. Monthly Crop Report: This report is designed to provide monthly data on the general agricultural situation at the provincial level with emphasis on crop growing conditions and rice shipments and marketing.
5. Corn and Sorghum Cost of Production Survey: This investigation will attempt to determine costs and returns to both corn and sorghum producers and identify cultural practices being used in six of the larger producing provinces. Target Date: July-August, 1970
6. Hog Marketing Survey: The purpose will be to estimate swine marketing costs and identify regional markets and transportation facilities utilized. Target Date: May-June, 1970
7. Fertilizer and Pesticide Utilization Survey: This survey will estimate the extent and quantity of fertilizers and pesticides used on major crops and rates of application, costs to farmers, and economical benefits realized. Target Date: August-September, 1970.
8. Rice Cost of Production: This is a follow-up of the 1969 Rice Cost of Production Survey. It is designed to provide the level of change in the cost of producing rice as determined by the 1969 survey. Target Date: June-August, 1970.
9. Bi-Monthly Price Program: This program is designed to shift responsibility for collecting agricultural prices from CORDS to the GVN in some 28 provinces. It will also test the feasibility of changing from CORDS to GVN telegraphic systems in some 5 provinces.

10. Development of District Reporting System: This project will develop a reporting system at the district level. The agents, working on a part-time basis, will report monthly on the agricultural situation in their districts and will include farm input and output prices. These agents will also function as supervisory enumerators on all surveys carried out in their district by AESS. This activity will be pursued throughout CV70.

Two additional activities are being considered for possible inclusion in the foregoing work plan:

(1) To provide Economic Research Grants to students in the Department of Agricultural Economics of the University of Saigon. These grants would be very small. They would be used to support several students during a one to four-month research period and also to cover translation and limited copy printing costs.

(2) To establish a Market Information and News Service. Initiation of a market news program continues to be an objective of this project. Such an effort will be undertaken if and when resources permit.

I. BACKGROUND

This project provides the services of agricultural technicians to work with the GVN Ministry of Land Reform, Agriculture and Fishery Development (MLRAFD) in support of GVN efforts to promote agricultural development in Vietnam. Technicians of the Chinese Agricultural Technical Group (CATG) supplement the staff of the MLRAFD in devising and implementing development programs and in training both GVN personnel and private farmers in new agricultural production techniques. These CATG technicians are provided through a GVN-Republic of China contract. The US provides dollar and piaster funding to cover personnel and operating costs of the CATG Team.

The services of these CATG technicians have been provided through this arrangement since 1967. Their continued services are required in order to supplement the technical and manpower capabilities of MLRAFD staff and thereby accelerate the rate at which new production technology is adopted on Vietnamese farms. In pursuing various program activities, CATG team members work in cooperation with USAID technicians engaged in related developmental activities.

II. DESCRIPTION AND OBJECTIVES

The long range goal of this project is to evolve an operational framework through which the US and the GVN can effectively coordinate the planning and implementation of multilateral assistance programs in support of agricultural development in Vietnam. The short-term objective is to provide technical support to on-going developmental efforts of the MLRAFD. CATG technicians supplement the efforts of Vietnamese agriculturists engaged in promoting improved production practices.

III. DESIGNATIONS

A. USAID

The Associate Director for Domestic Production (or his designee) is hereby designated US Project Manager. In this capacity he will work directly with the GVN Project Manager and the Team Leader of the CATG in determining the scope of CATG program activities and in coordinating the developmental efforts of USAID and CATG technicians with those of MLRAFD technicians.

E. GVN

The Secretary General of the MLRAFD is hereby designated as GVN Project Manager. In this capacity he will be primarily responsible for the overall implementation of the program. To the maximum extent possible, he will seek to coordinate his efforts with those of the US Project Manager.

IV. IMPLEMENTATION PLAN AND RESPONSIBILITIES

The GVN and US Project Managers shall, in consultation with the CATG Team Leader, establish a formal Program Coordination Committee for coordinating the planning and implementation of CATG project activities. This committee shall be the focal point for determining on a continuing basis the areas in which CATG efforts can best be directed in support of MLRAFD development programs and for continually monitoring program progress.

Within 30 days after the effective date of the contract extension, the planning and implementation of CATG project activities shall be developed into a written work plan stating, to the maximum extent possible, specific targets and goals, quantitatively stated and placed within a meaningful time frame.

In order to secure optimum benefits in terms of developmental impact, this Committee shall review all phases of planned and on-going CATG program activities and seek to emphasize those project areas which promise the greatest returns and which complement other MLRAFD programs. Such reviews shall be conducted on a monthly basis and shall cover all MLRAFD activities supported by both the CATG and USAID. Participants in these reviews shall include the GVN Project Manager, the CATG Team Leader, the US Project Manager, and such technicians from the MLRAFD, USAID, and the CATG as may be required to address particular subject areas.

As a means of promoting maximum impact of CATG program efforts, the GVN Project Manager shall officially designate counterparts for each CATG technician, and these counterparts shall be the focal point of CATG technical assistance efforts. CATG technicians shall function to support the work of their GVN counterparts, rather than to do the work themselves on behalf of their counterparts.

The Program Coordination Committee shall jointly determine the post of assignment for individual CATG technicians. Every effort will be made to optimize the impact of these technicians by assigning them to priority development areas. Overall MLRAFD development objectives shall provide the basic framework for making these determinations.

BLURRED COPY

In order to promote the coordination of MIRAFO, USAID, and CATC program efforts at the operational level, the GVN and USAID Project Managers and the CATC Team Leader shall regularly secure from their respective field technicians reports on program matters of mutual interest. A particular effort will be made to identify any duplications of effort or conflicts in program activities. These reports shall be discussed at monthly meetings of the Program Coordinating Committee in order that actual or potential conflicts can be resolved and overall program activities can be coordinated better.

V. FINANCIAL OBLIGATIONS

A. USAID

in column B

The dollar funds obligated on page 1 of this Agreement will finance a contract between the Republic of Vietnam and the Republic of China under which the services of 34 agricultural technicians will be provided to work in support of GVN efforts to promote agricultural development.

B. GVN

in column B

The local currency shown on page 1 of this Project Agreement shall cover local staff and operational support costs of the CATC technicians according to the Piaster Budget shown in reference PIC/T.

VI. REPORTING AND EVALUATION

Quarterly reports on the status of GVN, USAID, and CATC progress in promoting improved coordination of development efforts shall be jointly prepared by the US and GVN Project Managers and submitted within 30 days after the end of the quarter. These reports shall be reviewed by the Program Coordination Committee identified in IV, above, and shall be sent by that Committee to appropriate GVN and US agencies as a joint assessment of program status. The reports shall include an analysis of any problem areas encountered and shall recommend appropriate corrective action.

(CATG - 363.00)

Project Number : 730-11-199-363

Agreement Number : 70-017

Original \_\_\_\_\_ Revision 10

Explanation and/or comments

This revision provides funds to support the CATG Team from April 1, 1972 through December 31, 1972. Funds provided herein are to be expended under Article 31-39 (Operational Supplies and Services).

The attached AAC Budget funds the remaining nine months for the Chinese team. VN\$6,550,000 was obligated for the first three months of the year under ProAg 70-017 Rev. 9. With this revision the total obligation will be VN\$35,000,000 (VN\$15 million from CY 72 AAC and VN\$20 million from CY 72 AAC Reserve). The CY 72 AAC reserve amount of VN\$20 million has been approved as a first priority item by the Joint USAID/CORDS/DGBFA Committee.

For your information the following back-up documents have been attached:

- Gleason to Reed Memo dated 12/18/71, subject "AAC Funds to Support CATG Activities".
- Reed to Gleason Memo dated 1/4/72, subject same as above.
- Gleason to Reed Memo dated 1/26/72, subject same as above.
- Minutes, DGBFA Meeting of 2/8/72 (see page 4, proj. #363 and attachments).
- Gleason to Reed Memo dated 2/24/72, subject same as above.
- Irvin to Gleason Memo dated 3/21/72, subject CATG.
- Minutes, DGBFA Meeting of 3/28/72 (see page 2, proj. #363).
- Status of 72 AAC Reserve Requests Report dated 4/11/72.

**Agriculture Technical Support  
(Agriculture Economics and Statistics)**

**I. BACKGROUND**

Although agriculture makes the greatest contribution to Vietnam's GNP, only meager information and analyses are available to guide government and private investors. Available data on numbers of farms, land in specific crop, animal numbers, production costs, consumption of food, prices etc., is incomplete and in some cases of questionable reliability.

There are not enough adequately trained Vietnamese agricultural economists and statisticians to carry on the required analyses of agriculture problems, or to develop a system of collecting more reliable data and presenting findings to the economic policy makers of the Vietnamese Government.

**II. PURPOSE**

Under the terms of this agreement funds are provided for U.S. advisors to assist the GVN to develop and implement an agricultural economics and statistics program which will: (a) provide information necessary to identify and evaluate policy and program alternatives in the implementation of goal plans for rice, swine, and poultry; (b) determine problem areas likely to develop from increased agricultural production and marketing; (c) expand farm management research to obtain accurate and adequate information for entrepreneurial decision; (d) provide basic data on selected farm products as basis for evaluating export potential of those commodities; and (e) improve the reliability and timelessness of statistics on principal agricultural products.

**III. RESPONSIBILITIES**

**A. The Government of Vietnam**

1. The Ministry of Land Reform and Agriculture hereby designates the Chief of the Agricultural Economics and Statistics Service to represent the Ministry in carrying out this project, and agrees to support the project through the normal revenues made available to the ministry for its operations.
2. The Director General agrees to:
  - a. continue to meet the normal operating costs of the Directorate including those in support of this project;

b. maintain in good condition the equipment which will be supplied by the USAID and provide gas, oil and lubricants for the operation of vehicles.

c. develop and implement an expanded program for the collection and analysis of data on the production, marketing and utilization of agricultural products, with particular emphasis on rice, swine and poultry. In addition to the annual census on livestock and crops, price reports, rice stock surveys, farm management studies, special attention will be given in CY 70 to an analysis of the impact of land reform on the production of agricultural products and farm income, the production and marketing of grain sorghums, and an analysis of price margins for selected agricultural products.

B. The United States Agency for International Development designates the Assistant Director for Economics (Domestic Production) to serve as Project Representative.

WORK PLAN

During CY 69/CY 70 surveys will be made to determine production of major crops, fruits and vegetables, livestock and poultry numbers, industrial crops, rice stocks, and costs of producing rice. The data collected on the costs of producing rice will be analyzed; a forecast of the rice crop for 1969/70 will be made; a survey will be made on the utilization and disposition of rice, swine and poultry; an agricultural pilot census study will be made to determine an appropriate census sample by testing it against a complete enumeration of a selected site in preparation for the agricultural census to follow. Farm management studies will be continued.

Project - CY 69

AAC Funded

1. Rice Stock Survey: April, August, October
2. Rice Cost of Production Study: April - September
3. Livestock Production Survey: June - September
4. Rice Crop Forecast: September, October
5. Improved Price Reporting: Continuing
6. Livestock Cost of Production Study: August - November (Swine & Poultry)
7. Pilot Study for 1970: September, October  
World Agr. Census
8. Utilization & Disposition Data: June - September (Rice, Swine & Poultry)
9. Farm Management Study: Continuing

GVN Funded

1. Agriculture Yearly Survey: October - December
2. Vegetable and Flower Survey (Dalat City and Tuyen Duc Province): November, December
3. Special Surveys: Continuous

**USAID/GVN STANDARD PROVISIONS**

**I. RESPONSIBILITIES :**

**A. USAID**

1. Availability of funds permitting, USAID proposes to provide dollar funds to finance the procurement of contract services, commodities, technicians' costs, participant training, and other costs as required for this project. Except for technician costs, the actual obligation of these funds will be accomplished by separate documentation signed by the GVN and USAID if they are not obligated by this Project Agreement.

2. AID agrees to furnish technical advice, guidance, and assistance through technical advisors, consultants, or contractors to assist the GVN Ministry sponsoring this project, in all technical and financial aspects of the project, including planning and implementation.

3. AID agrees to assist the Government of Vietnam in the selection of participants for further study and training in the USA and third countries and to assist in planning study and observation tours as required.

4. USAID shall appoint a Technical Advisor, who will act as the USAID technical specialist and be delegated the authority to assist his GVN counterpart in the latter's responsibility to supervise, develop, and implement this project. Notification of the name of the USAID Technical Advisor shall be made to DGBFA and the appropriate Ministry within 10 days after the Agreement has been signed. The Technical Advisor or his successor will assure continuity of activities undertaken pursuant to this Project Agreement.

5. USAID shall make available to the USAID Technical Advisor such technical, financial, or administrative services as may be necessary to implement the project on schedule, including relevant financial data concerning the USAID direct dollar assistance. This information will also be made available to DGBFA.

**USAID/GVN STANDARD PROVISIONS - CONTINUED**

**B. Government of Vietnam :**

1. The GVN agrees to provide the piaster funds from the source and in the amount specified under block 9 of this Project Agreement for the purposes designated in this Agreement.

2. The GVN Minister sponsoring this project, or his authorized representative, shall appoint a Project Manager, who will act as the GVN technical specialist and be delegated the authority to supervise, develop and implement this project, with the assistance of U.S. technical advisors. Notification of the appointment and the name of the Project Manager shall be made to USAID and DGBFA within 10 days after this Agreement has been signed.

3. The GVN Minister, or his authorized representative, shall make available to the Project Manager such technical, financial, or administrative services as may be necessary to implement the project on schedule, including financial data from the National Budget relating to the project. This information will also be made available to USAID.

4. For evaluation and review purposes, the Project Manager, acting through his Minister, shall render to the Directorate General for Budget and Foreign Aid (DGBFA) quarterly progress reports in a format approved by the GVN and USAID. Copies of the reports will also be made available to USAID.

5. In accordance with AID regulations governing the selection of participants, the Project Manager is to nominate qualified technicians associated with the project as candidates for participant training. Selection of participants and nomination to the GVN and USAID for approval will be achieved jointly by the Project Manager and his U.S. technical advisors. The GVN agrees that all participants selected and mutually approved by the GVN and USAID for training shall (a) be released for training when scheduled, (b) have their salary continued during the period of training, and (c) shall be immediately re-employed upon their return from training in the same position from which released or in a more responsible position in the project.

Original or Revision No.

A. As used herein, the term «AID» refers to the Agency for International Development, any component agency, or any successor agency. References to «this Project Agreement» shall mean the original Project Agreement as modified by any revisions which have entered into effect.

B. (1) AID will make available the amounts specified in Block 8 of this Project Agreement, as necessary for the project, for use for the designated purposes and as may be further described in Annex A, as required by Block 5 hereof. In addition, as may be further specified in Annex A, AID will, subject to the availability of funds and (where required by AID procedures) as provided for in Project Implementation Orders (PIOs) issued by AID in accordance with its procedures, make available funds (a) to pay costs of furnishing technical services to be performed by United States Government employees in connection with the project, (b) to pay a share of the costs of providing training outside the cooperating country in connection with the project for qualified persons from the cooperating country, and (c) to pay such additional costs as may be specified.

(a) The Cooperating Government Agency will make available the amounts specified in Block 9 of this Project Agreement, as necessary for the project, for use for the designated purposes and as may further be described in Annex A. The Cooperating Government Agency will also make, or arrange to have made, additional contributions of property, services, facilities and funds required for carrying out the project as may be specified in Annex A, or as may subsequently be agreed upon by the two parties.

C. AID and the Cooperating Agency may obtain the assistance of other public and private agencies in carrying out their respective obligations under this Project Agreement. The two parties may agree to accept contributions of property, services, facilities and funds for purposes of this Project Agreement from other public and private agencies, and may agree upon the participation of any such third party in carrying out activities under this Project Agreement.

D. AID shall not be required to make any contribution after the expiration of six months following the estimated final contribution date (Block 13 of the Project Agreement form AID 1330-1) or any amended final contribution date specified herein. Except as otherwise specified herein or subsequently

agreed by the parties, all contributions of the Cooperating Agency pursuant to this Project Agreement shall be made on or before said estimated termination date, or amended date. A contribution of goods or services shall be considered to have been made when the goods or services, provided or financed by the contributing party, are delivered in accordance with commercial practice.

E. The procurement of commodities and contract services to be financed in whole or in part by AID may (where so required by AID procedures) be undertaken only pursuant to PIOs issued by AID in accordance with its procedure.

F. Unless otherwise specified in the applicable PIO, the procurement of commodities financed with the AID contribution referred to in Block 8 of this Project Agreement shall be subject to the provisions of AID Regulation x.

G. Unless otherwise specified in the applicable PIO, title to all property procured through financing by AID pursuant to Block 8 (c) of this Project Agreement shall be in the Cooperating Agency, or such public or private agency as it may authorize. This provision is inapplicable to any property which may be used in connection with the project but is not financed pursuant to said Block 8 (c).

H. Any property furnished to either party through financing by the other party pursuant to this Project Agreement shall, unless otherwise agreed by the party which financed the procurement, be devoted to the project until completion of the project, and thereafter shall be used so as to further the objectives sought in carrying out the project. Either party shall offer to return to the other, or to reimburse the other for, any property which it obtains through financing by the other party pursuant to this Project Agreement which is not used in accordance with the preceding sentence.

I. (1) If AID and any public or private organization furnishing commodities through AID financing for operations hereunder in the cooperating country, is, under the laws, regulations or administrative procedures of the cooperating country, liable for customs duties and import taxes on commodities imported into the cooperating country for purposes of carrying out this Project Agreement, the Cooperating Agency will pay such duties and taxes unless exemption is otherwise provided by any applicable international agreement.

(a) If any personnel (other than citizens and residents of the cooperating country), whether United

States Government employees, or employees of public or private organizations under contract with, or individuals under contract with, AID, the Cooperating Agency or any agency authorized by the Cooperating Agency, who are present in the cooperating country to provide services which AID has agreed to furnish or finance under this Project Agreement, are, under the laws, regulations or administrative procedures of the cooperating country, liable for income and social security taxes with respect to income upon which they are obligated to pay income or social security taxes to the Government of the United States of America; for property taxes on personal property intended for their own use, or for the payment of any tariff or duty upon personal or household goods brought into the cooperating country for the personal use of themselves and members of their families (not including such personal or household goods as may be sold by any such personnel in the cooperating country), the Cooperating Agency will pay such taxes, tariff, or duty unless exemption is otherwise provided by any applicable international agreement.

J. Any personnel (other than citizens and residents of the cooperating country), whether United States Government employees, or employees of public or private organizations under contract with, or individuals under contract with, AID, the Cooperating Agency or any agency authorized by the Cooperating Agency, who are present in the cooperating country to provide services which AID has agreed to furnish or finance under this Project Agreement shall be subject to the approval of the Cooperating Agency and AID, and shall be under the general direction of the Director of the Mission to the cooperating country.

K. If any commodity is furnished to the Cooperating Agency, or any public or private agency authorized by the Cooperating Agency, on a grant basis through financing by AID pursuant to this Project Agreement under arrangements which will result in the accrual of proceeds to the Cooperating Agency or any authorized agency and if the applicable agreement between the two governments referred to on the first page of this Project Agreement does not provide for the establishment of a Special Account and the deposit therein of currency of the cooperating country, the Cooperating Agency will make such arrangements as may be necessary to establish a Special Account and to deposit therein currency of the cooperating country in amounts equal to such proceeds, in accordance with such terms and conditions as may be agreed upon. Funds in the Special Account may be used only as agreed upon by AID and the Cooperating Agency; provided, that such portion of the funds in the Special Account as may be designated by AID shall be made available to AID to meet the requirements of the United States.

L. The Cooperating Agency will make such arrangements as may be necessary so that funds introduced into the cooperating country by AID or any public or private agency for purposes of carrying out obligations of AID hereunder shall be convertible into currency of the cooperating country at the highest rate which, at the time the conversion is made, is not unlawful in the cooperating country.

M. AID shall expend funds and carry on operations pursuant to this Project Agreement only in accordance with the applicable laws and regulations of the United States Government.

N. The two parties shall have the right at any time to observe operations carried out under this Project Agreement. Either party during the term of the Project and three years after the completion of the project, shall further have the right (1) to examine any property procured through financing by that party under this Project Agreement, wherever such property is located, and (2) to inspect and audit any records and accounts with respect to funds provided by, or any properties and contract services procured through financing by, that party under this Project Agreement, wherever such records may be located and maintained. Each party, in arranging for any disposition of any property procured through financing by the other party under this Project Agreement, shall assure that the rights of examination, inspection and audit described in the preceding sentence are reserved to the party which did the financing.

O. Upon completion of the project, a Completion Report shall be drawn up, signed by appropriate representatives of AID and the Cooperating Agency, and submitted to AID and the Cooperating Agency. The Completion Report shall include a summary of the actual contributions by both AID and the Cooperating Agency to the project, and shall provide a record of the activities carried out, the objectives achieved, and related basic data. AID and the Cooperating Agency shall each furnish the other with such information as may be needed to determine the nature and scope of operations under this Agreement and to evaluate the effectiveness of such operations.

P. The present Agreement shall enter into force when signed. Either party may terminate this Project Agreement by giving the other party 30 days written notice of intention to terminate it. Termination of this Project Agreement shall terminate any obligations of the two parties to make contributions pursuant to Blocks 8 and 9 of this Project Agreement, except for payments which they are committed to make pursuant to noncancellable commitments entered into with third parties prior to the termination of the Project Agreement. It is expressly understood that the obligations under paragraph H relating to the use of property shall remain in force after such termination.

Agricultural Technical Support  
(Agricultural Extension and Information)

Use this form to complete the information required in any block of a PIO or PAA form.

I. BACKGROUND

Agriculture extension and information is one phase of a multiple thrust to increase agricultural production in Vietnam. The significant increase in the production of rice and protein foods demands modern practices and inputs unknown to the majority of Vietnamese farmers. This activity provides the means of reaching these farmers and gaining their cooperation through demonstrations and the teaching of proven techniques. The highest priority agricultural goal is increased rice production.

The situation in Vietnam which led to American Assistance for agricultural extension and information included several related factors: declining agricultural production to the point where Vietnam became a food-deficient country; low agricultural yield per unit of area resulting from antiquated farming methods and livestock husbandry; lack of a government agency to teach farmers new and improved methods of production; and a total lack of programs for training rural youth and women.

The GVN Agriculture Extension Service and the Agriculture Information Service started in 1954. Since then, their administrative structures, physical plants, and personnel have steadily expanded. In 1968 the Agricultural Extension Service included four technical groups as follows: (1) Bureau of Demonstration and Training, (2) Bureau of Rural Youth, (3) Bureau of Home Improvement and (4) The Rice Production Training Center. The Agriculture Extension activities are operating in forty-three provinces and seven improved farming villages with a total of 423 personnel. This includes 18 in the national offices, 84 in the provincial offices and 321 district cadres. A goal of 1000 agents has been established however it has not been possible to reach this level due to personnel shortages caused by the military mobilization.

The Agriculture Information Service (AIS) creates and produces information materials on agricultural subjects for various directories for distribution to the Vietnamese farmers and their families. It supports all GVN/USAID projects concerned with agricultural production and rural living.

3. Project/Activity No. and Title 730-11-199-363

Agricultural Technical Support  
(Agricultural Extension and Information)

The three main functions of AIS are to (a) publicize the work being done by MLRA in its nation-building activities (b) produce various types of information materials to inform the farmer in improved agriculture practices and (c) to produce teaching and training materials for AIS staff personnel to use in the field.

During 1968 AIS produced nearly 2.5 million copies of magazines, technical journals, booklets, leaflets and posters and taped two 15-minute radio farm broadcasts each week and distributed them (10 copies) to outlying radio stations. AIS has supported MLRA in its televised programs by providing visual-aids and has assisted directorates in preparing their exhibits for agriculture fairs.

## II. PURPOSE

The purpose of this project agreement is to focus resources on ways and means of increasing agricultural production. Emphasis will be placed on:

A. Training farmers in proper management and utilization of agricultural inputs on the new rice varieties, IR8 and IR5. Some 500 demonstrations will be established by agriculture extension workers for farm families to observe.

B. Improving production techniques/that will enable farm families to increase production of fish, hogs, poultry and eggs. through demonstration training

C. Developing agriculture extension training programs for 423 extension personnel and 2,700 local leaders.

D. Developing training meetings for farm men, women and rural youth. Practical improved production techniques will be taught to an estimated 300,000 rural people.

E. Expanding the Rural Youth program to 20,000 members to include 2,500 rice projects, 3,000 swine projects, 6,000 vegetable projects and 1,000 poultry projects.

F. Expanding the Home Economics program to 16,000 farm women and girls and hold training meetings designed to reach a total of 160,000 rural people. In addition to the production of rice, swine, poultry and vegetables the training will include food preparation, nutrition, child development, health, sanitation, home improvement and clothing.

G. Sponsoring exhibits tours and achievement days to enable farm families and extension personnel to become familiar with the improved practices that are being used to increase results.

H. Developing and disseminating 4,000,000 pieces of agricultural and home economics information materials that will encourage and motivate farm families to adopt improved practices.

I. Providing technical assistance in training and information when requested to support the Agriculture Sub-Committee programs of the Village Council in 5 Pilot Provinces.  
(Long Khanh, Ninh Thuan, Vinh Long, Pa Xuyen, Dinh Tuong)

### III. RESPONSIBILITIES

#### A. The Government of Vietnam

1. The Ministry of Land Reform and Agriculture hereby designates the Chief of the Agriculture Extension Service and the Chief of the Agriculture Information Service as project managers to represent the Ministry in carrying out the activities covered in this agreement and agrees to support the activity through the normal revenues made available to MIRA for its operations.

#### 2. The Project Managers will:

- a. Designate at least one official of the respective services to act as counterpart for each U.S. advisor assigned to work on this activity;
- b. Continue to meet the normal operating costs of the services including those in support of this activity;
- c. Arrange for in-country transportation, storage, and field distribution of all USAID commodities brought to Vietnam in support of this activity;
- d. Maintain in good operating condition the equipment which has been and will be supplied by the USAID, and provide gas, oil and lubricants for the operation of vehicles.

Agriculture Extension Service Work Plan

1. The major responsibility of Agriculture Extension is the training of personnel, local volunteer leaders, and farm families.

A. Personnel

(1) Four selected extension personnel will receive six months of rice production training at the National Rice Institute, Philippines, under FIO/P 730-314-1-90591.

(2) Provincial and district personnel will receive two weeks concentrated training on rice production at the NRPTC, Hiep Hoa as provided in NRPTC Project Agreement.

(3) All provincial agriculture agents will attend regional short courses from 10-14 days and the annual six-day seminar in Saigon.

(4) All provincial 4-T agents will have two training courses of four days each and one four-day seminar in Saigon.

(5) Provincial Home Agents with 3 years or less experience will attend four weeks of short courses in Saigon. All others will have two weeks. All home agents will attend the annual seminar for six days.

(6) All district cadres will be trained at monthly seminars at the Provincial Agriculture Service. Six days of special practical training on improved methods and techniques will be held in each province.

(7) 1,000 agriculture leaders, 800 4-T club leaders and 750 home improvement club leaders will attend 4 to 6 days of training.

(8) Farmers, 4-T clubs and home improvement clubs will organize and hold 2,500 agriculture meetings with attendance of 95,000; 4,124 4-T club meetings with attendance of 49,500 and 15,000 home improvement meetings with attendance of 168,300.

B. Demonstrations

(1) Method and result demonstrations will illustrate to farm families the utility in applying technical and practical methods of rice and protein production and home improvement.

C. Tours

(1) Two-day tours will be held for 1,000 farmers, 400 4-T club members and 800 home improvement club members to observe improved practice method and result demonstrations.

D. Achievement Days

(1) Provincial and district achievement days will be organized for farmers, 4-T club members and home improvement clubs to participate in exhibits, demonstration and other program activities.

(2) One national exhibit will be held in Saigon. All farm groups and individuals will be invited to participate.

E. Rally Days

(1) Provincial 4-T club rally days will be organized in 40 provinces with attendance of 2,000.

(2) Provincial home improvement rally days will be held in 32 provinces with attendance of 1,700.

(3) National 4-T club rally will be held in Saigon with 240 delegates from 40 provinces.

(4) National home improvement rally will be held in Saigon for 100 delegates from 32 provinces.

F. Village Agriculture Sub-committees

(1) Provide technical support through training and distribution of information on request to Agriculture Sub-committees of Village Council in 5 Pilot Provinces.

(2) In order to expand the Agriculture Extension program beyond the work plan, to service the farm families of Vietnam adequately, the staffing goal of the Extension Service remains: one agriculture, one home economics, and one 4-T club agent in each of the 257 districts of the country; one agriculture, one home economics, and one 4-T club agent in each of the 44 provincial offices.

#### Agriculture Information Service Work Plan

For 1969 AIS will continue to support GVN/USAID activities by producing required printed materials, radio programs and visuals. For the first 6 months of 1969 AIS has produced more than 1.5 million copies of printed pieces and current production indicates that production will exceed that amount in the latter part of this year.

Because of the high priority placed on land distribution activities in the Land Reform program, AIS is currently devoting half of its production capabilities to printing materials for use by field technicians, supervisors and headquarters.

WORK PLAN

1. The following training will be given at the Center:
  - a. Two-week courses for a total of about 300 provincial technicians and cadres from the priority rice-producing provinces on modern techniques of rice production.
  - b. An expanded one-month course for 30 cadres selected from the graduates of the two-week course to be conducted during the later part of the year.
  - c. A 4-month course for 10 highly motivated rice and extension technicians to be selected from the priority rice-growing provinces.
2. The rice training courses will be patterned after those offered at the International Rice Research Institute. Half time will be devoted to the practical aspects of growing a crop and half time to classroom work in the theory of rice production technology. The following will be stressed:
  - a. Development of practical skills in the physical aspects of rice production.
  - b. Development of thorough background knowledge of the rice plant, pest and disease control, variety characteristics, fertilizer use and fundamentals of communication.
  - c. Practice in the design, establishment, and management of effective demonstration plots.
3. Practical and written examinations will be given at the opening day of all training courses to test the trainees' present knowledge of general rice production and their diagnostic skills on the major pest, diseases and plant disorders. A similar test will be administered on the last day of training to assess the progress made by the trainees.
4. The training plots at Hiep Hoa will be planted continuously every 25 days to provide all the growth stages of the rice plant for any field operation at any given time of the year.

MISSION STATEMENT: TO ASSIST IN THE DEVELOPMENT OF RICE PRODUCTION TRAINING FOR FARMERS AT THE PROVINCE AND DISTRICT LEVEL.

4. Works closely with the Farm Superintendent to ensure that field operations are oriented to the requirements of the different training programs.

5. Works with the Field Support Coordinator in the development of programs for long-term trainees to ensure that the training they receive will prepare them for their regional and provincial responsibilities.

6. Provides the Manager with a monthly report on all training activities at the NRPTC.

FIELD SUPPORT COORDINATOR:-

1. Works with the Manager, the USAID Advisor, and concerned provincial officials in the development of rice production training for farmers at the province and district level.

2. Coordinates all activities at NRPTC and in the provinces concerned with the implementation of provincial rice training programs including the supervision of regional rice training coordinators.

3. Works directly with long-term trainees in training at the NRPTC, particularly with reference to establishment of demonstrations and adaptive research studies, and in instructional techniques.

4. Participates in classroom and field instruction at the NRPTC when not traveling to the provinces.

FARM SUPERINTENDENT:-

1. Plans and supervises all field activities at the NRPTC training fields at Hiep Hoa.

2. Assists the Assistant Manager in coordinating the field exercises of all training programs conducted at the NRPTC.

3. Supervises the operation, maintenance and repair of all facilities at the NRPTC warehouse and training fields at Hiep Hoa.

4. Provides the Assistant Manager with a weekly report on the status of supplies, equipment, field plans, harvest, labor, etc., related to the operation of the NRPTC field activities.

5. Maintains complete records on individual fields including crops grown, fertilizers and pesticides applied, yields, etc., and submits a monthly summary to the Manager.

INSTRUCTORS:-

1. Assist the Assistant Manager in developing training materials and course outlines and participate in all classroom and field instruction as delegated by the Assistant Manager.

2. Assist the Farm Superintendent in supervising field operations at the NRPTC training field in Hiep Hoa as they relate to the training program.

REGIONAL RICE TRAINING COORDINATOR:-

1. Plans and coordinates all rice training activities for cadres and farmers in his region of assignment in cooperation with provincial rice training team leaders.

2. Helps provincial rice training coordinators identify problems of rice production including insects, diseases, cultural practices, weed control, etc.

3. Plans and conducts simple adaptive research on varieties, insecticides, herbicides, fertilizers, etc. in cooperation with the Rice Service and the Extension Service.

4. Provides a monthly report to the Field Support Coordinator summarizing training activities in his region.

1. Serves as assistant to the Field Superintendent in supervising and coordinating all operations at the NRPTC training fields at Hiep-Hoa.
2. Supervises the maintenance and repair of all facilities at the NRPTC warehouse and at the NRPTC training fields at Hiep Hoa.
3. Has responsibility for direct supervision of all labor used at the Training Center including that required for adaptive research plots.

OFFICE MANAGER:-

1. Serves as office manager and supervises all clerical employees at the main office of the NRPTC at 28 Mac Dinh Chi.
2. Sets up and maintains an itemized bookkeeping system in accordance with the budget of the NRPTC attached to the Project Agreement, and keeps a continuous account of all expenditures made against the budget.
3. Makes an official monthly report on the financial status of the NRPTC to the Manager and other offices as required by GVN regulations.
4. Implements all office procedures required to keep records on trainees who participate in programs at the NRPTC.

PROVINCIAL RICE TRAINING TEAM LEADER:-

1. In cooperation with provincial officials and the Regional Training Coordinator develops and implements farmer and cadre rice production training in the province.

**I. INTRODUCTION**

This project provides advisory and supervisory personnel through Participating Agency Service Agreements (PASA) with the US Department of Agriculture (USDA), commodities and participant training to support the total GVN/USAID agricultural program and to promote agricultural development in Vietnam.

**II. OBJECTIVES**

A. Develop within the Ministry of Land Reform, Agriculture and Fisheries Development (MLRAFD) the capability to plan, program and budget development projects by:

1. Developing the Central Policy, Planning and Programming Committee, established at Ministry level in early FY 71, into an effective organization capable of coordinating all sub-sector planning and programming.
2. Developing among key personnel in the MLRAFD capabilities in the fields of development planning, program budgeting, and project evaluation.
3. Improving the Agricultural Economics and Statistics Service (AESS) reliability and timeliness in the areas of economic data collection and analyses in support of policy formulation and sound program planning in the MLRAFD.
4. Developing an Agricultural Development Plan by the end of FY 71.
5. Preparing a program-oriented budget for CY72.

B. Support at the field level the implementation of joint GVN/USAID agricultural development programs and simultaneously develop GVN competence to plan and administer such programs.

C. Provide supplementary technical support to GVN agricultural development activities through the financing of contracts for the Chinese and Korean Agricultural Technical Groups, thereby encouraging multilateral involvement in the development of Vietnamese agriculture.

**III. DESIGNATIONS**

- A. The Minister of Land Reform, Agriculture and Fishery Development has primary responsibility for the implementation of this project.
- B. The USAID Associate Director for Domestic Production is hereby designated US Project Manager.

**IV. IMPLEMENTATION PLAN AND RESPONSIBILITIES FOR FY 71 AND CY 71.**

The MLRAFD and USAID/ADDP shall conduct a comprehensive analysis of the agricultural resources of Vietnam, the state of development of the private agr-business sector, and the manpower resources and operational procedures of the Ministry. Special studies of crop and animal production potential, marketing systems, water resource development, and internal MLRAFD operational procedures will be made by each of the technical Directorates of the Ministry. The Planning Committee shall coordinate the preparation of these sub-sector studies and consolidate them into a comprehensive Agriculture Sector Analysis. USAID/ADDP economists and consultants, including a team of water resource consultants, will assist in the preparation of the various studies and in using them in the preparation of plans for future agriculture development programs. The target date for completion of sub-sector portions of the Sector Analysis is November 1, 1970. The water resource development study will be completed by December 1970. A preliminary development plan will be completed by January 1971 and the final plan, which will be used as the basis for preparing the CY72 budget submission, will be completed by June 1971.

Concurrently with the preparation of the Sector Analysis, the Planning Committee shall determine how best to institutionalize an integrated Programming, Planning, and Budgeting System that will improve administrative coordination between provincial agriculture offices and the Ministry. In determining how best to establish this system, Provincial Agriculture Service Chiefs will be consulted by the Planning Committee in order to improve understanding of the practical problems involved in coordination between headquarters and field office staffs. USAID agricultural technicians serving as counterparts to the Provincial Agriculture Service Chiefs will advise and support these officials in their efforts to improve MLRAFD administrative procedures in the field. They will give particular attention

to assisting the Provincial Agriculture Officials develop sound, well-defined operational plans and the complete and detailed budgets necessary for the implementation of these plans.

The USAID agricultural technicians assigned at the province-level shall provide technical and managerial assistance in the planning and implementation of development programs geared to the needs of the respective provinces.

Special training courses in the fields of planning, programming, budgeting, data gathering, economic analysis, and project administration, will be conducted in Vietnam for selected staff of the Ministry. Participant training outside of Vietnam for key program management personnel designed to provide these officials with grounding in the principles of development planning, program evaluation, and program budgeting will be included. Similar training on a less sophisticated level and with greater emphasis on day-to-day practical problems for lower echelon Ministry personnel, particularly province-level program managers, will be provided through a series of in-country seminars conducted by ministry technicians assisted by TDY consultants.

Agricultural Economics and Statistical Service (AESS) will continue to collect, process, analyze and publish the normal array of agricultural product and price statistics as it has done in the past. In addition, in CY71 it will conduct an agricultural census in support of the United Nations worldwide census. With assistance from US advisors AESS will concentrate on improving survey designs, data collection procedures and analytical methods. Also AESS with the help of their US advisors will work on the design and conduct of farm enterprise and commodity marketing studies designed to support the program planning and administrative capabilities of the MLRAPD.

Prepare an implementation plan for CATG and KATG by January, 1971.

V. EXPLANATION OF FINANCING

## A. Personnel Costs - PASA

Technical assistance will be provided under PASAs with divisions of the USDA as follows:

1. Federal Extension Services eleven man-years.
2. Foreign Economic Development Service (FEDS) two man-years.

B. Participant Training - Direct

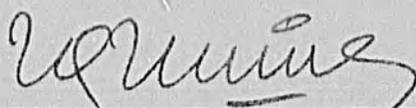

Participants will be sent to the US and/or third countries for training in agricultural development planning and implementation, resource development, program administration of mathematical statistics.

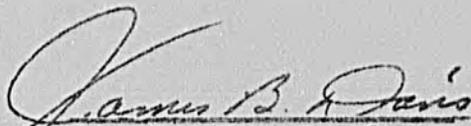

VI. REPORTING AND EVALUATION

On a Semi-annual basis, the GVN and USAID Project Managers shall review the status of progress achieved under this Project and prepare a joint report summarizing major accomplishments and identifying major problem areas. These status reports will facilitate project implementation and allow both parties to review and reassess implementation plans. Copies of the reports shall be made available to the Director General of Budget and Foreign Assistance, the USAID Program Office, and other GVN and USAID agencies as appropriate within 30 days of the end of each reporting period.

	AN AGENCY OF THE GOVERNMENT OF <b>Vietnam</b>	3. Project/Activity Title <b>Agriculture Technical Support          (Korean Agricultural Technical Mission)</b>	

**I. BACKGROUND**

The Korean Agriculture Training Group has operated in Vietnam with various sections of the Ministry of Land Reform, Agriculture and Fisheries Development since 1967. The Team has been funded fully with dollars by USAID and with piasters by the GVN.

The Government of the Republic of Korea and the Government of the Republic of Vietnam signed an Agricultural Technical Cooperation Arrangement dated 6/27/71 which provides for direct cooperation between the two governments and the provision by the ROVK of technical services to the GVN.

This activity provides US dollar and Vietnamese piaster financing in support of members of the Korean Agriculture Technical Mission to Vietnam for the period June 27, 1971 through March 27, 1972.

**II. DESCRIPTION AND OBJECTIVES**

This activity will provide Korean technicians to assist the MLRAFD in the implementation of projects in the fields of crop research, irrigation system development, agricultural mechanization and fisheries development in furtherance of the MLRAFD's 5-year Rural Economic and Development Plan.

**III. IMPLEMENTATION PLAN AND RESPONSIBILITIES**

The details regarding the number of Korean technical specialists, their scopes of work and their counterpart relationships to officials of the MLRAFD are included in the Agricultural Cooperation Arrangement between the Republic of Vietnam and the Republic of Korea. The Specifics of that Arrangement are hereby incorporated into this Project Agreement by reference.

**IV. DESIGNATIONS**

A. The USAID Associate Director for Food and Agriculture is hereby designated as US Project Manager.

B. The Minister of Land Reform, Agriculture and Fisheries Development or his designee is hereby designated GVN Project Manager.

	AN AGENCY OF THE GOVERNMENT OF Vietnam	3. Project/Activity Title Agriculture Technical Support (Korean Agricultural Technical Mission)	

**V. EXPLANATION OF FINANCING**

Through a Memorandum of Understanding between the Government of the United States and the Government of the Republic of Korea, dated 6/27/71 and incorporated into this Project Agreement by reference, USAID will provide dollars in the amount of \$252,000 for salaries, international travel, insurance, overhead, and other costs attendant to providing 360 man months of technical services (40 men for 9 months) called for under the ROKG/GVN Arrangement.

The GVN and USAID agree to utilize the local currency in the amount of VN\$20,000,000 shown on the face sheet in support of this activity for the purposes of the Piaster Budget to be finalized. In the event it is found that additional local currency will be required as agreed by the GVN and USAID the GVN will provide such additional local currency (AAC).

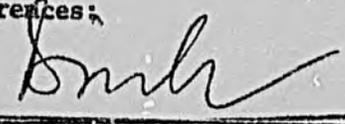

**VI. REPORTS**

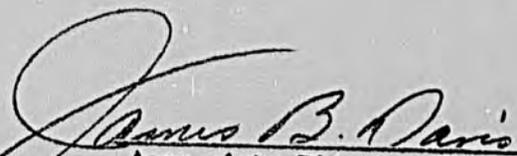

The US and GVN Project Managers shall prepare jointly and submit to their respective agencies quarterly progress reports, and other reports as may be requested, in a format mutually acceptable to the GVN and USAID. Distribution will include the USAID Program Office and the GVN Directorate General of Budget and Foreign Aid, and other GVN agencies when appropriate. These reports should cover progress in the attainment of specific targets and identify any problems or delays which are deterring progress of the project.

**VII. SPECIAL PROVISIONS**

Vietnamese piasters in the amount of VN\$14,412,000 from the AAC FY 71 Reserve account and VN\$588,000 from the AAC CY71 budget will be used in support of this activity. The USAID office of Financial Management will administer all dollar disbursements in accordance with the Memorandum of Understanding between the USG and the ROKG.

	AN AGENCY OF THE GOVERNMENT OF  <b>Vietnam</b>	3. Project/Activity Title  <b>Agriculture Technical Support</b> <b>(363.01 - Agr Econ &amp; Stat.)</b>	

**I. BACKGROUND**

The development of an agricultural economics and statistics program within the Ministry of Land Reform, Agriculture, Fishery and Animal Husbandry Development (MLRAFAHD) was started in 1957, and the Agriculture Economics and Statistics Service (AESS), was established under the MLRAFAHD in 1958. The function of AESS has been: (1) to provide the GVN and the general public with an accumulative source of economic and statistical information and published data related to agriculture, fisheries and forestry; (2) to gather agricultural production data, farm input and farm commodity prices; (3) to conduct economic studies; and (4) to disseminate information. It is now proposed by GVN that AESS be upgraded to the Directorate level, called the Directorate of Agriculture Economics and Marketing (DAEM). Upon establishment a substantial increase of responsibility will occur in the span of economic problems, the need for more depth in data gathering and the requirement for economic analyses for policy decisions by the central Ministry Staff.

Notwithstanding the progress made to date, the number of adequately trained Vietnamese agricultural economists and statisticians remains limited for making in-depth analyses of agricultural problems and for developing data collection systems in order to satisfy the information needs of agriculture policy makers. In addition, available data on numbers of farms, production of specific crops, production of animal products, production costs, consumption of food products, and other utilization of agricultural products needs attention to assure continually improved reliability.

The need for reliable data and more thorough in-depth economic analyses is increasing for the determination of policies relating to the development of the agriculture sector, and for the guidance of particular production programs.

**II. DESCRIPTION AND OBJECTIVES**

This activity is now designed to assist the MLRAFAHD upgrade the Agriculture Economics and Statistics Service to a Directorate level, and through provision of technical and commodity assistance and on-the-job and formal training programs, accomplish the following:

1. Establishment of a continuing flow of timely, reliable, useful data for agriculture sector policy makers and program administrators;

	AN AGENCY OF THE GOVERNMENT OF <b>Vietnam</b>	3. Project/Activity Title <b>Agriculture Technical Support</b> <b>(363.01 - AE &amp; S)</b>	

2. Development of a monitoring capability to analyze changes in the agricultural sector of the economy and through analysis of changes, make policy recommendations to appropriate officials in the MLRAFARD;

3. Improvement of techniques in the collection, reliability, and timely distribution of agricultural production data, prices, production and marketing costs, and agricultural census data;

4. Improvement in designs, methods and procedures used in agricultural surveys, economic investigations, and associated analyses;

5. Development of an adequate staff of trained personnel to carry-out required support activities and to participate more directly in agriculture development planning and policy formation.

**III. IMPLEMENTATION PLAN AND RESPONSIBILITIES**

A. The Agriculture Economics Staff of ADEA will maintain a continuing contact with the new Directorate in an advisory capacity. Furthermore, from time to time it will solicit specialized technical assistance from the USA or from third countries on a short-time basis to handle special problems as they arise. A case in point is the Economic Research Service/USDA project; close cooperation and mutual assistance will be maintained at all times.

B. DAEM statisticians and economists, with the advisory service of American economic and statistics advisors, will pursue the plan of work (AAC funded activities) during CY72 shown in Annex B.

**IV. DESIGNATIONS**

**A. USAID**

The Assistant Director, Agriculture Economics Division, Office of Food and Agriculture is hereby designated as the US Project Manager. In this capacity he will act as technical advisor, coordinate the USAID assistance provided for the project and work closely with the GVN Project Manager in all phases of the project including planning, budgeting, implementing, and evaluating.

**B. GVN**

The Director of the Directorate of Agriculture Economics and Marketing is hereby designated GVN Project Manager. In this capacity

he will be primarily responsible for the overall implementation of the program. It is understood and agreed that he will work closely with the US Project Manager and will seek and utilize the latter's technical knowledge, advice, and counsel to the maximum degree practicable to attain project objectives.

**V. EXPLANATION OF FINANCING**

The GVN and USAID agree to utilize local currency shown on the face sheet in support of this activity for the purposes indicated on the piaster budget attached.

**VI. REPORTING AND EVALUATION**

The US and GVN Project Managers shall jointly prepare and submit to their respective agencies progress reports and other reports as may be requested, in a format mutually acceptable to the GVN and USAID. Additional reports also shall be submitted shortly after project completion. Distribution will include DGBFA and other GVN agencies when appropriate. These reports should include the results of work completed, the attainment of specific targets established in this Project Agreement and Work Plan and identification of any problems or delays encountered which deterred of the project.

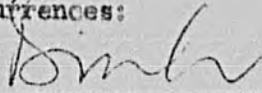

**VII. SPECIAL PROVISION**

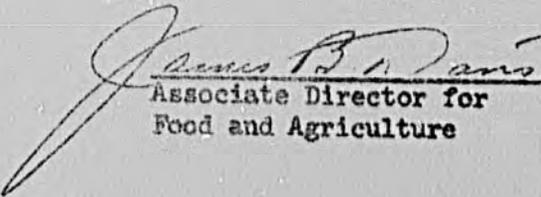

A. The local currency budget shown in Annex B to this Agreement may be modified, within the limits of total funds hereby approved by agreement between the GVN and USAID Project Managers, but no budget article as mentioned in the budget may be increased by more than 20 percent without formal amendment of this Agreement.

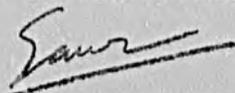

B. The Work Plan attached hereto as Annex B may be modified by agreement between the GVN and USAID Project Managers, but more substantive changes may not be made without formal amendment of this Agreement.

AID 1330-1A (B-70)  <b>PRO AG</b>  CONTINUATION SHEET  ANNEX B	<b>PROJECT AGREEMENT</b> BETWEEN AID AND  <b>DGBFA</b>  AN AGENCY OF THE GOVERNMENT OF  Vietnam		1. Project/Activity No. 730-11-199-363	PAGE <u>6</u> OF <u>6</u> PAGES
			2. Agreement No. 72-023	3. <input type="checkbox"/> Original or Revision No. <u>4</u>
			3. Project/Activity Title  Agriculture Technical Support (363.01 - AE & S)	

2. Establishment of market news service.  
 The rudiments of a market news service was started in CY72 for selected fruits and vegetables. It proposed that this effort be expanded to include Can Tho and to include a representative sample of farmers to report weekly on farm prices of paddy in the surplus rice producing provinces

.634

3. Translation and printing of research report done jointly by AESS and ADFA.  
 AESS will establish a translation center and translate English and other language reports into Vietnamese. Also, these funds will be used for the duplication and distribution of reports carried out by the ERS group of USDA in cooperation with the Ministry of Agriculture

2.960

4. Establishment of the basic economic data system. This will be done by ordering studies in the basic agriculture economic areas as listed below and by demonstration of use of such a data system in decision-making by agricultural technicians, and for policy marking at the highest administrative levels - to be done in the following subject matter areas:

Farm Management	1.7
Land use and tenure	1.3
Credit and Finance	1.2
Agriculture prices and outlook	1.5
Marketing of crop and animal products	2.0
International commerce	1.5
Food balance sheets	.8

Total                      10.0                      17.5

Revision No.

**I. BACKGROUND**

The GVN Five-Year Rural Economic Development Plan establishes goals for substantial annual increases in agricultural production, including specifically rice, grain sorghum, corn, peanuts, soybeans, vegetables, tree crops and hard fiber crops (kenaf). It was specified in the Plan that additional manpower at the Engineer and Controller levels would be required to achieve the established goals, and the Directorates identified herein have included new personnel positions in their 1972 budget request accordingly. It is agreed that the GVN National Budget for Calendar Year 1972 will authorize 41 new positions at the Engineer level and 50 new positions at the Controller level, and provide funds for the salaries and allowances of incumbents of those positions.

Inasmuch as the personnel anticipated for these positions are in fact now available and the first crop season in which they are to be involved is already in progress, funds are required for the salaries and allowances of said personnel for the period October 1 - December 31, 1971.

**II. IMPLEMENTATION PLAN AND RESPONSIBILITIES**

**A. GVN**

The GVN agrees to establish and fund the positions indicated below, to endeavor to fill the positions with qualified personnel as nearly as possible by September 1, 1971, and to fund all salaries and allowances for these personnel starting January 1, 1972. The positions and the activities of the incumbents will be distributed as follows:

Directorate of Agriculture

Crops Service

Engineer (Feed Grain Production)	Saigon
Engineer (Peanut Production)	Saigon
Engineer (Soybean Production)	Saigon
Engineer (Vegetable Production/Asparagus and Mushrooms)	Phuoc Tuy

Explanation and/or comments

This Agreement provides funds for the employment of 91 new Engineers and Controllers to help the Ministry carry out its 5-year Rural Economic and Development Plan. Funding will provide salaries for the period October 1, 1971 through December 31, 1971. Beginning in January 1972, GVN will take over full financing of these additional personnel.

ADFA reports that the Minister and Vice-Minister have been in touch with DGBFA on the matter of using FY71 AAC Reserve funds, and that DGBFA is agreeable.

**Agriculture Technical Support  
(Korean Agricultural Mission - 363.00)**

**I. BACKGROUND**

The Korean Agriculture Mission (KAM) has operated in Vietnam with various sections of the Ministry of Land Reform, Agriculture, Fishery and Animal Husbandry Development (MLRAFAHD) since 1967. The Team has been funded fully with dollars by USAID and with piasters by the GVN.

The Government of the Republic of Korea and the Government of the Republic of Vietnam signed an Agricultural Technical Cooperation Arrangement dated June 13, 1972, which provides for direct cooperation between the two governments and the provision by the ROKG of technical services to the GVN.

The activity provides US dollar and Vietnamese piaster financing in support of members of the Korean Agriculture Mission to Vietnam for the period March 29, 1972 through December 31, 1972.

**II. DESCRIPTION AND OBJECTIVES**

This activity will provide salaries for up to twenty-four (24) Korean technicians to assist the MLRAFAHD in the implementation of projects in the field of crop production, irrigation system development and agricultural mechanization. These efforts are in furtherance of the MLRAFAHD's 5-year Rural Economic Development Plan.

**III. IMPLEMENTATION PLAN AND RESPONSIBILITIES**

The details regarding the scopes of work of the twenty-four (24) Korean technical specialists, and their counterpart relationships to officials of the MLRAFAHD are included in the Agricultural Cooperation Arrangement between the Republic of Vietnam and the Republic of Korea. The specifics of the Arrangements are hereby incorporated into this Project Agreement by reference.

**IV. DESIGNATIONS**

A. The USAID Associate Director for Food and Agriculture or his designee is hereby designated as US Project Manager.

B. The Minister of Land Reform, Agriculture, Fisheries and Animal Husbandry Development or his designee is hereby designated GVN Project Manager.

	AN AGENCY OF THE GOVERNMENT OF Vietnam	3. Project/Activity Title Agriculture Technical Support (Korean Agricultural Mission - 363.00)	

V. EXPLANATION OF FINANCING

Through a Memorandum of Understanding between the Government of the United States and the Government of the Republic of Korea, dated July 10, 1972 and incorporated into this Project Agreement by reference, USAID will provide dollars in the amount of \$125,221 attendant to providing 218.4 man months of services (24 men for nine months 3 days) and per diem for up to 3 executive visits to Vietnam by Korean officials. 1/

The GVN and USAID agree to utilize the CY 72 AAC local currency in the amount of VN\$20,000,000 shown on the face sheet in support of this activity for the purposes of the Piaster Budget (page 5) ① In the event it is found that additional local currency will be required as agreed by the GVN and USAID, the GVN will provide such additional local currency (AAC).

VI. REPORTS

Reports on progress of work are rendered by the KAM on a quarterly and annual basis. Copies of these are submitted to appropriate agencies within the GVN and to USAID for routine distribution and review.

VII. SPECIAL PROVISION

Vietnamese piasters in the amount of VN\$20,000,000 from AAC CY 72 will be used in support of this activity. The USAID Office of the Associate Director for Financial Management will administer all dollar disbursements in accordance with the Memorandum of Understanding between the USG and the ROKG.

1/ The total amount of funding available under this commitment is \$125,221. Of this amount \$55,000 is obligated under this agreement, and the remaining \$70,221 represents funds presently available from the pipeline (ProAg 71-080 and ProAg 70-017/R6)

Project Number : 730-11-199-363

Agreement Number : 72-031

Original \_\_\_\_\_ Revision 1

## Explanation and/or comments

This Project Agreement provides US dollar and GVN piaster financing for continuation of the activities being performed by the Korean Agricultural Mission in Vietnam. This assistance is being provided in accordance with the terms and conditions of the Technical Cooperation Arrangement signed between the Government of Korea and the Government of Vietnam, as amended, on June 13, 1972. The project will be implemented under a Memorandum of Understanding between the United States Government and the Government of Korea. This Memorandum of Understanding (draft copy attached) is presently in final clearance and will be signed upon issuance of the Project Agreement. The date of signing will be inserted in the ProAg before reproduction and distribution.

This ProAg provides financial support for the Korean Agricultural Mission from March 29, 1972 through December 31, 1972 and extends the MCD to June 30, 1973. The total amount of funding available for use in this project is \$125,221. Of this amount, \$55,000 is obligated under this Agreement and the remaining \$70,221 represents funds available from prior year obligations (ProAg 71-080 and ProAg 70-017/R6).

- Ref: - Copy of Technical Cooperation Arrangement between GVN and ROKG dated 6/4/70.  
- Copy of Amendment No. 1 to above Arrangement dated 6/13/72.

3. Project/Activity Title <b>Agriculture Technical Support (363.01 - AE)</b>	

**I. BACKGROUND**

The Development of an agricultural economics and statistics program in the Ministry of Land Reform, Agriculture, Fishery and Animal Husbandry Development (MLRAFAHD) was started in 1957, and the Agriculture Economics and Statistics Service (AESS), was established in 1958. The function of AESS has been: (1) to provide the GVN and the general public with an accumulative source of economic and statistical information and published data related to agriculture, fisheries, and forestry; (2) to gather agricultural production data, farm input and farm commodity prices; (3) to conduct economic studies; and (4) to disseminate information. In FY 72 AESS was elevated to be the Directorate of Agricultural Economics (DAE).

**II. SECTOR GOAL STATEMENT**

To increase the efficiency of production and distribution of agricultural products, increase and equitably distribute farm income, provide an adequate diet for the people of Vietnam at reasonable costs, achieve surplus production of commodities with favorable economic advantage and expand exports of agricultural commodities and of products derived from agricultural commodities.

**III. PROJECT PURPOSE**

To develop the MLRAFAHD's capability to gather and disseminate statistical data and to make economic analyses as bases for policy decisions.

**IV. CONDITIONS EXPECTED AT THE END OF PROJECT**

1. A data-gathering operation with recognized ability to supervise enumerators, secure data, summarize data and publish results.
2. An analysis function with a demonstratable ability to examine factual evidence and recommend alternative choices for policy decisions.
3. A planning function capable of appraising short and long run priorities for the allocation of available resources of the MLRAFAHD in support of agricultural and national development.
4. An effective market evaluation unit capable of conducting market studies, analyzing the findings and disseminating the information to clientele germane to particular problems.

	AN AGENCY OF THE GOVERNMENT OF <b>Vietnam</b>	3. Project/Activity Title <b>Agriculture Technical Support          (363.01 - AE)</b>	

5. Established capability to appraise international trade opportunities and recommend actions for exports and import substitution of agriculture products.

**V. OUTPUT TARGETS**

1. Provide recommendations and prepare analytic papers for MLRAPAND to upgrade the DAE.
2. Develop methodology for training DAE staff in establishing a basic data system.
3. Stimulate the DAE to develop methodology for taking a census of agriculture in Vietnam.
4. On-going analyses of economic problems to provide methodological skills for DAE staff and to add to the technical information requirements for decision making.
5. Provide economic models, methodology, training and basic data base for an upgraded DAE.
6. Establish economic statistical data to appraise international trade opportunities.
7. Prepare recommendations for MLRAPAND for implementation of program to export bananas.
8. Provide recommendations to the DAE to establish formal structure for a marketing news service.
9. Train staff by short term specialized courses in Vietnam and other countries including specialized courses in the United States and of section leaders in specific product areas. Such training usually will be intensive 2 month short courses followed by on-the-job training with US processors and distributors.

**VI. INPUTS**

VIII. DESIGNATIONS

A. Government of Vietnam

The Director of the Directorate of Agricultural Economics is hereby designated GVN Project Manager. In this capacity he will be primarily responsible for the overall implementation of the program. It is understood and agreed that he will work closely with the US Project Manager and will seek and utilize the latter's technical knowledge, advice, and counsel to the maximum degree practicable to attain project objectives.

B. The United States Government

The Assistant Director for Agricultural Economics, Office of Food and Agriculture, is hereby designated as the US Project Manager. In this capacity he will act as technical advisor, coordinate the USAID assistance provided for the project and work closely with the GVN Project Manager in all phases of the project including planning, budgeting, implementing, and evaluating.

Explanation and/or Comments

This documentation provides funds to defray lodging and administrative expenses connected with a 4-week Bankable Projects course being given in Nha Trang. The course will be attended by 24 participants from the Ministry of Agriculture, the Agriculture Development Bank, and the National Economic Development Fund.

This use of Trust Fund is considered appropriate under paragraph 1c of the Trust Agreement of August 15, 1958, which reads as follows:

1. ... The Government of the United States, on behalf of the Government of Vietnam, may make disbursements from the Trust Account to cover the following costs of United States assistance programs in Vietnam:

- a. . . .
- b. . . .
- c. Local currency costs in connection with the training under ICA programs of Vietnamese nationals.

The program concerned is sponsored by USAID with participation by the US Department of Agriculture. The use of Trust Funds for this program is not precedent-setting for future programs which must be reviewed on the basis of their individual merit.

	AN AGENCY OF THE GOVERNMENT OF Vietnam	3. Project/Activity Title <b>Agriculture Technical Support (363.00)</b> <b>(Management of Heavy Clay Delta Soils</b> <b>for Multiple Cropping under Water Control)</b>	

This Project Agreement provides funds for the implementation of the Heavy Delta Clay Soils Project located at the University of Can Tho. Because site construction is not possible during present monsoon conditions, project field experimentation cannot commence until early 1974. Prior to that time research objectives and experimental plans must be developed. Appropriate research techniques and methodology must be determined and applied according to proper statistical designs so that the data generated is meaningful. The remainder of CY 1973 can profitably be utilized in developing these experimental plans and perfecting research techniques. Early in CY 1974, upon completion of the site, field research will commence in accordance with the developed experimental plans.

The Project is designed to study the physical and chemical characteristics of lower Mekong Delta Soils as related to crop diversification and multiple cropping; to study water requirements of crops; to improve the soil structure through various cultural and soil management practices; to determine the most effective forms of water control and irrigation; and to develop cropping system suited to Delta soils conditions under controlled water management.

MEMORANDUM OF UNDERSTANDING

Preamble

Whereas the Mekong Committee is in need of certain information on the potential use of heavy clay Delta soils in connection with its planning for the development of water and land resources of the Lower Mekong Basin;

Whereas such information not only would be of considerable value to the development of the Mekong Delta region but would also assist in the development of other major river basins found in the tropical regions of the world;

Whereas the US government is actively supporting the economic development of the nations of Southeastern Asia, including regional development programs through the Office for Regional Development (RED) in Bangkok, Vietnam economic assistance programs through the Office of USAID/Saigon and general technical support through the Office of AID/Technical Assistance Bureau (TAB) in Washington, D. C.;

Whereas the University of Can Tho in Can Tho, Vietnam has potential for and is interested in developing expertise in the agriculture of the Delta including particularly the management of soils and water on such Delta lands;

Whereas the 16 provinces in the Delta of Vietnam cover approximately 3.8 million hectares, land and water constitute their chief physical assets in the overall economic development plan.

The familiar aspects of the Vietnamese Delta are extreme flatness with large tracts of developed paddy lands intercepted by a long established network of navigation and drainage canals;

Long range planning has received attention in the recent years. Two conceptual plans are available: one prepared by the Development and Resources Corporation and the other is outlined in the Indicative Basic Plan. The two plans have much in common particularly the technical feasibility of developing the whole Delta.

Under the Mekong program, a Dutch team is now conducting appraisal work more inclined to the agricultural aspect of the Delta. Also, the International Bank for Reconstruction and Development as executing agency, is now promoting the pioneer projects in the Delta in view of gathering more data on the economic impact of developmental projects in the priority program.

From the GVN side, with USAID/Saigon assistance, a number of pilot stations have been established throughout the Delta to experiment and promote multiple and year-round cropping wherever it is possible, correlated with the introduction of modern agri-inputs such as improved varieties, fertilizers, pesticides, farm mechanization, etc.

The above programs, however, are all more or less inclined to the "applied" aspect of agri-science, pointing toward an immediate increase in farm income.

A void seems to exist in an understanding of the changes that must be made to enable the farmers of the Delta to shift from the traditional cropping pattern to an intensive year-round pattern with water control. In other words, basic studies on the inter-relationship of soil-crop-water need to be carried out to fill the gap between actual applied research and conceptual planning.

Therefore, the parties signatory hereto hereby agree to participate in a study to determine the possibility of producing a variety of field or upland crops on the heavy clay Delta soils of the Mekong Delta during both the dry and wet seasons. The title of the study shall be, "Management of Heavy Clay Delta Soils for Multiple Cropping under Water Control".

## I. The Study

### A. Objectives

1. To study the physical and chemical characteristics of the soils of the lower Mekong Delta as related to crop diversification and multiple cropping and to study the water requirements of the various crops.
2. To improve the structure and permeability of the heavy clay Delta soils by the application of various cultural practices.
3. To determine the most effective forms of water control including the methods of irrigation.
4. To develop cropping systems suited to the soil conditions of the Delta under controlled water management.

### B. General Description

1. The program will involve the use of five (5) hectares of land on which various field crops will be raised by the application of various cultural practices, irrigation methods, soil treatments, and special amendments.
2. Water control for the experimental area will be provided by the construction of a dike around the area and the installation of pumps to provide irrigation water to the experimental plots during the dry season and to remove excess water during the wet season.
3. Inputs to the program, responsibility of which is agreed to herein, will include, but not be limited to, the following:
  - (a) A staff including a project director, an advisor to the project director, a farm management superintendent and various assistants, aides and laborers as required.
  - (b) Office, laboratories, residential space and other buildings including furnishings and equipment.
  - (c) Six (6) fellowships for training at the Masters level in the fields of soils and water management.

- (d) Farm machinery and tools.
- (e) Reference materials.
- (f) An annual operating budget.
- (g) An advisory committee.

4. Although external assistance initially will be required, the responsibility for all phases of the program will gradually shift to the University of Can Tho as additional staff is developed through training programs and as the financial resources of the University are increased to sustain the continued implementation of the program. The University will assume full responsibility by July 1, 1980. Even though it is expected that the advisory committee will meet annually, the responsibility for directing the implementation of the program will rest with the University of Can Tho.

#### C. Preparation of the Site

1. The University of Can Tho is now in the process of constructing buildings and providing equipment for a new campus on a site which has been provided by the Vietnamese Government. Eight (8) hectares of that site has been assigned to the Faculty of Agriculture of the University for use as an Agricultural Experiment Station. The faculty of agriculture has agreed that five of the eight (8) hectares will be available to use in connection with this study. In order to provide a degree of water control similar to that which will be provided for the entire Delta by the Mekong development program, it will be necessary to construct a dike around the site to protect it from flooding from the river, and also to construct a two-way pumping system in order that water for irrigation can be pumped to the plots from an adjacent stream during the dry season and so that excess water which originates from rainfall on the plots during the wet season can be removed. The dike will be constructed by excavating from the inside. This will provide a collection canal within the dike system which can be used to collect excess rainfall during the wet season as well as to provide a means for collecting the tail water from the irrigation of the plots. Two pumps will be installed to provide

an alternative source of power in the event one should fail or have to be shut down for repair.

2. The plots will be leveled in such a manner that they can be irrigated by impounding the water (paddy system of irrigation) by borders, or by furrows. Also it is anticipated that eventually, it may be desirable to test the effectiveness of application of water by sprinkler. It is also expected that in some cases it will be desirable to measure the water both on to and off the fields. This will provide a basis for determining the farm water requirement for the production of various crops. If the amount of percolation into the ground-water table can be determined, it will also provide a basis for determining water consumption by crops. In order to determine the amounts of water applied, it is proposed to use a system of pipes to deliver the water to the plots which will be equipped with meters to measure the delivery and with weirs which can be used to measure the tail-water from the plots.

3. Although only five (5) of the eight (8) hectares available to the University will be used exclusively for the study of Delta Clay Soils, it is expected that the balance of the area will be used by the University for agronomic research closely related to the study. Therefore, the entire eight (8) hectare area will be diked and prepared for irrigation, and the irrigation and drainage system will be designed to such a capacity as to serve the eight (8) hectares.

D. Staff

The staff will consist of a project director, an advisor to the project director, and such other personnel as necessary to carry out the study.

E. Buildings and Facilities

Adequate housing and office space, including furniture and equipment will be provided the project/director and his advisor; also other buildings including equipment and facilities as deemed necessary will be provided.

F. Machinery

Standard machinery needed for all phases of crop production and yield measurement will be provided.

G. Operating Expenses

In connection with the operation of the plots, it is anticipated that through the operational budget it will be necessary to provide for such expenses as seeds, fertilizers, pesticides, gasoline, oil, electricity, other consumable items, and publications.

H. Reference Materials

Funds will be provided for the purchase of necessary reference materials and bibliography on the management of soil and water.

I. Fellowships

Six (6) fellowships for training in the fields of soil and water management at the Masters level will be provided. These will run for a period not in excess of twenty-four (24) months each.

J. Advisory Committee

An Advisory Committee composed of representatives of the participating organizations will be established. That committee will meet annually to review the progress and status of the study and to make suggestions of other possible approaches that might be explored. The committee will be advisory in nature only.

K. Annual Reports

At the end of each dry season starting in 1973 two annual reports, one covering the operational aspects of the project and the other the technical aspects, will be prepared. These reports will be made available to the Advisory Committee prior to each meeting.

II. Contributions of Various Participants

Subject to the availability of funds, the following organizations have indicated a willingness to consider contribution of funds, services or facilities as outlined below:

A. The National Mekong Committee

The National Mekong Committee will name one or more persons who will act on the technical advisory committee. The

committee chairman will be the Director of Rural Irrigation and Engineering of the Ministry of Land Reform, Agriculture, Fishery and Animal Husbandry Development.

B. University of Can Tho

1. The University of Can Tho will provide the project director, staff consultation, five (5) hectares of land to be used for the project site, housing for the project advisor, and major items of farm machinery when necessary. The University of Can Tho, in calendar year of 1976, will begin to assume the responsibility for some of the operating expenses as agreed to by the GVN, RED and USAID/Saigon. This responsibility will increase annually until the entire operational budget is funded by the University by July 1, 1980.

2. The project director will serve as the executive secretary of the advisory committee.

3. The project director will prepare or have prepared the two annual reports.

C. USAID/Saigon

1. The USAID in Saigon will provide the required local currency to finance the development of the site and the construction of necessary facilities including site preparation, pumping system and buildings; the employment of local technicians and other personnel; the purchase of farm machinery and tools of non-US origin; and to cover the annual operating expenses prior to the time the University assumes such operating expenses. See Annex A, Tentative Piaster Budget (attached 12/29/72 to the Memorandum of Understanding.

2. One person for the advisory committee.

D. AID/TAB/Washington, D. C.

1. Through the contract which it has with Colorado State University, TAB will provide one senior advisor for a period of at least eighteen (18) months to arrive in Can Tho during 1973. Also provide other or additional consultative

services from time to time as may be requested and agreed to by the parties hereto.

2. One person for the advisory committee.

E. RED/Bangkok

1. Through a contract with the University of Hawaii, will provide a senior advisor to the project manager for a period of eighteen (18) months.

2. Three (3) fellowships for a period up to twenty-four (24) months each at Colorado State University.

3. Purchase of equipment for the soils and agronomy laboratories, reference materials for the library, the meters and weirs for the irrigation system, and other equipment requiring dollar expenditure as agreed to by the parties hereto.

4. One person for the advisory committee.

5. If the East-West Center of the University of Hawaii is unable to finance three (3) fellowships to that institution, RED will attempt to finance the cost of these fellowships.

F. University of Hawaii

1. The University of Hawaii will use its best efforts with the East-West Center of the University to provide three (3) fellowships for a period of up to twenty-four (24) months each.

2. A representative from the University will be a member of the technical advisory committee. If his travel expenses are not otherwise provided for through an AID financed contract, travel expenses may be financed by RED.

Mekong Committee

The Mekong Committee will provide a representative to participate on the advisory committee.

Colorado State University

The Colorado State University will provide a representative to participate on the advisory committee whose travel expense will be financed from the existing TAB contract.

Explanation and/or Comments

The purpose of this documentation (ProAg and PIO/T) is to obligate and subobligate the Trust Funds required by the contractor to meet an increased payroll. Contract local personnel salary levels are based on rates paid to USAID personnel performing similar tasks. The contractor (the University of Florida) has therefore given salary increases to its staff commensurate with the increases approved by USAID for its direct hire personnel. The budget shown in the PIO/T reflects a revised piaster budget through June 30, 1974.

15. Objective for which the Technical Services are to be used (Describe)

To assist USAID/Vietnam and the Vietnamese Ministry of Land Reform, Agriculture and Fishery Development (MLRAPD) to appraise, assess and evaluate the GVN's Five Year Rural Economic Development Plan and to create a data base and to ascertain economic relationships with respect to: a) the effective demand for major farm products, b) the production capacity and "supply response" in Vietnamese agriculture, and c) the ways to improve the marketing systems. Such data and relationships will be established so as to be utilized effectively for planning and decision making.

## SCOPE OF WORK

## 21. Scope of Technical Services

## A. Description

This effort anticipates four separate studies which shall be identified as I) Rural Economic Development Plan (REDP) Analysis, II) effective demand, III) supply response, and IV) marketing systems as described below:

I. Economic analysis of the GVN's Five Year Rural Economic Development Plan. The analysis should address the following questions:

a) What are the explicit and implicit policies one derives from studying the plan - particularly as related to prices, credit, tenure, taxation, marketing, land and water development, research, education, food supplies, employment, international trade and capital development? Can they be evaluated in terms of impact on other segments of the agricultural economy, on the national economy, and on each other. (Are they conflicting, supplementary or complementary?)

(See continuation sheet)

## B. Technicians

(1) (a) Number	(b) Specialized Field	(c) Grade and/or Salary	(d) Duration of Assignment (Man-Months)
Study No I	Economists	Variable	9 mm
" " II	"	"	24 mm
" " III	"	"	30 mm
" " IV	"	"	27 mm

All professional economists to be assigned with exception of clerical staff. Since the months assigned are estimates, variation of a month or so from the estimate is permissible.

## (2) Duty Post and Duration of Technicians' Services

Washington and Vietnam. Stay in Vietnam for any one investigator not expected to exceed six months.

## (3) Access to Classified Information

Yes

 (4) Dependents  Will  Will Not Be Permitted to Accompany Technician

## C. Financing Costs of Technical Services

(1) By AID - \$ 454,118

(2) By Cooperating Country - VN\$4,325,880

22. Equipment and Supplies (Related to the services described in Block 21 and to be procured outside the Cooperating Country by the supplier of these services)

A. (1) Quantity (2) Description (3) Estimated Costs

None - publication of report included elsewhere in estimated cost.

B. Financing Costs of Equipment and Supplies

(1) By AID - \$ None

(2) By Cooperating Country -

23. Instructions to Authorized Agent

This PIO/T provides funding for a Participating Agency Service Agreement (PASA) with the US Department of Agriculture (USDA), under the terms of the General Agreement dated February 15, 1966 and the Memorandum of Understanding dated September 23, 1966, entered into between the Agency for International Development (AID) and the USDA for the services as outlined in Block 21-A.

24. Special Provisions

Informational disclosures of project findings, results and progress during or after the period of the PASA may be released by the USDA with the consent of AID. Appropriate credit will be given to both parties in any publication emanating from the PASA.

Every effort should be made to complete all reports by December 31, 1972. Any delays beyond that date should be agreed to in advance between ERS and FEDS of USDA and ADFA/USAID/Vietnam.

Study No. I should be completed by August 15-30, 1971.

Study No. II should be completed within six months of the date of signing agreement with ERS. Discussions with ERS will establish terminal dates for the remainder of the studies.

25. Reports by Supplier of Services (Indicate type, content and format of reports required, including language to be used if other than English, frequency or timing of reports and any special requirements)

Study No. I:

A final report summarizing findings from the analysis of the Plan will be prepared and submitted to AID/W.

In addition to this written report, USDA will hold a special seminar for representatives from AID and officials of MLRAFD to discuss the Plan and the findings of the study.

Study No. II, III, & IV:

A final report including the needed chapters, summary and appendices for each section of the three studies (9 reports) are to be submitted to AID/W and USAID/VN. Pending approval, 100 copies finished are to be forwarded to USAID/VN for distribution. Any copies to be retained by USDA or AID/W would be extra beyond the 100 copies for USAID/VN.

Subsequent to preparation of each final report one or more ERS Technicians, as needed, will spend one to three weeks in Vietnam working closely with the appropriate persons in MLRAFD and USAID/VN in seminar activity and/or developing follow-up work plans.

26. Availability of Background Information (Additional information useful to Authorized Agent and Prospective Suppliers; if necessary, cross reference Block 21.B(3) above)

Study No. I:

The basic reference for this work assignment shall be the GVN's Five Year Rural Economic Development Plan. Other relevant background information is wavailable from USAID/Vietnam and from AID/W.

Study No. II, III, & IV:

USAID/VN and MLRAFD will make available to the assigned technicians the existing data, reports and unpublished studies relevant to the technicians designated frame of reference. Further USAID/VN will provide interpreter and technician services as can be made available within ADFA's resources. Mission personnel located at Saigon,  
(See continuation sheet)

27. Relationships of Supplier to Cooperating Country and to AID.

A. Relationships and Responsibilities The PASA personnel are responsible to the USAID Director, but work will be under the guidance and supervision of the Associate Director for Food and Agriculture. Services are provided to the Agricultural Economics and Statistics Service of the MLRAFD.

B. Cooperating Country Liaison Official

Minister of Land Reform, Agriculture and Fishery Development.

C. AID Liaison Officials

Associate Director for Food and Agriculture, USAID/Vietnam.

- b) What can be said about the mix of resource inputs and their relationship to the three stated fundamental plan objectives?
- c) What levels of efficiency seem to prevail for the various input factors; land, labor, credit and capital, manpower and government? Evaluate these levels. Does the plan reflect an increasing or decreasing productivity for these factors?
- d) Given the population statistics, to the extent possible, evaluate the food balance sheet assuming a reasonable diet and usual daily food requirements.
- e) Can a livestock feed balance be made? If so, what would be its dimension?
- f) Are there conflicting goals among the projections for 1975? Are any of them serious?
- g) What can be said about the priorities for: 1) attaining effective agriculture development, and 2) the inputs for attaining the stated production goals?
- h) Evaluate the possible impact on distribution of income?
- i) What can be said about the indicated export potential and import substitution?
- j) Are the linkages adequate as between provincial plans, project plans and national goals?
- k) What other questions should be asked and answered in order for agriculture to be a springboard for economic development in Vietnam?
- l) What additional work needs to be done in the data gathering, planning and policy areas to establish a system of accounts for agriculture for CY72 and to measure the progress made over the subsequent years?
- m) What adjustments need to be made in the Plan to move adequately to treat areas now given inadequate attention?
- II. Estimate current and prospective effective demand for major farm products. (Effective Demand)
- A. Analyze prices and price relationships among commodities, and between geographic areas. The chief purpose here will be to marshal

available data and economic intelligence to sharpen judgments on price policy, especially price policy for rice. It will include some estimate of effects of prices on volume of rice marketed and consumed as food or feed.

B. Examine prices and marketings of rice and other major commodities in Vietnam relative to prices in major external markets, especially Hongkong, Japan, Singapore, and other world markets. This would be the first phase in appraising possibilities for export. It must include volumes traded, prices, qualities, effect of exchange rates, institutional restraints, and an appraisal of the competition situation in like-world markets. This would begin to answer questions about the prospects for and directions to seek on export trade in Vietnam's farm products.

C. Examine potential growth in domestic <sup>demand</sup> for farm products. This would involve the first phase in developing a body of economic knowledge Vietnam needs to help appraise potential demand. It should include information on population (composition, distribution, rural-urban, and others) consumption patterns, income and income distribution, employment, spending patterns, and institutional factors. This section of the study should concentrate on structuring a body of economic intelligence aimed at appraising effective demand which would provide a base for the proposed Directorate in Agricultural Economics. An overall summary relating A and B to this section of the study would be prepared and appended or submitted as a separate report as deemed advisable.

### III. Appraise production capacity and "supply response" in Vietnam agriculture. (Supply Response)

A. Examine resources, cropping systems, costs and inputs for chief commodities to appraise responsiveness of production to changing economic factors, e.g. relative prices, relative costs, rates of substitution and others. The chief purpose here would be to provide a basis for judgments on volumes of output to be expected from alternative economic, but especially varying price situations. Time series analysis and cross sectional analysis both might be used. Include will be knowledge of competitive, complementary and supplementary relationships among enterprise; the "state of the arts" in production; marketing conditions including transportation; and something of land, capital, and labor resources.

B. Examine the potential and costs for bringing new or unused land into agricultural production. Vietnam displays an apparent potential for expanded production. This potential needs to be shown by geographic

(Cont'd)

areas. For each such area the cost/benefit rationale should be provided. Examples; analysis should include, an economic appraisal of various irrigation and/or drainage schemes, use of land for grazing, reclaiming abandoned land, multiple cropping, and alternative uses. The study would exclude that area of land within the Mekong Delta proper. Development proposals should reflect the assumptions made regarding security.

IV. Examine ways to improve the marketing systems. (Marketing Systems)  
This area of work will include a range of individual inquiries.  
Studies include:

A. Examine marketing practices and suggest efficiencies in marketing of livestock and livestock products. This study should be concerned with swine, and with poultry including ducks. The marketing systems should be differentiated as between the large scale and small farm enterprises.

B. Appraise possibilities of food processing industries aimed at general and specialized market opportunities in-country and out-of country. This study should appraise Vietnam potential to provide products to satisfy the "specialized tastes" of certain ethnic and social groups in Vietnam and in other countries.

C. Examine possibilities for improved-efficiencies in the various transportation systems. The transportation network developed for defense purposes should be appraised for its value to development and/or expansion of marketing, distribution, or warehouse centers for agricultural development. An estimate of costs and benefits for rail, water, and road surface used for transportations of farm products and farm inputs under the assumption of low, medium, and high degree of development. In other words, to develop an effective transportation system for Vietnam identify in relative terms the priorities and proportions of capital investment in transportation for agriculture development.

D. Appraise the economics of food and feed grain marketing in Vietnam. Various studies have been made: the emphasis on types of grain production is changing; market outlets and dynamic, and new varieties of food and feed grain are being developed. These factors should be analyzed and alternative routes for action identified in relation to the economic development of agriculture. This section of this study should be integrated with the transportation study.

SCOPE OF WORK					

19. Scope of Technical Services

A. Objective for which the Technical Services are to be Used To study the physical and chemical characteristics of lower Mekong Delta Soils as related to crop diversification and multiple cropping; to study water requirements of crops; to improve the soil structure through various cultural and soil management practices, to determine the most effective forms of water control and irrigation, and to develop cropping system suited to Delta Soils conditions under controlled water management.

B. Description

The program will involve the use of a five-hectare experimental site on which field crop systems adapted to delta conditions under water control, will be developed. Development will be based upon selection of suitable crops and varieties and experimental application of various cultural and soil management practices, irrigation and drainage methods, soil treatments and amendments, etc.

Staff is being developed through training programs.

Plaster Funding for Operation of Project Entitled  
"Management of Heavy Clay Delta Soils for Multiple  
Cropping under Water Control" for the Remainder of  
CY 1973 and CY 1974

Positions for CY 1973

Research Scientist: The development of comprehensive research outlines require professional experience and training. Such expertise is presently available through the Faculty of Agriculture of the University of Can Tho and the assigned project advisor. It is proposed three qualified university personnel with M.S. or Ph. D. degrees or their equivalent be assigned to the project as research scientists. One, except for minimum required teaching, would devote full time to the project; the other two would be assigned as consultants on a half-time basis.

In conjunction with the Senior Project Advisor, the three scientists will immediately initiate the development of research plans and methodology consistent with guidelines established in the project document "Memorandum of Understanding." The ultimate goal will be to develop a year-round cropping system adapted to delta conditions under controlled water management.

Junior Research Scientist: Three junior research scientists with B.S. degrees are required to assist in developing techniques and equipment for laboratory and field measurement of infiltration rates, soil permeability for air and water, lysimetry methods for establishing crop water requirements, economical methods for measuring net radiation, etc. Development of the techniques and equipment is required before the initiation of field work in the coming dry season.

Junior research scientists will work initially under the direct guidance of either the Research Scientist or the Project Advisor.

This period devoted to technique and apparatus development will allow junior scientists to become trained in the methods for measurement of soil physical properties. On initiation of experimentation they will assume responsibility for experiment installation, maintenance, and data collection.

Laboratory Assistants: Two laboratory assistants are required to help the research assistants in technique and apparatus development. They will assist in the Physical installation of equipment, record and summarize data, assist in the repair of equipment, etc. In addition, they will be assigned the task of tabulating and summarizing all available

weather and climatic data of the delta. After the research station becomes fully operational they will assume responsibility for routine laboratory determinations, maintenance of the laboratory and laboratory equipment, and assist in field and laboratory experiments. Laboratory assistants will possess at least a high school degree.

Secretary: A bilingual secretary, with high English fluency, capable of typing in both English and Vietnamese is needed immediately. In addition to the typing of correspondence, reports, research results, etc., she will immediately assist in preparing equipment orders, publication requests, catalog orders, filing, bookkeeping, etc. Preferably the secretary should have former USAID experience.

Laborers: Two men are needed for all general labor. They will assist in the preparation of small test plots, soil sampling, and general office maintenance.

Driver-Messenger: One driver is required for movement of materials and personnel for delivering messages and running errands, etc.

USAID salary scales will be used as a guideline in establishing salaries for the above positions. Total piaster funding required for salaries and operation during the remainder of CY 73 is listed in the following tables:

Salaries for Remainder CY 1973\*

<u>Position</u>	<u>Number</u>	<u>Monthly Salary</u>	<u>Total CY 73</u>
Research Scientist (full time)	1	VN\$80,000	VN\$320,000

Total	VN\$1,165,000

Total salary and operating funds for CY 1973 VN\$2,553,000

Position for CY 1974

Site completion has been scheduled for early February 1974. Since it is intended that field and laboratory experimentation be initiated during the 1974 dry season the hiring of the project staff should be completed or in process by January 1974. To achieve the necessary staffing levels the following additional personnel are required.

Farm Superintendent: One farm superintendent is required for management of site and laboring personnel. He will be responsible for plot and soil preparation, planting, spraying, fertilization, harvesting, irrigation, field equipment maintenance, site security, etc. He will directly supervise laborers and guards. The superintendent will work under the direction of the project director or his designee.

Junior Research Scientist: One additional junior scientist should be hired and, with the other three, be placed on full time status. One will be assigned to each of the Research Scientists and the Project Advisor. They will assume operational responsibility for the field and laboratory experiments of their respective supervisors.

Laborers: Eight additional men are required for field and general labor on the fully operational site.

\* Operating expenses for the above categories are estimates; transfer of funds between the categories may be necessary.

Guards: One guard and combination guard-pump operator will be required for site and building security. Both will reside on the site. The guard-pump operator will be billeted in or near the pump house and will be present during all pumping operations. In addition to part time security duties he will be responsible for both pump maintenance and operation.

Estimated piaster funding required for salaries and operational expenses are listed in the below tables. Salaries shown include Tet bonuses but do not include required dependent allowances; dependent allowances, when applicable, will be acquired from proposed miscellaneous operational funds. In addition, it is stipulated that pay raises granted USAID local employees will be granted to all project employees (excluding the Project Advisor). If salary increases are given during CY 1974 additional piaster funding must be requested.

730-11-199-363

2. Description

A. Goal

This project provides funding for supervisory and support personnel for the USAID agricultural programs including agricultural advisors to work with GVN field programs and contract employees who support a variety of activities within the program. Sixty-three direct-hire and PASA personnel are provided, including the senior officers of the USAID Office of Agriculture in Saigon, and those agricultural advisors in provinces whose work is not limited to a single project.

regions

Additional technical advice is provided under two contracts, one with the Joint Commission on Rural Reconstruction (JCRR) of the Republic of China, and the other with the Republic of Korea. Under these contracts eighty Chinese and thirty-five Korean agricultural specialists work on a number of varying projects and activities, generally at the village and hamlet level in support of basic pacification goals.

PROPERTY OF  
VIETNAM RESEARCH AND EVALUATION  
INFORMATION CENTER - AID/W  
PLEASE RETURN

B. Priority

Similar to the Agriculture Credit and Agriculture Organization project this project which is somewhat of a catch-all is in direct support of the rice and protein goals. The project supports the ADDP administrative staff and provincial agricultural advisors. The administrative personnel are responsible for the overall planning and supervision of the total program. The Provincial Agricultural advisors provide the arm at the local level to implement the program through the development of the local institutions and personnel to meet the rice and protein goals. This includes assistance to a wide range of activities and institutions such as the ~~extension~~ Extension Service, adaptive research, distribution of farm requisites and the marketing and distribution of farm products. ✓

C. Inputs:

Personnel

Number	-	31	DH
		21	PASA
		23	TCN
Cost	-	\$3,039,000	
Participants	-	\$ 9,000	
Commodities	-	\$ 30,000	

Contract Services

Korean Agricultural Technical Mission for rural technical services in cooperation with USAID and the Ministry for Land Reform and Agriculture. (started 12/67; in FY 69 extend to 6/70; in FY 70 extend to 6/71).

Personnel	-	20	TCN	<i>New Contract 30</i>
Cost	-	\$212,000		

Joint Commission on Rural Reconstruction, Republic of China for rural technical services in cooperation with USAID and the Ministry of Land Reform and Agriculture. (started 7/67; in FY 69 extend to 9/71; in FY 70 extend to 9/72)

Personnel	-	60	TCN	<i>New Contract 50</i>
Cost	-	\$475,000		

D. Current Status

This project supports the administration's programming and field support of ADDP with the large component cost being the Regional and Provincial Agricultural advisors.

In view of the general reduction in total ADDP personnel proposed by us for FY 1971 the general administration and programming work load will be greatly reduced, likewise the requirement for regional and provincial advisors to support the rice and crop production and protein programs. Thus, we are recommending that in FY 1971 the administrative and program staff of ADDP be reduced to 5, the regional advisors to 4 livestock specialists, and the provincial advisors to 3 in Region I, 4 in Region II, 5 in Region III, and 8 in Region IV.

The determination on the continuation of the JCRR and Korean technicians will need to be determined after the scope of the FY 71 program has been determined but nevertheless a sharp reduction <sup>or Termination</sup> should be possible.
