4. APPROVAL A/AID (See M.O. 1025.1 VI C)

SIGNATURE	DATE
ADMINISTRATOR, AGENCY FOR INTERNATIONAL DEVELOPMENT	

SPECIAL CONDITIONS

The AID policy determinations and other program guidance cited below, are hereby included as part of this project document as conditions for AID approval and funding.

- A. Policy determination 56 relative to abortion and related activities signed by the Administrator June 10, 1974.

Section 114 of the Foreign Assistance Act of 1961, as amended, adds legislative restrictions on the use of funds relative to abortions. The new provision reads as follows:

" Section 114. Limiting use of funds for abortion -- None of the funds made available to carry out this part (Part I of the Act) shall be used to pay for the performance of abortions as a method of family planning or to motivate or coerce any person to practice abortions."

- B. Policy Determination #60 for Integration of Women into National Economies, signed by the Administrator September 16, 1974.

Section 113 of the Foreign Assistance Act of 1961, as amended known as the "Percy Amendment", requires that the U.S. bilateral development assistance programs authorized in Sections 103 to 107 of the Act, be administered so as to give particular attention to those programs, projects, and activities which tend to integrate women into the national economies of foreign countries, thus improving their status and assisting the total development effort.

The Amendment gives Congressional endorsement to the increasing concern of the development assistance community and developing countries that women participate fully in the tasks and benefits of economic growth. Sections 103 to 107 of the Act, to which the Amendment refers, calls for concentrating AID resources on critical development problems, including food and nutrition.

This project makes three major contributions to improving the status of women: (1) their health is improved through the training emphasis which is placed on the spacing of pregnancies and on the importance of periodic physical examinations; (2) their economic conditions are improved by the training which is aimed at improving their skills and earning power; (3) the project itself employs women at many levels, including administrators, doctors, supervisors, nurses and other health auxiliaries.
