RESEARCH TITLES DATABASE

<u>RESEARCH SUBJECT/TYPE</u>	<u>PAGES</u>
ORT/Control of diarrheal diseases	1
Immunization/vaccine-preventable diseases	57
Management, operations and performance	84
Epidemiologic and demographic research	111
High-risk births and family planning	146
Nutrition (general)	164
Vitamin A	190
Infant feeding	199
Breastfeeding	204
HIV/AIDS	208
Health care financing/economics	218
Maternal and neonatal health	237
Vector-borne diseases	253
Information, education and communications	275
Basic research (basic biomedical)	286
General titles (non-descriptive and vague titles)	304
Other health and development	318
Water supply and sanitation	328
Acute respiratory infections	338
Vaccine development	345

USAID HEALTH INFORMATION SYSTEM

The USAID Health Information System, managed by the Center for International Health Information (CIHI/ISTI), is responsible for:

- maintaining a series of databases used to monitor the evolution of projects in USAID's health and child survival portfolio, including the allocation of funds to specific types of activity; and
- gathering demographic, child survival and health status information from a variety of sources, and using that information for both analysis and reporting purposes.

HEALTH AND CHILD SURVIVAL PROJECT QUESTIONNAIRE

Each year, on behalf of USAID, CIHI/ISTI implements a survey of USAID health activities through a questionnaire administered to projects and sub-projects in USAID's health portfolio. In FY 90, about 550 questionnaires were distributed of which approximately 500 were returned.

- The questionnaires summarize project inputs and outputs, and provide descriptive information regarding strategies employed as well as project highlights.
- The database formed from responses to the questionnaire is an integral part of the USAID Health Information System and a primary source of information used in reporting on individual projects and on the scope of USAID activities regarding specific interventions.

RESEARCH DATABASE

The USAID Health and Child Survival Project Questionnaire includes a set of questions on USAID-funded research activities in health.

- In FY 1990, a database containing information on more than one thousand research activities, both completed and ongoing, was initiated.
- The database includes:
 - the title of the research activity or publication,
 - the duration of the research activity (in years) or publication date,
 - reference to the project supporting the research, and
 - the primary researcher, affiliation and address.
- Upon request, data can be sorted and reported by:
 - project,
 - country and/or region,
 - type of research (e.g., diarrheal disease; nutrition), and
 - fiscal year reported.
- A listing of research titles reported in FY 1989 is also available by country and by project.

The quality and comprehensiveness of the database is dependent on complete and accurate reporting.
