Institute for Development Anthropology
Associates Network

Prepared by
Curt D. Grimm
Research Assistant

[1983]

Institute for Development Anthropology Associates Network

The Institute for Development Anthropology has recently computerized its file of Associates. The credentials of nearly four hundred individuals are in the database file and additional entries or new data are continually updated. Information pertaining to each associate is entered into the following five categories.

| <u>Field</u> | <u>Key for Interpretation</u> |
|--------------|--|
| 1) NAME | |
| 2) EDUCATION | University attended, highest degree earned, degree date, subject studied. |
| 3) LANGUAGE | EX=excellent, G=good, F=fair, -=not at all or not applicable. The order of the symbols indicates competency in <u>Speaking-Reading-Writing-Understanding</u> . |
| 4) AREAL:EXP | The countries or geographical regions in which the associate has extensive experience. |
| 5) EXPERTISE | The associate's topical specializations. See attached sheet for complete listing. |

The files may be accessed in the form of a complete or partial alphabetical list, a list of all files containing a specific data entry, or a cross-reference for files with any combination of similar information within or between categories.

The Area Development Cooperative Agreement between the Agency for International Development, Clark University and the Institute for Development Anthropology was established to provide USAID missions and host country institutions with technical expertise for designing, implementing, and evaluating regional development activities. In this context, the IDA Associates Network provides easy access to the individuals experienced in the primary activities of the Cooperative Agreement. Three lists have been compiled to demonstrate the database file and provide a collection of IDA associates.

- 1) The first list contains the files of individuals experienced in Natural Resource Management, Environmental Analysis, or Semi-Arid/Arid Lands.
- 2) The second grouping of associates is cross-referenced for the files of those individuals who have worked in the fields of River Basin Development, Settlement/Resettlement, or Refugees.
- 3) Finally, those individuals with specialization in Urbanization, Migration, Small Towns/Secondary Cities, or Regional Planning are listed.
