

ETHIOPIA

USAID Humanitarian Assistance in Review, 1991 – Present

Cyclical droughts, exacerbated by a rapidly growing population and limited government capacity, have led to chronic food insecurity and water shortages in Ethiopia. Major drought and famine episodes in 1984/1985, 1993 to 1999, 2002/2003, and 2005 have rendered several areas of Ethiopia increasingly vulnerable to emergencies, while the cumulative effects of multiple crises have exhausted many household coping mechanisms. The recent repeated failure of the short rains has adversely affected crop production and resulted in significant livestock losses due to severe shortages of water and pasture.

Since the 2002/2003 emergency, USAID/OFDA has adopted a more comprehensive approach to saving lives and alleviating human suffering in Ethiopia, focusing on livelihood interventions that complement emergency assistance, while promoting economic resilience and diverse strategies to break the cycle of famine and poverty. In a shift towards more sustainable solutions to address recurrent emergency problems, USAID/OFDA assists vulnerable families in undertaking a variety of activities to improve food security by enhancing coping mechanisms at the household level. Current USAID/OFDA interventions, including cash-for-work programs, livestock health activities, and livelihoods fairs, meet immediate emergency needs while helping to develop household and community assets for the long-term benefit of drought-affected regions—energizing local markets and yielding more lasting solutions to Ethiopia's complex challenges.

However, communities in Ethiopia remain vulnerable due to endemic poverty, chronic malnutrition, high cereal prices, limited access to water and pasture, conflict, localized agricultural failure, and other shocks. Approximately 7.2 million chronically food-insecure people receive support through cash and food transfers from the Government of the Federal Democratic Republic of Ethiopia's (GFDRE) Productive Safety Net Program. On October 14, the GFDRE revised the number of people in need of emergency assistance from 4.6 million to 6.4 million, including nearly 1.9 million people in Somali Region.

¹ USAID's Office of Food For Peace.

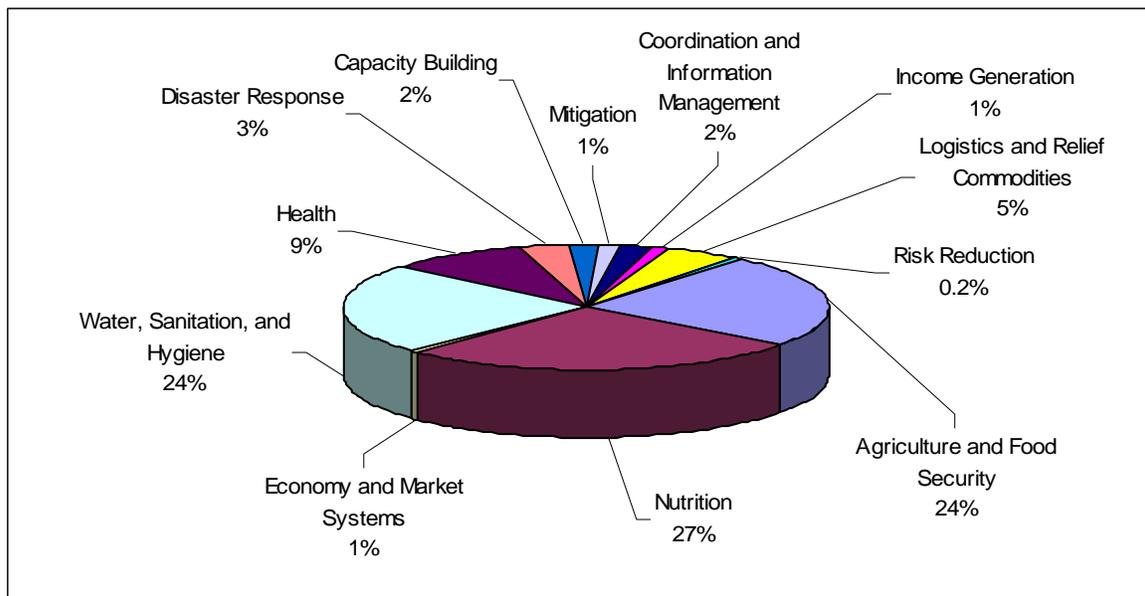

² Includes humanitarian assistance from USAID's Bureau for Africa, the U.S. Department of Agriculture, the U.S. Department of Defense, and the U.S. Department of State's Bureau of Population, Refugees, and Migration.

Since 1991, USAID has provided more than \$3.2 billion in humanitarian assistance to Ethiopia, including \$197.3 million in USAID/OFDA emergency interventions. USAID has deployed humanitarian assessment teams, including Disaster Assistance Response Teams, to Ethiopia in 2000, 2003, 2005, and 2006. On December 18, 2007, USAID deployed a Humanitarian Assistance Team (HAT) to Ethiopia to assess conditions and determine humanitarian needs within the conflict-affected zones of Somali Region. In coordination with USAID/Ethiopia and the U.S. Embassy in Addis Ababa, the HAT conducted multiple humanitarian assessments to examine health, nutrition, food security, livelihood, and water, sanitation, and hygiene conditions in Somali Region, as well as other drought-affected regions countrywide in response to increased food insecurity and malnutrition. Additionally, in response to the regional food security crisis in the Horn of Africa and an upsurge in humanitarian needs, including in Ethiopia, OFDA activated a Washington, D.C.-based Response Management Team from June to September 2008 to monitor humanitarian conditions and coordinate with relief agencies operating in the region.

Since 2002, USAID/OFDA Ethiopia programming has reflected an expanded focus on sustainable interventions in response to systemic vulnerabilities and cyclic emergencies, including the 2002/2003 and 2005 drought crises. USAID/OFDA activities focus on agriculture and food security, nutrition, health, and water, sanitation, and hygiene. In FY 2008 and to date in FY 2009, USAID/OFDA has provided more than \$36 million in non-food assistance, the majority targeting drought-affected areas, including Somali Region. In addition, the USG is the largest donor of food assistance to Ethiopia, consistently providing up to 50 percent of food aid requirements per year. Since 1991, USAID/FFP has provided more than \$3 billion in food aid. In FY 2008 and to date in FY 2009, USAID/FFP has contributed approximately \$631 million in P.L. 480 Title II emergency food assistance.

To address recurrent emergencies and promote sustainable solutions in Somali Region, USAID/OFDA and USAID/Ethiopia have developed a relief-to-development transition strategy. The USG transition strategy focuses on critical livelihoods rehabilitation and disaster risk reduction activities to secure current and rehabilitate disrupted livelihoods.

USAID/OFDA NON-FOOD ASSISTANCE TO ETHIOPIA BY SECTOR (FISCAL YEARS 2002–2008)³

³ Approximate percentage of assistance by sector, excluding program support costs.
