The Social Sciences in Asian Forestry Curricula

Bibliography of Social Sciences in Forestry Literature

Compiled by

Carol Stoney, Cristin E. Gallup,
Joseph A. Miller and Osman Gani

Edited by

Christine S. Laporte
Stephen Kelleher

This bibliography has been compiled by the Tropical Resources Institute of the Yale School of Forestry and Environmental Studies as part of subproject activities sponsored by the United States Agency for International Development's Forestry/Fuelwood Research and Development (F/FRED) Project, for which Winrock International is the prime contractor.

1989
New Haven, CT.

ACKNOWLEDGEMENTS

The editors would like to thank all who have been involved in the compilation and production of this Bibliography. Special thanks are due to Dr. William R. Burch, Jr. for the guidance he has given this effort, Robert Clausi and Jeff Bopp for their persistence in shepherding this project through to completion, and Brian Young for his valuable technical contributions to the production of this volume.

INTRODUCTION

Students and professionals alike will find this Bibliography quite useful. These citations are intended to represent the wide range of inquiry, disciplines, and applications associated with the integration of social sciences into Asian forestry and forest-related resource issues.

Considerable professional judgement and extensive experience are reflected in these selections. Carol Stoney, a graduate of the Yale School of Forestry and Environmental Studies, has been a professional in this field for several years. Joseph Miller, Librarian of the Yale School of Forestry and Environmental Studies, compiled the geographic and subject indexes that start on page 38 to assist the user to rapidly access references in the Bibliography that are relevant to specific research needs. Indeed, everyone associated with the compilation, editing and production of this Bibliography brings a similar interest to the selections contained in this volume.

The reader is encouraged to use these sources as signposts for direction to further sources. Many of the selections are readily available in the standard resource literature, or from the publishers or authors as noted. Additionally, the Library at the Yale School of Forestry and Environmental Studies may possess or have access to certain of these publications.
