OFFICE OF POPULATION NARRATIVE

BACKGROUND

The 1982 world population is 4.6 billion and is growing at an increment of about 75 million annually. Ninety percent of this growth is occurring in less developed countries. The developing world's population of about 3.4 billion is growing at 2.1 percent annually and, at this rate, will double in 33 years. The population of the developed countries will double in 116 years at its present rate of increase.

Rapid population growth is now widely recognized as an important factor which makes social and economic progress in LDCs less rapid and more difficult. Twenty-five years ago only a handful of developing countries explicitly recognized this problem, but currently over 60 LDCs, containing over three-fourth of the total population of LDCs, have adopted policies which address population growth.

The United States has taken a leading role in calling attention to the negative impact of rapid population growth and through A.I.D. has provided almost half of all population donor assistance over the past two decades.

Considerable reduction in LDC population growth rates has occurred over the past decade--particularly in countries which received considerable A.I.D. assistance such as Indonesia, Thailand, Colombia, and the Philippines. LDC crude birth rates have fallen from about 37 in 1970 to 33 in 1982.

STRATEGY

The achievements of A.I.D.'s program of population assistance over the last two decades confirm the soundness of A.I.D.'s basic strategy, which is to provide individual couples with the information and means to freely and voluntarily decide their desired family size. While affirming the basic strategy of population program assistance, the program presented for fiscal year 1984 proposes to: strengthen continuing support for voluntary and other non-governmental organizations; accelerate the transfer of technology; strengthen institutions needed for self-sufficiency in population work; ensure as broad as possible range of choices of family planning methods, including natural family planning; and increase biomedical research which seeks improved means of fertility control.

The Agency's population program is both broad and flexible with provision for adaptation to the needs and desires of individual LDCs. It includes assistance in collection and analysis of demographic data; population policy formation; the provision of safe, effective, and affordable contraceptives; technical assistance in planning and designing of programs; community education; and training of individuals involved in family planning services and population activities. In all instances, the Agency's program is based on the principle of voluntarism and the receptivity of the host country's people and government.

The majority of A.I.D.'s population funds have been programmed through the Office of Population. Beginning in FY 1982, there was a substantial shift to bilateral funding, although well over half of the population account is still handled by the Office of Population. In fiscal years 1982 and 1983, the Asia region accounted for over three-fourths of the Agency's bilateral budget. It is anticipated that in FY 1984 the Office of Population will still be the sole or primary source of A.I.D. population assistance for a number of countries in Latin America and Africa where bilateral programs are not feasible.

The central population program has been essential in implementing the Agency's strategy. Through the use of private and voluntary organizations, funding has been provided to important countries without bilateral programs. In addition, in countries with bilateral programs, these organizations have pioneered new activities and stimulated participation of the private sector--which serves as a complement to LDC government efforts in the population field.

The central program also provides technical assistance in demography; population policy development; new delivery systems design; program evaluation; information, education and communication techniques; and training of physicians, nurses, midwives, community health workers, and family planning managers.

The central program is responsible for developing technical specifications for contraceptives and their procurement and distribution to bilateral programs and private, voluntary organizations. This commodity support includes logistics training and technical assistance to country programs. In addition, A.I.D. is a principal funding organization for the development and testing of fertility regulation techniques for developing countries.

DECISION RATIONALE

While the Agency's objective and strategy concerning population has remained consistent over the years, its program is implemented in an evolutionary manner. Changes have been more of a tactical rather than strategic nature with each modification designed to improve the Agency's program. There are a number of such changes proposed in this submission--they are highlighted below.

For improved management, we have condensed the FY 84 portfolio to 23 projects (from 31 in FY 82). The following summarizes these projects and notes their relative rankings:

Demography: Over the past few years, the Office has implemented an orderly deemphasis of demographic activities. In FY 1980, demographic research and data collection accounted for over seven percent of the Office's account with a budget of $9.2 million. In FY 84 $4.2 million will be allocated to this area, constituting just over three percent

of the Office's budget. This part of the Office's program will focus on data collection and analysis that have obvious programmatic and/or policy implications. As indicated in last year's ABS, a new project, Family Planning and Demographic Surveys, will be initiated in FY 1984. Through this project, ranked sixteenth, important monitoring and planning tools such as fertility and contraceptive surveys will be supported. The other project, Demographic Data for Development, will concentrate on data that will assist policy makers in formulating population and other developmental policies.

Policy: Three projects are concerned with various aspects of population policy. Of these, Resources for Awareness of Population Impact on Development (RAPID II) receives the highest priority, being ranked twelth. RAPID provides policy makers with information in a direct fashion through specially designed computerized presentations. The twenty-first project, Population/Development Planning; and the twenty-third, Population Policy Research, are somewhat more removed from the decision making process but are critical in providing the knowledge base on which well-formulated policies must build. Altogether, policy projects have a budget of $4.6 million.

Research: Two Research projects receive high priorities. The International Fertility Research Program (IFRP) and Fertility Impact-Different Family Planning Programs are ranked, respectively, fifth and eighth/ninth. Both of these projects are concerned with the testing and cost-effective delivery of fertility regulation technologies. The third project, Applied Research on Fertility Regulation (PARFR), is ranked fifteenth and is more concerned with the development of new or the modification of existing fertility regulation techniques. Applied biomedical research is also supported through the Programmatic Grant, Population Council, which is ranked just above PARFR. While these activities have a less immediate impact on programs, they are critical for continuing research to develop the most effective, safe, and culturally acceptable means of fertility regulation for use in LDCs. The proposed FY 1984 budget reverses a previous trend and increases the Ageny's commitment to improving fertility regulation technology, as shown by the following budgets for this type of research: FY 1981 - $9.7 million; FY 1982 - $7.6 million; FY 1983 - $6.9 million; FY 1984 - $10.7 million. This reemphasis will allow the Agency to adequately address a wide range of technologies, including some that have not received adequate attention, such as natural family planning. In total, $17.2 million is being proposed for operations research to improve the cost-effectiveness of family planning and health delivery systems and biomedical research to improve fertility regulation technologies.

Family Planning Services: The FY 1984 submission continues to reflect the vital role these projects play in the Agency's population program. This portion of the Office's portfolio constitutes 47 percent of the budget or $63.4 million. Additionally, four of the six highest ranked projects are in this functional area: Contraceptive Procurement, Program for Voluntary Sterilization, Family Planning International Assistance, and the

Contraceptive Retail Sales. With the exception of International Planned Parenthood Federation (IPPF), the remaining projects also receive strong rankings: Accelerated Delivery Systems Support, thirteenth; Programmatic Grant, Population Council, fourteenth; Family Planning Services (Pathfinder), eighteenth; and Population Program Development and Support, seventeenth. IPPF is ranked lower because it has other sources of funds.

More than other parts of the Office's program, Family Planning Services projects support the private sector in both the United States and the developing world. Through these programs, the Agency purchases high quality U.S. manufactured family planning commodities and uses private organizations to transfer resources and know-how to developing world counterparts. Additionally, the Commercial Retail Sales (CRS) project explicitly exploits commercial infrastructures in the developing world for the delivery of family planning information and services. Although the budget for CRS has remained fairly constant, this does not indicate a disinterest since this project is designed to provide seed money and expertise during the initial stages of a CRS effort. After a period of several years, the support of these projects is taken over by missions and/or the host country government, as has occurred in Jamaica, El Salvador, Bangladesh, Nepal, and Egypt.

Information, Education and Communication (IEC): In FY 1984, IEC activities will receive greater emphasis. During the preceding four fiscal years, this functional area constituted about two percent of the Office's budget. An increase to slightly over three percent with a budget of $4.4 million is recommended. IEC activities will emphasize technical assistance to develop information and educational programs designed to make populations aware of the range of family planning services available and to give them the information requisite for informed decisions about fertility and use of family planning. The project that covers this area, Family Planning IEC Field Support, is ranked nineteenth. Ranked just below this project is the Population Information Program (PIP). This project produces Population Reports, perhaps the most widely read publication in the field. These reports have proven an effective way to keep the population community informed about the latest developments in population.

Training: A.I.D.'s emphasis on training is again reflected in the FY 1984 budget. The Physicians Postgraduate Training and Paramedic and Auxiliaries Family Planning Training are ranked third/fourth and tenth/eleventh by the Office. These projects allow the Agency to transfer the latest techniques and knowledge to LDC family planning and health personnel. The remaining training project, Family Planning Program Worldwide Fund, is ranked twenty-fourth. For FY 1984, $11.9 is proposed for training.

UNFPA: It is anticipated that the demands for A.I.D. population assistance will exceed available resources in FY 1984. Since the level of funds available to UNFPA from alternative sources has increased, it is recommended that A.I.D. provide $32 million to UNFPA in FY 1984.

The Office of Population has a well-balanced portfolio of projects. The program is a dynamic one which is responsive to the changing needs of the developing world and to the development of new technologies. Although only one new project is proposed for FY 1984, projects are designed to be flexible and provide mechanisms that allow innovative, robust approaches to population. The Office's program is based on the premise that the most effective way the Agency can fulfill its mandate in population is not through a simple transfer of resources, but by improving and expanding services through the transfer of the latest service and delivery technologies and the strengthening of LDC institutions needed for successful population programs. A.I.D. has been the leader in the development and provision of the latest fertility regulation techniques and has pioneered such cost-effective delivery systems as community-based distribution and commercial retail sales. More recently, A.I.D. has formulated and tested innovative and effective ways to integrate family planning with other health interventions. Because of A.I.D.'s support of integrated approaches to health and population, $6.325 million from the Health account is included in the FY 1984 budget. The strategy outlined in this ABS will make it possible for A.I.D. to continue its leadership role in population assistance.

Population Program Development and Support	Population Planning	FY 84 $2,000	LIFE OF PROJECT: Continuing
NUMBER 932-0502 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE FY 1981 Annex V, Centrally funded, p. 109	INITIAL OBLIGATION FY 68 / ESTIMATED FINAL OBLIGATION FY N/A	ESTIMATED COMPLETION DATE OF PROJECT FY Continuing

Purpose: To improve program development, project design and implementation of population/family planning in less developed countries (LDCs) and to provide essential family planning services and resources which cannot be provided under other projects.

Background and Progress to Date: This project provides a means of financing technical expertise and goods and services needed to develop and design projects, to improve the management and implementation of on-going projects, and to provide supportive training, supplies, equipment and consultants for LDC activities in population and family planning. To date, consultants have been provided to meet requests for technical assistance from more than 50 less developed countries. Specific technical assistance activities include the following: assessments of national family planning programs; evaluations of contraceptive distribution systems and family planning data systems (service statistics reporting and contraceptive commodity flows); development/improvement of family planning management information and management logistics systems; special training workshops for LDC supply personnel to improve the efficiency and accountability of in-country commodity distribution networks; analysis of the health and demographic impact of family planning activities and fertility control behavior; design, implementation, and analysis of contraceptive prevalence surveys; and collection and assessment of data on adolescent fertility. Additional resources provided include medical instruments and kits; contraceptive commodities such as foaming tablets and Copper T's; compacts (memorettes) for CRS oral contraceptives; and books, publications and training materials. Other types of goods and services have also been provided in support of population/family planning programs.

Host Country and Other Donors: Host countries may provide local personnel, facilities, transportation and selected in-kind inputs to assist the consultants.

Beneficiaries: Beneficiaries vary greatly due to the nature of the project. They include LDC personnel worldwide who receive technical assistance in developing, managing and evaluating family planning service programs; family planning managers and technicians who receive equipment, training materials, and up-to-date information on family planning activities; and poor rural and urban fertile-age couples who will benefit from access to improved family planning programs.

FY 84 Program: In response to worldwide ad hoc requests, the project will finance the cost of short-term consultants to work on project design, evaluations, analysis of operational problems, implementation of recommendations, workshops and special training programs. Other services and resources, such as commodities, supplies and equipment, will be provided in support of population/family planning programs on request from the field.

Major Outputs: Major outputs include improved program development, project design, implementation and evaluation of population/family planning activities; expansion of contraceptive distribution networks, including improved logistics management and service statistics, as well as trained supply personnel; special population reports and program studies; conferences, on-site observation visits, and workshops to promote population/family planning programs; and supplies, equipment and publications.

A.I.D. Financed Inputs:

		Advice of Program Change dated July 2, 1981			

Purpose: To test, assess and improve fertility regulation technologies and to disseminate information on their safety, effectiveness, and acceptablity.

Background and Progress to Date: This project: (1) conducts comparative clinical trials on safety and efficacy of various fertility control methods under local conditions; (2) trains overseas clinicians in fertility control techniques; (3) collects, analyzes and disseminates data findings of fertility control; (4) establishes national fertility research programs; (5) provides limited equipment and supplies of new contraceptives technology; (6) assesses impact of fertility control modalites and delivery systems, and (7) conducts epidemiologic safety studies of fertility control methods. Clinical trials of new and improved means of fertility control have been carried out at more than 200 centers in nearly 50 countries. This project has documented the comparative safety, efficacy, and acceptability in different LDC settings of methods such as minilap and laparoscopic sterilization, postpartum IUDs and various barrier contraceptives. Several national fertility programs have been established with the capability to conduct their own research studies (e.g. Bangladesh, Colombia, India, Indonesia, Tunisia, Malaysia and Sudan). Project activities have included technology transfer and related training, support of the International Journal of Gynaecology and Obstetrics and extensive maternity care monitoring studies.

Host Country and Other Donors: Host countries provide local support costs; other donors, including the Population Council, the United Nations Fund for Population Activities, the Population Crisis Committee and the National Institutes of Health provide coordinated funds for research.

Beneficiaries: Project beneficiaries are the users of methods developed and introduced by this program.

FY 84 Program: Continue to strengthen program of worldwide field testing and analysis of new fertility control methods, with emphasis on: barrier methods, laprocator for female sterilization, postpartum IUDs, techniques for non-surgical female sterilization and comparative trials on side effects of oral contraceptives. Other priorities include: the establishment of national fertility research programs, training and commodity support, studies of user specific variables, evaluation of family planning programs, and epidemiologic studies of fertility control technologies.

Major Outputs

	All Years unit
Fertility control methods studied	7
LDC physicians conducting clinical field trials	250
LDC physicians trained	700
Clinical field trials conducted	1,000
National and regional fertility research programs established and supported	15
Epidemiologic safety studies conducted	5

TITLE	FUNDS	PROPOSED OBLIGATION (in thousands of dollars)	
Program for Applied Research on Fertility Regulation	Population Planning	FY 84 2,700	LIFE OF PROJECT 37,285
NUMBER 932-0546 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE Centrally funded data base, p. 89.	INITIAL OBLIGATION FY 72	ESTIMATED FINAL OBLIGATION FY 92 / ESTIMATED COMPLETION DATE OF PROJECT FY 93

Purpose: To develop new and improved methods of fertility control especially appropriate for use in less developed countries.

Background and Progress to Date: The Program for Applied Research on Fertility Regulation (PARFR) provides scientific, technical and financial assistance to United States and foreign institutions for small, applied research projects to develop safe, effective and acceptable methods of fertility regulation. Project activities have been undertaken in the following areas: male and female sterilization techniques, drugs which inhibit ovulation, new delivery systems for contraceptives, other methodological improvements, and scientific workshops. The techniques and methods (collagen sponge, methods of microencapsulation, methods of non-surgical sterilization) developed in this program are being introduced into family planning centers worldwide for further testing. The workshops proceedings have been widely distributed. Studies have been carried out in Jamaica, Korea, Iran, Egypt, Guatemala, Mexico and others. As of FY 1981, more than 130 research or pilot projects have been implemented. Ten workshops have been held.

Host Country and Other Donors: None

Beneficiaries: Beneficiaries are the users of methods developed and introduced by the program and more directly, the family planning clinical institutions involved as well as research institutions.

FY 84 Program: The program will continue to support applied research for fertility regulation and workshops. There will be increased emphasis on study and collaborative clinical research in developing countries with development of a small, highly research-oriented clinical network. In addition, a research commentary will be issued regularly to disseminate findings. One or two workshops will be conducted, 20 or more studies funded, and small highly specific research meetings on single topics will be held.

Major Outputs:

	All Years unit
Contraceptive research studies conducted	200
Workshops held	16
Collaborative research-oriented clinical network established	1
Research newsletters Prepared and distributed	24

PROJECT MANAGER: ANDREW WILEY

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)	
Physicians Post-Graduate Training in Reproductive Health	Population Planning and Health	FY 84 5,900	LIFE OF PROJECT 76,370
NUMBER 932-0604 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE Advice of Program Change, 4/14/82	INITIAL OBLIGATION FY 73 / ESTIMATED FINAL OBLIGATION FY 86	ESTIMATED COMPLETION DATE OF PROJECT FY 87

Purpose: To train LDC physicians and nurses in reproductive health.

Background and Progress to Date: Since 1973, The Johns Hopkins Program for International Education in Gynecology and Obstetrics (JHPIEGO) has trained physicians from LDC medical schools and teaching hospitals in the broad field of reproductive health. Since 1976, medical administrators and nursing faculty have also been included. JHPIEGO training now primarily takes place in LDCs where sufficient numbers of JHPIEGO-trained physicians have become available. OB-GYN leaders from more than ten countries comprise an advisory committee which meets annually to provide program guidance. JHPIEGO courses deal with maternal and infant care, high risk pregnancy, infertility, contraception, cancer screening, voluntary sterilization and the use and care of special instruments such as laparoscopes. Formal JHPIEGO training programs are ongoing in Thailand, Tunisia, Colombia, Philippines, Brazil, Kenya, Nigeria, Somalia, Mexico, Turkey, Morocco, Egypt, Malaysia and Sudan. JHPIEGO has established agreements whereby clinical practice for trainees is provided at 40 sites in more than 15 countries. The Tunisian program alone trains physicians from more than fifteen Francophone countries of Africa. All JHPIEGO trainees who qualify are supplied with appropriate surgical equipment. An ongoing program of equipment maintenance is also provided. JHPIEGO trainees come from more than 100 countries and JHPIEGO-trained faculty members are now teaching in more than 250 LDC medical schools. Short practical reproductive health courses for medical and nursing students are also established in LDC universities. An extended management audit was completed in 1980 and an intnesive evaluation of the program was conducted in January 1981.

Host country and other Donors: Host country governments, universities and other agencies provide facilities, administrative and teaching staff, work space, utilities and other support. In Korea, all training costs have been taken over locally. In Pakistan and China, other donors support the full costs of the JHPIEGO program. In many countries JHPIEGO supplies only equipment and consultant trainers. In Morocco, JHPIEGO shares program costs with the USAID mission, other donors and the Ministry of Health. Funds from the Noyes Foundation enable JHPIEGO to cover some training costs not covered by AID funding. All JHPIEGO programs are closely coordinated with other AID funded agencies and with the Ministries of Health.

Beneficiaries: Project beneficiaries are poor rural and urban women in 90 developing countries.

FY 84 Program: JHPIEGO reproductive health training in Baltimore will be confined to special fields such as endoscopy, infertility, reversal procedures and program administration. Most JHPIEGO training will be in the LDCs. New national training programs are being planned for Haiti, Peru, Jamaica, Tanzania and possibly also in Burma, Cameroon and Zimbabwe. JHPIEGO support to these programs includes teaching materials, consultants, tuition, special surgical equipment and help in repair and maintenance. By 1984 JHPIEGO will have complied with requests for physician training and for needed equipment from representatives of most qualifying medical schools in the developing world.

Major Outputs:

	Unit
Clinicians and administrators trained	7,000
National training programs established	30
Reproductive Health clinics set up and equipped	1,500
Medical and Nursing Students directly trained	15,000

TITLE	FUNDS	PROPOSED OBLIGATION (in thousands of dollars)	
Contraceptive Retail Sales (CRS)	Population Planning	FY 84 $2,000	LIFE OF PROJECT $50,000
NUMBER 932-0611 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE APC 11/14/80	INITIAL OBLIGATION FY 71 / ESTIMATED FINAL OBLIGATION FY 91	ESTIMATED COMPLETION DATE OF PROJECT FY 92

Purpose: To increase the availability of contraceptives through existing commercial distribution systems in developing countries and provide them at a price the rural and urban poor can afford.

Background and Progress To Date: In many LDCs, free or low-cost contraceptive products are usually provided, if at all, through clinics. Unfortunately, these delivery systems do not generally reach a majority of the rural or urban poor populations. These countries, however, usually have extensive retail systems, including pharmacies, general stores and small village shops. This project supports the introduction of non-clinical contraceptives into LDC commercial systems; sells these products at a generally affordable price; and reinforces their appeal via modern marketing techniques and national advertising campaigns. As a result, rural and urban poor populations are provided access to contraceptive products not otherwise available. To date, A.I.D. contractors have assisted in the establishment of contraceptive retail sales projects in Bangladesh, Jamaica, Nepal, Ghana, Mexico, Honduras and El Salvador. In FY 1982, at least three additional CRS projects will be initiated; on-going project development activities are currently being undertaken in the Caribbean, the Dominican Republic, Ecuador, Panama, Guatemala, Haiti, India and Pakistan. In FY 1981, a cooperative agreement was implemented to facilitate information transfer among CRS projects, to provide technical assistance and subgrants for specific activities to graduate projects, and to develop/manage small-scale CRS activities in countries where the use of a separate U.S. contract organization with a resident advisor would be impractical. A contract for technical assistance to a mission-funded CRS project in Egypt was developed in FY 1981 and technical assistance continues to be provided by AID/W project managers for the development of other mission-funded CRS projects in India, Pakistan, Haiti and Guatemala.

Host Country and Other Donors: Arrangements for host government and other donor support are subject to country-specific project designs.

Beneficiaries: Where these projects are implemented, the majority of urban and rural poor fertile-age couples have increased access to a means of contraception they can afford.

FY 84 Program: The program will support CRS activities in approximately 17 countries, including major projects in five countries, small grants in ten-to-twelve countries, and three-to-four special subprojects in countries with social marketing projects which are not A.I.D. supported.

Fertility Impact of Different Types of Family Planning Programs	Population Planning and Health	FY 84 6,500		LIFE OF PROJECT 120,841
NUMBER 932-0632 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒☒	PRIOR REFERENCE Advice of Program Change submitted March 23, 1982	INITIAL OBLIGATION FY 76	ESTIMATED FINAL OBLIGATION FY 92	ESTIMATED COMPLETION DATE OF PROJECT FY 93

Purpose: To initiate and test the cost-effectiveness of family planning and basic health delivery systems that make services more fully available to rural and urban poor in developing countries, and to provide other operations research assistance in direct support of field programs.

Background and Progress to Date: Applied research addresses important needs of both policy makers and program managers seeking to improve the availability and effectiveness of basic family planning and health delivery systems. This program now provides funding and/or technical assistance for evaluating innovative service delivery systems in developing countries. Projects focus on the development of cost-effective delivery systems. Since the program was launched, 42 projects have been initiated in 24 countries. Of these projects, 29 have a health and/or nutrition component. Health components focus on Maternal and Child Health, e.g., oral rehydration, immunization and anti-parasite drugs for young children; iron supplementation and tetanus toxoid immunization for pregnant women; and vitamin and mineral supplementation for lactating women. To date, results are available from 31 projects. On the average, projects experienced an absolute increase in contraceptive prevalence of 15 percent and a relative increase of 260 percent. The range of annual per capita cost for these projects was from $0.03 to $1.93. The average annual cost per user was $37.45. An intensive outside evaluation of the overall project was completed in FY 1981.

Host Country and Other Donors: Host countries provide training and storage facilities, part of local salary cost, office space, and - in most cases - transportation. Limited support from other donors.

Beneficiaries: The project will benefit over 40 million persons served by delivery systems in which the project operates; most beneficiaries are rural.

FY 84 Program: Major recipient countries will include Brazil, Bolivia, English-speaking Caribbean, Haiti, Kenya, Morocco, Nepal, Nigeria, Sri Lanka, Sudan, Thailand, Togo and Zaire. A.I.D.-funded elements of the project's activities will include: contraceptives and other basic health items; professional consultants; data collection; and health, nutrition, and logistics training.

Major Outputs

	All Years unit
Community workers trained	17,000
Cost-effectiveness of alternative community-based delivery strategies studies and results disseminated to host country officials and leaders	75-90
Regional workshops/conferences conducted	25-30
Published studies in international journals and monographs	200

Purpose: To increase understanding of policy implications of determinants of fertility and to identify government actions, in addition to family planning, that will encourage lower fertility.

Background and Progress to Date: This project sponsors research studies leading to the development of government policies and programs, including family planning, that will encourage lower fertility. The project is composed of three major elements: 1) the review of current knowledge on fertility determinants and identification of the most promising areas for fertility determinants research; 2) solicitation and funding of studies in identified areas; and 3) an enhanced capacity to respond to and administer unsolicited proposals from USAID Missions on fertility determinants research. In 1979 the National Academy of Sciences (NAS), Committee for Population and Demography, formed a panel of recognized fertility experts and scholars which completed the identification of areas for needed research based on its review of current knowledge. A second element incorporates these areas in an awards program at the Population Council which solicits and funds promising new research. The Population Council provides technical assistance in the design and implementation of projects, assures adherence to the highest scientific standards, directs research results toward the appropriate audience of policy makers, and encourages the strengthening of local research institutions.

Host Country and Other Donors: Host countries will provide some government researchers and data. Other donors may provide funding for additional phases of the studies.

Beneficiaries: Immediate beneficiaries are host country planners and donor agency officials who gain information on ways in which development programs can encourage lower fertility. This project will have the secondary impact of benefiting local research institutions.

FY 84 Program: The Panel of recognized international experts on fertility determinants has completed its work on the identification of promising areas for research. These areas have been incorporated into the Population Council's awards program which continues to solicit and administer grants for promising policy research on fertility determinants. In FY 1984, five such research studies will be undertaken. Monitorship of ongoing research will continue and new activities for future years' funding will be developed. In addition, a population law and policy program will be supported. This program will furnish information and technical assistance to LDC law-makers on population law and policy.

Major Outputs

Paramedical and Auxiliary Family Planning Training	Population Planning and Health	FY 84 5,600	LIFE OF PROJECT 77,923
NUMBER 932-0644 GRANT ☒ LOAN ☐ NEW ☐ CONTINUING ☒	PRIOR REFERENCE Advice of Program Change, 4/14/82	INITIAL OBLIGATION FY 78	ESTIMATED FINAL OBLIGATION FY 88 / ESTIMATED COMPLETION DATE OF PROJECT FY 89

Purpose: To train paramedical, auxiliary and community (PAC) personnel to improve family planning (FP) delivery.

Background and Progress to Date: Trained PAC personnel are urgently needed if developing countries are to provide effective and affordable basic health/FP services for rural poor. This project includes: training of nurses and midwives in clinical FP; introduction of FP materials and educational principles into nursing/midwifery curricula; training of LDC trainers to give instructions in the management of FP/health programs; and observation and training of senior LDC health program managers and policy makers. Emphasis will be given to training indigenous rural health workers to include traditional birth attendants. During FY80 and 81 each of the three geographical contractors conducted country training needs assessments in selected countries within their respective regions to plan courses of action for new and continuing training activities. Regional Advisory Groups have been established, composed of LDC MCH/FP leaders who meet to assure that planned program actions are consonant with LDC programs and training needs and to set policy guidelines for the use of project funds. Providing MCH/FP training through this program continues to be a priority for those 27 countries where no A.I.D. bilateral POP/FP programs are operating.

Host Country and Other Donors: Host countries generally provide funds for training facilities, in-country transportation, utilities, and salaries for local training personnel. When appropriate, funds and other resources of international donors will be utilized to further project objectives.

Beneficiaries: The immediate beneficiaries will be LDC PAC personnel in the assisted LDCs. The ultimate beneficiaries will be developing country populations, especially poor couples of reproductive age.

FY 1984 Program: Continuing effort will be given to training those categories of personnel, other than physicians, who design, develop, operate and provide direct services within family planning service programs--i.e., administrators, managers and supervisors; nurses, midwives and auxiliary health personnel; and community and indigenous family planning and health workers. Technical and financial support will be provided both to train approximately 7,000 PAC and FP program managerial personnel directly and to improve the training capability of host countries and collaborating institutions. FP teaching materials and training aids for nurses, midwives, community outreach workers, auxiliary workers and other relevant FP personnel will be developed and communicated to LDC institutions and staff. Approximately 155 conferences, seminars and observation trips for all levels of FP health personnel, including FP managers and policy makers, will also be arranged.

Major Outputs

PAC and managerial personnel trained (directly)	90,250
Conferences, seminars, workshops, Observation trips	1,500

Purpose: To fund participant training in the United States for Key population/family planning (P/FP) personnel from less developed countries where no other A.I.D. financing resource exists.

Background and Progress to Date: These funds have been useful in increasing understanding and professionalism among POP/FP personnel in less-developed countries in the areas of demography, maternal/child health, population education and management of family planning related programs. These resources are made available to LDCs where there are no U.S. bilateral activities, where existing U.S. field missions have no other funds to finance U.S. training or where the host countries are unable to finance the training. Continuing post-training assessments of the participants indicate that their newly acquired knowledge and skills are being utilized and that they are very often assuming more responsible positions.

Host Country and Other Donors: Host countries provide salaries for the trainee and may provide health examinations and/or air fare.

Beneficiaries: Immediate beneficiaries are managers, supervisors and implementors of LDC POP/FP programs. At least 60% of all selected participants will be from LDC non-governmental organizations. Ultimate beneficiaries include LDC reproductive-age couples who will receive improved FP and Maternal/Child Health Services.

FY 1984 Program: Funds will provide an estimated 350 weeks of training to each 40 POP/FP participants from 20-25 LDCs. The training programs will concentrate on POP/FP management, population, education and maternal/child health/family planning. Priority will be given to participants from the Africa region to receive training under this project.

Major Outputs:

Training of POP/FP participants	700

A.I.D.-Financed Inputs:

	FY 84
Participant training (travel, per diem and training costs)	400

Purpose: To strengthen institutional capacity of development planning institutions in the use of demographic techniques to understand implications of rapid population growth for development goals.

Background and Progress to Date: This project aims at increasing the commitment of high level officials in LDC planning ministries to recognize and deal with the effects of rapid population growth on achieving development objectives. Demographic policy in 80% of all LDCs is wholly or partly determined by central planning organizations. These groups are the key link between the analysis of demographic data and the design of development plans that take demographic realities fully into account. This project has strengthened the demographic expertise of planning units in selected LDCs through tailored technical assistance, training workshops and seminars. Extensive support has been given to new national population commissions to strengthen their roles as policy development bodies. This project also has primary responsibility to assist planners understand the impact of urbanization and migration and to evaluate the effectiveness of population distribution policies. A regional office has been opened in Lome, Togo to coordinate and expand project activities in Africa. Technical advisory services concentrate on Sub-Saharan Africa and the Middle East. Project cost benefit analysis of the family planning program in Thailand has been instrumental in ensuring continued government financial support for family planning. To date, IPDP has provided technical assistance and/or training to individuals from approximately 30 developing countries.

Host Country and Other Donors: Host countries provide planning office personnel, researchers and, as appropriate, local facilities and services.

Beneficiaries: Immediate beneficiaries are the development planning technicians and organizations that gain skill in population and planning analysis.

FY 1984 Program: The contractor will hold four major regional conferences, country specific seminars and presentations and provide technical assistance for LDC planning ministries. Target countries include Sudan, Nigeria, Tanzania, Turkey, Zimbabwe, and Morocco among others.

Population Information Program	Population Planning	FY 84 2.000	LIFE OF PROJECT 21,296	
NUMBER 932 0659 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE Centrally funded Database, pg. 109	INITIAL OBLIGATION FY 78	ESTIMATED FINAL OBLIGATION FY 87	ESTIMATED COMPLETION DATE OF PROJECT FY 88

Purpose: To provide regular reports and special information materials on selected population topics.

Background and Progress to Date: Prior to 1972, family planning (FP) experts lacked easy access to research in contraceptive technology and authoritative information on new modes of delivering FP services. This project has produced scientific, technical, and general information that has become a highly credible source of guidance around the world for FP program administrative and medical decisions, paramedical training, and projections of population problems in many LDCs. From its computerized data base and original research sources the project has published some 230 Population Reports in five languages. These have dealt with oral contraceptives, intrauterine devices, barrier methods, rhythm and periodic abstinence, FP programs, male and female sterilization, law and policy, prostaglandins, injectables and implants, social marketing and special topic monographs on world health issues, e.g. hazards of tobacco smoking to maternal and child health. The project POPINFORM data base, containing nearly 55,000 citations, has been merged gradually into the National Library of Medicine information network, called POPLINE and project relationships overseas have expanded with the first of a series of Cooperating County Organizations (CCOs). The program continually seeks to increase linkages with other FP information sources in LDCs. Mass media have been serviced with press releases, Population Reports and other project materials which provide reliable and timely bases for articles, broadcasts, telecasts, etc. An intensive external project evaluation, completed in 1981, found that the program is regarded as highly useful by FP program administrators and other professionals in the population/FP field. There is a growing reliance in some countries on the project's facilities for training staff and managers of information networks either in country or in the United States. The Population Information Program will be continued after the current contract expires based on past experiences and results of project evaluations.

Host Country and Other Donors: A few countries are expected to provide data gathering and dissemination assistance but no major financial support.

Beneficiaries: Project outputs are especially beneficial to FP program Administrators, LDC development leaders, medical and paramedical staff of FP organizations (government and non-government), experts in the fields of sociology, demography, law, earth sciences, etc. The ultimate beneficiaries are LDC couples seeking to have smaller families who utilize the FP service delivery centers.

FY 1984 Program: Publish a minimum of 192 pages of Population Reports in English, French, Spanish, Portugese and Arabic editions; continue to feed information into the composite computerized data base at the National Library of Medicine; and maintain an international system of approximately 80,000 names and addresses.

Major Outputs (and A.I.D. Unit Cost):

Serial Population Reports prepared in five languages and distributed	28
Computer-based Data Increased (Abstracts)	35,000
International Mailing List maintained (addresses)	80,000

PROJECT MANAGER: C.J. Hemmer

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)		
United Nations Fund for Population Activities (UNFPA)	Population Planning	FY 84 32,000	LIFE OF PROJECT Continuing	
NUMBER 932-0622 GRANT X LOAN ☐ NEW ☐ CONTINUING X	PRIOR REFERENCE FY 1983, Annex V, Centrally Funded, p. 47	INITIAL OBLIGATION FY 58	ESTIMATED FINAL OBLIGATION FY Continuing	ESTIMATED COMPLETION DATE OF PROJECT FY Continuing

Purpose: To enable the UNFPA: to promote awareness of population problems, to provide multilateral assistance for the initiation and support of population programs, and to coordinate international population assistance efforts.

Background & Progress to Date: The UNFPA, established in 1967, is the major multilateral channel of assistance for population programs in LDCs. The U.S. has supported UNFPA because it provides a way for developed countries without bilateral programs to provide population assistance, and because its multilateral character makes assistance available to countries where bilateral aid is either unavailable or inappropriate. UNFPA programs in the 1970s raised worldwide awareness of rapid population growth problems, principally by sponsorship of basic data collection, population research, and communication-education activities. Emphasis then shifted to country-specific programs, particularly maternal/child health-family planning programs, in a set of countries identified as priority demographic problem areas. Needs assessment studies were introduced through which joint UNFPA-host country teams defined the priority actions needed to remedy each country's population problems, and identified the appropriate roles for external assistance from the UNFPA or other donors. During 1980-81, a State-A.I.D. review team conducted a comprehensive assessment of UNFPA activities and their relationship to U.S. interests. At the same time, the June, 1981, UNDP Governing Council - with full U.S. support - directed UNFPA to give substantially more support to family planning assistance in the 1980s and substantially less support to basic data collection and population research.

Host Country & Other Donors: From 1967 through 1981, the UNFPA received over $580 million in contributions from more than 100 donors other than the United States. Pledges from these donors are estimated at $101 million in 1982, and an increase to $112 million is projected for 1983. In most cases, recipient countries pledge matching support for major UNFPA programs.

Beneficiaries: Project beneficiaries are the reproductive age couples and their families in 125 countries which receive population assistance through UNFPA-funded programs.

FY 84 Program: In 1984, UNFPA will be implementing a revised assistance program that will be approved by the June, 1982, UNDP Governing Council. All countries receiving A.I.D. bilateral population assistance of centrally-funded assistance will continue to benefit from complementary forms of UNFPA assistance. UNFPA will continue to collaborate with A.I.D. in critical areas such as the provision of contraceptive commodities, the training of paramedical, auxiliary health, and program management staff in advanced methods of family planning services, and in support for contraceptive research.

Major Outputs: Through FY 1982, the UNFPA will have initiated more than 3,200 projects in 133 countries, of which more than 1,500 will have been completed. The UNFPA projects to be initiated in 1984 will be determined during 1983 after consultation with host governments and, in the case of larger, multi-year programs, after review and approval by the UNDP Governing Council session of June, 1983.

FY 84	LIFE OF PROJECT
7,900	109,894

INITIAL OBLIGATION FY	ESTIMATED FINAL OBLIGATION FY	ESTIMATED COMPLETION DATE OF PROJECT FY
68	87	88

Purpose: To improve family planning information and services in geographic areas and to population groups not previously or adequately served by government or other donor family planning programs.

Background and Progress to Date: The Pathfinder Fund is a Boston-based, nonprofit organization incorporated in 1957 to encourage and initiate family planning programs worldwide with emphasis in the LDCs. Pathfinder grants to LDC institutions average $40-50,000 and are intended to foster the introduction and/or integration of family planning information and services into programs and areas where they do not currently exist. Since A.I.D. support began in FY 1968, Pathfinder has conducted over 1,200 projects in 85 countries. At present Pathfinder is supporting over 75 major projects and provides over 100 training awards and commodity grants yearly to over 40 countries. Project emphases are on community-based contraceptive distribution programs, voluntary sterilization training and services, and increased participation of women's groups in population activities. Since 1979 the Project has supported activities that integrate family planning services into other development programs that focus on women. Pathfinder grantees include non-government, private institutions as well as LDC governments. Based on a comprehensive evaluation conducted in October-November of 1980 that reported favorably on Pathfinder's performance, this project will be renewed for a five-year period, 1983-87.

Host Country and Other Donors: Pathfinder Fund assistance is closely coordinated with A.I.D. and other donors, including the United Nations Fund for Population Activities, the International Planned Parenthood Federation and Family Planning International Assistance. Pathfinder Fund encourages its grantees to share local project costs as much as possible to help them assume program costs when Pathfinder support ends.

Beneficiaries: Project beneficiaries are the rural and urban poor in the LDCs who, as a result of Pathfinder programs, will have access to comprehensive family planning and information and services.

FY 84 Program: Pathfinder will support approximately 80 projects in 35 countries. Program emphasis will be on community-based service programs (20 projects); training of paramedical personnel to provide family planning services (20 projects) improvement of delivery systems for clinic-based family planning services, including voluntary sterilization (15 projects); pharmaceutical personnel training (5 projects); and projects to enhance the role of women as family planning program managers and as active participants in integrated family planning/development programs (10 projects); and conferences, seminars and workshops on population issues (10 projects). Program concentration will continue to shift toward new initiatives in the African and Near East regions while major efforts in Latin America and Southwest Asia will be maintained. To accomplish the above activities A.I.D. will contribute $8.0 million in grant funds and contraceptives worth approximately $1.0 million. An intensive evaluation was completed in FY 1981.

Major Outputs:

	All Years
Family planning acceptors	3,000,000
Family planning clinics established a/o improved	300
Paramedics trained in family planning	4,000
Community-based Service Programs established	100

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)		
Grant to the International Planned Parenthood Federation	Population Planning	FY 84 11,500	LIFE OF PROJECT 301,353	
NUMBER 932-0638 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE FY 1983 Annex V Centrally Funded, p. 20	INITIAL OBLIGATION FY 68	ESTIMATED FINAL OBLIGATION FY 90	ESTIMATED COMPLETION DATE OF PROJECT FY 92

Purpose: To support the improvement and expansion of population/family planning programs of the International Planned Parenthood Federation (IPPF) and its network of family planning associations (FPAs) and affiliates in less developed countries.

Background and Progress to Date: IPPF has programs in over 90 countries which are supported by funds provided by A.I.D. and other donors. In many of these countries, IPPF has demonstrated a latent demand for family planning and now many governments' service programs are supplanting IPPF pioneering efforts. The IPPF affiliates are working to: (1) initiate services where no A.I.D. bilateral programs are providing family planning; (2) develop quality delivery systems; (3) integrate family planning into existing service systems; (4) demonstrate the effectiveness of community-based distribution of contraceptives; and (5) broaden the education, information, and service systems to assure that a wide range of appropriate methods and education approaches are available to meet family planning needs. Recent initiatives include voluntary sterilization, youth programs, improved grassroots participation in policy and programming, and projects to improve the status of women. U.S. contributions are predicated upon annual evaluation of (1) IPPF performance, (2) program plans for the following year, and (3) satisfactory resolution of A.I.D. audit issues. Particular attention is given to annual questionnaire responses from A.I.D. field missions regarding current FPA performance and potential.

Host Country and Other Donors: Other governments, including United Kingdom, Australia, Sweden, Denmark and Japan and over ten private donors, including the Draper World Population Association and the Family Planning Association of Canada, provide more than 70% of the program support costs. In addition, nonmonetary local contributions are often received by IPPF member associations in the form of tax exemption, free office and clinic space, free publicity, voluntary professional services, etc.

Beneficiaries: The beneficiaries are urban and rural poor where IPPF programs are being implemented, as well as host governments, which gain knowledge and expertise from IPPF pilot programs.

FY 84 Program: Major efforts include: expanded community-based contraceptive distribution; information and education, especially for youth, medical and clinical activities; training; women's projects; innovative information and services delivery systems; project-related research; and dissemination of current medical and educational information.

Major Outputs:	All Years
Community-based contraceptive distribution programs	70
FP clinic networks	85
Voluntary sterilization programs	50
	($ thousands)

PROJECT MANAGER: Joseph M. Loudis

TITLE: Family Planning International Assistance (FPIA) Program	FUNDS: Population Planning	PROPOSED OBLIGATION (in thousands of dollars) FY 84: 13,300	LIFE OF PROJECT: 192,000
NUMBER 932-0955 GRANT ☒ LOAN ☐	NEW ☐ CONTINUING ☒	PRIOR REFERENCE: Centrally Funded Data Base, Page 113	INITIAL OBLIGATION FY 71 / ESTIMATED FINAL OBLIGATION FY 87 / ESTIMATED COMPLETION DATE OF PROJECT FY 89

Purpose: To initiate family planning programs through existing social welfare, church, youth and womens organizations in the developing countries.

Background and Progress to Date: Family Planning International Assistance (FPIA) was organized in 1971 as the international assistance division of the Planned Parenthood Federation of America. In selecting and funding developing country programs, FPIA stresses innovative, cost-effective, low technology programs which have a good chance of continuing after the end of FPIA support. FPIA support is directed primarily to non-government institutions and is designed to encourage integration of family planning into other activities such as maternal child health and/or women's church and youth programs. To date, FPIA has supported 370 projects in 41 countries; currently assists 103 projects in 32 countries and provides contraceptive commodities to Health/Family Planning programs in 49 additional countries. Approximately 3,700,000 family planning acceptors are being served through FPIA's project and commodity distribution services. In 1977 and 1980 evaluation and follow-up audits were conducted by the American Public Health Association (APHA) and the A.I.D. Auditor General (AAG/W). Their respective conclusions justified continuation of the PPFA/FPIA program through FY 1982. APHA conducted a second worldwide evaluation in May 1981. This is being used as a basis for designing a further continuation of the program through FY 1987. The proposal for continuing the program will be available for A.I.D. review in late April 1982.

Host Country and Other Donors: Project assistance is coordinated closely with other international donors, including International Planned Parenthood Federation, Church World Services and other non-government donor agencies. FPIA encourages recipient institutions to share program costs, such as personnel, facilities and administrative expenses to facilitate continuation of the project after the end of FPIA support.

Beneficiaries: Project beneficiaries are the rural and urban poor in less developed countries who do not have alternative access to affordable, routinely available family planning information and services.

FY 84 Program: FPIA will support approximately 101 projects in 42 countries. Program emphasis will be on establishment of community-based distribution programs (35 projects); increased participation of and impact on women (35 projects) and adolescents (10 projects); physician training (10 projects); and expanded use of para-professionals and village-level people as family planning agents (11 projects).

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)		
Program for Voluntary Sterilization	Population Planning	FY 84 9,800	LIFE OF PROJECT 216,826	
NUMBER 932-0968 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE FY 1983 Annex V Centrally Funded, p. 22	INITIAL OBLIGATION FY 72	ESTIMATED FINAL OBLIGATION FY 92	ESTIMATED COMPLETION DATE OF PROJECT FY 93

Purpose: To make high quality voluntary sterilization (VS) services available as an integral part of LDC health and family planning programs.

Background and Progress to Date: The International Project of the Association for Voluntary Sterilization (AVS) was created in 1972 to advance availability of VS to requesting couples as a normal component of public health and family planning services. As of the end of 1981, AVS was assisting over 93 projects in 37 countries for service delivery, information, paramedic and physician training, equipment, equipment repair, and/or development of national leadership groups. Thirty-seven national associations are associated in a world federation. AVS has assisted Korea, Taiwan, Philippines, Thailand, Indonesia, Bangladesh, Egypt, Tunisia, Guatemala, El Salvador, Honduras, Colombia and Jamaica in their expansion from limited to nationwide VS services. An external evaluation in late 1979 reported that AVS is continuing to perform in a superior manner. The next such evaluation is scheduled o/a June 1983. Demand for VS services is increasing rapidly in LDCs as safe, inexpensive techniques are introduced on an outpatient basis.

Host Country and Other Donors: In most countries, host governments share project costs, although attainment of the goal of self-sustaining programs depends on the respective countries' economic conditions. Many projects have complementary, coordinated inputs from one or more other donors.

Beneficiaries: LDC couples with complete families who seek a method of permanent contraception for reasons of health and family wellbeing.

FY 84 Program: Continue services, training, information, and equipment support in about 40 countries; assist pilot demonstration projects in at least 5 new countries, principally in Africa; expand number of equipment repair/maintenance centers to about 15 countries; support development of World Federation of (national) Associations for VS role as the major international source of expertise on VS and foster creation of leadership groups in additional countries.

Major Outputs	All Years unit

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)		
Demographic Data for Development	Population Planning	FY 84 1,700	LIFE OF PROJECT 7,500	
NUMBER 936-3000 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE FY 1983 CP, Annex V, Centrally Funded, p. 58	INITIAL OBLIGATION FY 82	ESTIMATED FINAL OBLIGATION FY 86	ESTIMATED COMPLETION DATE OF PROJECT FY 87

Purpose: To strengthen the capacity of developing countries to process, evaluate and analyze demographic and family planning data as well as other social and economic data which, in turn, will help promote greater understanding of population and development relationships.

Background and Progress to Date: The project responds to the continuing, critical need among LDCs to improve the institutional capacity for processing and analyzing statistical data which are essential for effective planning, implementation and assessment of population and development programs. Major components of the project are 1) technical assistance to LDC statistical institutions for data entry, editing, tabulation, and analysis, 2) short-term training workshops for LDC technicians and analysts on mapping, census design, data processing software and data analysis, and 3) compilation, analysis and dissemination of data to provide a continuous flow of accurate and timely data which are used in program and project planning, implementation and evaluation. A part of the technical assistance component will involve transfer of micro-computer technology to a limited number of countries for use in data processing and analysis by statistical institutions. The project is a follow-on to several projects including 1980 Round of Censuses, Demographic Data Collection in Asia and Compilation and Analysis of Population Data and will utilize previously collected data from censuses and surveys (including WFS and CPS), existing training materials, and will build on the expertise acquired in providing technical assistance and training to LDCs over the past 5 years.

Host Country and Other Donors: Host countries will carry some costs for training and personnel in data processing and analysis techniques and for conducting in-country analyses of the data.

Beneficiaries: Project beneficiaries are LDC statistical institutions, specifically personnel responsible for the analysis, evaluation and use of demographic data. In addition, accurate and timely demographic and statistical data will be more readily available for use by policy makers and planners and will help increase the effectiveness of LDC efforts to improve the standard of living of the poor, who are the ultimate beneficiaries.

FY 84 Program: Project activities during this period will include: 1) provision of technical assistance for processing and/or analyzing demographic data; implementation of country specific and regional workshops to present data processing and analysis methods; and continued compilation, analysis, and dissemination of demographic data. At least 12 developing countries, half of which are in Africa, are expected to receive assistance through this project. Included among the target countries are Bangladesh, Ecuador, Guatemala, Jordan, Nigeria, Kenya, Peru, Rwanda, Senegal, Sudan, Tanzania and Togo.

Purpose: To develop effective information and education (IE) programs in direct support of selected LDC population and family planning (FP) service delivery programs.

Background and Progress to Date: World Fertility and other surveys in developing countries report that, although many LDC couples are aware of the concept of family planning, they lack the information necessary to make an informed choice as to whether to practice family planning, when, and which method is most appropriate for them. This project provides country-specific assistance in the following: (1) identification of information and education (IE) needs of family planning programs; (2) marketing and audience surveys; (3) design, implementation and assessment of activities. These activities may range from small-scale studies to test effective IE methods; to larger-scale informational campaigns; development, pretesting and revision of materials and methods; measurement and evaluation of effectiveness of IE programs; and exchange and adaptation of IE methods and materials between countries. The project emphasizes the use of both public and private sector organizations in LDCs engaged in information and education, and the development of IE planning and implementation capability in LDC institutions. The U.S. prime contractor will assist 15-20 LDCs in strengthening their communication support for population and family planning service delivery programs. Through this project, translations and copies of existing materials and films that have been shown to be effective will also be provided as needed and requested for population IE programs.

Host Country and Other Donors: LDC broadcast and film media are owned mostly by government and/or public corporations. Host countries will be encouraged to contribute free airtime on publicly owned stations. They will also be encouraged to contribute facilities and staff time. Other donor agencies would be invited to participate in joint projects. These include UNFPA, UNESCO, FPIA, Pathfinder as well as bilateral programs.

Beneficiaries: The immediate beneficiaries are the LDC P/FP service organizations with rural outreach programs and established service delivery facilities which will reach fertile aged couples. Ultimately, these couples will benefit from improvements in health and welfare.

FY84 Program: FY 1984 funds will continue to be directed toward project implementation, mounting informational and educational activities to support country FP programs, designing IE materials, providing technical assistance and evaluating results.

Major Outputs:

Marketing and Audience Analyses	12
IE Action Studies	15
Design/Production of Materials	20
Advertising and Informational Programs	25
Exchange of Methods and Materials Between LDCs	25
Pretesting and Evaluation of Materials Developed, Methods Adopted, and Campaigns	10

TITLE: Programmatic Grant to the Population Council		FUNDS: Population Planning	PROPOSED OBLIGATION (In thousands of dollars) FY 84: 3,500	LIFE OF PROJECT: 20,573
NUMBER: 936-3005 GRANT ☒ LOAN ☐	NEW ☐ CONTINUING ☒	PRIOR REFERENCE: Advice of Program Change Dated 12/16/81	INITIAL OBLIGATION FY 78	ESTIMATED FINAL OBLIGATION FY 87 / ESTIMATED COMPLETION DATE OF PROJECT FY 88

Purpose: To support the Population Council's programs of technical information to the international population/family planning (P/FP) community and provide funds and technical assistance to institutions in developing countries for service delivery systems, research, evaluation, training and contraceptive marketing.

Background and Progress to Date: Population Council's fellowship program has trained key researchers and government population program administrators throughout the world. Council publications, with more than 16,500 active subscribers, have had a substantial impact through dissemination of current medical research and demographic trends. Institutional strengthening in Africa and Latin America has created centers of demographic and family planning evaluation expertise. The Council's activities have stimulated service delivery programs in countries such as Colombia, Thailand and Peru. The Council has provided training to many of the population leaders who now plan and administer programs in over 70 LDCs.

Host Country and Other Donors: LDC governments and institutions provide personnel, office space and administrative support. Council activities are also supported by major U.S. foundations, the World Bank and the United Nations Fund for Population Activities.

Beneficiaries: The Population Council benefits the worldwide population/family planning movement through publication of research data and other professional papers. Its research and demonstration activities benefit local clientele, generally urban and rural poor.

FY 84 Program: Major elements are expected to include new and ongoing publications on population issues; training of professionals and paramedics; examination of benefits of child spacing as a means of increasing demand for family planning services in tropical Africa; contraceptive development studies; a few small-scale projects to emphasize how women's status can be enhanced by family planning technical assistance to government ministries in North Africa, Peru and Indonesia; extension of family planning and health services through traditional birth attendants; technical assistance and program resources to the Government of Tunisia, primarily for family planning outreach.

Rapid II	Population Planning	FY 84 2,300	LIFE OF PROJECT 9,786
NUMBER 936-3017 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE Centrally Funded Data Base, p. 103	INITIAL OBLIGATION FY 82	ESTIMATED FINAL OBLIGATION FY 86 / ESTIMATED COMPLETION DATE OF PROJECT FY 87

Purpose: To raise awareness of LDC leadership of the basic relationship between population growth and development and to examine population and family planning issues which affect or are affected by development objectives.

Background and Progress to Date: This project is an innovative approach to population policy based on the experiences learned from the AID-sponsored RAPID and PDP projects. These projects, during a five-year period, completed operations in over 30 LDCs. The continued need to demonstrate to LDC policy makers the ways in which population growth affects socio-economic development will be accomplished by institution building, technology transfer, and intensified training. Collaboration of host country officials in project activities is key and accomplished through several site visits to each country. Country, region and sector-specific presentations will be developed which use computer simulation techniques to explain the impact of population growth on development. Presentations will be made for: 1) LDC government leaders and non-government "influentials," 2) U.S. country teams, enabling both AID Mission and Embassy staff to understand the relationship between population and their area of responsibility so they can discuss these interrelations with their host country counterparts, 3) AID and State Department personnel in Washington, increasing their awareness of population/development relationships, and 4) international groups, agencies and organizations. Computer terminals with the accompanying software systems will be installed in selected LDCs where their continued use will further increase the understanding of population factors in development planning. In addition, private and public sector planners will be brought together to prepare population policy analyses tailored to the needs of the country. These analyses and their implications for economic development will be presented to the highest eschelons of government via a series of training workshops.

Host Country and Other Donors: Host countries provide government participants and trainees and in some cases, local facilities and services.

Beneficiaries: Immediate beneficiaries are the host country officials who gain awareness of the links between their national interests and the development restraints related to population growth. Ultimate beneficiaries are the recipients of family planning services and other appropriately designed and implemented economic and social services developed by these country officials.

FY 84 Program: The contractor will prepare country-specific in-depth analyses in collaboration with host-country officials to examine relationships between population and development and will make presentations of the analyses to high level officials in a number of countries.

Contraceptive Procurement	Population Planning	FY 84 12,600		LIFE OF PROJECT Continuing
NUMBER 936-3018 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE APC 11/14/80	INITIAL OBLIGATION FY N/A	ESTIMATED FINAL OBLIGATION FY Continuing	ESTIMATED COMPLETION DATE OF PROJECT FY Continuing

Purpose: To meet requirements for certain contraceptives to be provided through centrally funded population/family planning programs and to serve as a central account from which purchases of contraceptives are made for A.I.D. bilateral programs.

Background and Progress to Date: Prior to development of a central system for contraceptive procurement the Agency paid prices ranging from 15 to 34 cents for a cycle of orals. Consolidating purchases has provided orals at a low cost of 13.78 cents (FY 1974), and a recent price of 17.9 cents (FY 1981) per cycle. The projected FY 1982 price is 18.5 cents per cycle. While prices for condoms have increased more rapidly due to raw material and production cost increases, the economic benefit to worldwide population programs from consolidated central procurement is well established. The Agency has provided more than 1 billion cycles of orals and 2.7 billion condoms for family planning/population programs.

This project was established in FY 1981 with a budget of $8.5 million to supply contraceptives for centrally funded programs. Current procedures call for bilateral funds for contraceptive purchases to be transferred at the beginning of the fiscal year. This occurred partially in FY 1982 as the piecemeal funding of purchases for some bilateral programs continued. During FY1981, the packaging configuration for oral contraceptives was changed resulting in a savings for all programs of about $1.5 million annually. Total planned purchases of contraceptives for FY 1982 are approximately $42 million.

Host Country and Other Donors: Not applicable.

Beneficiaries: This project provides for purchase of safe and effective contraceptive products for use in service programs in developing countries by couples who chose to plan their families.

FY 84 Program: Contraceptives will be supplied to centrally-funded C.R.S. projects and approximately 300 grantee projects (and bilateral programs.)

Purpose: To conduct sample surveys of contraceptive knowledge, availability, and use and/or recent demographic levels and trends.

Background: Effective management of population programs requires a regular flow of timely and reliable data on levels and trends of contraceptive knowledge, availability, and use. Information on births and deaths is also needed to measure the impact and cost-effectiveness of family planning and MCH efforts. During the past several years A.I.D., through its support of the World Fertility Survey, Contraceptive Prevalence Surveys, and Birth and Death Data Collection projects, has been a leader in supporting sample surveys to provide this needed information. The Family Planning and Demographic Surveys project will carry on the most important functions of these projects. The primary objectives of the project are to (a) provide financial and technical support to developing countries in conducting family planning and/or demographic surveys, (b) disseminate survey results quickly to policy-makers and family planning program administrators; and (c) strengthen institutional capabilities in host countries for undertaking future surveys of this type.

Host Country and Other Donors: Host countries will provide at least 20-25% of local survey costs and will assume major responsibility for survey implementation.

Beneficiaries: Data generated by this project will be used by LDC governments to evaluate recent family planning and demographic levels and trends, and to improve programs for providing family planning and MCH services to the poor.

FY 84 Program: Design and test survey methodology in close consultation with A.I.D. Coordinate correspondence and/or site visits to prospective participating countries. Begin sample surveys in approximately six LDCs.

TITLE	FUNDS	PROPOSED OBLIGATION (In thousands of dollars)	
Accelerated Delivery Systems Support	Population Planning	FY 84 800	LIFE OF PROJECT 4,676
NUMBER 936-5900.01 GRANT ☒ LOAN ☐ / NEW ☐ CONTINUING ☒	PRIOR REFERENCE CP FY 1983 Annex V, Pg. 48	INITIAL OBLIGATION FY 79	ESTIMATED FINAL OBLIGATION FY 84 / ESTIMATED COMPLETION DATE OF PROJECT FY 85

Purpose: To support and promote planning, development and evaluation of affordable primary health care and family planning delivery systems in LDCs.

Background and Progress to Date: A.I.D. for 3 years jointly funded (Hea/Pop) a project incorporating primary health care activities and family planning technical assistance. The Health Office will fulfill its needs for technical assistance, collecting, analyzing and disseminating information and carrying out special studies on primary health care programs through its new Technologies for Primary Health Care project. The Population Office will continue receiving technical advisory services of consultants quickly responding to field Missions' requests for assistance in solving problems of family planning/population program design, evaluation and implementation through this project.

This project, originally programmed through 1982, will be amended, reducing the scope of work to only technical advisory services, and extended for two years. Funding will be from the Population account.

Host Country and Other Donors: None

Beneficiaries: The people who are receiving population and family planning services through the agencies responsible for health care programs in 70 A.I.D.-assisted countries will benefit.

FY 84 Program: Funding will support activities in the major area of technical advisory services. About 1,750 days of expert advisory services will be provided for project planning, design, implementation, and evaluation.

Major Outputs:
