

PURDUE UNIVERSITY PROJECT AID NE-C-1701
Monthly Report, August, 1982
John H. Sanders, UE, Évora - Portugal

Distribution:

Reitor - UE - 1
Portas - 1
AID Mission - 3
ODIU - 2
IPIA - PU - 1
Foley/Ahlich - 2
Farris - 1
Dobson - 1

In the previous Quarterly Report I should have mentioned that Eng^o Eduardo Figueira and the Reitor Ário Lobo Azevedo provided the organization for the English courses of 1981 - 1982 thereby enabling many of the UE professors to pass the English tests. Also with this increasing English competence at UE seminars from visiting professors and research in the principal scientific journals are facilitated.

In August almost of the staff were gone on vacation so it was a good time to get things done. With Eng^o Eduardo Figueira a thorough review of the training in the States, past and future, was undertaken. Then the Department Heads at U.E. involved in the AID program were asked to update their planning and propose their candidates for future training in the States for the English course beginning in early October.

With the usual efficient help of June Lang planning for the five trainees leaving now was finished. By September 18 all five were in the States bringing the total trainees in this program to 12. Mr. Finberg helped the sixth applicant, Eng^o Eduardo Figueira, by proposing that he study English in Lisbon at the ALI to make another run at passing the TOEFL English exam in November.

With the help of Ermelinda Pinheiro and Pedro Silveira did the work plan for Charles Rhykerd. José Mira Godinho Avô helped

on the work plan for J. Outhouse and Maria do Rosário Gamito Oliveira did most of the work for the work plan for H. Taylor. Progress was made on total budgeting for the EIPO bulletin on sheep stocking rates and it is now almost finished. Went through Foote et al. papers for PROCALFER program as background for the Outhouse work plan.

One major problem in UE research-service area is that have little on-going research on farms. Need to concentrate on building up a network of farms on which several Departments work. Afonso de Almeida is anxious to set this up with his animal nutrition group supported by their largely AID financed laboratory for analyzing feed quality. Need to get a similar on-farm program going in the Management Department in support of the RICA program to collect farm data as an input into agricultural policy once Portugal enters the EEC. Also need to help develop the farm record keeping systems of two of the three University farms. In the fall will try to spend more time on farms facilitating these efforts.
