

The Pathfinder Fund  
BRAZIL STRATEGY DOCUMENT  
FY'87

27  
PNH84321

Country Allocations

During fiscal year 1987 (July 1986-June 1987), the Pathfinder Fund plans to commit \$611,000 in USAID funds \*, \$283,000 in private funds and \$336,000 from other sources \*\* to family planning activities in Brazil. This money will be used to support the following activities:

- o increase the availability of family planning client education and services, with a high concern for the user's perspective in low-income rural and urban areas.
- o provide theoretical and practical training for family planning providers and managers.
- o increase the availability of family planning education and services for adolescents, create adolescent services which are linked to community resources, and create an environment in which adolescent fertility issues can be described, debated and understood.
- o continue to build a constituency among women's groups and organizations to support the availability of family planning to improve women's status and to facilitate women's entrance into the labor force through the funding of dissemination of experience in supporting community-based, low cost day care services.
- o promote the creation of a national population/family planning policy in Brazil, create a public environment favorable to family planning, and promote the participation of nurses in family planning service delivery.
- o supply financial and technical assistance to Brazilian agencies involved in family planning training and service delivery, which can bridge the private/public sector service gap and serve as a model for the health component of the public program funded by the World Bank (Mission Grant, Cooperative Agreement Brazil - CAB)

From Pathfinder central five-year USAID grant, entitled the Cooperative Agreement Washington (CAW), awarded in October 1985.

\*\* Mission Grants, buy-ins, blocked assets.

Country Background

Covering 3.3 million square miles, Brazil is the fifth largest country in the world. With a current population of 143,300,000 and an estimated growth rate of 2.3%, it is the sixth most populous nation and one of the fastest growing countries among those with more than 100 million people.

The Brazilian population is a young population, with 37.5% under the age of 15. This implies that, even with the decline in fertility rates currently underway, the population will continue to increase well into the next century because of the large cohorts that will reach reproductive age. Even using a "low" population projection, the population of Brazil will double in the next thirty years to surpass 200 million by the year 2000. (International Encyclopedia of Population, pp. 65-71)

The average population density in Brazil averages to about 14 persons per square kilometer. It is important to recognize, however, that many rural and/or jungle areas have a very low population density (1-3 persons per square kilometer), while the state of Rio de Janeiro has a dense population of 625 persons per square kilometer, accounting for nearly 50% of the total population of Brazil. (International Encyclopedia of Population, pp. 65-71)

There has been no contraceptive prevalence survey done of Brazil as a whole, although individual surveys have been conducted in ten states. From these it is estimated that Brazil has an unusually high contraceptive prevalence rate of 61%.

A 1978 contraceptive prevalence study of Sao Paulo showed that about 64% of exposed women used contraceptives. This figure was about the same proportion of women as indicated in a 1965 survey. Most women who were not using contraceptives were poor and not well-educated, and for many it was geographically difficult to get to the clinics and depots. However, according to a 1979 BEMFAM survey of women in the poor northeast region of Piaui, contraceptive prevalence in such areas among the poorer populations is still as low as 31%.

Gallup surveys of public opinion have revealed an increasing interest in slowing population growth. In 1967, only 46% of those polled thought that fewer children should be born. In Sao Paulo the number of persons believing that two to three children was an ideal family size increased from 68% in 1977 to 82% in 1981.

Basic Demographic Data for Brazil

Total Population.....	143,300,000
Crude Death Rate.....	8 per 1,000
Crude Birth Rate.....	31 per 1,000
Annual Growth Rate.....	2.3%
Infant Mortality Rate (per 1,000 live births).....	71
Total Fertility Rate.....	4.1%
Per Capita GNP (in US\$, 1983).....	\$1,870.00
Percentage Urban/Rural.....	68/32
Literacy Rates Male/Female.....	76/73
Females as % of Formal Labor Force.....	24%
Fertility Rate Among Women Ages 15-19.....	57.4%
Total Population Under 15 Years of Age.....	37.5%
Percent Contribution of Women Ages 15-19 to Total Fertility Rate.....	7.1%
Contraceptive Prevalence (average of 10 independent states surveyed).....	61%

The Government of Brazil Position on Family Planning

The Brazilian government policies toward family planning have been changing since the 1974 Bucharest Conference on Population. At this meeting, at the last minute, Brazil adopted a favorable position on the right of every individual to have access to family planning services. Although this became the official position, there was no intention of implementing a program. In 1978, the Ministry of Health announced plans for a family planning program for the prevention of high risk pregnancies. This idea, however, encountered strong opposition from the Catholic Church and some political sectors. As a result, the choice of contraceptives under this program was reduced to only pills. The program did not succeed.

During his inaugural speech in 1979, Joao Batista Figueredo, then president of Brazil, spoke of the need to introduce family planning into government health programs and asserted the right of every individual and couple to have access to these services. Soon after, the legislation was amended to allow physicians and clinics to advertise family planning services as well as counseling on contraceptive use.

The Ministry of Social Security finally approved a family planning program this year. On April 9, 1986, the Ministry of Health sent a document on family planning care guidelines for use countrywide.

The Pathfinder Fund Program in Brazil

I. Family Planning Services

(Public Sector) The public sector has recently taken on responsibility for the provision of family planning services in Brazil, formerly something left exclusively to the private sector. Guidelines have been published by the Ministry of Health (MOH), but program implementation has not followed. The State Secretariats of Health are the major health providers in the country. They are under the State Government but receive guidelines and projects from the MOH. Most of them are interested in integrating family planning services with existing health programs, but have been cautious to do so because of political sensitivity to family planning and no clear instructions from Federal MOH in this regard. The Federal Government has a dual position: on the one hand they prepare guidelines for family planning programs while on the other they send new regulations and restrictions to family planning service implementation. Federal Government staff have criticised surgical family planning, IUD insertions, and most other methods. They are very much concerned with having a good educational component in their program, but what really happens is they have neither the clinical or administrative expertise to implement a good and effective family planning program in a short period of time. For political reasons, they are reluctant to accept the experience and know-how of private sector family planning institutions.

Private sector family planning service provision has been scarce and disperse so far due to the political efforts of a few individuals. The Municipal Secretariat of Health in Sao Paulo is now interested in implementing a family planning program for the city of Sao Paulo, but because of a lack of support from the public sector they are now soliciting assistance from international agencies.

(Private Sector) Private institutions are responsible for the majority of family planning services provided in the country today. IPPF-affiliated BEMFAM, which provides CBD services in many states of the country and is now increasing the number of its clinics to support these programs, is the major family planning provider in the country. ABEPF has about 150 affiliates from different institutions, medical schools and private and non-profit clinics, many of which started with Pathfinder support. ABEPF affiliates are autonomous and receive technical support and information from ABEPF and many of their commodities from CPAIMC. CPAIMC is a large organization working primarily in Rio de Janeiro where they have a large family planning/maternal and child health network. Some private sector family planning providers have developed their organizations in different regions and act as regional training centers.

It is important to mention that there is some association today between the public and private sector with regard to family planning. In its fight for survival, the private sector strives to integrate their services with those of the public sector. The private sector also sub-contracts their services to Social Security. However, the public sector accepts no technical support from the private sector - something which could be very valuable at this stage for the effective implementation of their proposed family planning programs. The atmosphere at this time is one of non-acceptance on both sides.

Expanding existing family planning services to low-income rural and urban areas, two major underserved populations in Brazil, is a priority for Pathfinder. To this end, Pathfinder proposes a number of activities in fiscal year 1987, including: work with non-profit, private organizations to include family planning services and commodities supply in their activities; work with state bodies to integrate family planning with existing maternal and child health services, and; increase the availability of post-partum family planning services in maternity hospitals.

## II. Training

(Medical Schools) Seventy-five medical schools in the country continue to be the major training resource for family planning. Family planning training standards are not yet accepted and integrated into the teaching of gynecology and obstetrics in medical schools, and many physicians are not effectively trained in this area. Seven medical schools have already received support from Pathfinder to implement theoretical and practical family planning into the curriculum. Others have received just commodities for the training sites. Medical school professors feel generally positive about family planning and that services and training need to be more widely offered in medical school settings.

Pathfinder proposes to standardize a family planning curriculum for the medical schools of Brazil, to improve the practical and theoretical training of medical students, and to improve family planning services at training sites.

(Government and Private Programs) Pathfinder proposes to identify potential training sites where government and private family planning program personnel can be trained in the management and delivery of family planning services.

(Drugstores) Pathfinder will increase the quality of information about, and provision of, contraceptives through drugstores by training drugstore employees and disseminating information to drugstore owners.

### III. Adolescent Fertility

There is no defined adolescent fertility policy in Brazil. Age at marriage differs according to socio-economic level. Early marriage or union is more common among the low socio-economic levels than in the middle-to-upper classes. In addition, there is no policy on contraceptive distribution to adolescents. Sex education is an issue which has been frequently discussed in universities, schools of biological sciences, and schools of education. Its implementation in high schools has been frequently discussed. Some private high schools have started to give sex education to their students. The acceptance and interest among parents and teachers is very high. There is no policy on denying school attendance of pregnant students.

Pathfinder proposes to increase family planning services and education to adolescents in Brazil.

### IV. Women

As in many other countries, laws regarding women's rights in Brazil have been evolving. In 1982, women gained the right to vote through a constitutional amendment. Workers' legislation is similar for both men and women, specifying that both men and women should earn the same salary for the same work and should have equal job opportunities. The law also provides for maternity leave and makes the number of years needed for retirement less for women than for men. With regard to marriage rights, women have the same rights and constitutional guarantees as men. However, the women's movement in Brazil is still fighting a law in the civil code which places the man as the head of the household. In the lower economic sectors, it is more common for the women to stay at home while men seek work outside.

Pathfinder proposes to continue its work in building a constituency among women's groups and organizations to support the availability of family planning and to improve the quality and responsiveness of services provided, and to improve women's status.

### V. Policy

As previously indicated, there is no population policy in Brazil. There have, however, been actions taken to create and implement a policy, which almost always come up against a good deal of public and political opposition, slowing the process repeatedly. Included in this debate is the controversy of nurses providing family planning services, which is illegal at this time.

Pathfinder proposes to promote the creation of a national population / family planning policy in Brazil, to create a public environment favorable to family planning and to promote the participation of nurses in family planning service delivery.

VI. Mission Grant

As previously indicated, the Government of Brazil is interested in integrating family planning with existing public health clinics and programs throughout Brazil. The USAID Mission in Brazil awarded Pathfinder a one-year grant to coordinate achieving the above objective, primarily through training in family planning to the health workers in the public programs, using the expertise and experience of the private sector. Currently, Pathfinder is funding four projects under this grant.

\*\*\*\*\*

The following pages outline Pathfinder's workplan for fiscal year 1987, as well as our long term goals for Brazil.

BRAZIL

Five Year Strategy 1985-1990 and FY'87 Workplan

---

I. SERVICES

Long Term Goal: To increase the availability of family planning client education and services, with a high concern for the user's perspective in low-income rural and urban areas.

FY'87 Objectives:

- A) To work with non-profit private organizations to support family planning services and to provide commodities, training and technical assistance.

Proposed Activities:

- CAW 040-1: Sergipe, Integrated Family Planning Services (Funded in FY'86, renewal not necessary until FY'88, Grantee: BEMFAM)
- CAW 041-1: Maranhao, Integrated Family Planning Services (Funded in FY'86, renewal funding not necessary until FY'88, Grantee: BEMFAM)
- Evaluation of BEMFAM CBD (Proposed)
- CPAIMC Commodity Distribution (Proposed)
- BEMFAM Commodity Grant (Proposed)
- CAW 033-1: Commodity Distribution (\$45,000 USAID/CAW Funds, February FY'87, Grantees: ABEPF, CPAIMC)
- TIN 013: ABEPF Annual Meeting (\$18,000 USAID/CAW Funds, & \$28,000 from Mission Grant, October FY'87, Grantee: ABEPF)
- CAW 028-2: ABEPF Technical Information Center (\$15,000 USAID/CAW Funds, February FY'87, Grantee: ABEPF)
- CAW 035-2: Promotion of Family Planning Among Women's Groups in Londrina (\$30,000 USAID/CAW Funds, February FY'87, Grantee: CLAM)
- (New) Supervision of Family Planning Clinics in Bahia (\$15,000 USAID/CAW Funds, February FY'87, Grantee: Universidad Federal do Bahia)

- CAW 036-1: CPAIMC Natural Family Planning Services (Funded in FY'86, no renewal necessary)
  - (New) Finish Evaluation of Pro-Pater (\$4,000 USAID/CAW Funds, October FY'87, Grantee: PRO-PATER)
- B) To work with state secretariats of health to introduce family planning as a part of maternal and child health services, and to provide personnel training.

Proposed Activities:

- PF 018-1: Goias Secretariat of Health Family Planning Program (Funded in FY'86, project being redesigned)
  - (New) SUDESCO Family Planning in Urban Social Centers (\$25,000 Private Funds, March FY'87, Grantee: SUDESCO)
- C) To work with the social security system to provide training and commodities.

(No specific activities are proposed for this fiscal year.)

- D) To work with private sector for-profit groups, including industry, labor unions and HMOs.

Proposed Activities:

- CAB/PIN 002-1: Family Planning Services, Industrial Central, Manaus, (Proposed for FY'88, Grantee: SESI)
- E) To increase the availability of post-partum services to adults and adolescents in maternity hospitals.

Proposed Activity:

- (New) Post-Partum Services to Adults and Adolescents (\$30,000-\$120,000 Private Funds, March FY'87)
- CAW 011-5: Salvador Adolescent Fertility Program (\$40,000 USAID/CAW Funds, February FY'87, Grantee: Maternidade Tsylla Balbino)
- CAW 025-4: Family Planning Services at the Encruzilhada Maternity Hospital in Recife (\$26,000 USAID/CAW Funds, August FY'87, Grantee: Encruzilhada Maternity Hospital)

## II. TRAINING

Long Term Goal: To provide theoretical and practical training for family planning providers and managers.

FY 87 Objectives:

### Medical Schools

- A) To encourage medical schools to make family planning an official part of their curriculum through a central organization.

Proposed Activity:

- CAW/Brazil: PIN 001-3 Family Planning Teaching and Services at the Clinic of Medical Sciences of Alagoas (\$16,000 USAID Funds, August FY'87, Grantee: Santa Monica Maternity Hospital)

- B) To improve the quality of practical and theoretical teaching in medical schools.

Proposed Activity:

- Family Planning Services at Encruzilhada Maternity Hospital (See I. SERVICES, 1, B)

- C) To improve the quality of family planning services at medical student training sites.

Proposed Activities:

- CAW 032-1: Production of Family Planning Teaching Materials for Physical and Medical Student Training (Funded in FY'86, no renewal funds necessary)
- (New) Seminar on Medical Schools (\$45,000 USAID/CAW Funds, February FY'87, Grantee: FEBRASGO)
- (New) Family Planning Consultants in Medical Schools (\$25,000 USAID Funds, April FY'87, Grantee: FEBRASGO)
- (New) Translation and Printing of the Health Provider's Guide to Contraception (\$10,000 Private Funds, November FY'87, Grantee: Pathfinder)
- Support for Medical School Programs (Proposed)
- CAW 043-1: Introduction to Family Planning Services in Medical School Training in Amazonas (Funded in FY'86, no renewal funds necessary)

Government and Private Programs

- B) To develop or identify centers in which to train family planning providers from government and private programs.

Proposed Activities:

- (New) Training Center (\$30,000 USAID/CAW Funds, April FY'87, Grantee: IHRPE)
- (New) Travel and Training Grants, unspecified (\$50,000 USAID/CAW Funds, March FY'87)
- Voluntarios Sociales Family Planning Counseling (Proposed for funding in FY'88)
- (New) Panel on Family Planning for FLASOG Meeting (\$10,000 USAID/CAW Funds, March FY'87, Grantee: FLASOG)

C) Drugstores

(No specific drugstore training activities are planned for this fiscal year, save that Pathfinder-Boston is to speak with SOMARC to learn of its plans for FY'87 and FY'88 and communicate findings to the Pathfinder Representative for Brazil.)

- D) User Perspective. To train family planning providers in ways to improve the quality of service delivery.

Proposed Activity:

- (New) User Perspective Seminar (\$75,000 New Funds, May FY'87)

II. ADOLESCENT FERTILITY

Long Term Goal: To increase the availability of family planning services and education for adolescents.

FY 87 Objectives:

- A) To support adolescent education and service projects, and provider training.

Proposed Activities:

- (New) Travel and Training Grants to CORA and El Camino (\$15,000 USAID/CAW Funds, June FY'87)

- CAW 011-5: Salvador Adolescent Fertility Program (See I. SERVICES, B)
- CAW 025-3: Recife Adolescent Fertility Program (Funds allocated in FY'86, no renewal funds necessary)
- CAW 020-1: ABEPF Adolescent Education and Services (\$100,000 USAID Funds, March FY'87, Grantee: ABEPF)
- CAW 030-1: Family Planning and Sex Education in Low-Income Neighborhood (\$28,000 USAID/CAW Funds, August FY'87, Grantee: CPAIMC)

Long Term Goal: To create adolescent services which link community resources.

FY 87 Objectives:

- A) To support the development of an adolescent center for young women.

Proposed Activity:

- PF 032-1: Orientation Center for Young Women in Manaus (Funds allocated in FY'86, no renewal funds required until FY'88)

Long Term Goal: To create an environment in which adolescent fertility issues can be described, debated and understood.

Proposed Activities:

- (New) Adolescent Prevalence Survey in Salvador, Bahia with the Centers for Disease Control (CDC) (\$40,000 USAID/CAW Funds, May FY'87)
- Adolescent Data Collection and Documentation (Proposed)

#### IV. WOMEN

Long Term Goal: To continue to build a constituency among women's groups and organizations to support the availability of family planning, to improve quality of care, and to improve women's status.

FY 87 Objectives:

- A) To support the National Council of Women.

Proposed Activity:

- PF/Brazil: PIN 034-1: Women's Issues and Project Planning Course (\$31,000 Private Funds, October FY'87, Grantee: Maria Augusta Rosa Rocha)

- B) To support the adaptation of a feminist reference book on women's health issues and strengthen the development of the Brazilian women's health movement.

Proposed Activity:

- PF/Brazil: PIN 033-1: Adaptation of Our Bodies, Our Selves (\$13,000 Private Funds, October FY'87, Grantee: Pathfinder)

- C) To build bridges between feminist groups and traditional family planning organizations.

Proposed Activities:

- Involve Feminist and Traditional Groups in the User Perspective Seminar (See II, TRAINING, D)
- Reprint Fundacion Carlos Gargas Booklets and Provide Training in their Use (\$40,000 USAID/CAW, November FY'87, Grantee: BEMFAM)

Long Term Goal: To support women's entrance into the labor force through the funding of dissemination of experience.

FY 87 Objective:

- A) To implement a daycare project and evaluate daycare projects in Brazil.

Proposed Activity:

- PF 017-1: Training Courses for Women in Community Centers, Manaus (Funded in FY'86, Renewal funds not necessary at this time)
- Evaluation & dissemination of regional projects.

IV. POLICY

Long Term Goal: To promote the creation of a national population / family planning policy.

FY 87 Objectives:

- A) To promote dialogue among leaders on population issues at municipal, state and national levels.

Proposed Activity:

- CAW 002-2: Second Brazil Demographic Analysis for Population Policy (Funded in FY'86, no renewal funding necessary at this time)

- B) To support the preparation and dissemination of materials for policymakers.

Proposed Activity:

- Revision and Dissemination of Population Policy: A Manual for Policymakers and Planners (Proposed for FY'88 funding)

- C) To promote the establishment of state level family planning policies and programs.

Proposed Activities:

- Send State Secretariat to CPAIMC (Funded in FY'86, no renewal funds necessary at this time)
- Send Social Security Representatives to Mexico (Funded in FY'86, no renewal funds necessary at this time)

- D) To establish an informal coalition of family planning organizations and programmatic issues common to all.

Proposed Activity:

- PF 031-1: Coalition Meeting of Family Planning Leaders (\$9,000 Private Funds, August and March FY'87, Grantee: Pathfinder Brazil)

Long Term Goal: To create a public environment favorable to family planning.

FY 87 Objectives:

- A) To promote public debate and create a favorable environment for family planning in Brazil.

Proposed Activities:

- Explore hiring a public relations/lobbyist for family planning (Proposed)
- Determine BEMFAM's activities in the area of public policy (Proposed)
- Determine Pathfinder's role in influencing public policy based on need (Proposed)
- Manage the Media Workshop by Family Planning Leaders (Proposed)

Long Term Goal: To promote the participation of nurses in family planning service delivery.

FY 87 Objectives:

- A) Introduce key family planning doctors to the concept of IUD insertions by nurses.

Proposed Activities:

- (New) Travel and Training Grants to Observe IUD Insertions by Nurses in Colombia (\$15,000, March FY'87)
- Disseminate CPAIMC Study Results (Proposed)

V. MISSION GRANT

Long Term Goal: To supply financial and technical assistance to Brazilian agencies involved in family planning training and service delivery, which can bridge the private/public sector service gap and serve as a model for the health component of the new World Bank loan to Brazil (a one-year grant from 07/01/86 to 05/31/88).

FY 87 Objective:

- A) To fund four family planning training and service projects in existing public sector health programs.

Proposed Activities:

- CAB 001: Family Planning Program in the Fourth Administrative Region, State of Bahia (\$136,000, January FY'87, Grantee: Bahia Secretariat of Health)
- CAB 002: Family Planning Services in Two Sattelite Cities in the Federal District (\$51,000, October FY'87, Grantee: SESI)
- CAB 003: Training Courses in International Family Planning and Health Services for Employees of Various Secretariats of Health (\$50,000, July FY'87, Grantee: BEMFAM)
- CAB 004: Promotion of Maternal and Child Health Care Quality Improvement in States of Maranhao and Sergipe (\$99,000 Other Funds, July FY'87, Grantee: BEMFAM)
- CAB 005: ABEPF Annual Meeting (\$28,460, November FY'87, Grantee: ABEPF)
- CAB 006: FP Teaching & Services at University of Brazilia Medical School (\$70,000, January FY'87, Grantee: University of Brazilia Medical School)
