INTRODUCTION

The present Inventory of Selected Regional Training Institutions in West and Central Africa results from the recognition of the Agency for International Development, as from other donor agencies, of the importance of manpower training to the development of African countries. Training of technicians and professionals, middle-level and senior personnel, continues to be a high priority of African nations in their efforts to meet pressing development goals, and to reduce dependency upon expatriate technicians, consultants, and staff. The number of post-secondary educational and training institutions in Africa has grown at an accelerated rate since independence. Nevertheless, there are few countries in sub-saharan Africa that have adequate local resources to provide for their human resource needs given budgetary, staffing, and infrastructure constraints. It is likely that, for the foreseeable future, African nations will continue to require training opportunities overseas in specialized fields.

The specific objective of this project, conducted by the African-American Institute, for the Agency for International Development, has been to identify a cross-section of regional training institutions and programs in West and Central Africa, at the post-secondary level, that can be utilized for third-country training. A number of excellent reference guides exist produced by agencies such as the Agence de Coopération Culturelle et Technique, the Association of African Universities, the Association of Commonwealth Universities, the International University Exchange Fund, and UNESCO, to name only a few. Nevertheless, some of these publications are dated, cover only anglophone or francophone countries, or concentrate particularly on university and academic programs. Furthermore, these inventories are not limited to institutions that accept foreign trainees.

This Inventory provides information on 61 institutions, 371 training programs, in 13 countries in West and Central Africa of which 4 are anglophone and 9 are francophone countries. Institutions and programs were selected according to the following criteria.

Institutions that are regional by definition, administration, and funding are identified. Also included are national institutions that have traditionally served a regional role, and continue to accept foreign students and trainees within acceptable limits. It should be noted that certain institutions are not primarily educational

establishments. Nevertheless, these institutions have training activities related to their research or operational goals.

The selection of programs is based upon certain key development fields, and several levels of training. The fields of interest to this study include agriculture, education, economic planning, environment and natural resources, health and nutrition, management and public administration, rural development, and technology and engineering. Programs have been categorized according to the level of training, as determined by entrance requirements. The five categories utilized are the following:

- I. Post-Secondary Programs requiring less than full university entrance qualifications
- II. University Programs up to the Bachelor's Degree level
- III. Graduate Programs
- IV. Specialized short-term training
- V. English/French Language Training

We cannot claim to present all post-secondary institutions and available programs in West and Central Africa. Moreover, it has not been our attempt to identify all specializations offered at the universities included. Rather, the objective has been to suggest the diversity of training programs available at anglophone and francophone institutions.

As the fields are by no means mutually exclusive, certain programs may have applicability to several sections. In these cases, the program has been listed under the most appropriate category. It should be noted that, given the differences in the educational systems of the 13 countries represented, the number of institutions by discipline, and by level of training, cannot be expected to be uniform. In some countries training in agriculture, education, or administration is provided by national institutions created to respond to local requirements. To the extent that admission to these institutions is reserved for nationals, they are not within the scope of the present study.

The methodology utilized for data collection was a mail questionnaire, supplemented by information available to the staff of the African-American Institute given their various training programs in Africa, university catalogues, institutional brochures, and other general secondary sources. Regrettably, in some instances, we have been

unable to include institutions for lack of up-to-date information. In other cases, the information provided is based completely on secondary sources.

The Inventory provides information on the training programs, the academic calendar, admissions requirements, the availability of practical training and preparatory courses, admissions procedures, student enrollment, faculty, estimated costs, and facilities. In most cases, foreign student quotas are indicated.

The academic entrance requirements, whether based upon General Certificate of Education passes, West African School or Higher School Certificate, or the Baccalauréat, are generally minimum requirements for eligibility. Very often the quality of the pass is critical for admission to the competitive programs. Application procedures and deadlines may be subject to change, and depend to a certain extent on the nature of the applicant's sponsorship. Applicants therefore should assure themselves in advance of the procedures and deadlines. Student enrollment statistics are for the 1979 or 1980 year, for the particular programs listed. In some cases, the figures may be for earlier years, or by faculty, and will be noted accordingly. The number of foreign trainees, within the total enrollment, is identified, when statistics are available. Information on the teaching staff, however, pertains to the faculty of instruction rather than to the specific programs listed, insofar as universities are concerned. The estimated costs are for the academic year, or the program, if of shorter duration.

It is hoped that this inventory will be of use to AID training officers, human resource advisors, and planning officials in the promotion of third country training in Africa. Despite the constraints operating upon both national and regional institutions, the majority have expressed continuing ability to receive trainees or students from other African countries. Many indicated interest and ability to organize special short-term programs. It is evident that more special programs could be identified by a more comprehensive and targeted study by field. Further, there are certainly many national and research institutions that have the capabilities for specialized training that could be designed on a regional basis.

We wish to take this opportunity to express our profound appreciation to African university and Government officials for their invaluable contributions to this inventory.

INTRODUCTION

Ce Répertoire des Institutions de Formation Régionales Sélectives en Afrique Occidentale et Centrale provient de la reconnaissance de l'Agence Américaine de Développement International, aussi bien que d'autres agences internationales, de l'importance de la formation des cadres au développement des pays africains. La formation des cadres techniques et professionnels, du personnel intermédiaire et supérieur, continue à représenter une grande priorité aux nations africaines pour répondre aux objectifs urgents de développement, et pour réduire la dépendance sur les techniciens, conseillers, et personnel expatriés. Depuis l'indépendance le nombre d'établissements supérieurs de formation en Afrique a augmenté d'une manière accélérée. Cependant, il existe très peu de pays en Afrique sous-saharienne ayant les ressources locales nécessaires pour faire face aux impératifs en ressources humaines, compte tenu des contraintes d'ordre budgétaire, de personnel, et d'infrastructure. Par conséquent, il est probable que dans un proche avenir les pays africains continuent à faire appel aux possibilités de formation à l'extérieur dans certaines spécialisations.

L'objet de ce projet, effectué par l'Institut Africain-Américain pour l'Agence Américaine de Développement International, était d'identifier une sous-section d'institutions et programmes de formation régionaux en Afrique Occidentale et Centrale, au niveau post-secondaire, utilisables pour la formation des cadres africains. Il existe des répertoires excellents publiés par des agences telles que l'Agence de Coopération Culturelle et Technique, l'Association des Universités Africaines, l'Association des Universités du Commonwealth, le Fonds International d'Echanges Universitaires, et l'UNESCO, pour n'en citer que quelques uns. Néanmoins, certains de ces ouvrages datent de quelques années, couvrent uniquement les pays anglophones ou francophones, ou s'adressent surtout aux programmes universitaires et académiques. En plus, ces répertoires ne se limitent pas uniquement aux établissements ouverts aux étrangers.

Ce Répertoire consiste en des renseignements sur 61 institutions, 371 programmes de formation, dans 13 pays de l'Afrique Occidentale et Centrale dont 4 pays anglophones et 9 pays francophones. La sélection des établissements et programmes s'est basée sur les critères suivants.

Des institutions régionales par définition, administration, et financement sont identifiées. D'autres établissements nationaux ayant eu une vocation régionale, et continuant à accepter les étudiants et stagiaires étrangers dans des limites convenables, sont également inclus. Nous ajoutons que certaines institutions ne sont pas en premier lieu des établissements éducatifs. Cependant, ces institutions ont des activités de formation reliées aux objectifs opérationnels ou de recherches.

Le choix des programmes particuliers est basé sur les disciplines prioritaires au développement, et selon plusieurs niveaux de formation. Les disciplines qui ont fait l'objet de cette enquête sont l'Agriculture, Planification Economique, Education, Environnement et Ressources Naturelles, Santé et Nutrition, Gestion et Administration, Développement Rural, et Technologie et Génie. Les programmes sont classés par niveau de formation, correspondant aux conditions d'entrée. Les cinq catégories utilisées sont les suivantes:

- I. Programmes Supérieurs recrutant sur critères autres que le Baccalauréat ou conditions normales pour l'accès universitaire
- II. Programmes Supérieurs de 1er et 2ème cycle
- III. Programmes de 3ème cycle
- IV. Programmes Spéciaux à court-terme
- V. Perfectionnement en Langue Française/ Anglaise

Nous ne pouvons pas prétendre avoir présenté toutes les institutions et options offertes, au niveau supérieur, en Afrique Occidentale et Centrale. En plus, nous n'avons pas tenté d'identifier toutes les spécialisations disponibles aux universités représentées. Le but plutôt est resté de suggérer la diversité de programmes de formation parmi les établissements anglophones et francophones.

Etant donné que les disciplines ne sont pas mutuellement exclusives certains programmes pourraient facilement être cités en plusieurs sections. Dans ce cas, le programme est inclus à la catégorie la plus appropriée. Nous précisons qu'en vue des différences en systèmes d'enseignement parmi les 13 pays représentés, le nombre d'établissements par discipline, et par niveau, ne peut être uniforme. Dans certains pays la formation en agriculture, enseignement, ou administration est

dispensée par des institutions nationales répondant aux besoins concrets locaux. Dans la mesure où l'accès à ces établissements est réservé aux nationaux, ils n'ont pas fait parti de ce recensement.

La méthodologie appliquée à l'élaboration de ce répertoire consiste des données fournies en réponse aux questionnaires adressés aux établissements, des renseignements disponibles au personnel de l'Institut Africain-Américain en raison de leurs programmes divers de formation en Afrique, des livrets d'étudiants, brochures d'informatio, et d'autres sources secondaires. Il est à regretter que dans certains cas, nous n'étions pas en mesure d'inclure des établissements par manque de renseignements courants. Dans d'autres cas, les renseignements fournis proviennent de sources secondaires.

Le Répertoire contient des renseignements sur les programmes d'études ou de formation, le calendrier académique, les conditions d'entrée, la disponibilité de stages pratiques et de cours préparatoires, les procédures d'admission, les effectifs d'étudiants et du personnel enseignant, les frais de formation estimatifs, et les avantages octroyés aux étudiants ou stagiaires. Les quotas pour étudiants étrangers sont indiqués dans la plupart des cas.

Les conditions académiques d'admission, qu'elles dépendent des réussites au General Certificate of Education, West African School ou Higher School Certificate, ou le Baccalauréat, sont normalement des conditions minimales. Etant donné la concurrence pour l'inscription à de nombreux programmes, la qualité du dossier scolaire, ainsi que les mentions aux diplômes secondaires sont souvent critiques pour l'admission. Les procédures d'inscription ainsi que les délais prévus peuvent être modifiés, et dépendent parfois des sources de financement du candidat. Par conséquent tout candidat a intérêt à s'assurer à l'avance des règlements en vigueur. Les statistiques données sur l'effectif des étudiants sont pour l'année 1979 ou 1980 pour les programmes de formation cités. Dans certains cas les statistiques s'appliquent à des années ultérieures, ou à l'inscription en faculté, et seront indiquées conformément. Le nombre d'étudiants étrangers inscrits, compris au total, est indiqué dans la mesure du possible. Les données quant au personnel enseignant sont le plus souvent pour la faculté en question plutôt que pour le programme précis, lorsqu'il s'agit des universités. Les frais estimatifs couvrent les dépenses prévues pour l'année universitaire ou pour le programme de formation, d'une durée plus limitée.

Nous restons dans le souhait que ce Répertoire sera utile aux responsables de formation de l'AID, aux conseillers en ressources humaines, et aux agents de planification pour la promotion d'échanges de formation en Afrique. Malgré les contraintes qui surgissent auprès des établissements nationaux aussi bien que régionaux, la majorité a manifesté une capacité continue de recevoir des stagiaires ou étudiants ressortissants d'autres pays africains. Maintes ont exprimé un intérêt et la possibilité d'organiser des programmes spéciaux à court-terme. Il va sans dire qu'avec une études plus compréhensive par discipline d'autres programmes spéciaux pourraient être identifiés. Egalement il existe certainement de nombreux établissements nationaux et de recherche ayant des capacités d'accueil pour l'élaboration de programmes au niveau régional.

Nous tenons à exprimer notre profonde gratitude aux responsables universitaires et gouvernementaux africains pour leurs contributions inestimables à la préparation de ce répertoire.

GLOSSARY/LEXIQUE

B.E.P.C.	Brevet d'Etudes du Premier Cycle de l'Enseignement Secondaire
C.A.P.	Certificat d'Aptitude Professionnelle
C.E.P.E.	Certificat d'Etudes Primaires Elémentaires
C.P.E.V.	Certificat Préparatoire aux Etudes Vétérinaires
D.E.A.	Diplôme d'Etudes Approfondies
D.E.S.	Diplôme d'Etudes Supérieures
D.I.T.	Diplôme d'Ingénieur Technologue

RENSEIGNEMENTS COMPLEMENTAIRES

Le CUEF a été crée à la demande de l'Association des Universités Africaines pour l'enseignement du français aux étudiants non-francophones. Des cours intensifs ainsi que des stages d'été sont organisés.

INSTITUTION: COURS DE LANGUE ET CIVILISATION FRANÇAISES (CLCF)

ADRESSE: Université de Dakar
Dakar-Fann, Sénégal

DOMAINE DE FORMATION: PERFECTIONNEMENT
EN FRANÇAIS

ORGANISME RESPONSABLE: Université de Dakar

NIVEAU DE FORMATION: V

DATE DE FONDATION: 1962

CALENDRIER ACADEMIQUE: octobre/juin

PROGRAMMES	DUREE	DIPLOME	STAGES PRATIQUES
LANGUE ET CIVILISATION FRANÇAISES	1 an	Certificat Pratique de Langue Française	
	1 an	Diplôme d'Etudes de Français	
	1 an	Diplôme Supérieur d'Etudes de Français	

CONDITIONS D'ADMISSION: Baccalauréat ou GCE 'A' Level.

PROCEDURE D'ADMISSION: Demande présentée par l'organisme intéressé

DATES LIMITES DE DEMANDE: le 15 juillet

COURS PREPARATOIRES: non prévus

QUOTA POUR ETUDIANTS ETRANGERS: aucun

INSTITUTION: COURS DE LANGUE ET CIVILISATION FRANÇAISES (CLCF)

EFFECTIF DES ETUDIANTS

NOMBRE D'ETUDIANTS:

HOMMES: 50 FEMMES: 64 TOTAL: 114

RENSEIGNEMENTS COMPLEMENTAIRES

INSTITUTION: GHANA INSTITUTE OF LANGUAGES (GIL)
ADDRESS: Post Office Box M 67
 Accra, Ghana
AREA OF TRAINING: ENGLISH LANGUAGE
 TRAINING
RESPONSIBLE AGENCY: Ministry of Education
LEVEL OF TRAINING: V
FOUNDING DATE: 1961
ACADEMIC CALENDAR:

1st term	October/December
2nd term	January/March
3rd term	April/June

PROGRAMS	DURATION	AWARD	TRAINING
BILINGUAL SECRETARYSHIP	3 years	Certificate in Bilingual Sec.	
LANGUAGE COURSE	3 years	Certificate of Proficiency	
TRANSLATORS COURSE	4 years	Diploma in Translation	

ENTRANCE REQUIREMENTS: WASC or equivalent required for the Language Course and the Translators Course. Bilingual Secretaryship: GCE 'A' Level or equivalent, entrance examination and interview.

APPLICATION PROCEDURE: Application to GIL

APPLICATION DEADLINE: August 31
PRELIMINARY/PREPARATORY COURSE: Preparatory courses

FOREIGN STUDENT QUOTA: none

INSTITUTION: GHANA INSTITUTE OF LANGUAGES (GIL)

ENROLLMENT

NUMBER OF STUDENTS:			
	MALE:	FEMALE:	TOTAL: 1,166
NUMBER OF FOREIGN STUDENTS:			
	MALE:	FEMALE:	TOTAL: 212

FACULTY

FULL-TIME TEACHING STAFF:	44
PART-TIME TEACHING STAFF:	28

ESTIMATED EXPENSES (IN LOCAL CURRENCY)

TUITION & FEES FOR FOREIGN STUDENTS:	450-660 Cedis
LIVING EXPENSES FOR FOREIGN STUDENTS:	not available

FACILITIES

HOUSING:	-	STUDY & READING ROOMS:	X
FOOD SERVICE:	-	TRANSPORTATION:	-
