Preface

This bibliography was prepared as a supplement to the Conference on Integrated Agriculture-Aquaculture Farming Systems held by ICLARM in cooperation with the Southeast Asian Regional Center for Graduate Study and Research in Agriculture (SEARCA) in Manila, Philippines, 6-9 August 1979. It was decided that the bibliography was of sufficient importance to warrant separate publication.

The present listing is provisional since we have not been able to locate all the articles cited. A number of incomplete references have been omitted.

It is intended to acquire copies of all these articles, at which time a complete fully indexed bibliography will be prepared. The articles themselves will, of course, be available from the ICLARM library.

Users of this bibliography are encouraged to send additional material and references for incorporation in the final document.

We would like to acknowledge the assistance of Mrs. Hazel Nishimura, librarian of the US National Marine Fisheries Service Honolulu Laboratory, the library of the International Rice Research Institute, Los Baños, Philippines and Ms. Clare Cuerden of the FAO Fisheries Department Library in compiling this bibliography, and Dr. James Avault Jr. of Louisiana State University for additional references.
