ORGANIZATIONAL CHART OF  
POPULATION ASSISTANCE  
U.S. AGENCY FOR INTERNATIONAL DEVELOPMENT

USER'S GUIDE TO THE OFFICE OF POPULATION  
U. S. AGENCY FOR INTERNATIONAL DEVELOPMENT

I. Overview of A.I.D. Population Assistance

Policy. Support for voluntary population and family planning programs is an essential part of U.S. development assistance. Family planning programs enhance individual freedom to choose freely the number and spacing of children, provide critical health benefits for mothers and young children, and contribute to more rapid social and sustainable economic development.<sup>1</sup>

Program Strategy. Technical assistance and program resources are provided to developing countries through a wide range of A.I.D. activities that include family planning assistance, information, education and training programs, policy analysis, and four broad areas of research: demographic, social science, operations, and biomedical. Service delivery and supporting research have the highest priority for the Agency.

Within the guidelines of A.I.D.'s population sector strategy, factors considered in the design of country-specific assistance include an assessment of each country's need to: (a) strengthen government commitment to voluntary family planning, (b) develop effective public and private family planning programs, (c) increase the utilization of these programs, and (d) decrease dependence on external donors for program support.<sup>2</sup>

Funding. Over the past twenty-five years, A.I.D. funding for population assistance has totaled \$3.9 billion. Ninety-two percent, or \$3.6 billion, has been provided under the Population Planning account and the Development Fund for Africa. Approximately \$2.9 billion of this amount has been obligated since 1981. The remaining eight percent, or \$0.3 billion, has come from the Economic Support Fund and the Sahel Development Fund. Summaries of A.I.D. funding for the period 1965-1989 are provided on page 5, Tables 2a and 2b.

In 1989, obligations amounted to \$252.5 million. The sources of these funds were: \$239 million under the Population Planning account and Development Fund for Africa; \$13.5 million under the Economic Support Fund and Sahel Development Fund. A.I.D. funds accounted for over half of the external population assistance available to developing countries from all bilateral sources in 1989.

Organization of Assistance. Population assistance is provided by the Bureau of Science and Technology's Office of Population (S&T/POP) through centrally-funded projects, and by A.I.D.'s Regional Bureaus - Africa, Asia/Near East, and Latin America/Caribbean - either through bilateral

-----  
<sup>1</sup> A.I.D. population policy is formally stated in the "A.I.D. Policy Paper on Population Assistance" (September 1982) and in the policy statement issued at the International Conference on Population at Mexico City (August 1984).

<sup>2</sup> See "A.I.D. Sector Strategy: Population" (March 1983).

(country-to-country) projects monitored by A.I.D.'s overseas Missions (USAIDs) or through regional projects monitored by the Regional Bureau offices in Washington, D.C. The Bureau for Program and Policy Coordination (PPC) allocates the population budget among A.I.D. bureaus and exercises policy and program oversight. See organizational chart on page iii.

The Population Sector Council reviews policy and program issues related to population assistance. The Council is chaired by the Agency Director for Population (who is also the Director of S&T/POP); the Regional Bureaus and PPC are members of the Sector Council.

The current allocation of resources from all sources among the different bureaus is as follows:

- o The Office of Population, whose work is described in this Guide, accounts for about 44 percent of A.I.D.'s population assistance. S&T/POP carries out its activities through 48 grant agreements and contracts with U.S. government and private agencies.
- o Bilateral programs, accounting for about 48 percent of population assistance, are carried out by A.I.D. Missions in 37 countries. (See Table 1 on page 4).
- o Regional population assistance programs are managed by A.I.D. Regional Bureaus and account for about 7 percent of assistance.
- o The remaining 1 percent goes to support special Agency initiatives in the population field.

## II. The Office of Population (S&T/POP)

Role. S&T/POP projects are designed to strengthen USAID assistance to country family planning programs worldwide. The projects fall into two broad categories: those which support current family planning service delivery, and research to enhance future efforts in the population field.

About 75 percent of S&T/POP activities support service delivery and include:

- o Programs to enhance policy developments that can legitimize and encourage family planning programs;
- o Program support for voluntary family planning programs, particularly for innovative activities;
- o Training of program personnel;
- o Provision of contraceptive supplies; and
- o Assistance to population information and education programs.

Research, which accounts for the remaining 25 percent of S&T/POP funding, builds the scientific and technological base for future program efforts. Research support includes:

- o Biomedical research on safer, more acceptable, more effective, and more affordable methods of contraception;
- o Operations research to improve the management and operation of service delivery programs; and
- o Social science and demographic research to increase knowledge of population dynamics and to improve the collection and analysis of demographic data.

Relationship to A.I.D. Overseas Missions. S&T/POP activities are designed to complement USAID programs. For this purpose, the Office of Population has developed 48 contracts or grant agreements with U.S. institutions - mainly private sector organizations - to work with LDC public and private institutions. S&T/POP projects provide support to activities that are not readily included in the 37 existing and planned bilateral population programs. In those countries that do not receive bilateral assistance, S&T/POP projects provide support that complements the USAID development assistance strategy. S&T/POP projects support population assistance for over 90 countries each year including more than 1,300 in-country subprojects as well as extensive technical assistance and other support.

Annually, the Office of Population develops a resource allocation plan that reflects the judgements of the Regional Bureaus and country Missions on the priority needs for Office of Population assistance resources. This plan allocates S&T/POP funds by functional area, region, and contractor or grantee. In addition, Missions sometimes "buy in" to Office of Population projects with their own funds to augment their share of S&T/POP activities. The Office of Population tracks the implementation of the allocation plan and provides reports on the amount and type of population assistance provided.

Organization of the Office of Population. S&T/POP has five divisions. In addition, an Operations Coordination Staff assists the Director in coordinating the funding and implementation of the S&T/POP program with the activities of Missions and Regional Bureaus. The division functions include:

- o Policy Development Division (PDD): Improves demographic research and data collection, assists LDC policymakers and researchers in understanding the impact of rapid population growth on economic development, and supports the development of appropriate LDC policies and programs.
- o Research Division (R): Supports development of new fertility regulation technologies and, through operations research, improves family planning delivery systems.

- o Information and Training Division (IT): Improves awareness of the availability and use of family planning methods, and expands and strengthens the technical skills of LDC family planning and health personnel.
- o Family Planning Services Division (FPSD): Encourages and supports private sector involvement in family planning service delivery, and supports evaluation of family planning activities.
- o Commodities and Program Support Division (CPSD): Provides a centralized system for contraceptive procurement and maintains a data base on all population projects and commodity assistance.

Project Activities. Each division carries out its responsibilities through a number of S&T/POP projects. The funding for projects supported in 1989 is summarized in Table 3 on page 6.

Table 1

	Zimbabwe***	

Note: Several African countries without population bilaterals are introducing population activities through the Africa Bureau's Family Health Initiatives II project, funded in FY 89 at \$10.9 million. Historically, some of the countries funded under this project have moved on to develop bilateral population programs.

- \* Health bilateral with substantial population component
- \*\* Ongoing bilateral to be reactivated in the Spring 1990
- \*\*\* Project under development for FY 90 funding.

### III. PROJECT INDEX

Policy Development Division

PROJECT TITLE: Demographic and Health Surveys (DHS)

PROJECT NUMBER: 936-3023      CONTRACT/GRANT NUMBER: DPE-3023-C-4083 (DHS-I)  
DPE-3023-Z-8074 (DHS-II)

DURATION: September 1984 - September 1989      SCOPE: Worldwide  
August 1988 - August 1993

FIVE-YEAR CONTRACT LEVEL: DHS-I: \$20,768,000    DHS-II: \$26,048,000

PURPOSE: To conduct sample surveys of contraceptive knowledge, availability, and use and/or recent demographic levels and trends.

BENEFICIARIES: Data generated by this project will be used by developing country governments to evaluate recent family planning and MCH services to the poor.

DESCRIPTION: For nearly two decades A.I.D., through its support of the World Fertility Survey, Contraceptive Prevalence Surveys, and Birth and Death Data Collection projects, has been a leader in supporting sample surveys to monitor trends in fertility and family planning behavior. The Demographic and Health Surveys project carries on the most important functions of these projects. The primary objectives of DHS-I have been to: a) provide financial and technical support to developing countries in conducting a total of 35 demographic and health surveys; b) disseminate survey results quickly to policymakers and family planning program administrators; and c) strengthen institutional capabilities in host countries for undertaking future surveys of this type.

Under DHS-II, IRD will: a) undertake a careful assessment of DHS data quality and future data needs; b) conduct approximately 25 additional DHS surveys; c) disseminate DHS data via reports, conferences, special presentations, and distribution of data files; d) promote further analysis of DHS data by host country researchers, program managers, and the international population and health communities; and e) further improve the Integrated System for Survey Analysis (ISSA) software and organize up to 10 ISSA workshops.

PROJECT TITLE: Demographic Data Initiatives

PROJECT NUMBER: 936-3046.02      PASA NUMBER: DPE-3046-P-CA-9005

DURATION: October 1987.....continuing      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$7,336,000

PURPOSE: To strengthen the capacity of developing countries to process, evaluate and analyze demographic and family planning data as well as other social and economic data.

BENEFICIARIES: Developing country statistical institutions: specifically, personnel responsible for the analysis, evaluation and use of demographic data; policymakers and planners who will use the improved data for more effective development planning (includes A.I.D. staff).

DESCRIPTION: PASA with the U.S. Bureau of the Census (BuCen) has two main components in the provision of assistance. One, technical support for the implementation of censuses in developing countries, provided by the International Statistical Programs Center, includes: (a) preparation and dissemination of instructional materials for taking censuses and surveys; (b) conducting census taking and data processing workshops; and (c) provision of technical consultations. Two, compilation and analysis of demographic data, carried out by the Center for International Research, comprises: (a) developing and maintaining a comprehensive worldwide demographic data base (b) responding to ad hoc requests from AID/W, USAID Missions and contractors and; (c) providing technical assistance on an ad hoc basis for the compilation and analysis of developing country demographic data.

Policy Development Division

PROJECT TITLE: Demographic Data Initiatives

PROJECT NUMBER: 936-3046.03      CONTRACT/GRANT NUMBER: DPE-3046-A-00-8050

DURATION: September 1988 - September 1993

SCOPE: Selected countries in the Asian and Pacific region.

FIVE-YEAR CONTRACT LEVEL: \$4,189,000

PURPOSE: To strengthen the capacity of developing countries to process, evaluate and analyze demographic and family planning data as well as other social and economic data.

BENEFICIARIES: Developing country statistical institutions: specifically, personnel responsible for the analysis, evaluation and use of demographic data; policymakers and planners who will use the improved data for more effective development planning.

DESCRIPTION: Under a Cooperative Agreement, The East-West Population Institute (EWPI) is working to enhance the capacity of developing countries in the Asian and Pacific region to collect, process, evaluate and analyze population and family planning data. Emphasis is on the analysis of demographic trends, their social and economic consequences and related policy implications. Major activities include conducting conferences, workshops and training programs and providing technical consultations. The East-West Population Institute will cooperate with population-related organizations in the region to contribute to the knowledge and solution of population problems affecting countries of this region. Audiences include government policymakers and planners as well as the research community.

Policy Development Division

PROJECT TITLE: Expert Studies on Population Issues

PROJECT NUMBER: 936-3035.03      CONTRACT/GRANT NUMBER: DSPE-3035-A-00-5046-00

DURATION: September 1985 - September 1990      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$1,250,000

PURPOSE: To support the Committee on Population in conducting research on population issues of special interest to the international population community.

BENEFICIARIES: Host-country policymakers and donor agency officials who learn about important population issues in relation to social and economic development.

DESCRIPTION: The Committee on Population conducts the following types of activities: 1) workshops for researchers and policymakers on key topics involving commissioned background papers; 2) in-depth assessments of major population issues; 3) experts' meetings lasting 1-2 days to address important policy questions; and 4) large conferences for U.S. and foreign researchers, policymakers, development specialists, and population program managers to discuss the work of the Committee on Population.

During 1989, the Committee published Contraception and Reproduction: Health Consequences for Women and Children in Developing Countries. The 118-page report summarizes the results of a comprehensive two-year review of research on the health consequences of contraceptive use and controlled fertility. The proceedings of a major international conference on the Demographic and Programmatic Consequences of Contraceptive Innovations were published by Plenum Press. Finally, a major study on Developing New Contraceptives: Obstacles and Opportunities (funded by the Mellon Foundation) was published.

The Committee is undertaking several new activities including a series of workshops on urbanization, migration and economic development and a major study on the population dynamics in sub-Saharan Africa.

Policy Development Division

PROJECT TITLE: Innovative Materials for Population Action (IMPACT)

PROJECT NUMBER: 936-3035.02      CONTRACT NUMBER: DPE-3035-C-00-5049-00

DURATION: August 1985 - August 1990      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$5,941,000

PURPOSE: To improve the use of population information and research findings by policymakers in developing countries and the donor community.

BENEFICIARIES: Policymakers and program planners in developing countries who need accurate and timely information to make informed policy decisions.

DESCRIPTION: The Population Reference Bureau provides creative design, production and targeted distribution of publications and supporting materials in a variety of formats (booklets, chartbooks, posters, factsheets, slide presentations, press kits, etc.) on population and family planning. Three in a series of four thematic booklets have been published in numerous languages and sent to a select list of policymakers in 25 countries. The first three booklets are entitled, "Family Planning Saves Lives: A Strategy for Maternal and Child Survival," "Contraceptive Safety: Rumours and Realities" and "Sustainable Development: The Challenge of Our Times."

Subprojects are being carried out in up to seven countries to assist developing country institutions to enhance their ability to improve the use of research findings by country leaders. Subprojects are completed or underway in Ghana, Madagascar, Mali (Sahel region), Somalia, Turkey, and Nepal. IMPACT has collaborated with other organizations in preparing special materials for conferences and seminars. IMPACT and DHS are collaborating on a series of 19 summary reports on the Demographic and Health Surveys. The IMPACT project also responds to ad hoc requests for materials on population and family planning. Short turnaround in producing quality materials is characteristic of the project.

Policy Development Division

PROJECT TITLE: Population Reference Bureau (PRB)

PROJECT NUMBER: 936-0502

CONTRACT/GRANT NUMBER: DPE-0502- 00-7066-00

DURATION: September 1987 - September 1992

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$466,000

PURPOSE: To increase the awareness among developing country officials of demographic levels and trends and to provide a mechanism to orient developing country officials to the activities of the international population community in Washington, D.C.

BENEFICIARIES: Developing country government officials, family planning program administrators.

DESCRIPTION: The project provides partial support to three ongoing PRB activities: 1) the production and distribution of the World Population Data Sheet and the distribution of other PRB material of interest to A.I.D. (e.g. The Population Handbook); 2) the management of a visitors program for developing country officials passing through Washington, D.C.; and 3) management of a small intern program. Under the first activity, missions can request multiple copies of PRB publications of special interest. Missions can also request that PRB assist in arranging meetings for developing country officials who pass through Washington, D.C.

PROJECT TITLE: Resources for Awareness of Population Impacts on Development  
(RAPID III)

PROJECT NUMBER: 936-3046.01      CONTRACT/GRANT NUMBER: DPE-3046-Z-00-7069-00

DURATION: September 1987 - September 1992      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$12,666,000

PURPOSE: To raise leadership awareness of relationships between population growth and development and about the positive socio-economic and health effects of lower fertility.

BENEFICIARIES: Host-country officials involved in development planning and policymaking.

DESCRIPTION: The RAPID III project supports collaborative analyses of the implications of population growth for national development, health, and environment. Analyses also estimate family planning program requirements to meet expected future demand for services. Analyses utilize microcomputer-based simulations which project population growth under alternative fertility and family planning program assumptions. Integral to the RAPID III approach is the strengthening of local institutional capabilities for conducting population analyses. This is accomplished through technical training in U.S.-based courses and country-based workshops, in addition to microcomputer transfer. The project supports activities in over 25 countries with major emphasis on sub-Saharan Africa.

PROJECT TITLE: Technical Information on Population for the Private Sector (TIPPS)

PROJECT NUMBER: 936-3035.01      CONTRACT/GRANT NUMBER: DSPE-3035-C-00-5047-00

DURATION: August 29, 1985 - August 28, 1990      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$5,566,000

PURPOSE: To increase the allocation of private sector resources to family planning by promoting an understanding of the benefits of birthspacing in private health and commercial systems.

BENEFICIARIES: Developing country health managers, business persons, administrators, and their clientele.

DESCRIPTION: This is a five-year project designed to assist private businesses and health care systems to incorporate family planning services into their health care programs. The chief audiences for this project are business owners, private health system managers, administrators, as well as private business persons who manufacture or distribute family planning products. Activities consist of country assessments, seminars, workshops, business analyses, study tours, and management fellowships. A minimum of 20 subprojects are being carried out in 10 developing countries. These subprojects are business analyses which examine the cost and health benefits of family planning. The project is being carried out by John Short and Associates, a health care consulting firm, and University Research Corporation.

Policy Development Division

PROJECT TITLE: Options for Population Policy (OPTIONS)

PROJECT NUMBER: 936-3035.04      CONTRACT/GRANT NUMBER: DSPE-3035-C-00-6062-00

DURATION: September 1986 - September 1991      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$10,088,000

PURPOSE: To assist governments in developing national population policies; to assist public and private sector institutions in formulating operational policies for achieving national policy objectives; and to assist institutions in conducting policy analyses to support the development of national and operational policies.

BENEFICIARIES: Public sector: population councils, line ministries, fiscal offices; Private sector: employees and professional associations, trade and labor organizations, research and policy institutes, and public interest groups.

DESCRIPTION: Many developing country governments have expressed a need for technical support in their efforts to develop national population policies. This project responds to these needs by promoting activities leading to policy dialogue and policy reform. Project activities assist in developing plans and mobilizing public and private resources for implementing national population policies. In addition, assistance is provided to eliminate legal and regulatory barriers to family planning. The project provides assistance through the support of policy analysis subprojects, staff training, observational travel, and long-term advisors.

PROJECT TITLE: Population Council

PROJECT NUMBER: 936-3050

CONTRACT/GRANT NUMBER: DPE-A-00-8059-00

DURATION: August 1988 - August 1993

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$37,000,000

PURPOSE: To support the Population Council's contraceptive development program, contraceptive introduction, the provision of technical information to the international population and family planning community, and provide limited funds and technical assistance to institutions in developing countries for service delivery systems, research, evaluation, training, and contraceptive marketing.

BENEFICIARIES: Population/family planning professionals throughout the world through publication of research data and other papers; local clientele in developing countries, generally urban and rural poor, through application of research and demonstration activities by host-country professionals.

DESCRIPTION: Two important, ongoing activities in FY 1990 will be technical assistance for the introduction of Copper T 380A IUDs and Norplant<sup>®</sup> implants. Other research areas include the development of second generation subdermal implants, contraceptive vaginal rings, a levonorgestrel-releasing IUD, gonadotropin releasing hormone analogs for male contraceptives, and new spermicides. In the contraceptive introduction area, the Council conducts activities to establish local experience and a management organization for the worldwide introduction of NORPLANT<sup>®</sup> implants and the Copper T 380A IUD. In addition, family planning program research and technical assistance is supported in such areas as post-partum family planning, breastfeeding promotion, and the study of various issues related to the introduction of new contraceptive technology being developed by the Council.

PROJECT: Natural Family Planning Project

PROJECT NUMBER: 936-3040

CONTRACT/GRANT NUMBER: DPE-3040-A-00-5064-00

DURATION: September 1985 - September 1991

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$15,000,000

PURPOSE: To improve knowledge, availability, acceptability and effectiveness of natural family planning (NFP), including breastfeeding, in developing countries.

BENEFICIARIES: Public and private developing country institutions involved in population, maternal and child health, and family planning programs, and developing country couples who will receive improved information on NFP, breastfeeding, and expanded family planning services.

DESCRIPTION: In order to meet the growing demand for NFP services, this project was created to improve the information and technical resources on NFP and breastfeeding available to family planning service providers and consumers, and developing country policymakers.

Project activities include biomedical, social science and operations research; information, education and training; technical assistance; and other NFP and breastfeeding activities. Current activities include the development of IEC and training materials on NFP and breastfeeding for policymakers, program managers, service providers, and clients; operations research on alternative approaches to providing NFP services and support to breastfeeding women; training of trainers and training in management and outreach; research on the return of fertility in breastfeeding women; and the detection of ovulation and breastfeeding promotion programs. The project aims to include NFP in family planning research, training, service delivery, and information programs.

Research Division

PROJECT TITLE: Family Health International

PROJECT NUMBER: 936-3041

CONTRACT/GRANT NUMBER: DPE-CA-4047-00

DURATION: September 1984 - September 1990 (This is a continuation of project number 932-0537 which ran from FY 71 through FY 85.)

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$63,400,000

PURPOSE: To test, assess, and improve fertility regulation technologies and to disseminate information on their safety, effectiveness, and acceptability.

BENEFICIARIES: Users of methods developed and introduced by this program.

DESCRIPTION: This project 1) conducts comparative clinical trials on the safety and efficacy of various fertility control methods under local conditions; 2) trains overseas clinicians in fertility control techniques; 3) collects, analyzes, and disseminates data findings of fertility control; 4) establishes national fertility research programs; 5) provides limited equipment and supplies of new contraceptives technology; 6) assesses impact of fertility control modalities and delivery systems, and 7) conducts epidemiologic safety studies of fertility control methods.

Priority areas are: Norethindrone/cholesterol biodegradable pellets; three-month microsphere norethindrone injectable; the Filshie Clip for female sterilization; non-surgical sterilization; new spermicides; the development of new, improved condoms; condom quality; and introduction of NORPLANT<sup>®</sup> implants.

This project has documented the comparative safety, efficacy, and acceptability in different developing country settings of methods such as minilap and laparoscopic sterilization, NORPLANT<sup>®</sup>, copper IUD's, low dose OC's, post-partum IUDs, and various barrier contraceptives. Several national fertility programs have been established with the capability to conduct their own research studies (e.g., Bangladesh, Egypt, Indonesia, Sri Lanka, and Thailand). Project activities have included technology transfer and related training. Clinical trials have been carried out at more than 200 centers in nearly 50 countries.

PROJECT TITLE: Contraceptive Research and Development (CONRAD)

PROJECT NUMBER: 936-3044                      CONTRACT/GRANT NUMBER: DPE-3044-A-00-6063-00

DURATION: September 1986 - September 1991                      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$28,000,000

PURPOSE: To develop improved and new methods of family planning for use in developing countries.

BENEFICIARIES: Developing country couples who become users of methods developed under this project, and developing country scientists and institutions strengthened as a result of their participation in this project.

DESCRIPTION: The project focuses primarily on the early stages of contraceptive research and development beginning with targeted basic research studies in animals through the first two phases of clinical trials. Although the project can pursue all avenues of applied research, priority is given to: 1) long-acting injectable and implantable contraceptives for women and men; 2) new barrier methods and spermicides that also provide protection against the spread of STDs including AIDS; 3) non-surgical and/or reversible sterilization for men and women; 4) contraceptive vaccines directed against sperm, ova or hormones; 5) new non-steroidal hormonal methods that inhibit ovulation and sperm function; 6) methods that interrupt the transport of ova or sperm; 7) methods that prevent fertilization; and 8) simple kits to predict ovulation; etc. The project will support subprojects conducted by collaborating investigators worldwide and will conduct in-house laboratory and clinical research. The project will also organize international workshops and regional seminars that bring together leading scientists from around the world and will prepare and disseminate technical information. The project also supports research on the mechanisms of heterosexual transmission of AIDS and a spermicide and viricide screening program.

PROJECT TITLE: Training in Reproductive Health; Johns Hopkins Program for International Education in Gynecology and Obstetrics (JHPIEGO)

PROJECT NUMBER: 936-3045

CONTRACT/GRANT NUMBER: DSP-3045-A-00-7004

DURATION: May 1987 - April 1992

SCOPE: Worldwide with an emphasis on Africa

FIVE-YEAR CONTRACT LEVEL: \$55,182,000

PURPOSE: To train developing country physicians and nurses in family planning and reproductive health; to institutionalize appropriate training in developing country medical and nursing schools; and thereby to improve family planning service delivery.

BENEFICIARIES: Developing country physicians, nurses, educators, and administrators. Medical and nursing education institutions will also benefit, as will individuals and couples in developing countries who receive better family planning services.

DESCRIPTION: The Johns Hopkins Program for International Education in Gynecology and Obstetrics (JHPIEGO) trains developing country physicians, nurses, and medical administrators in family planning and reproductive health. The training sites are primarily in developing country medical and nursing institutions. Three-week courses on specialized subjects are also held at JHPIEGO headquarters in Baltimore. Courses provided by JHPIEGO address: contraceptive methods, academic skills, sexually transmitted diseases, advances in contraceptive technology, infertility, safe motherhood, and child survival. Trainees and training activities are carefully chosen to lead to: 1) institutionalization of reproductive health training in developing country medical and nursing schools and 2) improved and expanded family planning services.

Information and Training Division

PROJECT TITLE: Family Planning Training for Paramedical, Auxiliary and Community (PAC) Personnel IIB

PROJECT NUMBER: 936-3031      CONTRACT/GRANT NUMBER: DPE-3031-Z-00-9023/9024

DURATION: September 1989 - September 1993 (This is a continuation of project number 936-3031 which ran from FY 84 through FY 88.)

SCOPE: Worldwide.      FIVE-YEAR CONTRACT LEVEL: \$33,567,000

PURPOSE: To strengthen and develop the capacity and capability of developing country institutions and agencies to design, implement and evaluate a program of training activities so that various PAC workers will be able to provide family planning (FP) services. Priority attention is given to the Africa region.

BENEFICIARIES: Developing country regional and in-country family planning training institutions and programs, particularly the training staff of these programs; PAC personnel in assisted developing countries; developing country reproductive-age couples who will receive improved FP and Maternal/Child Health services provided by those trained through the PAC IIB project.

DESCRIPTION: PAC IIB provides assistance in training a wide variety of family planning paramedical workers including nurses, midwives, auxiliary and community workers, traditional practitioners, and others. The project places particular emphasis on assisting developing country institutions in all regions to develop the capability to carry on effective, technically self-sustaining family planning training programs for PAC workers. Assistance includes technical and other support to develop and strengthen family planning training institutions and programs; short-term technical assistance to supply specific technical training in on-going programs; and assistance in conducting training programs, assessing training results, and incorporating the findings into subsequent courses. Project efforts concentrate on strengthening the skills of personnel who train, manage or supervise other PAC workers. The project emphasizes training in mid-level management/supervision, training of trainers, service delivery skills and pre-service education. Types and levels of assistance vary to meet needs specific to geographic regions and individual countries.

PROJECT TITLE: Population Communication Services (PCS)

PROJECT NUMBER: 936-3004    COOPERATIVE AGREEMENT NUMBER: DPE-3004-A-00-6057-00

DURATION: August 1986 - September 1991                      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL:    \$30,000,000

PURPOSE: To develop effective information and education (IE) programs in direct support of selected developing country population and family planning service delivery programs.

BENEFICIARIES: Developing country population/family planning service organizations with rural outreach programs and established service delivery facilities; fertile age couples.

DESCRIPTION: Although many developing country couples are aware of the concept of family planning, they lack the information necessary to make an informed choice as to whether to practice family planning, when, and which method is most appropriate for them. This project provides country-specific assistance in the following: 1) identification of information and education needs of family planning programs; 2) marketing and audience surveys; 3) design, implementation and assessment of activities. These activities may range from small-scale studies for testing effective IE methods, to larger-scale information campaigns; development, pretesting and revision of materials and methods; evaluation of effectiveness of IE programs; and exchange and adaptation of IE methods and materials between countries. The project emphasizes the use of both public and private sector organizations in developing countries engaged in information and education, and the development of IE planning and implementation capability in developing country institutions. Through this project, translations and copies of effective materials and films are provided for population IE programs.

PROJECT TITLE: Population Information Program (PIP)

PROJECT NUMBER: 936-3032

CONTRACT/GRANT NUMBER: DPE-3032-Z-00-7061

DURATION: August 1987 - August 1992 (This is a continuation of project number 932-0659 which ran from FY 73 through FY 84, and project number 936-3032 which ran from FY 84 - FY 87.)

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$23,175,000

PURPOSE: To inform population/family planning professionals--particularly in developing countries--of new developments in fertility management, family planning programs, demographic change, law and social policy, and other areas of international population concern.

BENEFICIARIES: Family planning medical and paramedical professionals, FP administrators, developing country development leaders and experts in FP-related fields; developing country couples seeking to have smaller families who use the FP service delivery centers.

DESCRIPTION: This project has produced scientific, technical, and general information that has become a highly credible source of guidance around the world for FP program administrative and medical decisions, paramedical training, and projections of population problems in many developing countries. From its computerized data base and original research sources, the project has published some 300 Population Reports in five languages (English, French, Spanish, Portuguese, and Arabic). The project POPLINE data base, containing nearly 142,000 citations, has been merged into the National Library of Medicine information network, called MEDLARS, and project relationships overseas have expanded with cooperating country organizations. Mass media have been serviced with press releases, Population Reports and other project materials that provide reliable and timely bases for articles, broadcasts, telecasts, etc.

PROJECT TITLE: Population Service Fellowship Program (PSIP)

PROJECT NUMBER: 932-3033

CONTRACT/GRANT NUMBER: DPE-3033-A-00-4058-00

DURATION: August 1984 - December 1991

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$3,681,000

PURPOSE: To provide technical assistance to developing country population and family planning programs while concurrently providing overseas experience for recent U.S. college/university graduates or mid-career professionals in population-related fields through internships overseas.

BENEFICIARIES: Developing country population/family planning programs and recent graduates or mid-career professionals in population related fields who need experience overseas.

DESCRIPTION: This project supplies developing country population/family planning programs -- in both the private and the public sectors -- with the skills of fellows who are recent graduates or mid-career professionals in population-related fields. The technical assistance provided by these fellows covers a wide range of program needs--for example, demographic analysis; computer programming; policy work; information, education and communication; training; management; clinical services; program evaluation; and other areas. Fellows are recruited through universities, population/family planning organizations, professional publications, and meetings. They are selected on the basis of their skills identified as relevant to developing country programs. An Advisory Board composed of representatives of the University of Michigan, the University of North Carolina, UCLA, Columbia University, Johns Hopkins University, the Population Council, and A.I.D. meets twice yearly to advise on intern selection, overseas placement sites and related issues. Interns serve overseas for 18- to 24-month terms and receive stipends as well as travel and other costs. Priority is given to A.I.D.-supported projects in Africa, but other areas and projects supported by other donors are eligible.

PROJECT TITLE: Family Planning Management Training

PROJECT NUMBER: 936-3039

CONTRACT/GRANT NUMBER: DPE-3039-C-5075

DURATION: September 1985 - September 1990

SCOPE: Worldwide.

FIVE-YEAR CONTRACT LEVEL: \$18,450,000

PURPOSE: To strengthen the leadership and management of public and private family planning programs in developing countries by training senior and middle-level personnel.

BENEFICIARIES: Immediate beneficiaries are program leaders and managers. Private and public family planning organizations will become more effective providers of services as a result of better program management, and individuals and couples will receive improved family planning services. Primary emphasis of the project is given to African and Asian countries.

DESCRIPTION: This project includes assistance for: (1) identifying specific management training needs in a country and planning training activities to meet them; (2) training current program leaders, future leaders, and senior and middle-level managers; (3) follow up/technical assistance to trainees; and (4) developing training materials applicable to the needs of each region.

Project assistance for current and future program leaders helps them develop a broad perspective on population problems and their impact on development, an understanding of management issues in public and private-sector programs, and the ability to recognize and take action on specific management problems hindering effective service delivery. FPMT assistance focuses on: strategic planning, organizational development, financial management, management information systems, personnel and supervision systems, and workplanning.

PROJECT TITLE: Family Planning International Assistance (FPIA) Program

PROJECT NUMBER: 932-0955

CONTRACT/GRANT NUMBER: DPE-0955-A-00-3005-00

DURATION: To be determined

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$73,150,000

PURPOSE: To initiate and strengthen family planning programs through existing social welfare, church, youth, and women's organizations in the developing countries.

BENEFICIARIES: Rural and urban couples in developing countries who do not have alternative access to affordable and routinely available family planning information and services.

DESCRIPTION: Family Planning International Assistance (FPIA) was organized in 1971 as the international assistance division of the Planned Parenthood Federation of America. In selecting and funding developing country programs, FPIA stresses innovative, cost-effective, low technology programs that have a good chance of continuing after the termination of FPIA support. FPIA support is directed primarily to non-government institutions and is designed to encourage integration of family planning into other activities such as maternal/child health and/or women's, church, and youth programs. FPIA provides financial support for projects in over 34 countries, and commodity assistance to institutions in over 75 countries.

PROJECT TITLE: Association for Voluntary Surgical Contraception Program

PROJECT NUMBER: 936-3049

CONTRACT/GRANT NUMBER: DPE-3049-A-00-8041

DURATION: August 1988 - August 1993

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$80,000,000

PURPOSE: To make high quality voluntary surgical contraceptive (VSC) services available as an integral part of developing country health and family planning programs.

BENEFICIARIES: Couples who have completed their families and who seek a method of permanent contraception for reasons of health and family well-being.

DESCRIPTION: The International Project of the Association for Voluntary Surgical Contraception (AVSC) was created in 1972 to advance availability of VSC to couples requesting these services. AVSC is assisting 120 subprojects in 66 countries for service delivery, information, health personnel and physician training, equipment, equipment repair, and/or development of national leadership groups. AVSC also emphasizes voluntarism, informed choice, quality assurance, and evaluation as part of their support for service programs.

PROJECT TITLE: Population Technical Assistance (POPTech)

PROJECT NUMBER: 936-3024

CONTRACT/GRANT NUMBER: DPE-3024-Z-00-8078

DURATION: September 1988 - September 1993

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$8,847,000

PURPOSE: To improve the effectiveness of population programs by providing short-term technical assistance services.

BENEFICIARIES: Managers, administrators, and designers of developing country institutions and programs who design and manage family planning services or population programs.

DESCRIPTION: The project provides worldwide short-term consulting services to public and private sector institutions to improve the design and management of population programs. The project recruits and fields professional consultants in response to specific requests for technical assistance from a broad spectrum of disciplines for activities such as design, assessments, evaluations, and special studies.

PROJECT TITLE: Contraceptive Social Marketing II (CSM II)

PROJECT NUMBER: 936-3051      CONTRACT/GRANT NUMBER: DPE-3028-C-00-4079-00 (CSM I)  
DPE-3051-Z-00-8043-00 (CSM II)

DURATION: CSM I - September 1984 - January 1990      SCOPE: Worldwide  
CSM II - September 1988 - September 1993

FIVE-YEAR CONTRACT LEVEL: \$32,988,000

PURPOSE: To increase the availability and use of contraceptives among low and middle income groups in developing countries using commercial marketing and distribution techniques and to establish cost recovery schemes and targets in all sales programs.

BENEFICIARIES: Couples from developing countries who can pay for contraceptives and prefer to use the commercial sector for supplies but cannot afford existing prices.

DESCRIPTION: Contraceptive Social Marketing (CSM II) project uses the techniques and resources of commercial enterprises to meet the social goal of making contraceptive supplies and information more widely available. The CSM II project has four main functions: 1) to provide technical and financial assistance to design and implement new country programs in Africa; 2) to provide short-term technical assistance to ongoing CSM programs; 3) to conduct special studies to improve the implementation of and expand the understanding of the dynamics of social marketing activities; and 4) to collect, analyze, and disseminate technical information among CSM programs, family planning professionals, A.I.D. officials, and developing country policymakers. CSM II incorporates activities initiated under CSM I and consolidates established programs and expands sales programs, particularly in Africa. Countries in Latin America, Asia and Near East with more sophisticated infrastructure and more mature family planning programs will be assisted in becoming financially independent, while newer programs will be provided greater assistance in market research policy and training. The project will also maintain a central management information system for all A.I.D. financed CSM programs.

Family Planning Services Division

PROJECT TITLE: Family Planning Enterprise (FPE)

PROJECT NUMBER: 936-3034

CONTRACT/GRANT NUMBER: DPE-3034-C-00-5072

DURATION: October 1985 - September 1990

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$27,767,000

PURPOSE: The purpose of the Family Planning Enterprise project is to increase the delivery and use of acceptable, affordable family planning services through private sector sources.

BENEFICIARIES: Primarily rural and urban couples receiving health and family planning services through market-based health care delivery channels and employee benefit packages. The project also benefits family planning PVOs attempting to increase their efficiency and financial sustainability.

DESCRIPTION: The project is designed to encourage "private enterprise" approaches to family planning delivery in two ways. The first is to introduce or reinforce financial and human resource management skills in existing private family planning organizations, primarily developing country private voluntary organizations (PVOs). The outcome of this activity will be family planning PVOs better prepared to serve the increasing number of developing country couples requesting family planning services.

The second approach is to integrate the provision of family planning products and services into existing profit-making commercial channels and employee benefit plans. The outcome of this set of activities will be the expansion of market-based family planning services in developing countries with many of the costs of delivery absorbed by profit-making commercial markets or shared with the private sector. In some cases commercial channels may provide new family planning markets that can be expected to reach self-sufficiency and result in the sale of contraceptives at market prices (e.g., health maintenance organizations, pharmacies). In other cases, the delivery of family planning services to hard-to-reach populations may require local businesses to cost-share with PVOs (e.g., family planning services for factory employees or plantation workers).

Family Planning Services Division

PROJECT TITLE: Extending Family Planning Services through Third World Women Managers

PROJECT NUMBER: 936-3037

CONTRACT/GRANT NUMBER: DPE-3037-A-00-5020

DURATION: September 1985 - August 1990

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$5,856,000

PURPOSE: To increase the availability and accessibility of family planning services in developing countries through private sector organizations, particularly women's groups, as well as small-scale industries, factories, markets, church groups, and other PVOs.

BENEFICIARIES: (1) Third world managers in the private sector who have limited or no previous access to funding or technical assistance for family planning services delivery and (2) family planning clients in communities reached by this project.

DESCRIPTION: This project has been designed to develop and extend family planning services in selected developing countries, by utilizing the extensive alumnae network of the Center for Development and Population Activities (CEDPA). Since 1978, CEDPA has provided management training to more than 600 middle-to-senior level managers in developing countries most of whom are women. During their CEDPA training, alumnae have developed project proposals for family planning service delivery. While some have attracted funds and technical assistance, many still lack support. This project is identifying approximately 30 of these family planning projects by conducting 6 regional workshops for selected alumnae. During these workshops, alumnae will develop or update proposals to extend family planning services in their respective countries, including plans for local financing through fees for service or other income generating activities designed to develop self sufficiency. Most of the sub-projects are being managed by CEDPA alumnae and will receive financial support for up to three years. It is expected that after the start-up period they will either have become self-sufficient or will have secured other donor financing.

PROJECT TITLE: Family Planning Services; The Pathfinder Fund

PROJECT NUMBER: 936-3042      COOPERATIVE AGREEMENT NUMBER: DPE-3042-A-00 5045

DURATION: June 1985 - September 1991      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$60,000,000

PURPOSE: To introduce voluntary family planning services, information, and training in developing countries and to make existing family planning service systems more effective in both public and private sectors.

BENEFICIARIES: Rural and urban couples who gain access to comprehensive family planning information and services as a result of Pathfinder-sponsored projects.

DESCRIPTION: The Pathfinder Fund is a nonprofit organization founded in Boston in 1957 to initiate and encourage family planning programs and activities throughout the developing world. Since A.I.D. funding began in 1967, the Pathfinder Fund has sponsored over 2,300 projects in 85 countries and has helped encourage the establishment of national family planning associations in several Asian and African countries. The Fund currently supports over 115 projects in 25 countries and provides training awards and commodity grants in many additional countries. Activities include community-based distribution programs, professional and paraprofessional training projects, clinical service programs, information and education projects, institutional development efforts, commodity and logistics support, and youth programs.

Family Planning Services Division

PROJECT TITLE: Expansion and Improvement of Family Planning Services in Latin America and the Caribbean

PROJECT NUMBER: 936-3043

CONTRACT/GRANT NUMBER: DPE-3043-G-SS-7062-00

DURATION: September 1987 - September 1992

SCOPE: Latin America

FIVE-YEAR CONTRACT LEVEL: \$27,000,000

PURPOSE: To provide technical, advisory and commodity services to selected Family Planning Associations (FPAs) throughout Latin America and the Caribbean.

BENEFICIARIES: Urban and rural couples in Latin America and the Caribbean. The project gives special attention to the major non-bilateral countries in the LAC region: Brazil, Colombia and Mexico.

DESCRIPTION: Organized in 1953, the IPPF/Western Hemisphere Region (WHR) was incorporated as a U.S. private voluntary organization in 1955 in the State of New York. It currently has 43 member associations of which 35 receive funds and technical assistance from WHR. WHR provides technical, advisory, and commodity services to selected Family Planning Associations (FPAs) throughout Latin America and the Caribbean. The five year program expands community-based distribution programs; increases family planning services through a network of private doctors (700); establishes family planning services in collaboration with the public and private sector; establishes family planning associations with private voluntary organizations; activates management information systems in FPAs; increases resource allocation to FPAs; carries out client surveys; and provides technical, advisory and evaluation assistance to member FPAs throughout the region.

As a result of this project, it is expected that an additional 2.8 million new clients will have received family planning information and services, 10 million clients will have been served, and participating FPAs will have strengthened management and family planning services in their respective communities. This project gives special assistance to FPAs not covered under USAID mission agreements, and the matching grant mechanism assures that A.I.D. does not become the sole sustaining donor to WHR.

Family Planning Services Division

PROJECT TITLE: Family Planning Service Expansion and Technical Support (SEATS)

PROJECT NUMBER: 936-3048

CONTRACT GRANT NUMBER: DPE-3048-Z-00-9011-00

DURATION: July 1989 - July 1994

FIVE-YEAR CONTRACT LEVEL: \$43,000,000

SCOPE: Low prevalence countries in sub-Saharan Africa and selected low prevalence countries in Asia, the Near East and the South Pacific.

PURPOSE: To expand the development of, access to and use of quality family planning services in currently underserved populations; and ensure that unmet demand for these services is addressed through the provision of appropriate financial, technical and human resources.

BENEFICIARIES: Couples in selected in low prevalence countries who wish to determine the size and spacing of their families.

DESCRIPTION: The Family Planning Service Expansion and Technical Support Project (SEATS) focuses on developing and strengthening family planning service delivery activities in low prevalence countries in sub-Saharan Africa and selected countries in Asia, the Near East and the South Pacific. This is accomplished through three overall programmatic emphases: 1) support for quality family planning service delivery subprojects; 2) technical assistance to strengthen subgrantee management and planning skills; and 3) design of sustainable subprojects.

SEATS will support the design and implementation of 50 to 60 new family planning service delivery subprojects in low prevalence countries. A large percentage of the budget is directed toward new subprojects and technical assistance in the areas of program planning and management, information/education/communication, training, commodity distribution, and management information systems (MIS).

Commodities and Program Support Division

PROJECT TITLE: Population Program Development and Support

PROJECT NUMBER: 932-0502

RSSA NUMBER: STB 0502-R-HC-2052

DURATION: October 1985 - Continuing

SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$9,366,000

PURPOSE: To improve program development, project design, implementation, and evaluation and to provide essential family planning services and resources that cannot be provided under other projects.

BENEFICIARIES: Population/family planning (P/FP) programs and staff in developing countries that receive technical assistance (TA) to improve their ability to develop, manage, and evaluate family planning service programs; and couples who benefit from improved access to such services.

DESCRIPTION: The project provides TA to develop, design, improve and evaluate P/FP projects through a RSSA with the Centers for Disease Control (CDC); local support costs (e.g., host country personnel) are normally borne by the user. Specific activities include the following: (a) evaluation of contraceptive distribution systems, including community-based programs; (b) development and/or improvement of management information, contraceptive commodity reporting and service statistics systems; (c) TA for workshops in program management, evaluation, and logistics management; (d) design and implementation of patient flow analysis models to improve the efficiency of clinic operations; (e) contraceptive requirement analysis; (f) design, implementation, and/or analysis of contraceptive prevalence surveys; (g) evaluation of the overall family planning data systems; (h) demographic analysis; (i) studies on the epidemiology of fertility control and pregnancy outcome; and (j) studies on the health and demographic impact of family planning activities and fertility control behavior. During FY 88 CDC consultants provided technical support services in a variety of P/FP areas to programs and organizations in 31 countries.

Commodities and Program Support Division

PROJECT TITLE: Contraceptive Procurement

PROJECT NUMBER: 936-3018

CONTRACT/GRANT NUMBER: Various

DURATION: 1981 through... (continuing)      SCOPE: Worldwide

PURPOSE: To provide a mechanism for consolidated purchases of centrally-procured contraceptives using central as well as bilateral/regional funds transferred by Regional Bureaus to S&T/POP's central account at the beginning of each operational year.

BENEFICIARIES: Recipients of family planning services in developing countries who are provided with safe and effective contraceptive products.

DESCRIPTION: Since the mid 1970's, A.I.D. has used a centralized funding and consolidated procurement system that aggregates country-specific requirements for selected contraceptives and for annual purchases. While the procurement and shipment of contraceptive commodities are handled in a consolidated manner, the budgeting and funding processes for commodities remain the responsibilities of individual Missions and regional bureaus as well as S&T/POP.

The central procurement system provides for the purchase of over a dozen brands of condoms (Ansell Incorporated), oral contraceptives for public sector programs (Wyeth International), oral contraceptives for social marketing programs (Syntex Laboratories, Inc.), vaginal foaming tablets (Ortho Pharmaceutical Corp.), and the Copper T-380 IUD (Finishing Enterprises, Inc.): For details on formulations, brands, prices, contract terms, and order procedures, please refer to the guidance issued by S&T/POP as part of the annual contraceptive procurement table package. In addition, beginning in FY 90 all shipping and warehousing of A.I.D.-supplied contraceptives will be handled through a single organization, Matrix International Logistics, Inc.

CONTRACTOR/GRANTEE: Contractors may change because purchases are made on a competitive basis when possible. Current contractors include:

Syntex Laboratories, Inc.  
Finishing Enterprises, Inc.  
Ortho Pharmaceutical Corp.  
Ansell Incorporated  
Wyeth International Ltd.  
Matrix International  
Logistics, Inc.

Commodities and Program Support Division

PROJECT TITLE: Family Planning Logistics Management

PROJECT NUMBER: 936-3038                      CONTRACT NO. DPE-3038-C-00-6064-00

DURATION: September 1986 - September 1991                      SCOPE: Worldwide

FIVE-YEAR CONTRACT LEVEL: \$11,998,000

PURPOSE: Improve the capability of developing country public and private sector organizations to administer more effective and efficient contraceptive logistics systems, including more reliable forecasting of contraceptive requirements; and to provide support to S&T/POP in managing the Office's Population Projects Database and the management system for tracking contraceptive orders, shipments and financial accounts.

BENEFICIARIES: Recipients of safe and effective family planning services; population and family planning organizations and cooperating agencies that need basic financial and program data on A.I.D. population projects in developing countries.

DESCRIPTION: The Centers for Disease Control (CDC) in Atlanta has been providing technical assistance in contraceptive supply management since 1974. This project complements and expands CDC work in this area. The contractor, John Snow, Inc. (JSI) collaborates with CDC and assists ST/POP/CPSD, USAID Missions, and developing country public and private-sector family planning organizations to carry out the following principal activities: 1) review and analyze estimates of contraceptive requirements for service delivery programs in each developing country; 2) evaluate and assist in designing and/or improving developing country FP logistics systems; 3) introduce simplified clinic, community-based, and warehouse management information systems; 4) conduct regional and in-country workshops on FP logistics; 5) develop regional technical assistance and training centers in Africa and Latin America; 6) assist USAID Missions in preparing annual Contraceptive Procurement Tables; 7) continue development of ST/POP/CPSD's computerized tracking system for centrally procured contraceptive commodities; 8) develop a microcomputerized P/FP Donor Contraceptive Information System; and 9) manage S&T/POP's Population Projects Database. During FY 89, logistics consultants provided technical assistance to population and family planning organizations in 29 countries.
