1983 Annual Report on Public Law 480

DEPARTMENT OF AGRICULTURE
OFFICE OF THE SECRETARY
WASHINGTON, D. C. 20250

TO THE CONGRESS OF THE UNITED STATES:

I am pleased to transmit the annual report on agricultural export activities carried out under Public Law 480, the Food for Peace Program. The report covers the period from October 1, 1982 through September 30, 1983. The program continues to support the economic, humanitarian, and foreign policy objectives of the United States by providing assistance to alleviate hunger and malnutrition, by promoting economic progress within the developing countries, and by expanding international trade and developing markets for U.S. agricultural commodities.

During the period, Title I and III agreements were signed with 27 countries to provide approximately 4.2 million metric tons of food assistance. Title III, Food for Development programs were signed with six countries--Bangladesh, Bolivia, Egypt, Honduras, Senegal and Sudan.

The Title II program provided approximately 1.9 million metric tons of food assistance to 76 countries, with substantial contributions made to programs of the U.S. voluntary agencies and the World Food Program, including contributions through the International Emergency Food Reserve.

Through both the Title I/III and Title II programs, the annual U.S. contribution to the Food Aid Convention of 4.47 million metric tons of food grains was achieved.

A handwritten signature in black ink that reads "John R. Block". The signature is written in a cursive style with a large, stylized initial "J".

John R. Block
Secretary of Agriculture

Enclosure

THE ANNUAL REPORT ON ACTIVITIES CARRIED OUT
UNDER PUBLIC LAW 480, 83rd CONGRESS
AS AMENDED, DURING THE PERIOD
OCTOBER 1, 1982, THROUGH SEPTEMBER 30, 1983

ACKNOWLEDGMENTS

The following agencies submitted material that has been incorporated into this report:

United States Department of Agriculture
Foreign Agricultural Service
Agricultural Stabilization and Conservation Service
Economic Research Service
Agricultural Research Service
Office of International Cooperation and Development

Agency for International Development
Department of Commerce
Department of Education
Environmental Protection Agency
Department of Health and Human Services
Department of Interior

February 1985

Summary

Under Public Law 480, agricultural exports totaled \$1.10 billion in fiscal year 1983, about 3 percent of the total value of U.S. agricultural exports for the year. Nearly 100 countries received Public Law 480 shipments. Egypt was the largest recipient, accounting for almost one-third of all commodities shipped. India, Bangladesh, and Pakistan were the largest recipients of title II commodity shipments. Wheat and wheat products remain the major commodities donated through Public Law 480 programs.

Titles I and III

The fiscal year 1983 aggregate program value of title I agreements was \$796.0 million. Forty-five title I sales agreements and amendments were signed with 27 friendly countries. Title III agreements and amendments accounted for 17 percent of the program value of title I. The objectives of the title III, Food for Development Program, were met through the signing of 6 agreements and amendments with a total value of \$139 million. Titles I and III programming met the 75:25 ratio of food allocation required by section 111 of the Agricultural Trade Development and Assistance Act of 1954, as amended.

Title II

During fiscal year 1983, 1.94 million metric tons of title II commodities were donated to 62 million needy persons in 68 countries. The major commodities supplied were wheat and wheat products, including flour, followed by feed grains, nonfat dry milk, and vegetable oil.

- Of the 1.94 million tons of commodities shipped, voluntary agencies were responsible for distributing 44 percent, the World Food Program accounted for 40 percent, and government-to-government programs for 16 percent. Shipments to Asia were larger in terms of both value and volume than to any other geographic area.

The Commodity Credit Corporation's (CCC) value of the commodities, including ocean transportation, was \$565.0 million--\$397.7 million in commodities and \$167.3 million in freight costs.

Title I - Sales Program

Summary

During fiscal year 1983, 45 title I sales agreements and amendments with a total export market value of \$796.0 million were signed. The agreement actions were concluded with 27 countries considered to be friendly with the United States at the time agreements were signed, in accordance with section 103(d) of Public Law 480.

In fiscal year 1983, convertible local currency sales agreements (including title III) comprised 100 percent of the total value of agreements signed. There were no dollar credit agreements.

In terms of dollar value, the five countries to which the largest amounts were programmed were Egypt--\$250 million; Bangladesh--\$60 million; Pakistan--\$50 million; El Salvador --\$39 million; and Sudan--\$50 million.

Commodities programmed during fiscal year 1983 included wheat, wheat flour, corn, sorghum, rice, vegetable oil, blended/fortified foods, and cotton. Wheat and wheat flour (3.3 million tons) were the major commodities programmed. Other quantities programmed were 361,000 tons of feed grains (corn and sorghum), 224,000 tons of vegetable oil, and 31,000 bales of cotton.

Allocation Requirements

The title I programming process during fiscal year 1983 met the 75:25 (not more than 25 percent for countries with per capita incomes over \$730) ratio of food allocations as set forth in section 111 of the Agricultural Trade Development and Assistance Act of 1954, as amended. Tables 1 and 2 provide the initial and final country and commodity allocations for fiscal year 1983.

Credit Terms

Title I of Public Law 480 provides for the concessional sale of agricultural commodities to friendly countries. Agreements under title I may be signed either for dollar credit with up to a 20-year repayment period or convertible local currency credit with up to a 40-year repayment period. The grace period for dollar credit agreements ranges from 0 to 2 years and for convertible local currency agreements it may be as long as 10 years. Specific downpayments in dollars may be required under both types of agreements. Minimum interest rates under both types of financing are set by law at 2 percent during the grace period and 3 percent thereafter. Terms for agreements are determined on a case-by-case basis.

Section 401

Section 401 of the Act provides that the Secretary of Agriculture must determine the availability, for concessional export, of commodities included in sales agreements. In determining this availability, the Secretary must consider U.S. productive capacity, domestic requirements, farm and consumer price levels, adequacy of carryover stocks, and anticipated exports for dollars.

Role of CCC

Although the Commodity Credit Corporation finances the sale and export of commodities under title I, actual sales are made by private U.S. suppliers to foreign importers, government agencies, or private trade entities. The Corporation finances sales by paying suppliers directly through the U.S. banking system for the portion of their sale not covered by any required downpayment. CCC then collects the amount provided in the agreement with the importing country.

Accounting for Costs

The gross cost to CCC of financing long-term credit sales of U.S. agricultural commodities from July 1, 1961, through Sept. 30, 1983, totaled \$12.378 billion -- \$11.357 billion commodity and other costs, \$1.017 billion ocean transportation costs (including \$908 million ocean freight differential), and \$4 million interest costs. Through Sept. 30, 1983, CCC had been reimbursed for all costs by dollar payments under government-to-government and private trade entity agreements in the amount of \$3.151 billion, by \$1.614 billion foreign currency funds used to finance long-term credit sales, and by appropriations in the amount of \$7.613 billion.

Title I - Self-Help Provisions

All Public Law 480 title I sales agreements since 1967 have contained self-help measures to which recipient countries have committed themselves. During fiscal year 1983, Congress enacted legislation requiring the self-help measures to be described in specific and measurable terms, to the greatest extent possible, and that the President monitor the implementation of the self-help measures to establish that these measures are fully carried out. The self-help provisions listed in section 109 are:

- Devoting land resources to production of needed food;
- Development of the agricultural chemical, farm machinery and equipment, transportation, and other necessary industries;
- Training and instructing farmers in agricultural methods and techniques, and reducing illiteracy among the rural poor;
- Constructing adequate storage facilities;
- Improving marketing and distribution systems;
- Creating a favorable environment for private enterprise and investment;
- Establishing and maintaining government policies to insure adequate incentives to producers;
- Establishing and expanding institutions for adaptive agricultural research;
- Allocating for these purposes sufficient national budgetary and foreign exchange resources;
- Carrying out voluntary programs to control population growth; and
- Carrying out programs to improve the health of the rural poor.

In compliance with title I regulations, self-help reports are received from all signatory countries. The following are representative of the achievements of the program.

Haiti

Goals

Reform customs and tax administration to increase revenue collections.

Eradicate African Swine Fever.

Improve soil conservation.

Progress

Identified problems of customs administration, which resulted in new legislation and plans for a customs school to train personnel.

Approved new tax laws and internal policies that contributed to fiscal year 1983 public revenues being 20 percent greater than estimates. All tax surplus is transferred to Haiti's Development Budget in accordance with the title I agreement.

Established an African Swine Fever Eradication and Swine Industry Development project, which oversaw the killing of all pigs in Haiti by September 1983. Began an adaptation phase for imported pigs and planned repopulation efforts.

Completed a soil survey of the Acul Dubreuil watershed (Agricultural District of Les Cayes). Recommended a system for improving management of the Acul Dubreuil watershed, and helped 2,449 farmers from 12 community organizations implement a soil conservation program.

Taught 2,500 Haitian farmers techniques for production of fruit and forest trees and forage plants.

Improved rain water collection techniques through installation of small 2,500-gallon tanks in the Morne a Cabrit area.

Established 12 pilot centers that produced and distributed 1.2 million seedlings for planting.

Madagascar

Goal

Support food production, particularly rice production, through:

- 1) improved supply of fertilizer and small farm implements to farmers, and
- 2) rehabilitation of irrigation canals, roads, and bridges.

Progress

Made available during the 1983/84 crop season some 9,000 tons of mineral fertilizers to small farmers who previously had no access to fertilizer use.

Adopted a new policy that eliminated the Ministry of Agriculture's role in distributing fertilizer in favor of more efficient fertilizer marketing by private or parastatal companies.

Removed subsidies for the manufacture and marketing of small farm implements to allow free market forces to regulate supply and demand of these implements.

Repaired and rehabilitated irrigation canals serving 44,000 hectares of farmland.

Repaired 900 kilometers of roads and initiated a system of defining priorities for road rehabilitation in order to use resources more efficiently.

Sri Lanka

Goal

Develop a national strategy to improve agricultural production, food availability, nutritional status, and resource allocation and utilization. Measures contributing to development of this strategy include:

- 1) Improved agricultural data collection and analyses,
- 2) Study of agricultural policies and marketing systems in dryland areas,
- 3) Agricultural research, and
- 4) Resource management.

Progress

Improved data on agricultural production through better coordination among the three institutions responsible for data collection (Department of Census and Statistics, Department of Agriculture and Central Bank).

Reorganized and expanded a market research unit to improve information services to producers, consumers, and traders, thereby reducing the need for government intervention.

Carried out special studies on such topics as "Agricultural Production Alternatives Under Rainfed Conditions," "Subsidiary Food Crop Marketing," and "The Rural Credit System in Sri Lanka."

Conducted research to develop crop varieties and innovative farming systems in dryland areas.

Examined technological and socioeconomic constraints to dryland agricultural production.

Carried out research and related activities to improve foodgrain, legume, and root and tuber crop production and marketing.

Improved irrigation and water management, agricultural extension and research, storage facilities, and reforestation/conservation with local currency proceeds from grain sales.

Use and Administration of Title I Foreign Currencies

Many sales agreements signed before 1972 allowed the importing country to pay for title I commodities in local currency rather than dollars. Revision of Public Law 480 in 1966 required that a phaseout of local currency sales agreements be completed by Dec. 31, 1971. After that date, no new local currency sales agreements were signed, although the financing of previously signed agreements continued until fiscal year 1974. Foreign currencies received under the title I program still remain the largest single source of currencies available to the U.S. Government without being purchased commercially for dollars. The loss in currency deposits from new local currency sales agreements has been partially offset by receipts from the second source of Public Law 480 local currencies: principal and interest payments of local currency loans to private enterprises and on economic development loans made with local currencies originally generated under earlier title I agreements.

After Dec. 31, 1971, the United States only entered into dollar credit sales agreements or convertible local currency credit sales agreements under title I. Under dollar credit sales agreements, the United States is paid in dollar installments over an extended period. Under convertible local currency sales agreements, installments may be paid in local currency at the option of the United States. However, this option has never been used.

Currency Use Payment

The 1968 and 1977 amendments to Public Law 480 provided that, except where the President determines that it would be inconsistent with the objectives of the Act, he shall determine the amount of local currencies needed for use specified in sections 104(a), (b), (e), and (h), and in title III. A local currency payment under this arrangement has come to be known as a currency use payment (CUP). The CUP may be considered as an advance payment of the earliest installment of principal and interest.

Commodity Credit Corporation

Foreign currencies resulting from repayments of local currency loans made under earlier agreements are generally available to U.S. Government agencies only when their use is charged to regular agency appropriations. These currencies are used for the payment of U.S. Government obligations overseas and for accommodation exchange sales for dollars to U.S. Government personnel. The dollars received from the agencies are credited to the Commodity Credit Corporation.

Excess Currencies In several countries, the Secretary of the Treasury has determined that the supply of U.S.-owned currencies from Public Law 480 and other sources is still in excess of requirements. In such countries, U.S. use proceeds are available under both regular appropriations and appropriations for Special Foreign Currency Programs, for purposes authorized by sections 104(a) and (b) of Public Law 480 and by other legislation. In addition, under section 104(j), currencies can be sold to U.S. citizens for travel or other purposes with dollar receipts going to the Commodity Credit Corporation.

Allocations Agencies desiring to use currencies for special foreign currency programs include estimates in their budget submissions to the Office of Management and Budget. Budget recommendations are then presented to the Congress for appropriation. Upon completion of congressional action, each agency informs the Treasury Department of the foreign currencies it plans to use under these appropriations. The Treasury Department provides the available foreign currencies when needed; the agency's appropriation is charged with the dollar value and the dollar proceeds of the transaction are credited to the Commodity Credit Corporation. In all cases, agencies must await the reservation of currencies for their accounts by the Treasury Department before incurring actual obligations. Table 14 shows agencies responsible for each foreign currency use program.

Excess currencies are used for other purposes set forth in section 104 under the terms and conditions of the final provisions of that section. Excess currencies are transferred to appropriate accounts through an allocation by the Director of the Office of Management and Budget, made at the request of a Government agency. The following text describes the allocations for fiscal year 1982.

U.S. Department
Of Agriculture

Agricultural Research. Under section 104(b)(3), the U.S. Department of Agriculture (USDA) made 17 research grants during fiscal year 1983 totaling \$2,993,043. These funds were used for research projects in India and Pakistan and covered the research areas of plant science, entomology, veterinary science, soil and water research, agricultural economics, and forestry research.

The following selected activities took place in fiscal year 1983 under the Agricultural Trade Development and Assistance Act of 1954, as amended. Specific examples of research accomplished in agricultural research projects are:

An Indian Special Foreign Currency (SFC) research project was conducted on the Southern Corn Leaf Blight. The fungus causing this blight exists in several different strains and species throughout the world. Indian scientists studied those which occur in their part of the world and tested them for virulence on U.S. corn varieties sent to India. From this work, fungus strains were identified that are capable of causing corn diseases in the United States. These strains might enter the United States inadvertently, or they might appear here as a result of natural mutations in the native fungus types. Using this information, U.S. corn breeders now are broadening the genetic base for leaf blight resistance in the new corns they are developing, and thus can prevent or delay disease outbreaks similar to that of 1970. This work was more safely done in India than in the United States in that the fungus strains could be tested for virulence without the potential hazard associated with importing them into U.S. greenhouses for such tests.

A Pakistan project resulted in the development and cataloging of the taxonomic keys to the economically important insect pests of rice in Pakistan. If any of these insect species were introduced into the United States, the keys and the biological information collected in this project would aid in their identification and determine their possible range within the United States.

Aquatic weeds in drainage ditches, irrigation canals, navigable waterways, and recreational area create costly hazards and are difficult to control. Pakistani investigators found two species of weevil which attack waterhyacinth. This research has resulted in introduction and establishment of these weevils in the United States where they are effectively reducing waterhyacinth infestations of U.S. waterways.

An SFC research project in Egypt on bovine skin disease has developed diagnostic criteria and treatment regimens to combat infections of C. ovis in buffalo, sheep, and goats. Uses of these systems are important to the control of this disease in the Middle East. Differentiation of biotypes of C. ovis and the diseases they produce enhances understanding of this bacterium, particularly with regard to chronic disease in sheep in the United States.

Effective methods of control were developed by Egyptian scientists for the cyst nematode, including cultural, chemical, and integrated pest management methods. Commercially important crops were screened for resistance to crop specific nematodes. Information on the pathogenicity and reproduction rate of the corn cyst nematode was of immediate value to U.S. agriculture when this root worm was first found in Maryland corn fields late in 1980. In further efforts to attack the problem, USDA

has requested research institutes in India to develop methods to monitor this nematode in fields to estimate crop damage and investigate chemical treatments and cultural practices for control or eradication.

Trees and woody plants are needed in the semiarid regions of the United States to reduce wind erosion, provide needed shade and protection for animals, and provide fuel wood. For similar reasons, woody plants are needed in North Africa, but such plant material is now limited. In a cooperative research effort with forest scientists in Egypt, a number of forest trees species and their seed sources were tested for their ability to survive and grow under arid conditions. Selected seed sources for Eucalyptus species were found to grow well under Egyptian conditions. These results suggest that selected species of Eucalyptus should be further tested under U.S. environmental conditions.

An SFC project in Egypt has resulted in the development of a large-scale Mediterranean fruit fly eradication project in Egypt, which will pay dividends in technology transfer to the United States on bulk handling, distribution, quality control, trapping, chemical and biological control, and marking and population estimation. This technology transfer will aid the eradication of the Mediterranean fruit fly in the arid areas of California. The physical and climatic characteristics of the arid western desert of Egypt and its influence on the Mediterranean fruit fly were defined. This information is useful for combating Mediterranean fruit fly infestations in the arid areas of Hawaii, California, Arizona, and Mexico.

Foreign Market Development. In fiscal year 1983, market development expenditures totaled an estimated \$90.4 million, of which the Government's share was less than a third (\$24.2 million); the remaining \$66.2 million was provided by U.S. and third party cooperators.

In 1954, the Foreign Agricultural Service (FAS) was authorized to begin using foreign currencies generated by the Public Law 480 programs to finance overseas market promotion activities for U.S. farm commodities. Since that time, FAS has spent about \$311 million to finance the foreign market development program. U.S. farm exports have increased from \$3.1 billion in fiscal year 1955 to almost \$35 billion in fiscal year 1983.

The program is jointly sponsored with nonprofit private trade and producer associations in this country (U.S. cooperators) and private organizations in foreign countries (third party cooperators) who have contributed an estimated \$566 million to more than match the \$311 million contributed by FAS. The trend over the past 16 years, in fact, has been for cooperator contributions to exceed Government outlays by successively larger percentages.

Some FAS market development activities in fiscal year 1983 are as follows:

Participated in long-term projects with 50 cooperators, four State organizations (covering 46 States), and the National Association of State Departments of Agriculture to conduct approximately 2,700 individual activities in almost 125 foreign countries.

Worked with 28 industry firms on a contractual basis to promote brand name food items under the export incentive program (EIP);

Assisted in the support of 59 permanently staffed cooperator offices overseas;

Sponsored 104 market development activities in 47 countries overseas under its country project statements (CPS);

Distributed two monthly computerized trade listings (AIMS and CONTACTS) designed to help U.S. food firms locate overseas buyers; and,

Opened one new Agricultural Trade Office in Saudi Arabia.

Utilization Research and Agricultural Marketing. Under section 104(b)(1), the Department of Agriculture made one utilization research grant and one agricultural marketing during fiscal year 1983, totaling \$94,173. Since June 1958, grants made for utilization research have totaled 365 with a value of \$21,559,396. However, between May 1960, when the first market development grant was issued, through June 1983, 109 grants have been made in this field for a total of \$7,208,935 dollar equivalent.

Specific examples of research accomplished in Utilization Research and Agricultural Marketing are:

A recently completed SFC project in India has revealed a number of uninvestigated seed oils that are unusual in some respect. Some of the seed oils the Indian scientist term as "minor" have unusually high proportions of one or more of the common fatty acids (palmitic, oleic, linoleic, or linolenic) and consequently may be considered potential crop sources of these acids. Since castor oil is an industrial oil of major importance, and new crop sources of the oil are needed, these discoveries are a potential aid to agriculture in the United States and elsewhere. Likewise, discovery of new seed oils rich in epoxy acids has potential for giving U.S. agriculture a new crop that is profitable and energy-conserving. The Vernonia species newly examined in this program provide additional germplasm for plant breeding work aimed at establishing a high-epoxy oilseed crop.

Under a recently completed SFC project in Pakistan, a number of native seedlings of different species of stone fruits exhibiting vigor and freedom of diseases and pests were identified, collected, and propagated. These selections may serve as source of germplasm in future breeding work for developing improved stone fruit industry. In addition, this research showed that a selection of plum (Taruab local seedlings) was more resistant than two local selections of peach and one selection of apricot to Phytophthora root and crown rot when used as rootstock for apricot, prune, and plum trees in commercial orchards. This plum rootstock may be useful to control and minimize losses due to Phytophthora root and crown rot in the U.S. stone fruit commercial orchards.

U.S. Department
of Commerce

In fiscal year 1983, two Department of Commerce bureaus obligated special foreign currency funds. The National Bureau of Standards (NBS) obligated \$40,000 for research grants in India and the International Trade Administration obligated \$1,100 for a market research study.

The NBS has carried out research in countries in which Special Foreign Currencies were available. Over the years, these countries have included India, Pakistan, Egypt, Israel, Yugoslavia, and Poland. The programs have terminated in all countries except India and Pakistan. NBS maintains programs in these countries and at this time is exerting special effort to expand our activities. For several years prior to fiscal year 1983, NBS did not obtain an appropriation for Special Foreign Currency funds but maintained a low level of activity using funds carried over from previous years. In fiscal year 1983, however, NBS obtained a supplemental appropriation of \$500,000, which became available to use only at the end of the year. In 1983, NBS developed plans and proposals for several projects on the thermodynamic properties of materials, electronic properties, chemical kinetics, and other areas related to ongoing programs in NBS laboratories. NBS also had a number of translations of technical literature from the Russian language into English carried out by the Amerind Publishing Company in New Delhi and made two grants for research projects on semiconductors and thermodynamic properties. Discussions are continuing with Indian authorities on facilitating the Indian Government procedures for review and approval of NBS projects.

During fiscal year 1983, NBS obligated the equivalent of \$40,000 for research grants in India. Since 1974, NBS has obligated approximately \$2,180,000.

The International Trade Administration obligated \$1,100 for a market research study in the area of telecommunications equipment. The purpose of the study was to provide support for a trade mission to be held in fiscal year 1984 and to provide data to the International Market Research Program.

U.S. Department
of Education

The National Institute of Handicapped Research (NIHR) continues to followup on approximately 25 projects in 7 countries. There was one new project approved during fiscal year 1983. The priority areas that have been identified and funded previously and that require a close followup and cooperative research are: cardiovascular disorders; neurological, neuromuscular, and orthopedic conditions; and mental illness, sensory disorders, and cancer.

The amount of foreign currency funds used during fiscal year 1983 totaled approximately \$410,000 (India \$105,182 and Pakistan \$305,632). The cumulative amount obligated from the beginning of the NIHR program was approximately \$50 million in equivalency funds with a total of more than 300 research projects undertaken in 14 countries. (Table 3).

Dollar support has continued with a project in Ljubljana, Yugoslavia, entitled: "To Establish a Comprehensive Rehabilitation Engineering Center with a Core Area of Research in Functional Electrical Simulation to Improve Locomotion and Manipulation in Hemiplegic and Paraplegic Patients." This project was a followup of an earlier project supported under Public Law 480. Approximately 35 American and foreign experts were interchanged during fiscal year 1983.

U.S. Environmental
Protection Agency

The Environmental Protection Agency's (EPA) cooperative research program offers an opportunity for productive joint efforts on environmental issues. During fiscal year 1983, three of EPA's four projects in India were successfully completed. The fourth was given a no-cost extension in order to allow completion of research already underway. A new project proposal with Pakistan began the clearance process within the Agency during fiscal year 1983 and has since been forwarded to Pakistan for the necessary Pakistani Government clearances. EPA looks forward to the continuation of work under this program, which makes visible U.S. efforts toward the enhancement of the global environment and demonstrates our willingness to share expertise and technology through projects that are of mutual benefit to the participants. Table 3 provides expenditure details.

U.S. Department
of Health and
Human Services

Summary. Under provisions of sections 104(b)(2) and 104(b)(3) of Public Law 480, Health and Human Services (HHS) conducts a broad range of cooperative programs abroad. In fiscal year 1983, approximately \$11 million in equivalent foreign currencies was obligated for eight new and seven ongoing projects in two countries. Since the inception of the Special Foreign Currency Program in 1961, HHS and its predecessor, the Department of Health, Education and Welfare, has obligated approximately \$246 million in the foreign currencies of 12 participating countries.

Health Research and Related Activities. In fiscal year 1983, the Public Health Service (PHS) obligated the foreign currency equivalent of over \$1 million for support of eight new projects and continuations of seven ongoing projects in India and Pakistan. Additionally, funds were used to support exchanges of scientists with these countries.

Although Egypt, India, Israel, Poland, Yugoslavia, Tunisia, and Morocco are no longer excess currency countries, there were still approximately 75 active PHS supported projects, which were funded with Public Law 480 funds in these countries. Because the PHS has a no-year appropriation, funds were obligated for the anticipated life of the projects, and the funds remain available until they are expended. Since the beginning of its Special Foreign Currency Program in 1961, the PHS has obligated over \$171 million in equivalent foreign currencies for over 300 projects with the participating countries.

All PHS-supported research projects are collaborative in nature, involving experts from both countries, and are of mutual benefit and interest to both the United States and the host country. Efforts are made to take advantage of research opportunities presented by the high incidence or unusual epidemiological patterns of disease and other health conditions, the presence of specialized research facilities or expertise, unique ecological or anthropological situations, and the like.

In addition to research projects, the program includes workshops and symposia on health science problems, expert consultation between scientists and at health policy levels, scientist exchanges, exchange of scientific specimens and materials, and translations and critical reviews of health science literature.

Food and Drug Administration (FDA). The Food and Drug Administration's activities under the Special Foreign Currency Program include projects in the areas of food research and radiological health in five countries. In Egypt, work continued on a study of toxicants in the food supply due to poisonous weeds. A number of pyrrolizidine alkaloids and other toxins have been identified and investigated for their potential toxic effects. An international workshop and symposium on mycotoxins was held in 1983. This was the second such symposium on this subject held in cooperation with the National Research Center in Cairo. The first symposium, held in 1981, focused on strengthening capabilities in countries to assure food safety. The 1983 symposium focused on research developments and potentials for research on mycotoxins. Representatives from 21 countries participated in this symposium. Work continued on a project with Egypt's National Organization for Drug Control and Research to develop a reference standards service laboratory for substances used in pharmaceutical products.

Social Welfare Research. In fiscal year 1983, the Office of Human Development Services (HDS) had nine active projects in six countries-- Egypt, Israel, Pakistan, Poland, Tunisia, and Yugoslavia. Active studies include a community-based demonstration youth center for delinquent and pre-delinquent youth and a demonstration and evaluation project to improve community living conditions and services affecting elderly residents. Cooperative social welfare projects conducted abroad by HDS are designed to complement the domestic research program. These projects focus on public welfare policy and planning and organization of community services. They also are directed toward the concerns of special groups such as the aging, youth, the family, children, and the disadvantaged. Since the Special Foreign Currency Program began, HDS has financed 97 social welfare projects at a cost of almost \$11 million in equivalent foreign currency.

Health Resources and Services Administration (HRSA). In 1983, work continued on studies of otitis media in rural Egypt. This project will further Egypt's efforts to provide speech and hearing services in comprehensive health services offered to rural areas. The Health Professions Exchange Program with Egypt was continued. Since the beginning of the Program, more than 100 Egyptian health professionals have come to the United States for training through the Project HOPE Exchange Program. Thirteen fellowships have been awarded to deans of Egyptian medical

schools to learn about U.S. medical education practices. A total of 93 U.S. educators in the health sciences visited Egypt from 1975 through 1983 to assist in improving skills and knowledge in medicine, dentistry, nursing, and other health professions. Also in 1983, work continued on projects in Egypt to enhance capabilities for medical equipment maintenance and repair and to transfer technology for the use of ultrasound in research. A significant ongoing project in 1983 was the development, implementation, and evaluation of emergency medical services (EMS) in Egypt. This project has resulted in the development of a comprehensive EMS plan for the establishment of EMS training centers in seven cities. Accomplishments include the training of instructors and over 2,400 students and emergency department nurses in basic life support.

National Institutes of Health (NIH). NIH is the principal health research agency of the PHS. Projects funded through the Special Foreign Currency Program are an integral part of NIH's intramural and extramural research program efforts. The program has two major components: (1) fundamental and clinical research, and (2) translation, documentation, and dissemination of health science information.

During 1983, projects were active in Egypt, India, Poland, and Yugoslavia. Among the active projects in Egypt was a study directed toward prevention of adverse genetic effects on growth and development. The project involves basic research to improve methods of diagnostic technology, such as prenatal screening and early diagnosis of developmental malfunctions. Other active projects with Egypt during 1983 included studies of the venom of poisonous snakes, the ecology of trachoma and other eye infections, carcinoma of the bladder of schistosomiasis victims, and epidemiologic and clinical studies of schistosomiasis.

Active projects in India included studies of filariasis in southern India, the epidemiology and etiology of viral hepatitis and related problems, the development from indigenous plants of therapeutic agents against cancer, oral cancer resulting from the use of tobacco, nutritionally related blindness, reproductive physiology, as well as projects on the frontiers of biomedical research using spectroscopy and molecular biological techniques.

An important development during 1983 was the initiation of the U.S.-India Science and Technology Initiative, an outcome of talks in 1982 between President Reagan and Prime Minister Gandhi. Health areas included under that initiative are infectious and parasitic diseases, including malaria, filarial diseases, tuberculosis and leprosy; prevention of blindness, with special emphasis on cataracts; and immunological approaches to reproduction, both fertility and infertility. PHS participation in this Initiative is supported, in part, through the Special Foreign Currency Program.

National Center for Health Statistics (NCHS). The Center conducts research to improve health data systems and statistical methodologies, as well as research on issues relevant to surveys of health status in the United States. In 1983, NCHS initiated a new collaborative project with the National Institute of Nutrition in Hyderabad, India, to determine whether folic acid could be used to raise hemoglobin levels in a population suffering from iron deficiency anemia and whether those levels could then be maintained through the use of iron-fortified salt. Ongoing projects included two long-term studies of low-birth-weight children in India; a project in Pakistan, carried out in cooperation with the World Health Organization, to develop a model health statistics system; and a project in Egypt to develop a profile of the health status of the Egyptian people.

U.S. Department
of Interior

The Endangered Species Act of 1973 (Public Law 93-205) and the National Historic Preservation Act, as amended, (Public Law 96-515) authorize the Secretary of the Interior to develop and manage programs for the conservation of endangered or threatened species, and to pursue international cooperation in natural and cultural heritage protection. Both acts allow the use of counterpart funds (mainly foreign currencies accruing to the U.S. Government under the Agricultural Trade and Development Assistance Act of 1954, as amended-Public Law 83-480) to provide for such cooperation.

Fish and Wildlife Service. Using this authority, and working in coordination with the U.S. National Park Service, the Fish and Wildlife Service sought and received congressional authorization for programs in Egypt, Pakistan, and India in fiscal years 1977-80. In fiscal year 1982, the Service received additional monies through a transfer from other Department Foreign Currency holdings. The major accomplishments and activities funded under this program during fiscal year 1983 are listed below:

Egypt

Continuation of major contract to develop national conservation strategy.

Library and publication support for various agencies in Egypt.

Orientation training in the United States on wildlife conservation for Embassy support personnel.

Assistance in design of specialized training course in the United States for an Egyptian aquarium manager.

Development of a major training proposal for wildlife managers in the Sinai.

Assistance in production of film on wildlife of the Sinai.

Amount used or obligated (fiscal year 1983)	\$ 57,149
Cumulative amount used or obligated (10/1/77 - 9/30/83)	525,486

Amount authorized:

FY-77	\$231,500;	FY-78	\$181,500;		
FY-79	\$129,600;	FY-80	\$ 70,000;		
FY-81	0;	FY-82	\$113,000	1/	
FY-83	0			TOTAL	\$ 726,000

1/ No congressional authorization, but funds received from redistribution of the U.S. Department of Interior holdings.

India

Continuation of four 5-year contracts on the movement and population structure of Indian avifauna; study, survey, and conservation of threatened and endangered species of flora; development of a hydrobiological research station at Bharatpur; and study of endangered species and their habitats.

Continuation of support of a 10-month survey of status of river turtles in India, many of which are on endangered list.

Support on status survey of lesser cats in northeast India.

Support of project by Ranger Rick's Nature Magazine, which led to a special issue on India and its wildlife.

Support of major international workshop on conservation cranes, which attracted 187 delegates from 24 countries.

Library and publication support for various agencies in India.

Amount used or obligated (fiscal year 1983)	\$ 1,022,657
Cumulative amount used or obligated (10/1/77 - 09/30/83)	2,301,507

Amount authorized:

FY-77	\$243,500;	FY-78	\$202,700;		
FY-79	\$323,000;	FY-80	\$540,000;		
FY-81	\$ 0;	FY-82	\$1,082,254	2/	
FY-83	\$ 0			TOTAL	\$2,391,454

Pakistan

Library and publication support for various agencies in Pakistan.

Amount used or obligated (fiscal year 1983)	\$ 17,606
Cumulative amount used or obligated (10/1/77 - 09/30/83)	42,606

Amount authorized:

FY-77 \$125,000; FY-78 \$100,000;

FY-79 \$100,000; FY-80 \$ 0;

FY-81 \$ 0; FY-82 \$ 0 3/

TOTAL \$210,729

2/ No congressional authorization but funds received from redistribution of the U.S. Department of Interior holdings and from Pakistan authorization.

3/ No congressional authorization but funds redistributed to India program.

National Park Service (NPS). Major accomplishments and activities funded under Public Law 480 program during fiscal year 1983 related solely to cooperative activities with India.

Cooperative Interpretive Planning Project--The NPS fielded a five-member professional team, which joined with counterpart Indian team representatives in the preparation and completion of a detailed planning document to guide the development of interpretive and educational program and facility development for model conservation sites in India. The interpretive planning documents, as a joint effort of U.S. and Indian specialists, were accepted without reservation by the Indian Government and have been the basis for continued cooperative activities.

NPS specialists joined with Indian counterparts and with Indian contract firms in an intensive exercise toward the design of specific interpretive facilities and materials in connection with the two model conservation projects mentioned above. This project provided detailed design and construction specifications according to mutually agreed to standards of quality and format for the subsequent production of these materials. Interaction of NPS and Indian Government representatives in the design of these materials provided valuable training to India in the principles and procedures of the specialized design requirements for park interpretation materials.

The NPS provided initial consultation and two expert advisors to guide the selection of production processes for interpretive materials at the two model sites and for prototype installation stage of production guidance and training.

Staff training--The NPS provided over seven man-months of technical training to Indian personnel through onsite incountry consultancies and through U.S.-based training of Indian park and conservation representatives.

The NPS joined with the Fish and Wildlife Service in an initial survey and development of recommendations for the incorporation of interpretive and educational curricula

into the technical training outlines of the newly established Wildlife Institute of India. The NPS continues its role of visible involvement in assistance to the Institute, including provision of expert lecturers, recommendations regarding curricula development, and U.S. and India-based training for instructors and students in connection with the Institute's establishment and development.

U.S. Department
Labor

The Bureau of International Labor Affairs uses Special of Foreign Currencies under Public Law 480-title I, in New Delhi, India, to facilitate conferences and consultations among U.S. labor attaches, labor reporting officers, and the office of the Departments of State and Labc

FY 83 Authorized amount	\$67,000
FY 83 Obligations	67,502 <u>1/</u>

1/ Includes FY 1982 carryover of unobligated funds.

Library of
Congress

Section 104(b)(5) authorizes the Library of Congress to purchase, index, and disseminate current foreign books, journals, and newspapers from foreign countries where excess currencies are available for such purposes. In fiscal year 1983, 521,203 pieces were acquired from Burma, India, and Pakistan for the Library of Congress collections and those of other major research libraries in the United States. The collective total of pieces acquired since 1962 is 23,812,150.

Since 1962, the Library has also administered programs in Egypt, Indonesia, Israel, Nepal, Poland, Sri Lanka, and Yugoslavia, but as a result of the removal of these countries from the excess currency list, it now operates Public Law 480 programs only in Burma and Pakistan. The Library of Congress has used special foreign currencies other than those of Public Law 480 for its program in India since 1974.

Library of Congress Public Law 480 Activities, 1983
Statistical Summary

- I. Foreign currency funds spent or firmly obligated in fiscal year 1983.....\$3,158,200
- II. Total amount used or obligated, fiscal years 1962-83.....\$33,980,700
- III. Total amount authorized, fiscal years 1962-83..... \$35,367,200

Overseas Private
Investment
Corporation

Cooley Loans. Pursuant to a redelegation of authority from the Agency for International Development (AID), Overseas Private Investment Corporation (OPIC) makes local currency loans to private enterprise under section 104(e) of the Agricultural Trade Development and Assistance Act of 1954, as amended. These loans are commonly referred to as "Cooley Loans."

In fiscal year 1983, OPIC's finance department attained its legally authorized financing limit of \$110 million for direct loan and investment guaranty commitments, and placed \$7.3 million in local currency loans.

1/ Includes fiscal year 1982 carryover of unobligated funds.

Pakistan- Allied Tractors Limited- Financed in part by an OPIC loan guaranty and a local currency loan totaling \$5.75 million, this project entails construction and operation of a plant in Baluchistan to manufacture Ford agricultural tractors. Ford Motor Company is an equity and technical partner in the project, which will be the only U.S. tractor manufacturing facility in Pakistan.

Pakistan - Squibb Pakistan Limited. A \$3.3-million local currency loan will enable this company to construct a facility for formulating, producing, and packaging pharmaceutical products. The project will provide employment for some 200 Pakistanis, generate tax revenues, and reduce the country's dependence on imported pharmaceutical supplies.

National Science
Foundation

During fiscal year 1983, the National Science Foundation (NSF) awarded \$2,900,000 in foreign currency grants to U.S. and foreign scientific institutions for the support of mutually beneficial cooperative research projects. The work, performed in India, Pakistan, and Egypt, is in fields such as geology, chemistry, engineering, physics, and the life and social sciences. In addition, the Foundation continued to obtain information on foreign research and development through its support of book and journal article translations in the same three excess foreign currency countries.

Smithsonian
Institution

Museum Programs and Related Research. The Smithsonian Institution's Special Foreign Currency Program, which began under the authority of section 104(b)(3) in fiscal year 1966, awards grants to American institutions of higher learning to support basic research in the natural sciences, cultural history, museum professional fields, and related educational activities. This program received appropriations equivalent of \$2,000,000 in excess foreign currencies for fiscal year 1983.

Obligations for the year were the equivalent of \$2,341,000 and supported over 70 projects in these fields. The funds included re-obligations of recoveries from previous years' obligations.

Of total obligations, the following foreign currency equivalents were spent: \$1,479,000-archeology, anthropology, and related disciplines; \$412,000-systematic and environmental biology; \$91,000-astrophysics and earth sciences; and \$187,000-museum programs.

Cumulative Obligations. Since the inception of the program in fiscal year 1966, the Smithsonian's foreign currency program has used the equivalent of \$53,603,000 in appropriated funds in support of over 800 projects. Not included in this project count are more than 6,450 research fellowships supported since program inception.

Department
of State

Buildings for U.S. Government. Under the authority of section 104(b)(4), the Department of State acquires land and buildings and constructs buildings and other facilities for use in conducting diplomatic and consular affairs and related U.S. Government activities. The Department also uses funds appropriated under this authority to maintain and operate these facilities.

Obligations for these purposes during fiscal year 1983 totaled \$7.9 million.

Appropriations for the buildings program, which are used to purchase from the U.S. Treasury foreign currencies accruing under title I, total \$175.2 million for fiscal years 1961 through 1983. Currencies are available for this program only in countries where there is a supply in excess of normal U.S. Government requirements for 2 or more years. This program is currently active in Burma, Guinea, India, and Pakistan.

Funds from this source have paid the operations and maintenance costs and the major portion of the costs of sites and buildings. Total expenditures for the building program since its inception are \$160.3 million. This includes the following: Construction of office and warehouse buildings in Athens, Brasilia, Colombo, Karachi, Madras, New Delhi, Tel Aviv, Warsaw, office building annex and warehouse in Rabat, office building in Casablanca, four residences in New Delhi, 76 staff apartments and an embassy residence in Cairo and a new office building in Cairo; rehabilitation of the New Delhi office building, the Consul General's residence in Karachi, and the Cairo compounds; and reconstruction of the Islamabad office building compound. Current projects include: acquisition of site and design of 14 staff residences in New Delhi, design and construction of an office building in Lahore, design and construction of six residences in Karachi, and compound rehabilitation in Islamabad. Funds were also employed in the rehabilitation of office buildings in Alexandria, Bombay, New Delhi, and Port Said. In addition to these construction projects, a large number of sites, residences, and buildings have been purchased in Belgrade, Cairo, Calcutta, Colombo, Dacca, Hyderabad, Islamabad, Jerusalem, Kathmandu, Karachi, Kinshasa, Lahore, Lucknow, Madras, New Delhi, Rabat, Islamabad, Tunis, Warsaw, and Zagreb.

Title II Foreign Donations

Summary

During fiscal year 1983, 1.93 million tons of title II commodities were shipped to about 62 million needy people in 72 countries. The Commodity Credit Corporation (CCC) valued these commodities at \$397.7 million -- freight costs for the transport of these commodities amounted to \$167.3 million. Food commodities distributed through the voluntary agencies amounted to \$213.4 million, over 53.7 percent of the total commodity value.

Wheat and wheat products, including flour, continued to be the major commodities donated through title II in fiscal year 1983. Feed grains and feed grain products, rice, vegetable oil, and nonfat dry milk also were donated.

In terms of both value and volume, shipments to Asia were larger than to any other geographic area--approximately 61 percent of the total tonnage. This results primarily from significant contributions by the U.S. Government to Afghan refugees in Pakistan through the International Emergency Food Reserve (IEFR). Shipments to the Pakistan program totaled over 300,000 tons in fiscal year 1983.

Operations

The title II food donations program aims to alleviate hunger and malnutrition of people in the poorest countries of the world. Women, infants, preschool children in maternal child care and day-care centers, older children in school feeding programs, and adults in food for work projects are priority recipients of title II food aid. Administered jointly by the Department of Agriculture and the Agency for International Development, title II activities are carried out by the following:

1) Nonprofit U.S. Voluntary Agencies

- Catholic Relief Services (CRS)
- Cooperative for American Relief Everywhere (CARE)
- Church World Service (CWS)
- American Joint Distribution Committee (AJDC)
- Seventh Day Adventist World Service (SAWS)
- Cooperative League for the United States of America (CLUSA)

2) Intergovernmental Organizations

- World Food Program (WFP)
- United Nations International Children's Emergency Fund (UNICEF)

3) Recipient Governments

Distribution

Of 1.9 million tons of commodities supplied, voluntary agencies were responsible for distributing 44.1 percent, World Food Program 39.5 percent, and government-to-government programs, 16.4 percent. Nearly \$139 million in commodities were channeled into emergency programs worldwide.

Maximizing
Development
Potential

All agencies involved in title II program activities have shown increased concern and interest in fiscal year 1983 to maximize the developmental potential of title II programs. Integrating title II with title I and III programs and other AID resources, and using more indigenous materials and administrative resources could significantly enhance the self-sufficiency of title II recipient countries.

Voluntary
Agency
Programs

The bulk of title II assistance continues to be provided through the private voluntary agencies. CARE and CRS are the major agencies involved in the title II program. Maternal child feeding activities are the single most important activity supported by the voluntary agencies, followed by food for work and school feeding activity. The voluntary agencies are also responsive to emergency needs, both in assisting after disasters and in helping refugees. Major commodities distributed by the voluntary agencies include bulgur, wheat, corn soy milk, vegetable oil, and nonfat dry milk.

World Food
Program

While CARE and CRS are the two major voluntary agencies using title II resources, the World Food Program is the major organization within the international community responding to world food needs.

The World Food Program is jointly sponsored by the United Nations/Food and Agriculture Organization headquartered in Rome. WFP's pledge target for the current biennium (1983 and 1984) is \$1.2 billion. Under Public Law 480 title II, the United States pledged \$200 million for calendar years 1983 and 1984 (\$155 million in commodities, \$45 million for ocean transportation). The United States also pledged an additional \$50 million under the administrative authority of section 416 of the Agricultural Act of 1949.

WFP's activities extend from development oriented programs to significant emergency assistance through the International Emergency Food Reserve (IEFR), which has a 500,000-ton calendar year target. In fiscal year 1983, the United States contributed \$137.1 million in commodities and \$35.7 million for ocean transportation to the WFP pledge and IEFR activities. Of the total U.S. contribution through the World Food Program, 364,059 tons of food valued at \$61.4 million were distributed through the IEFR. Commitments supported refugee and disaster programs in Kampuchea, Pakistan, Nepal, El Salvador, Honduras, Chad, and Somalia.

Food Aid
Convention

The Food Aid Convention (FAC) of 1980 was extended through June 1986. The objective of the Convention is to improve world food security by assuring a minimum of 10 million tons of cereals aid annually to developing countries, a target first established by the World Food Conference of 1974. Signatories are obligated to pledge minimum annual amounts of cereals aid in wheat or its equivalent suitable for human consumption.

Twenty countries are members of the new FAC with total pledges of 7.6 million tons. The United States is the largest donor with a pledge of 4.47 million tons. All of the U.S. obligation is met by Public Law 480 shipments. Efforts continue to encourage the participation of other potential donors in order to reach the 10-million-ton target.

The donor members of the 1980 Food Aid Convention with their minimum annual contributions are as follows in tons: Argentina (35,000); Australia (400,000); Austria (20,000); Canada (600,000); European Economic Community (1,650,000); Finland (20,000); Japan (300,000); Norway (30,000); Spain (20,000); Sweden (40,000); Switzerland (27,000); and the United States (4,470,000). The total amount equaled 7,612,000 tons.

Title III - Food for Development

Goal	<p>The International Development and Food Assistance Act of 1977 added provisions to title III of Public Law 480, establishing a food for development program. Its overall goal is "to increase the access of the poor in the recipient country to a growing and improving food supply through activities designed to improve the production, protection, and utilization of food, and to increase the well-being of the poor in the rural sector of the recipient country."</p>
Two Special Provisions	<p>Title III offers recipient countries two special provisions.</p> <p>The first stipulates that the funds generated through the local sale of Public Law 480 title I commodities be used to support programs of agricultural development, rural development, nutrition, health services, or population planning. The title I repayment obligation to the Commodity Credit Corporation is forgiven if it is determined that the local currencies or the commodities themselves have been used in support of those programs.</p> <p>The second special provision offers multiyear commitments of up to 5 years, provided commodities are available for programming through Public Law 480 and the recipient country has made progress under the agreed-upon development plan.</p>
Requirements	<p>The legislation requires that of the annual aggregate value of title I agreements, not less than 15 percent is to be under title III in fiscal year 1980, and each fiscal year thereafter. However, the President may waive the minimum requirement if he determines that there are an insufficient number of projects which qualify for this assistance and the reasons for the waiver are reported to Congress. To qualify for assistance under the title III program, a country must:</p> <ul style="list-style-type: none">Demonstrate a need for external resources to improve its food production, marketing, distribution, and storage systems;Meet the eligibility criteria of the International Development Association for development loans;Have the ability to use the resources made available through the sale of food commodities; andUndertake self-help measures to expand and improve food production, storage, transport, and distribution of agricultural commodities.

Bellmon Amendment As in the case for title I, no commodity will be shipped unless at the time of exportation adequate storage facilities are available to prevent spoilage and waste, and the commodities will not create a significant disincentive to domestic production in the recipient country.

Agreements During fiscal year 1983, the objectives were of the title III, Food for Development Program, met through the signing of agreements with Bangladesh (\$60 million), Bolivia (\$32.4 million), Honduras (\$5 million), Egypt (\$15 million), Senegal (\$7 million), and Sudan (\$20 million). The total value of these agreements (\$139 million) accounted for 17 percent of the annual aggregate program value of title I agreements.

Highlights Food for Development programs are to complement and not to replace assistance from other sources. Program highlights in various countries follow:

Bangladesh Goals

- Maintain incentive prices for farmers and reduce food subsidies to consumers.
- Moderate price increases by means of an Open Market Sales Program.
- Maintain food security through improved reserve management.
- Improve policy planning.
- Increase agricultural production.
- Encourage private sector activity to stimulate overall economic development.

Commodities Used

In fiscal year 1983 5,000 metric tons of wheat, 55,000 metric tons of rice, 30,000 metric tons of soybean oil and 28,300 bales of cotton with a total export value of \$64.0 million were furnished under the title III program.

Progress

- Increased commodity procurement prices and announced these prices prior to planting seasons as an incentive to farmers to increase production.
- Maintained ration prices at or above procurement prices, thus reducing the food subsidy to consumers.
- Assured sufficient stocks to support the Open Market Sales Program, thereby halting an increase in foodgrain prices even though drought limited aman (rice) production.

Gained widespread Government acceptance of the Open Market Sales Program as a major mechanism to moderate price increases.

Established a special planning organization, the Food Planning and Monitoring Secretariat (FPMS), which prepared working papers and monthly food situation reports for food policy decisionmakers in the Bangladesh Government.

Completed special studies on food stock management, and food budget and accounting procedures.

Added about 380,000 acres to year-round cultivation through funding of projects to develop tubewell irrigation.

Removed government restrictions on development of the private textile industry, divested major portions of government-owned textile facilities, and denationalized certain soybean oil refineries.

Bolivia

Goal

To increase agricultural production and productivity levels.

Commodity Use

A total of \$92.5 million has been allocated to the Bolivian Food for Development Program for fiscal years 1978-84. In fiscal year 1983, the title III agreement provided US\$10.0 million for the purchase of 60,000 tons of U.S. wheat.

Progress

A summary of the activities planned for the life of the program and broken down by sector support for the title III currencies follows:

<u>Subprojects Titles</u>	<u>Life of Project (\$)</u>
Promotion of National Wheat Production	4,737
Development of Integral Cooperatives	5,200
Access roads and Transportation Infra- structure	4,731
Reorganization of the Ministry of Campesino Affairs and Agriculture	1,500

Pesticide Control and Plant Quarantine Program	1,150
Departmental Development Corporations - Rural Development Projects	18,000
Community Conservation Projects	1,400
Small Irrigation Systems	4,406
Expanded Small Farmer Credit Program	17,000
Campesino Scholarship Fund	2,500
Rural Development Studies	450
Communicable Disease Control	9,519
Health Projects	1,600
Policy Analysis Project	600
Secretariat for Develop- ment of the Bolivian Tropics	1,000
Institutional Support for Producers' Association	500
Administration of the Program	2,000
Adjustment for Devaluations ^{1/}	<u>15,544</u>
Total	92,500

^{1/} Represents loss in dollar value of pesos in the special account since the peso started devaluing in January 1982. Amount fluctuates with exchange rate; if current trend continues, the total devaluation loss will be less. The devaluation adjustment does not affect either calculation of currency use offset during the course of the agreement or full offset after successful completion of the program.

Egypt

Goals

Support the Government of Egypt's decentralization policy by enhancing the self-reliance of rural Egyptians.

Upgrade Egypt's rural infrastructure.

Progress

Initiated the 5-year Basic Village Services Program under a title III agreement signed March 20, 1979.

Improved the capacity of local government units to plan, finance, and manage rural infrastructure projects.

Implemented 1,000 projects in 14 Egyptian governorates to construct, repair, and expand:

1. Potable water systems,
2. rural roads,
3. drainage and sewage facilities,
4. irrigation canals, and
5. wells for irrigation and potable water.

Because of the success of this program, supplemented the program with a grant from the U.S. Agency for International Development (A.I.D.), totaling \$98 million in fiscal year 1983 alone.

Honduras

Goal

To increase agricultural production.

Commodity Use

A total of \$15 million has been allocated to the Honduran Food for Development Program for fiscal years 1982-84. In fiscal year 1983, the title III agreement provided \$5 million for the purchase of 34,000 tons of U.S. wheat.

Progress

A summary of the activities being supported by the title III local currencies follows:

Administrative Strengthening of Public Agricultural Institutions. This activity will receive the equivalent of \$1.5 million in local currencies during the 3-year life of the program.

Diversified Crop Marketing. This component of the title III program will receive \$4.75 million. Funds will be used to increase research in nontraditional crops, carry out marketing feasibility studies, provide technical assistance to small-scale procedures and marketing entities, promote domestic and foreign investment, and provide working capital to marketing activities.

Development of Regional Agricultural Cooperatives. Over the life of the program, this activity will receive the equivalent of \$3.75 million. The title III program will help to reorient these existing cooperatives to improve administrative capability so that they can better deliver resources in a cost effective manner.

Small Farmer Water Resources Activity. This activity will receive \$3.75 million over the life of the title III program and is intended to rationalize the development of Honduras' potential for irrigation and drainage.

Farmer Training. This project will receive the equivalent of \$1 million.

Program Monitoring and Evaluation. Through this activity, \$500,000 will be provided to assure success of the Food for Development Program and to finance the offices created under the Program.

Goal

To enhance agriculture's contribution to economic development.

Commodity Use

A total of \$100.0 million has been allocated to Sudan's Food Development Program for fiscal years 1980-84. In fiscal year 1983, the title III agreement provided \$20.0 million for the purchase of 107,000 tons of wheat and 20,000 tons of wheat flour.

Western Sudan Agricultural Research Project supports an applied agricultural research program for Western Sudan. The major research facilities at Kadugli have been completed including offices, field laboratories, farm buildings, 29 staff houses and fencing. Construction of similar facilities in three other Western provinces is under way.

Railway Rehabilitation Project focuses on improvement and expansion of railroad capacity in the southwestern regions of Sudan in order to ease construction to agricultural marketing. New railroad ties have been laid and communication lines installed.

Rural Health Support Project will improve the capability of the Ministry of Health to deliver primary health care to Sudan's rural population, with special emphasis on management and maternal and child health. The project supports building an infrastructure for improved management, planning, and budgeting at the regional level via special analysis and training.

Regional Finance and Planning Project will increase the capacity of the Kordofan and southern regions to fund their own activities and promote decentralization of government and services. Title III local currencies have supported training in finance, budgeting, and planning; sponsored research on finance and revenue issues; and supported a regional model project fund.

River Transport will help to increase the operating efficiency of freight transport to southern Sudan by improving the linkage between rail and river transport in the region. Title III currencies have purchased four cranes and constructed two warehouses. Future activities include rehabilitation of docks and quays, additional warehouse construction, procurement and installation of channel and distance markers, and dredging of the channel between Juba and Mongalla.

Agricultural Planning and Statistics Project supports policy analysis and reform measures to improve the structure of incentives in the agricultural sector. Some of the studies being funded are:

1. The impact of alternative effective exchange rates for selected commodity exports;
2. Analysis of marketing margins and constraints for major commodities;
3. Sudan's present and projected competitiveness in major oilseeds, sorghum, livestock, and gum arabic export markets.

Blue Nile Integrated Agricultural Development Projects will develop an integrated delivery system for farmers and herders. Local currency support is targeted to small interventions such as beekeeping, animal traction, co-op support, well drilling, veterinary services, and metal workshops.

Southern Region Agricultural Development Project is aimed at relieving key policy, production, marketing, and institutional constraints to private sector agricultural production, processing, and marketing in the south. Project houses and office complex improvement in Juba are underway.

Rural Renewable Energy Project will develop an applied research and dissemination capacity in rural renewable energy technology. Subprojects on training and charcoal stoves have been implemented; others are under study.

Agricultural Production and Marketing Project, still being designed, will address the issue of technology transfer and other production and marketing constraints affecting farmers in the rainfed sector.

- = N/A
- 1/ Fiscal years 1955-7b end June 30, subsequent years end September 30.
- 2/ Estimated export market value.
- 3/ Exports after December 31, 1962 under barter contracts which result in balance of payments benefit, and rely primarily on authority other than Public Law 480, are shown in column headed "Outside Specified Government Programs."
- 4/ Represents disbursements which may vary from period when commodities were shipped.
- 5/ Less than \$50,000.
- 6/ The difference between total exports as reported by Bureau of Census and Government Programs.
- 7/ Some totals may differ from those in Table 1 because this table includes some unrevised data.
- 8/ Under foreign currency and long-term dollar credit agreements, raw cotton was exported to third countries for processing. In exchange, processed goods were exported to agreement countries. Exports of cotton under these triangle arrangements were included in exports to the agreement country and excluded from exports to processing countries.
- 9/ Malta, Gozo, Cyprus, 1955-62.
- 10/ Included in Italy 1966-74.
- 11/ The excess of the government programs over total agricultural exports may be attributed to lags in reporting or to differences in classifications procedures.
- 12/ Included in Arabia Pen. States, n.e.c., 1955-72.
- 13/ Included in Pakistan 1955-72.
- 14/ Vietnam, Laos, Cambodia 1955-58, separately classified 1959-7b, formerly Cambodia.
- 15/ Vietnam 1978-80.
- 16/ British Malaya 1955-58, Federation of Malaya 1964-66.
- 17/ Included in Japan beginning 1973.
- 18/ Spanish Africa, n.e.c. 1955-71.
- 19/ French West Africa 1955-60, Western Africa, n.e.c. 1961-64.
- 20/ French West Africa 1955-60, Western Africa, n.e.c. 1961-71.
- 21/ British West Africa 1955-64.
- 22/ Western Equatorial Africa 1955-64.
- 23/ Western Equatorial Africa 1955-64, Western Africa, n.e.c. 1965-71.
- 24/ Zaire 1955-64, Burundi-Rwanda 1965-71.
- 25/ British East Africa 1955-64.
- 26/ Included in Madagascar 1955-71.
- 27/ Republic of South Africa 1955-67, Southern Africa, n.e.c. 1968-71.
- 28/ Rhodesia-Nyasaland 1955-63.
- 29/ Includes Canal Zone for Fiscal Years 1981-83.

- = not applicable.

1/ Preliminary.

2/ Less than \$50,000

3/ Represents the difference between total exports reported by the Bureau of Census and concessional/Government financed programs as reported by various operating agencies. Negative values in the "Commercial" column indicate excess of Government programs over total exports attributed to reporting lags or classification difference.

- = N/A

1/ Data applicable to the transition quarter July 1, 1976 through September 30, 1976 bridging change of fiscal year ending from June 30 to September 30 and each year thereafter.

2/ Gross cost to CCC of financing sales of U.S. agricultural commodities for foreign currency. Includes commodity and other costs, ocean transportation costs, and interest costs.

3/ Gross cost to CCC of financing long-term dollar credit sales of U.S. agricultural commodities. Includes commodity and other costs, ocean transportation costs, and interest costs. The export value of commodities financed and ocean transportation costs (except ocean freight differential) are repayable by the importing country or private trade entity. However the International Development and Food Assistance Act of 1977 amended Public Law 83-480 to (a) provide for the waiver of repayment of the cost of processing and enrichment of blended foods and (b) permit the proceeds from local sale of Public Law 83-480 commodities, when used for approved programs, to be applied against the repayment obligation of the importing country.

4/ CCC's value of commodities made available for donation abroad under Title II of Public Law 83-480, ocean transportation costs for such donations and foreign currency for use in self-help activities. Also includes gross cost of foreign donations through nonprofit voluntary agencies beginning January 1, 1967.

5/ CCC's acquisition cost value, plus the cost of any processing and packaging performed after acquisition, for commodities donated through nonprofit voluntary agencies under authority in Section 416, Agricultural Act of 1949. This authority was repealed by the Food for Peace Act of 1966, Public Law 89-808, and such donations consolidated into new Title II of such Act, effective January 1, 1967.

6/ Value at which barter materials were transferred to the supplemental stockpile.

- = N/A

1/ Fiscal years 1954-76 end June 30, subsequent fiscal years end September 30.

2/ Excludes exports after December 31, 1962 made under barter contracts which result in balance-of-payments benefits and rely primarily on authority other than Public Law 480.

3/ Some totals may differ from those in Table 1 & 5 because this table includes some unrevised data.

(By Country of Destination in Thousands)

1/ Quantities shown reflect a combination of quantities shipped under agreements for which all activity is complete, plus quantities programed in signed agreements for which activity is not complete.

2/ See table below: Thousands Bushels

Corn.....	566,277
Barley.....	162,345
Sorghums.....	347,383
Oats.....	6,814
Rye.....	4,736
Mixed livestock feeds.	67
Total.....	<u>1,087,622</u>

3/ See table below:

Thousands Pounds

Soybean oil.....	11,482,742
Cottonseed oil.....	1,953,051
Tallow.....	2,091,240
Lard.....	216,761
Linseed oil.....	7,495
Total.....	<u>15,751,289</u>

4/ See table below:

Thousands Pounds

Nonfat dry milk.....	367,286
Condensed milk.....	480,098
Evaporated milk.....	79,895
Dry whole milk.....	24,934
Anhy milk fat/butter fat.....	5,220
Butter.....	33,421
Butter oil.....	3,527
Cheese.....	22,334
Ghee.....	13,668
Dry modified milk.....	55
Whey.....	1,984
Total.....	<u>1,032,422</u>

5/ See table below:

Thousands Pounds

Poultry.....	34,010
Pork.....	20,062
Beef.....	120,593
Dried Peas and Beans; Lentils.....	138,466
Dried Fruit.....	44,157
Fresh Fruit.....	69,540
Canned Fruit.....	35,199
Potatoes.....	70,731
Hayseeds.....	882
Cattle Hides.....	1,102
Cotton Textiles (grey cloth).....	17,055
Cotton Yarn.....	61,887
Soybeans.....	199,077
Soybean meal.....	54,675
Blended Food Products.....	73,856
Total.....	<u>941,292</u>
