**USAID FUNDED PROJECTS IN FY 1988 REPORTING
ACUTE RESPIRATORY INFECTION (ARI) ACTIVITY**

The Health Projects Database (HPD) is a comprehensive inventory of health related projects that have been funded by the U.S. Agency for International Development (USAID) since 1975. Supported by USAID's Office of Health, Bureau for Science and Technology, the HPD tracks bilateral, regional and centrally-funded projects and sub-projects with a health component, including child survival, AIDS, nutrition, water supply and sanitation, and other health related activities. Projects are identified for the HPD through the annual Health and Child Survival Questionnaire, Annual Budget Submissions (ABS), and the Congressional Presentation (CP). The HPD includes some, but not all, health and nutrition related projects funded with local currency (PL 480) or Population Account monies. Project Development and Support (PD&S) funded activities are included in the HPD when they have been identified as health related in the CP, ABS or questionnaire. Large urban water supply and sanitation projects are maintained in a separate database and are not included in the HPD.

This is a listing of every project, ordered by region and country, that reported ARI activity in the annual Health and Child Survival Questionnaire, or in new project descriptions in the ABS or the CP, as recorded in the HPD. Various other official agency documents such as Project Papers and cables are also periodically reviewed to identify ARI activities. The report includes implementing agents, geographic scopes, and whether or not the project supports research activities. The report does not provide funding data.
