The present list of 100 bibliographies, indexes, abstracts and literature reviews represents selected titles from the holdings of the Agriculture Library of Ohio State University Libraries. They were published, for the most part, during the 1970's. The first eleven titles are indexing and abstracting journals, and require regular checking by the library user. Most are general and include the topic socio-economic aspects of third world agriculture and development. Items 12 through 100 are specialized subject bibliographies, indexes, abstracts or literature reviews on a wide variety of topics within the subject of agriculture and development. I have provided both a Name Index, which includes authors and organizations, and a Title/Term Index, so that the reader can find the publications needed either by author, title, subject or issuing agency.

Some of the items listed have not been completely processed yet, and may not have an OSU call number in parentheses, or may not have an annotation.
