Dear Mr. Severn:

Enclosed are three (3) copies of the preliminary list of variables that have been developed for the classification of financial markets. The material includes the data that have been compiled for six countries as a test of the availability and effort required to obtain the descriptive information.

I look forward to the review of the material by you and Mr. Zank, and would enjoy discussing it with you both. I will call Neal next week to schedule a meeting to get your comments and to decide on the next step in the study.

Yours very truly,

Robert J. Rourke
Principal
