IV. PROJECT AUTHORIZATION

1. CONDITIONS OF APPROVAL
 This project is being undertaken in accordance with A/AID's commitment to Congressman Bincham (July 23, 1975) and in partial fulfillment of the conditions of the proposed stipulation between the Environment Defense Fund, Inc. and AID. Ref. also; AA/TA memo dated Nov. 13, 1975, Environmental Impact Statement (EIS) On AID's Pest Management Program. As this is a first effort by AID to prepare an EIS, the \$260,000 is an estimated budget figure which may have to be increased upon receipt of proposals.

ADMINISTRATOR, AGENCY FOR INTERNATIONAL DEVELOPMENT

Scope of Work for Contract Services to Assist the
Preparation of an Environmental Impact Statement
Relating to the Use of AID-furnished Pesticides in
Recipient Countries' Pest Management Projects

INTENT:

The U.S. Agency for International Development (A.I.D.) is undertaking to prepare a detailed Environmental Impact Statement (EIS) on its pest management program including its pesticide activities.

This EIS will be issued, circulated for comment to other federal agencies, and made available to the public and interested foreign governments and international organizations in draft form by August 31, 1976.

MEANS:

A.I.D. plans to utilize a contractor and as necessary will use outside consultants or experts as well as other federal agencies, international organizations and representatives of foreign governments to assist in the preparation of this EIS.

SCOPE OF WORK:

The EIS will contain, among other things, the following, to the maximum extent practicable:

- a. Historical description of the pest management program, including the pesticide activities.

b. Description of the scope and nature of current and reasonable anticipated pest management program, including pesticide activities, regulations, guidelines, policies and practices relating thereto; an individual description of any pesticides included in such activities for which the registration for use in the United States has been finally suspended or cancelled by the Environmental Protection Agency (EPA) and for 2, 4, 5-T, Chlordane, Heptachlor, and such descriptions by functional or chemical groups of all other pesticides included in such activities; and a statement with respect to each pesticide included in the pesticide activities of the amounts used, by geographic area and purpose.

c. Assessment of environmental impacts, including adverse environmental impacts which cannot be avoided, of the current and reasonably anticipated pest management program, including the pesticide activities, wherever such impacts or activities occur, subdivided by areas of activity; i.e., food production and preservation, public health programs, non-food crops, etc., including:

(i) effects on humans using the pesticides or living near the locale where the pesticides are used, or elsewhere;

(ii) effects on flora and fauna, including fish and wildlife;

(iii) effects on pesticide residues in food, with a focus on international and national residue tolerances;

(iv) effects caused because of the mobility of pesticides as they may be carried to other areas by water, air, or otherwise; and

(v) effects caused by the cumulative impact of the pesticides, to the extent data or analyses are available on such cumulative impacts.

d. Analysis of reasonable alternatives and their environmental effects, including, but not limited to:

(1) Terminating or temporarily suspending all or part of the pest management program, including pesticide activities;

(2) Providing assistance for forms of pest management other than the use of pesticides; and

(3) Requiring user compliance with standards, either those promulgated by the EPA for use of pesticides in the United States (including cancellations, suspensions, restricted uses, and label restrictions) or some other standards.

e. Recommendations as to which pesticides A.I.D. should not and which pesticides A.I.D. should provide assistance for, and, in detail, the limiting factors applicable to those pesticides for which A.I.D. should provide assistance including, but not limited to, conditions relating to use, climate, flora, fauna, or geography of areas where each pesticide may be used, handling and packaging, and those efforts which should be undertaken, where possible, to obtain the agreement of host countries and/or international and regional organizations, for the establishment of such data-gathering mechanisms as might be necessary and appropriate to monitor or prevent potential adverse environmental impact associated with pesticide activities collectively and individually.

DEFINITIONS:

The pest management program, as used herein, means all activities conducted, supported, financed, and/or otherwise assisted by A.I.D. intended to control

or eliminate pests. Pesticide activities, as used herein, means all activities conducted, supported, financed, and/or otherwise assisted by A.I.D. for the procurement or use of pesticides. Pesticides, as used herein, mean substances or mixtures of substances, (a) intended for prevention, destroying, repelling, or mitigating any unwanted insects, rodents, nematodes, fungi, weeds and other forms of plant or animal life or viruses, bacteria or other micro-organisms (except viruses, bacteria or other micro-organisms on or living in man or other living animals), or (b) intended for use as plant regulator, defoliant or desiccant.

The contractor will, in preparing materials and recommendations necessary for this EIS, follow as closely as possible and take into full account the suggestions and guidelines set forth in Section 102(2)(c) of the National Environmental Policy Act of 1969, Pub. L. No. 91-190, 83 Stat.852, 42 U.S.C. §§4321 et seq. ("NEPA"); Executive Order 11514, 3 C.F.R. 271 (Supp. 1974); and the guidelines of the President's Council on Environmental Quality, 40 C.F.R., Part 1500 (the "CEQ guidelines").

_____ copies of the draft EIS will be delivered to A.I.D. on or before 31 August 1975 and the contractor will appoint an appropriate person to head the team performing this work. A.I.D. will also appoint a project representative to coordinate the work of the contractor within A.I.D. and with the foreign governments, other federal agencies, etc.
