# The Documentation Center Bibliography of Holdings

The Documentation Center is maintained through the Price Waterhouse Privatization and Development Contract, funded by the Bureau of Private Enterprise in the U.S. Agency for International Development.

## The Call Numbering System

All reports in the Documentation Center are filed using a call numbering system that has been developed to be user-friendly. Each document is initially classified into one of four groups, representative of the document's contents: Country, Issue, Sector, or General.

- Documents classified as "Country" focus on a privatization within a specific country or area of the world.
- Documents classified as "Issue" discuss a specific privatization issue.
- Documents classified as "Sector" focus on privatization within a certain sector.
- Documents classified as "General" discuss broad themes in privatization, not specific to a privatization issue, sector or country.

The first letter of a document's call number will describe which of these four classifications it has been assigned (C = Country, S = Sector, I = Issue, G = General)

After the first-letter code, two sets of three-letter codes complete the call number. By section, the codes are:

C:[country]/[author]  
I:[issue]/[author]  
S:[sector]/[author]  
G:[author]/[title]

The three letter codes, when possible, are the first three letters of a word. For example, the call number "C:PHI/REE" describes a document on Philippine privatization whose author's last name starts with "Ree."

A list of the standardized three-letter codes is provided in the Country, Sector, and Issues sections of this bibliography.

### Bibliographic style

All of the documents in this bibliography are printed in the following format:

[Title] [Author(s) Name] [Number of Pages] [Date of Publication]

A more complete listing of each entry is available in the Documentation Center

### Research Assistance

Assistance is also readily available in the Documentation Center for researchers requiring specific help in locating documents. The Microdis computer cataloging program allows researchers to search and cross-reference documents via author, key word, title, and date of publication.

### Microdis

As mentioned, the Documentation Center uses Microdis as its computer cataloging system. Microdis was designed by Paul Howard of Logical Technical Services, under contract from the U.S. Agency for International Development.

To look-up reports on privatization on a specific country:

- Go to the region section that contains your country
- Find the four-letter code that identifies your country (e.g. "India = C:IND")
- Find the reports whose call numbers start with the same four letters  
(they are listed alphabetically)
