PREFACE & SUMMARY OF KENYAN MARKET OPPORTUNITIES

This desktop report is one of a series commissioned by the USAID-funded Kenya Export Development Support (KEDS) Project to assess the market potential for a variety of Kenyan fresh and processed fruits and vegetables, as well as fresh cut flowers. Other countries in this market survey series include: Japan, the United States, Germany, France, the United Kingdom, the Netherlands, Dubai, Bahrain, and Saudi Arabia.

Singapore and Hong Kong were combined into one report based on their shared characteristics:

- Small populations relative to the other markets studied (roughly 2 million in Singapore and 6 million in Hong Kong);
- Small island city states, with correspondingly low domestic food production levels;
- Duty-free market access, with relatively low non-tariff barriers;
- Newly industrialized countries (NICs) with relatively high per-capita incomes (about US\$12,000) and growing middle/upper income populations; and
- Bordering low-cost producing countries supply much of their food needs -- Hong Kong (China), Singapore (Malaysia, Indonesia).

Limitations of Data

Of all the countries, Hong Kong and Singapore had the least amount of desktop information available. While import statistics were relatively easy to obtain, many of the Kenyan products studied were not broken down in these statistics. Furthermore, much information (such as wholesale prices and price trends, varietal preferences, grades and standards) could not be obtained without conducting on-site field research (which was not part of this project). Therefore, the primary information contained in this report includes:

- General descriptions of the market and distribution systems for fresh and processed fruits and vegetables; and
- Analyses of imports, including annual trends, sources of supply, seasonality, and import unit values.

Kenyan Market Opportunities

The lack of available data prevents definitive product rankings, such as those done for previous reports in this market series. However, enough information was available and analyzed to determine overall market prospects -- see Chart 1 below. Those products which are bolded may hold promise for Kenyan exporters (based on the limited data available). Additional research for these products is required.

TABLE 1: OVERALL MARKET PROSPECTS: HONG KONG & SINGAPORE		
	HONG KONG	SINGAPORE
OVERALL MARKET		
Strengths	<ul style="list-style-type: none"> ● High per capita GNP, good market for high value fruits and vegetables; ● Duty-free port, limited non-tariff barriers 	<ul style="list-style-type: none"> ● High per capita GNP, good market for high value fruits and vegetables; ● Distance from Kenya is only slightly more than to U.K. (7,451 kms); ● Duty-free port, limited non-tariff barriers;
Weaknesses	<ul style="list-style-type: none"> ● Relatively small market of only 6 million; ● Large supplies entering from China and other low-cost Asian countries; ● Nearly 9,000 kms from Kenya, transport may be a problem; 	<ul style="list-style-type: none"> ● Relatively small market of only 2 million; ● Large supplies entering from Malaysia, Indonesia, and other low-cost Asian countries; ● Transportation methods to market could be troublesome;
PRODUCTS		
Mango, Fresh	<ul style="list-style-type: none"> ● Mango imports have nearly tripled over last 6 years, now at US\$12.3 million (14,706 MTs); ● Low-cost Asian countries supply most import needs (the Philippines alone supplies 88 percent of imports). 	<ul style="list-style-type: none"> ● Import statistics grouped with avocados and guavas; ● Malaysia, Thailand, and the Philippines supply majority of import requirements, with small amounts entering from India and Pakistan.
Avocado, Fresh (Singapore Only)	<ul style="list-style-type: none"> ● 1991 avocado imports of 2,055 MTs (US\$2.9 million); ● China and other nearby Asian countries (primarily Thailand) supply nearly 90% of imports -- Australia and the U.S. account for most of the remainder. 	<ul style="list-style-type: none"> ● Imports statistics grouped with mangoes and guavas; ● Appears by looking at sources, that Australia and New Zealand provide majority of product.
Strawberry, Fresh	<ul style="list-style-type: none"> ● Imports up substantially since 1985, now nearing US\$8 million (1,829 MTs); ● Distant suppliers (U.S., New Zealand, and Australia) supply most of imports -- U.S. with 70% share. 	<ul style="list-style-type: none"> ● 1991 imports of 564 MTs (US\$2.7 million); ● U.S., Australia, and New Zealand supply majority of imports; ● Monthly demand appears steady.

TABLE 1: OVERALL MARKET PROSPECTS: HONG KONG & SINGAPORE

	HONG KONG	SINGAPORE
Cherry Tomato, Fresh	<ul style="list-style-type: none"> • No breakdown for cherry type in data; • China supplies 61 percent of all tomato imports, though distant suppliers (U.S., Netherlands, Australia) supply over 20 percent of market; • Small shipment (5 MTs) reported from Zimbabwe in 1991. 	<ul style="list-style-type: none"> • 1991 imports US\$2.9 million (6,041 MTs); • Malaysia supplied 61% of imports in 1991, although Australia also was a major source (23%) – very high value tomatoes are also imported from the Netherlands.
Mangetout, Fresh (Singapore Only)	<ul style="list-style-type: none"> • No breakdown for snow peas in data; • China supplies 95 percent of imports of all fresh peas. 	<ul style="list-style-type: none"> • No breakdown in import data; • Harmon survey reported Zimbabwe product on the market in 1990.
Asparagus, Fresh	<ul style="list-style-type: none"> • No statistics available. • Regional producers expected to supply most import requirements with low-cost product. 	<ul style="list-style-type: none"> • No import statistics available; • Thailand supplies most imports (although U.S. Jumbo receives premium).
Okra, Fresh	<ul style="list-style-type: none"> • No statistics available. 	<ul style="list-style-type: none"> • No statistics available, although okra considered a low value product primarily for the lower income classes.
French Beans, Fresh	<ul style="list-style-type: none"> • No statistics available. • Regional producers expected to supply most import requirements with low-cost product. 	<ul style="list-style-type: none"> • No data available.
Chili Pepper, Fresh	<ul style="list-style-type: none"> • No statistics available. 	<ul style="list-style-type: none"> • 1991 imports of 6,241 MTs (US\$3.5 million); • Malaysia and Thailand supply 99 percent of import requirements.
Cut Flowers, Fresh	<ul style="list-style-type: none"> • Market size is relatively small, with imports totaling only US\$18.7 million in 1991; • Supplies from distant countries high – eg. the Netherlands with 32.1% import share is largest supplying country. South Africa supplied US\$305 thousand in product in 1991. 	<ul style="list-style-type: none"> • Total 1991 imports (excluding orchids) stood at US\$10.6 million; • Malaysia supplied 71 percent of market – largest distant suppliers were the Netherlands (13%) and New Zealand (4%).
Processed Products	<ul style="list-style-type: none"> • Products which may warrant further analysis include: frozen vegetables (US\$24 million in 1991 imports); canned vegetables (US\$40.3 million); and fruit juices (US\$14.2 million with significant South African supplies). 	<ul style="list-style-type: none"> • Products which may warrant further analysis include: frozen vegetables (US\$7.6 million in 1991 imports) and fruit juices (US\$6.5 million).

PART 1

HONG KONG

SECTION I: HONG KONG MARKET OVERVIEW

Hong Kong, a dependent territory of the United Kingdom, covers an area of 990 km². Ninety-eight percent of the population of just under 6 million is Chinese. Cantonese and English are the official languages. Hong Kong's status is expected to change in 1997, when it should revert to China by prior agreement with the United Kingdom.

Only 7 percent of the land is arable, with only 1 percent in permanent crops. Therefore, imports supply the majority of domestic food needs. Imports of all fresh fruits and vegetables stood at US\$750 million in 1990.

Kenya's Current Position in the Market

Kenyan total exports to Hong Kong stood at HK\$37.7 million (US\$4.9 million)¹ in 1991, up from HK\$18.2 million (US\$2.3 million) a year earlier. Fish and fish preparations accounted for more than half of all imports from Kenya, followed by textile fibers, crude animal/vegetable matter, leather and leather products, and coffee/tea. None of the products studied under this report, either in fresh or processed forms, entered the market in either year. In fact, there are no recorded imports of any fresh or processed fruit or vegetable.

Domestic Production

Domestic production statistics for individual fruit and vegetable products are not readily available. In 1989, domestic producers supplied 131 thousands MTs or 33 percent of fresh vegetable requirements. This is down 33 percent from 195 thousand MTs in 1980, when domestic producers supplied 39 percent of market needs.

The vast majority of fresh fruit demand is supplied by imports. In 1989, domestic production was only 3 thousand MTs, or 0.5 percent of total market supplies for that year. Local fresh fruit production has varied between 1-5 thousand MTs for the period 1980-1989.

According to the U.S. Department of Commerce, there were 943 food manufacturing/processing establishments (with 17,728 employees) established in Hong Kong as of September 1989. Gross output was estimated at US\$837 million in 1987. Major products include instant noodles,

¹ Local currencies are converted into U.S. dollars based on annual average exchange rates. One U.S. dollar, therefore, equals the following Hong Kong dollar equivalents:

1985	HK\$7.79	1988	HK\$7.81	1991	HK\$7.77
1986	HK\$7.80	1989	HK\$7.80		
1987	HK\$7.80	1990	HK\$7.79		

Hong Kong's manufacturing sector has been increasingly shifting operations to China (especially to the Pearl River Delta, the agricultural heartland of Guangdong province). As land and labor continue to become more scarce in Hong Kong, domestic production (both in fresh and processed produce) can be expected to further decline.

Sources: Trade Department, Agriculture and Fisheries Department

Import Regulations

Hong Kong is a duty-free port and, therefore, no import tariffs are charged on fresh or processed fruits and vegetables, or on fresh cut flowers.² Phytosanitary restrictions are not strict, although in 1997 (when China takes over) there is some question as to whether China will impose its much harsher phytosanitary regulations (primarily targeted at the fruit fly).

Market Distribution Systems

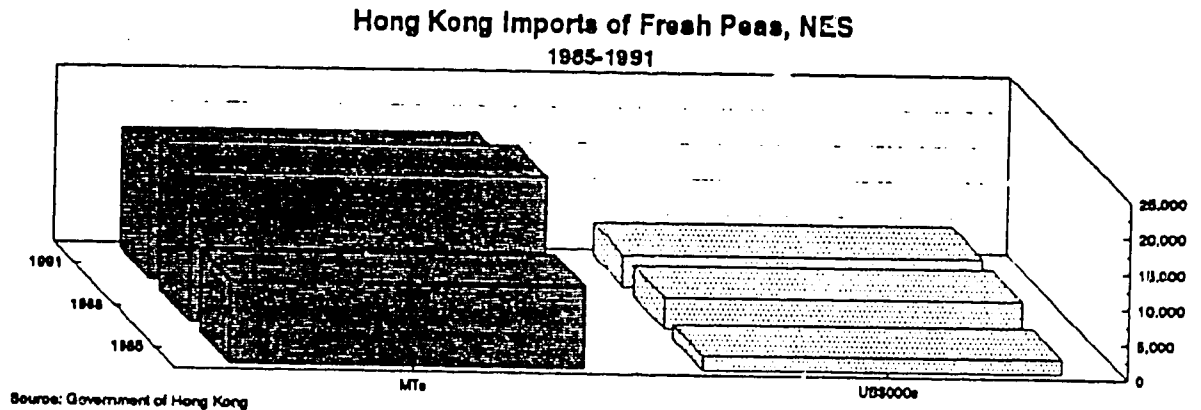

The Hong Kong market distribution system is marked by multiple layers, as shown in the organizational chart below. There are two wholesale markets, Cheung Sha Wan and Kennedy town, located on Kowloon and Hong Kong island. Many small importers and wholesalers are present at these markets.

² There is a very small flat charge (HK\$5.00) for each shipment of fresh and processed fruits and vegetables. Payment is due upon presentation of the import declaration.

SECTION II: FRESH PRODUCE & CUT FLOWER IMPORT TRENDS

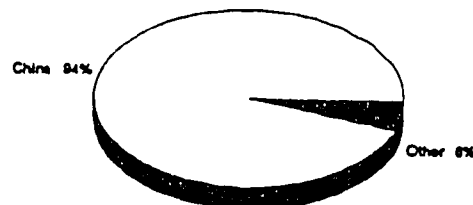

Peas

Hong Kong's imports of fresh peas have grown from 11,685 MTs (US\$2.0 million) in 1985 to 17,057 MTs (US\$4.4 million) in 1991. 1991 imports, however, are down from the 21,064 MTs (US\$4.4 million) recorded in 1988.

China supplies the vast majority of import requirements, with a 94.4 percent import market share or 16,107 MTs in 1991. The United States and Canada combined for a 4.6 percent market share in 1991, while ten other suppliers provided the remaining 1.0 percent of imports.

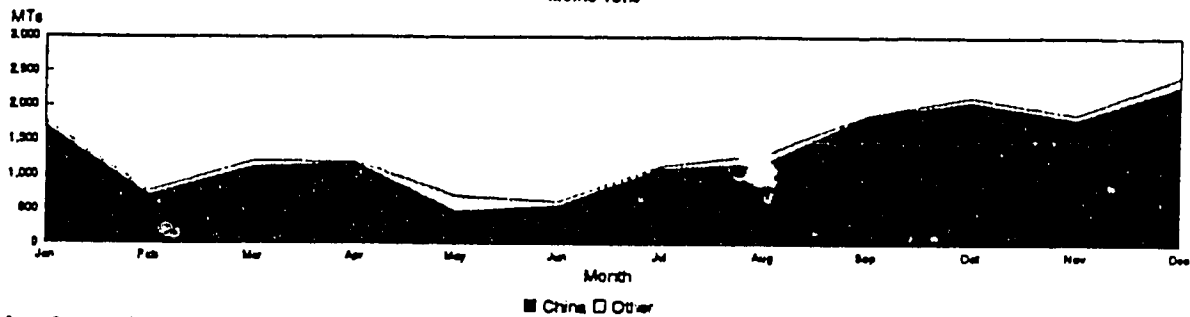

Hong Kong Import Market Share - Fresh Peas
1991, by weight

Source: Government of Hong Kong

In 1991, import of fresh peas were highest during the period September-January, when monthly imports exceeded 1,500 MTs per month. Imports levels were lowest from February-August, and bottomed out at 629 MTs in June. China and, with much smaller quantities, the United States were the only countries which supplied the market in every month of 1991.

Hong Kong Imports of Fresh Peas, 1991
Metric Tons

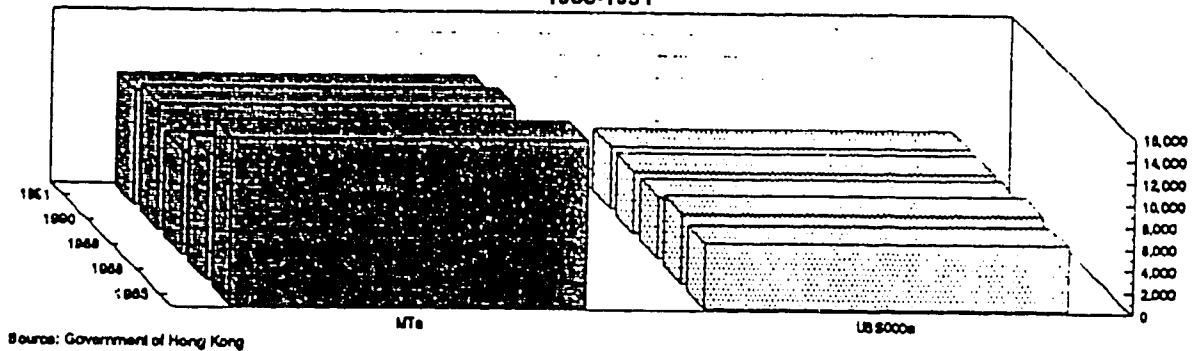

Source: Government of Hong Kong

Import unit values averaged US\$0.26/kg in 1991, just slightly above China's average unit value of US\$0.23/kg. Other countries generally had much higher unit values, although these statistics are not so reliable as they are based on very small quantities. The 1991 unit value of US\$0.26/kg compares favorably with those recorded in 1988 (US\$0.21/kg) and 1985 (US\$0.17/kg). During 1991, unit values were highest during May-June (a period of low supply with unit values ranging from US\$0.39/kg to US\$0.44/kg) and during November-December (US\$0.33/kg to US\$0.31/kg).

Tomatoes

Imports of fresh tomatoes have fluctuated over the period 1985-1991. In 1985, imports stood at 15,206 MTs (US\$5.9 million). By 1988, imports had decreased to 11,490 MTs (although value increased to US\$6.4 million). Imports decreased further in 1989, before increasing in 1990 and then falling back again in 1991. 1991 import levels were 10,390 MTs (US\$5.6 million).

Hong Kong Imports of Fresh Tomatoes
1985-1991

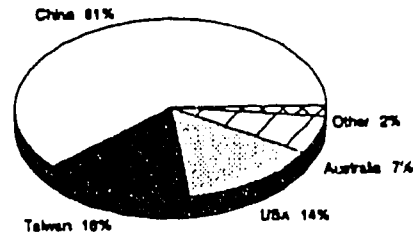

Source: Government of Hong Kong

China supplied 61.1 percent of import requirements in 1991. Other suppliers included Taiwan (15.8%), the United States (14.4%), Australia (6.7%), and the Netherlands (1.3%). Six other countries made very small shipments in 1991, among them Zimbabwe with 5 MTs (US\$38

thousand). Since 1985, imports from the U.S. and Taiwan have steadily decreased. In 1985, both countries combined for 89 percent share of the market. Their exports to Hong Kong have decreased as low-priced Chinese supplies have become available (Chinese shipments are up over 700 percent since 1985). If this trend continues, it is likely that China may become the only significant supplier in the market.

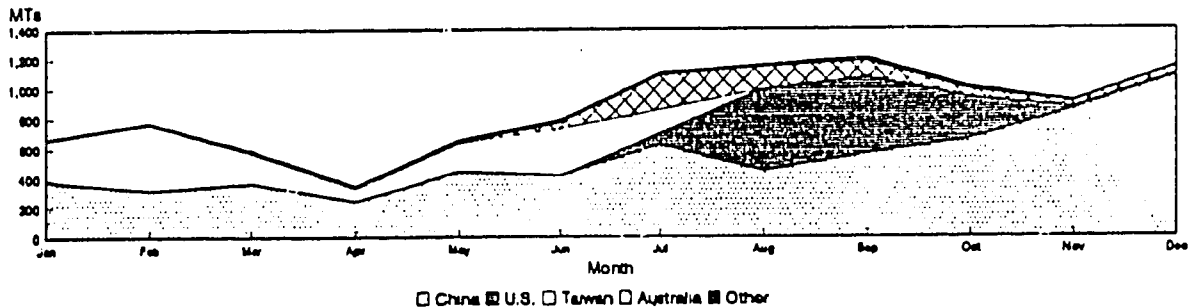

**Hong Kong Import Market Share - Fresh Tomatoes
1991, based on weight**

Source: Government of Hong Kong

In 1991, monthly shipments were highest during the period July-December. During this time imports were above 1,000 MTs in all but one month. Four countries supplied in every month of 1991: the United States (although 91 percent entered from August-October), the Netherlands (very small quantities), Australia (69 percent during the period July-September), and China. While Chinese shipments were highest late in the year, it made significant shipments in every month.

**Hong Kong Imports of Fresh Tomatoes, 1991
Metric Tons**

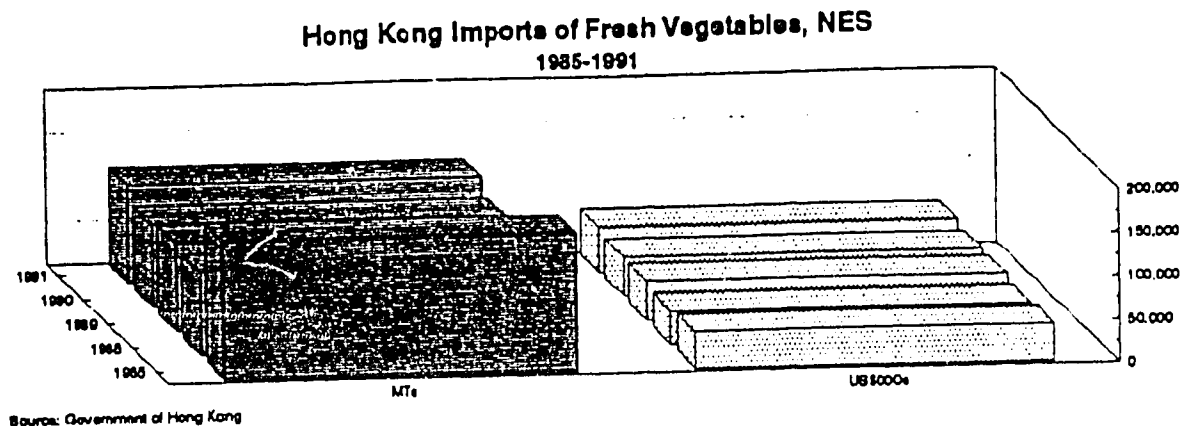

Source: Government of Hong Kong

Average import unit prices have increased from US\$0.39/kg in 1985 to US\$0.54/kg in 1991. In 1991, Chinese average unit price was the lowest at US\$0.30/kg, followed by Taiwan with US\$0.34/kg. Other suppliers had significantly higher unit prices (at least double).

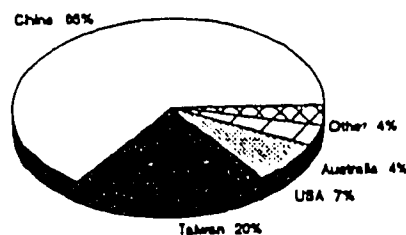

Other Fresh Vegetables

Beans, asparagus, and okra (the other products included in this market survey exercise) are not reported separately in available Hong Kong trade statistics, but are included in the "Other Fresh/Chilled Vegetables" category. Imports have fallen from 159,801 MTs in 1985 to 113,399 MTs in 1991. Over the same period, imports in value terms have increased from US\$42.1 million to US\$52.9 million.

As with other fresh vegetables, China supplies the majority of the market with an 1991 import market share of 64.9 percent. Other significant suppliers include Taiwan (20.3 percent), the United States (7.4 percent) and Australia (3.7 percent). South Africa and Zimbabwe made small shipments in 1991, with the latter exporting 41 MTs (US\$269 thousand).

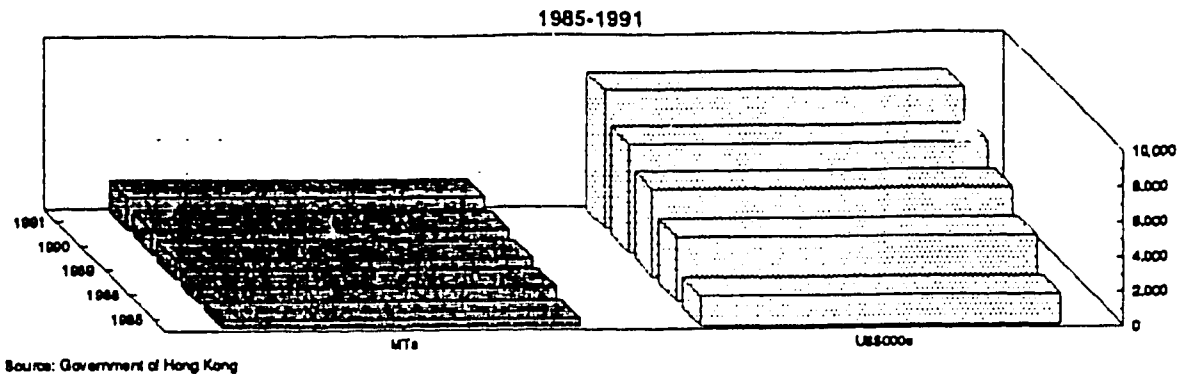

**Import Market Share - Other Fresh Veg., NES
1991, based on weight**

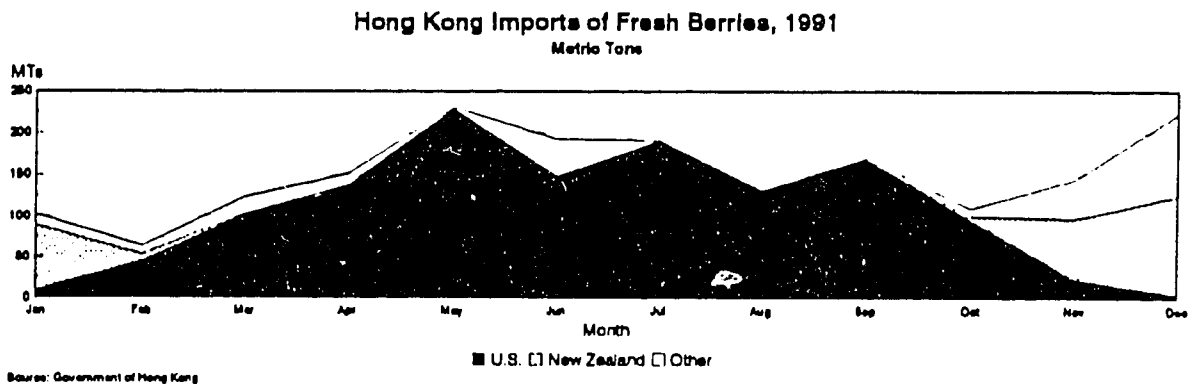

Source: Government of Hong Kong

Berries

Hong Kong's trade statistics combine straw/berries with all other berries in one statistical category. Imports of fresh berries have risen dramatically since 1985, going from 478 MTs (US\$1.7 million) to 1,829 MTs (US\$7.9 million) in 1991. 1991 imports are up over 30 percent, in volume terms, from 1990 levels.

The United States supplied 70.0 percent of total imports in 1991, with significant levels also entering from New Zealand (15.8%) and Australia (8.9%). Nine other suppliers delivered to the Hong Kong market in 1991, although none supplied more than 50 MTs. The United States, New Zealand, and Australia have consistently supplied the majority of the market over the past six years.

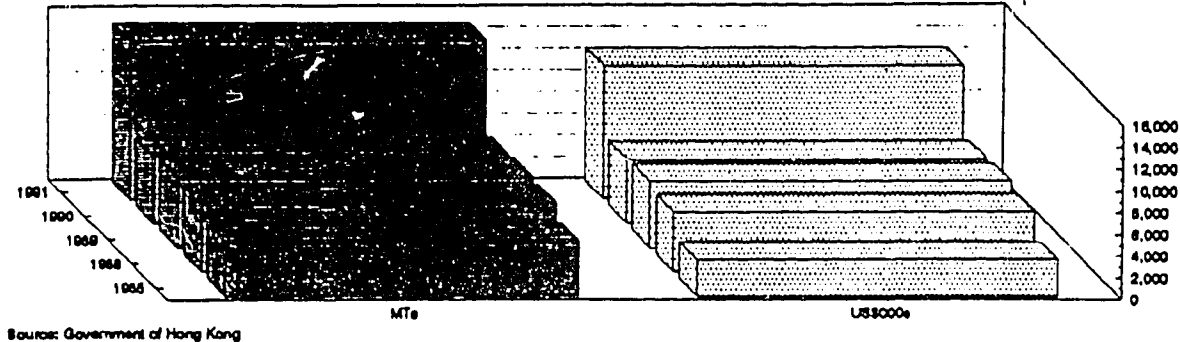

In 1991, fresh berry imports exceeded 100 MTs per month in all but one month (February). Imports were greatest during the periods May-July and December. The majority of U.S. supplies entered the market from March through October. Australia and New Zealand supplied Hong Kong during the U.S. office season -- November-January. Imports during February were at a yearly low of only 63 MTs.

1991 monthly unit prices were highest in February (US\$6.46/kg), after supplies from Australia and New Zealand slowed and before significant U.S. supplies entered the market. Of the three key suppliers, Australia had the lowest average unit price (US\$4.16/kg), followed by the United States (US\$4.39/kg), and New Zealand (US\$4.42/kg). Unit values were lowest during periods of high U.S. supply (dropping below US\$4/kg in May and June).

Mangoes

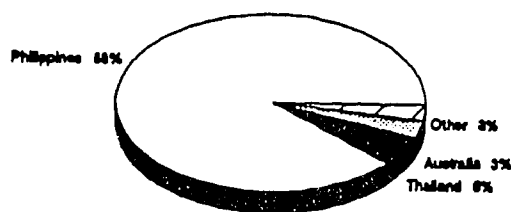

Imports of mangoes have also risen sharply, from 5,167 MTs (US\$3.4 million) in 1985 to 14,706 MTs (US\$12.3 million) in 1991. 1991 imports are more than double 1990 levels.

**Hong Kong Imports of Fresh Mangoes
1985-1991**

The Philippines supplied 88.3 percent of fresh mango imports in 1991. Other suppliers included Thailand (5.7%), Australia (3.1%), and Taiwan (1.2%). Nine other countries shipped to Hong Kong in 1991, although none more than 100 MTs for the year. The Philippines has been responsible for filling the majority of the increase in imports of fresh mangoes. Australia, while only a small supplier compared to the Philippines, also has witnessed steady growth in exports to this market. Imports from Thailand have fluctuated widely over the past six years.

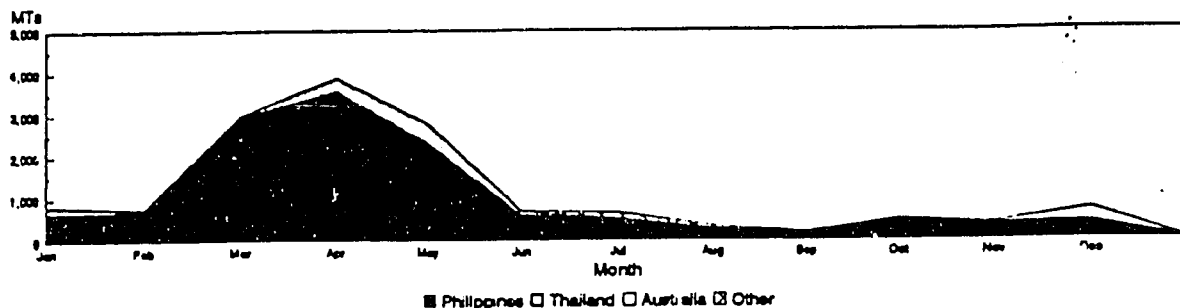

**Hong Kong Import Market Share - Fresh Mangoes
1991, based on weight**

Nearly 70 percent of all Filipino mangoes enter during the period March-May, during which 66 percent of all imports enter. During these three months, Filipino shipments average over 2

thousand MTs per month, while during the other nine months mango imports were on average well under one thousand MTs per month. The Philippines was the only country to supply the market in every month of 1991. Australia supplied it primarily during December-January, while 87 percent of Thai supplies entered in April and May.

Hong Kong Imports of Fresh Mangoes, 1991
Metric Tons

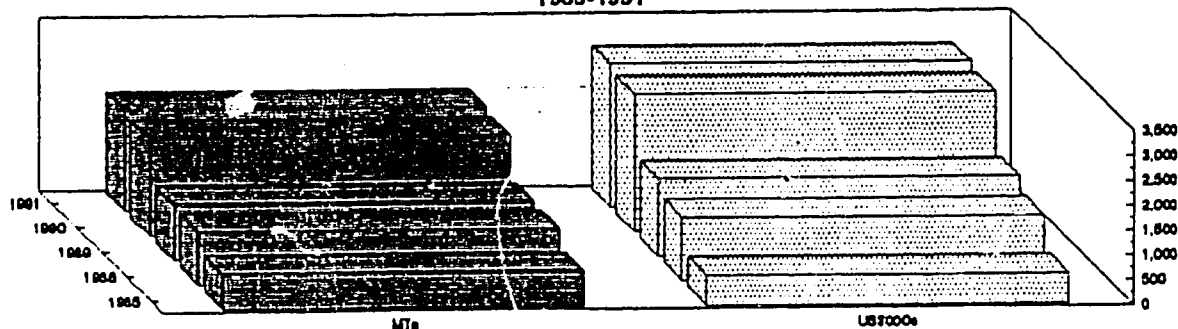

Source: Government of Hong Kong

Average import unit prices have gone from US\$0.66/kg in 1985 to US\$0.84/kg in 1991, although the 1991 level is lower than the US\$0.93/kg recorded in 1989 and 1990. In 1991, the Philippines had the lowest average import unit value (US\$0.76/kg). The average unit values for the next two largest suppliers, Thailand and Australia, were US\$0.82/kg and US\$2.57/kg, respectively. Not surprisingly, the average monthly import values were lowest (US\$0.65/kg to US\$0.67/kg) when Filipino supplies were highest (March-May). During most of the remaining months, unit values were a good deal above US\$1.00/kg.

Avocados

Hong Kong imports of avocados have increased from 715 MTs (US\$603 thousand) in 1985 to 2,055 MTs (US\$2.9 million) in 1991.

Hong Kong Imports of Fresh Avocados
1985-1991

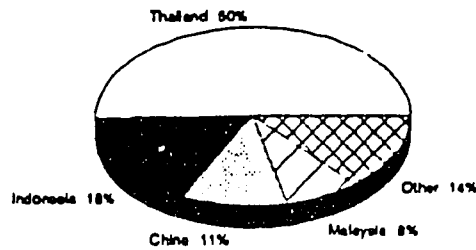

Source: Government of Hong Kong

Thailand held a 50.3 percent market share in 1991, down from its 70 percent share in 1990. It was the only country to have exported more than US\$1 million of avocados to Hong Kong.

Other suppliers in 1991 included Indonesia (17.6%) and China (10.7%), with lesser supplies entering from Australia (5.4%), the United States (3.6%), and Singapore (2.8%). Six other countries also exported to Hong Kong in 1991, although all with levels of well under US\$60 thousand.

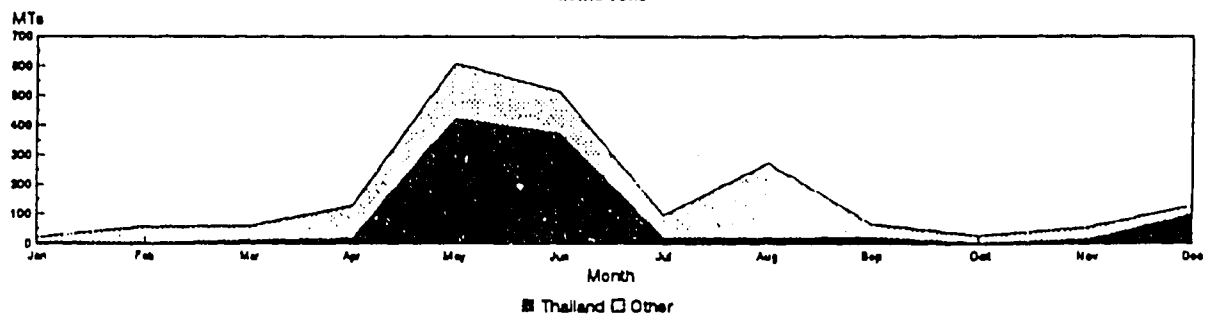

**Import Market Share - Fresh Avocados
1991, based on weight**

Source: Government of Hong Kong

Eighty percent of imports entered the market during the period April-August, with 55 percent entering in the two months of May and June. Seventy-eight percent of imports from Thailand also entered during these two months, as well as 63 percent of Indonesian supplies.

**Hong Kong Imports of Fresh Avocados, 1991
Metric Tons**

Source: Government of Hong Kong

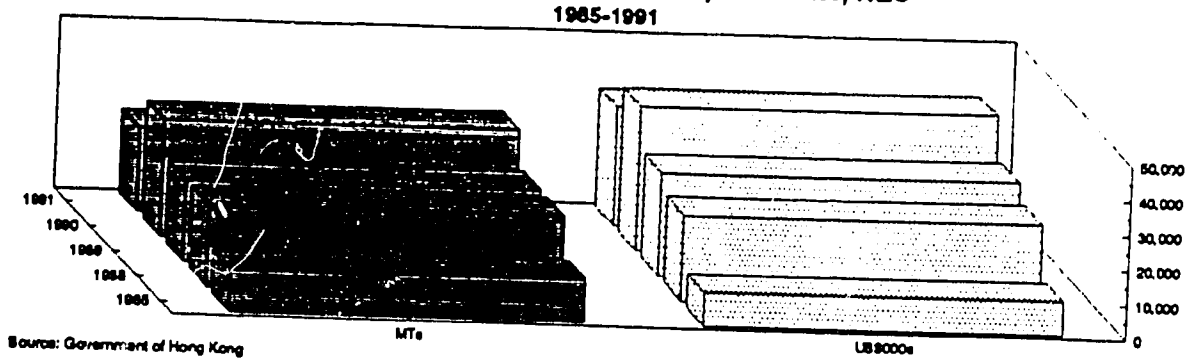

The average import unit value for fresh avocados was US\$0.84/kg in 1985, increasing to US\$1.18/kg in 1988. Over the period 1989-1991, unit values have remained fairly stable at between US\$1.38/kg and US\$1.41/kg. Of the major suppliers, Thailand had the lowest unit value in 1991 of US\$1.07/kg.

Other Fresh Tropical Fruit

Hong Kong's imports of other tropical fruits (not including pineapples, dates, mangoes, avocados, lychees, papayas, and bananas) has nearly doubled in volume and more than tripled in value from 1985 (12,531 MTs, US\$9.7 million) to 1991 (24,231 MTs, US\$34.3 million). 1991 imports, however, are down from 1990 levels of 33,811 MTs (US\$41.7 million). Thailand

supplies nearly 83 percent of fruit in this category, with over 12 percent entering from Malaysia.

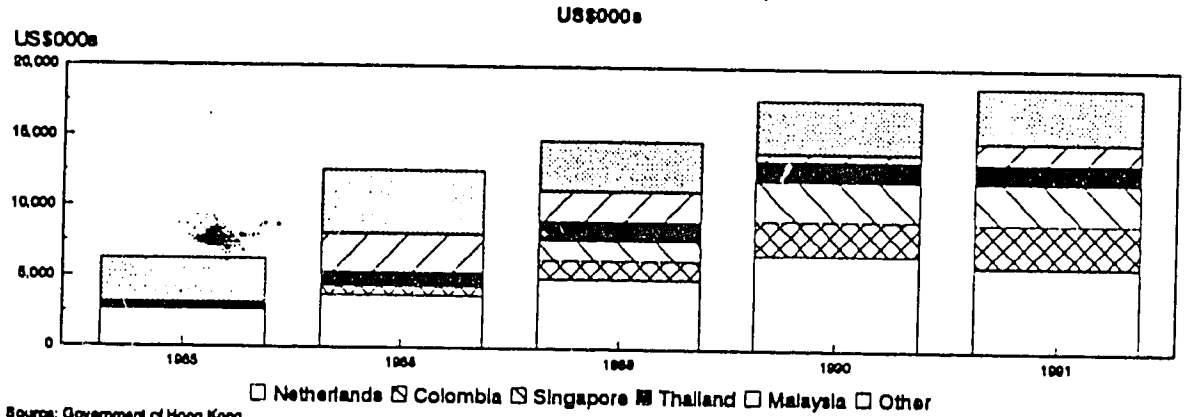

Hong Kong Imports of Other Tropical Fruits, NES

Cut Flowers

Imports of fresh cut flowers stood at HK\$145.6 million (US\$18.7 million) in 1991, up nearly 200 percent from HK\$48.9 million (US\$6.3 million) in 1985. 1991 imports are also up from the previous year's level of HK\$138.4 million (US\$14.7 million). Volume levels for cut flower imports are not reported.

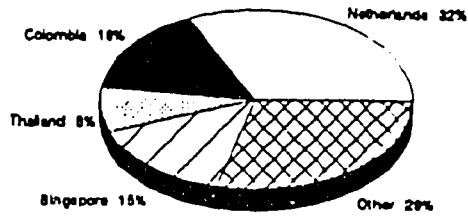

Hong Kong Imports of Cut Flowers, 1985-1991

In 1991, the Netherlands was the largest supplier in the market, with a 32.1 percent import share (by value). Other significant suppliers included Colombia (16.0 percent import share), Singapore (15.2%), Thailand (8.1%), Malaysia (7.6%), New Zealand (4.4%), and China (3.0%). There were 22 other countries which supplied the Hong Kong market in 1991, although none shipped more than US\$500 thousand worth of merchandise.

The only African supplier was South Africa, which shipped US\$305 thousand in 1991, and which represents a steady and continual increase in cut flower exports to Hong Kong since 1985. Imports from Singapore and Thailand have also been increasing steadily over the period.

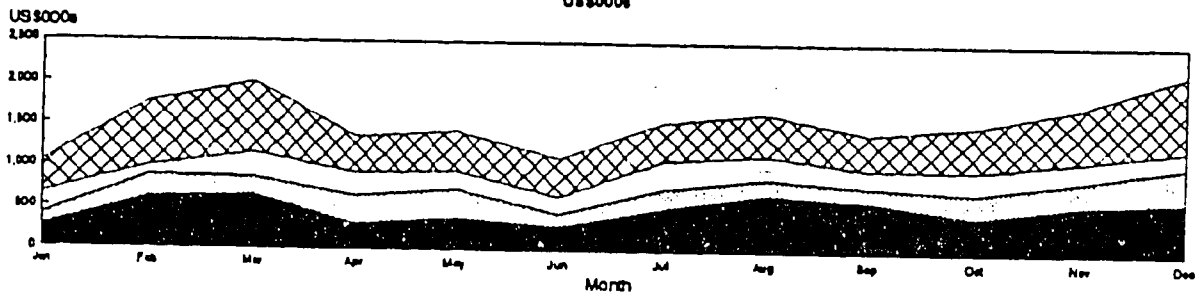

**Hong Kong Import Market Share-Fresh Cut Flowers
1991, based on value**

Source: Government of Hong Kong

In 1991, imports exceeded US\$2 million in March and December. Although it is highly speculative in determining seasonality from value data alone, the graph below shows imports increasing for February-March, with a gradual decrease in imports until July, at which time imports gradually increased to the monthly import high in December. Only seven countries supplied the market for every month of the year: the Netherlands, Colombia, Thailand, Japan, China, Malaysia, and Singapore.

SECTION III: PROCESSED PRODUCE IMPORT TRENDS

As with many of the trade statistics from Hong Kong and Singapore, reporting authorities aggregate a number of products into one category. This greatly diminishes the worth of the information for any statistical analysis. Field research should be conducted to obtain additional data on these markets.

Dried Fruits and Vegetables

Imports of dried fruit, excluding dates, has grown from 2,815 MTs (US\$5.1 million) in 1985 to 3,880 MTs (US\$10.4 million) in 1991. China supplied 70.4% of imports in 1991, with the United States (9.3%), the Philippines (9.1%), and Thailand (6.8%) accounting for most of the remaining imports. Twelve other countries also supplied the market in 1991.

Dehydrated vegetable imports have increased nearly 46 percent from 1985 (46,202 MTs, US\$27.7 million) to 1991 (67,399 MTs, US\$49.5 million). 1990 imports stood at 55,374 MTs or US\$37.7 million. In quantity terms, China supplied 98.8 percent of 1991 imports. There were seventeen minor suppliers to the market the same year.

Frozen Fruits and Vegetables

Frozen fruit imports have remained low for the period 1985-1991, with 1991 imports of only 125 MTs (US\$376 thousand). This compares to 1985 imports of 110 MTs (US\$191 thousand). In 1991, France provided 40.0 percent of volume imports, with China supplying 13.6 percent. The United States, the Philippines and Thailand each supplied roughly 10 percent of imports. The only other suppliers in 1991 were Belgium, the United Kingdom, Turkey and Italy.

Hong Kong's imports of frozen vegetables have increased dramatically over the period 1985-1991, going from 3,942 MTs (US\$3.1 million) to 25,178 MTs (US\$24.1 million). The United States is the largest supplier, with a 1991 import market share of 60.3 percent. Other suppliers include China (28.3%), New Zealand (3.1%), Thailand (2.1%), and Sweden (2.1%). Fifteen other countries supplied this market in 1991, although none had an import share of one percent or greater. The only African country to have supplied the market in 1991 was South Africa, which shipped 116 MTs with a CIF value of US\$97 thousand.

Canned Fruits and Vegetables

Canned fruit imports have more than doubled since 1985, going from 17,024 MTs (US\$13.1 million) in 1985 to 34,742 MTs (US\$30.5 million) in 1991. China supplied 57.2 percent of all imports, followed by the United States (15.4%), the Philippines (14.2%), Thailand (6.4%), and South Africa (4.6%). There were twenty-two other suppliers to the market in 1991, although they combined for only 2.2% of all imports.

growth since 1985. 1991 imports (38,404 MTs, US\$40.3 million) are up 270 percent in volume terms and 388 percent in value terms from 1985 levels. China supplied 68.4 percent (by weight) of imports in 1991, with the United States supplying 18.1 percent of the market. Other less significant suppliers include the United Kingdom (3.8%), Thailand (3.4%), and Taiwan (1.6%). Twenty-four other countries shipped to Hong Kong during 1991, including the only African supplier, South Africa, which shipped 365 MTs worth US\$334 thousand.

Other Processed Fruits

Hong Kong imported US\$5.6 million (3,002 MTs) of jams, marmalades, jellies and purees in 1991, compared to US\$2.8 million (2,239 MTs) in 1985. Twenty-one countries supplied the market in 1991, chief among these was the Philippines (22.9% of volume), the United Kingdom (21.3%), Switzerland (13.4%), the United States (9.4%), Australia (9.0%), South Africa (7.8%), and China (7.4%). The remaining fourteen countries supplied only 8.8 percent of import requirements.

Fruit Juice imports increased from 7,923 MTs (US\$7.7 million) in 1985 to 12,127 MTs (US\$14.2 million) in 1991. Of the twenty-five countries which supplied the market in 1991, the United States was by far the largest, with a volume share of 37.3 percent. Other major supplying countries included South Africa (15.4%), Australia (13.9%), the Philippines (9.4%), Korea (5.3%), and Denmark (4.7%).

Preserved fruit NES (not canned) imports has grown from 11,757 MTs (US\$11.7 million) in 1985 to 23,073 MTs (US\$29.2 million) in 1991. Regional suppliers China, Thailand and the Philippines accounted for nearly 90 percent of total 1991 imports, China being the largest supplier with 67.4 percent import share. The majority of remaining supplies entered from the United States and Taiwan, although seventeen other suppliers (including South Africa with US\$178 thousand) exported to Hong Kong in 1991.

Other Processed Vegetables

Vegetables in temporary preservative imports stood at US\$4.0 million (5,559 MTs) in 1988, falling in value terms to US\$3.1 million (6,523 MTs) by 1991. China and Taiwan supply together nearly 98 percent of import requirements, with 1991 market shares of 86.5% and 11.2%, respectively. Eight other countries shipped minor amounts of goods under this category.

The catchall import category of preserved vegetables NES (not canned) saw imports increase from 12,662 MTs (US\$5.4 million) in 1985 to 17,745 MTs (US\$19.3 million) in 1991. Chinese exports to Hong Kong accounted for 66.8% of all 1991 imports, with significant supplies also entering from Taiwan (11.5%), Japan (8.4%), and the United States (5.7%). Seventeen other countries supplied the remaining 7.6 percent of imports.

SECTION I: SINGAPORE MARKET OVERVIEW

Singapore, a Commonwealth republic, covers 623 km² with a population of just under 2.8 million (1991). Seventy-six percent of the population are ethnic Chinese, with significant minorities of Malays (15% of population) and Indians (6% of population). Chinese, Malay, Tamil and English are the official languages.

Only 4 percent of the land is arable, with imports supplying the majority of food needs. In 1990, imports of fresh fruits and vegetables stood at US\$608 million, up 9 percent over the previous year. Consumption of fresh vegetables has experienced a downward trend, falling 16 percent since 1986. This is reflective of a general trend in the Newly Industrialized Countries (NICs) where there is increasing demand for prepared foods. Not surprisingly, processed vegetable consumption (frozen, canned, etc.) has surged 56 percent since 1986.

Kenya's Current Position in the Market

Kenya exported just under S\$8.6 million (US\$5.0 million) worth of merchandise to Singapore in 1991.³ Fish and fish preparations accounted for 40 percent of the total, followed by coffee/tea/spices with 34 percent of total exports. 1991 Singapore trade statistics do not report imports from Kenya of any fresh/processed fruit, vegetable, or cut flower.

Domestic Production

Fresh fruit production has fallen from 10,000 MTs in 1980 to only 1,000 MTs in 1990. Fresh vegetable production (primarily of leafy varieties) stood at 9,000 MTs in 1990, down 57 percent from 1986.

Singapore has a small canning and processing industry, comprised of only a few companies. While many local labels are in existence, product is generally canned overseas and labeled in Singapore.

³ Annual average exchange rates were used in converting from Singapore dollars throughout this report. The rates used are listed below as Singapore dollars per one U.S. dollar:

1981	2.1128	1987	2.1059
1982	2.1406	1988	2.0130
1983	2.1136	1989	1.9508
1984	2.1333	1990	1.8128
1985	2.2010	1991	1.7284
1986	2.1779	1992	1.6302 (through September)

Import Regulations

Singapore, like Hong Kong, is a free port. As such, fruits and vegetables (both fresh and processed) and cut flowers enter duty-free.

There is no phytosanitary certification required for imports of fresh fruits, vegetables and cut flowers. However, under the Singapore Food Act there are certain regulations governing pesticide residues in fresh fruits and vegetables and additives and coloring in processed fruits and vegetables. The schedules attached to the Act are a positive list of allowable ingredients and maximum pesticide tolerances.⁴ In principle, all other ingredients and pesticides not stated in the schedules are prohibited. Singapore importers may make an appeal to the Food Section of the Ministry of Environment on a case by case basis regarding approval of ingredients and use of pesticides not listed in the schedules.

Market Distribution Systems

The Singapore market distribution system is marked by multiple layers, as shown in the organizational chart below. Most fresh fruits and vegetable imports pass through the Singapore Fruit Exchange at Pasir Panjang.⁵ The Exchange handles over 80 percent of the market and is comprised of hundreds of importers and wholesalers, of varying company sizes. Importers normally sell goods on consignment, with commissions of from 5 to 10 percent on the sales price charged to the foreign supplier. The remainder of imports (20 percent) is handled primarily by large trading companies (Cold Storage Trading is the largest) and supermarkets who buy direct.

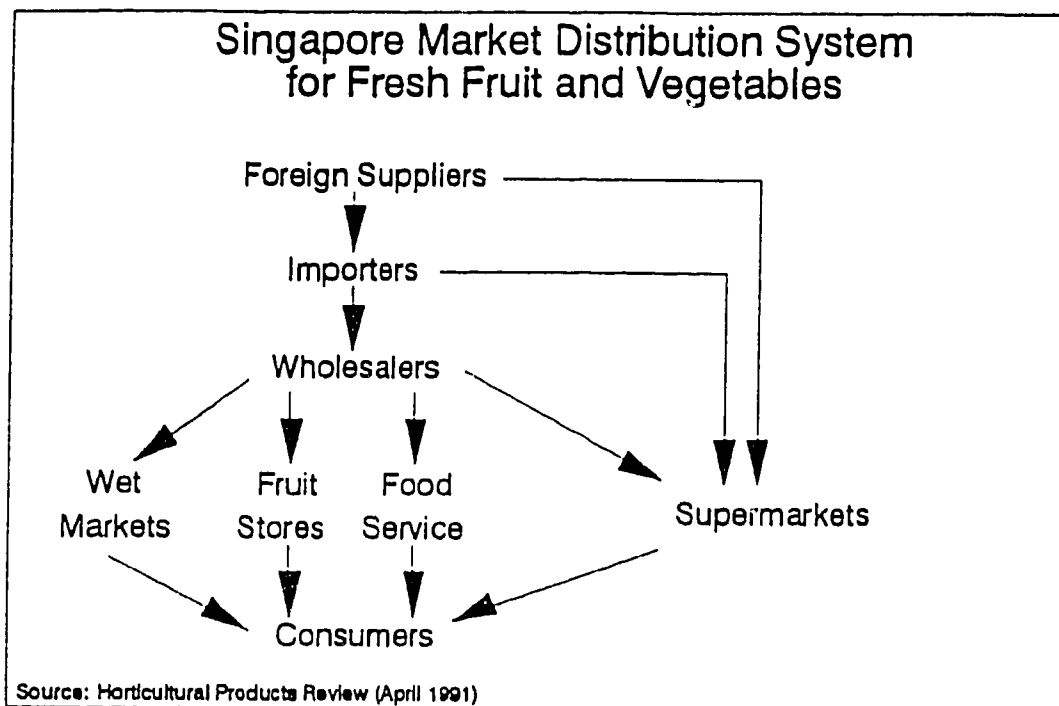

On the retail level, sales in wet markets and fruit stores dominate, with over 85 percent of all retail sales occurring in these two types of establishments. Wet markets are characterized by a number of stalls, while fruit stores are more permanent structures (somewhat similar to greengrocers) which generally have higher and more consistent quality produce. Both types of outlets are normally located in or around the housing estates.

Supermarkets account for the remaining 15 percent of sales. The two largest chains are NTUC ("National Trade Union Cooperative" or "Fairprice", 37 stores, primarily located in the housing estates) and Cold Storage (up-market geared to the upper income class and expatriates). Gourmet stores, which even more finely target the very wealthy and expatriates, are primarily

⁴ The "positive list" schedules of the Singapore Food Act are too lengthy to include in this report. For those interested in obtaining copies of these schedules, contact Fintrac Inc.

⁵ H. Harmon reports that of the 200+ imports and wholesalers located at this market, only 25-30 are major importers, and only half of these specialize in the higher-value fruits and vegetables.

owned by Cold Storage. Fruit and vegetable prices are generally 30 percent higher in the supermarkets. Retail markups range from 50 to 100 percent.⁶

Consumer Preferences

The U.S. Department of Agriculture (USDA) reports that Singaporeans prefer smaller size fruit, with sales being made primarily on a per unit basis (as opposed to by weight). Pre-packed fruit is not as popular, as consumers prefer to select their own individual fruits.

Demand for fresh fruit is generally lower during the period November to January for a number of reasons: school holidays occur during which many residents travel abroad; consumers are more financially cautious because of the holiday season; and because of the...

⁶ Harmon, 1990.

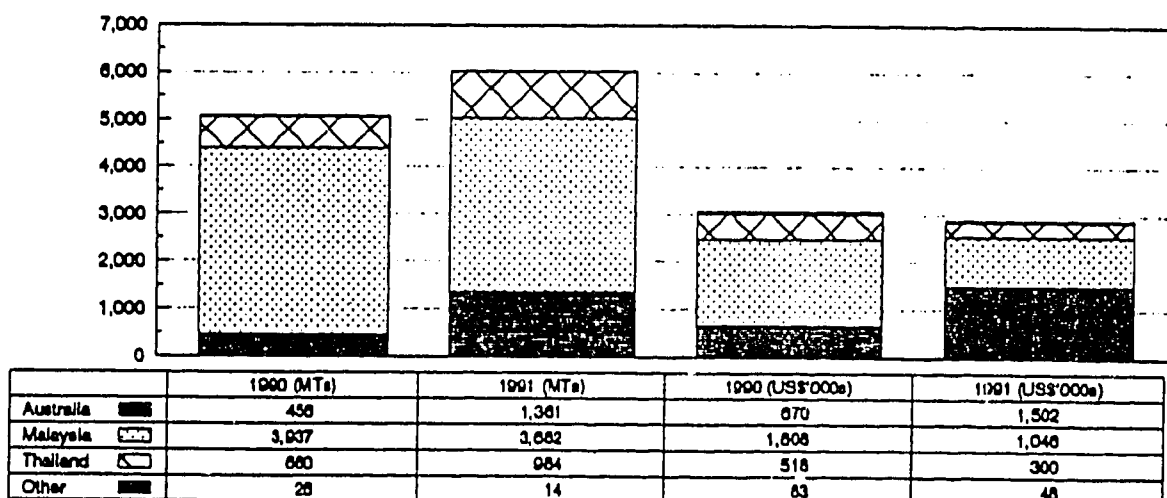

SECTION II: FRESH PRODUCE & CUT FLOWER IMPORT TRENDS

Note: Imports from Indonesia are not reported in Singapore trade statistics. It is believed that Indonesia exports significant quantities of fresh fruits and vegetables (especially the latter) to Singapore. Therefore, imports may be somewhat underestimated. In addition, there is a healthy re-export trade, which means that not all imports are necessarily for domestic consumption.

Tomatoes

Imports of fresh tomatoes stood at 6,041 MTs or US\$2.9 million in 1991. This represents a good recovery from low 1990 levels of 5,079 MTs and US\$1.8 million. In 1986, Singapore imported 8,061 MTs.

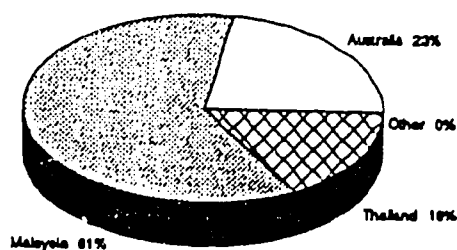

Singapore Imports of Fresh Tomatoes, 1990-1991

Source: Government of Singapore

Import Market Share - Fresh Tomatoes

1991, by weight

Source: Government of Singapore

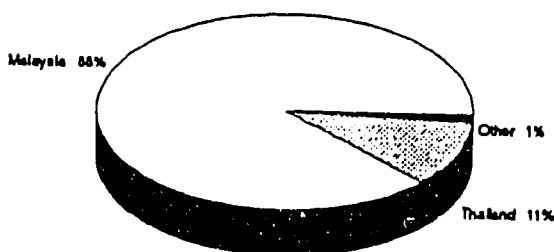

Malaysia supplied over 61 percent of the market in 1991, down from 78 percent in 1990. Australia, the second largest supplier in 1991 with a 23 percent import share, exported nearly triple the amount of the previous year. Thai exports, up nearly 50 percent from a year earlier, supplied 16 percent of total imports. A very small amount of tomatoes enters from the Netherlands and other countries -- which combined to export only 14 MTs (0.2% of total imports) in 1991. Malaysia and Australia supply the market year-round.

The average import unit value of Malaysian tomatoes (US\$284/MT) is the lowest of all suppliers. Thailand's unit value of US\$304/MT is the second lowest, followed by the much more costly supplies from Australia (US\$1,104/MT), the Netherlands (US\$4,628/MT), and other countries (US\$2,764/MT).

Chili Peppers

Singapore's imports of fresh chili peppers decreased in volume terms from 1990 to 1991, going from 6,645 MTs to 6,241 MTs. Imports over the same period, however, increased in value terms from US\$3.5 million to US\$3.8 million.

Import Market Share - Fresh Chillies
1991, by weight

Source: Government of Singapore

Malaysia supplied 88 percent of imports in 1991, up slightly from its 80 percent 1990 share. Thailand supplied 11 percent of imports in 1991, down from 19 percent in 1990. Thailand's decline in exports in 1991 accounted for the drop in overall imports. India and other countries combined for a 1 percent share of the market in 1991, not much different than in 1990. Malaysia supplies chilies year-round and monthly import volumes do not fluctuate to any great degree.

The average per unit import value has increased from US\$524/MT in 1990 to US\$602/MT in 1991. Malaysia has a significantly lower unit value of US\$477/MT (1991) than Thailand's US\$1,504/MT.

Other Fresh Vegetables

The other fresh vegetables included under this market survey (asparagus, snow peas, french/bobby beans, and okra) are not classified separately in Singapore trade statistics, and therefore field research will be necessary to adequately explore their market potential. The following observations on the market were made by Henry Harmon in his 1990 market survey:

- The most popular asparagus, in terms of volume, is the inexpensive thin type from Thailand. U.S. Jumbo grade receives a price premium and is primarily supplied to the hotel and restaurant trade.
- Okra is inexpensive on the local market and primarily in demand by the lower economic class.
- Pre-packed snow peas from Zimbabwe were on the market during June 1990, fetching S\$1.25 per 100 grams.

As a matter of interest to the reader, the following are summaries of the broad fresh vegetable trade categories:

- Singapore's imports of fresh leafy or stem vegetables (not including cauliflower and cabbage) stood at US\$27.7 million (65,166 MTs) in 1991, up from US\$19.8 million (49,388 MTs) in 1990. Singapore imported 29,101 MTs under this category in 1986. Malaysia supplied 85 percent of imports in 1991, with Australia and the United States each supplying 4 percent of import needs. The majority of the remaining imports entered from Thailand and China.
- Singapore's imports of fresh fruited or leguminous vegetables also increased from US\$7.0 million (28,476 MTs) in 1990 to US\$10.7 million (33,326 MTs) in 1991. However, imports have dropped substantially since 1986 when they stood at 52,898 MTs. This drop is probably due to a shift from fresh beans and other leguminous vegetables to frozen and canned product. Malaysia supplied 95

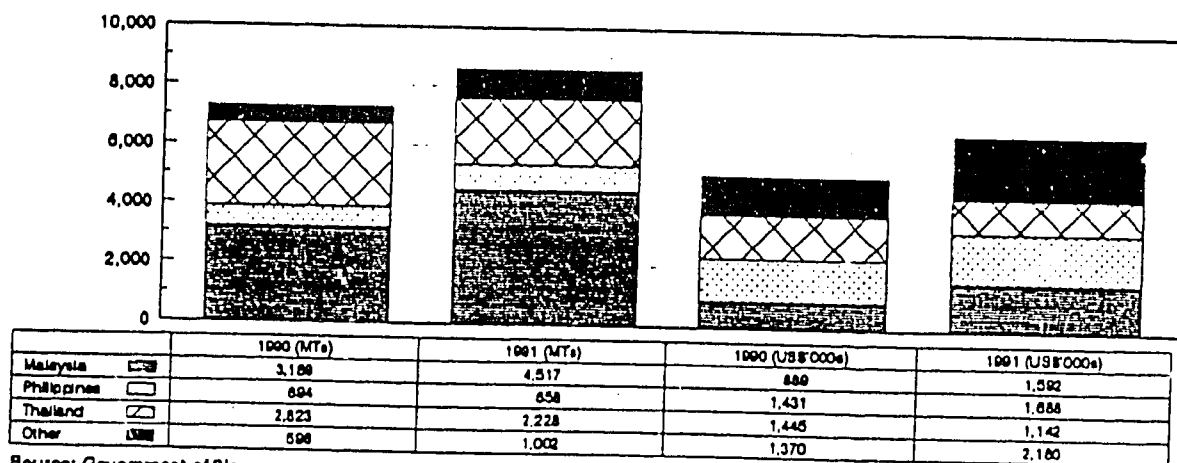

percent of the import market in 1991. Australia, Burma, China, Taiwan, and Thailand supplied most of the remainder.

Singapore's imports of other fresh vegetables (not including the above two categories, or alliaceous vegetables, tomatoes, roots or tubers, corn, and chilies) increased from US\$4.4 million (2,130 MTs) in 1990 to US\$5.7 million (2,412 MTs) in 1991. Australia supplied a little over half of the products included in this category, followed by Malaysia (12 percent), Taiwan (13%), and Thailand and the United States (each with 7 percent import shares).

Avocados and Mangos

Unfortunately, Singapore groups imports of avocados, mangoes, guavas, and mangosteens into one statistical reporting category. Imports in this category increased from 7,302 MTs (US\$5.2 million) in 1990 to 8,605 MTs (US\$6.6 million) in 1991. This is still quite a bit lower than the ten year high of 11,047 MTs recorded in 1989, but more than double the 1980 level of 4,088 MTs. Import levels have fluctuated widely over the last decade.

Singapore Imports of Avocados, Mangoes, Guavas, and Mangosteens, Fresh/Dried, 1990-1991

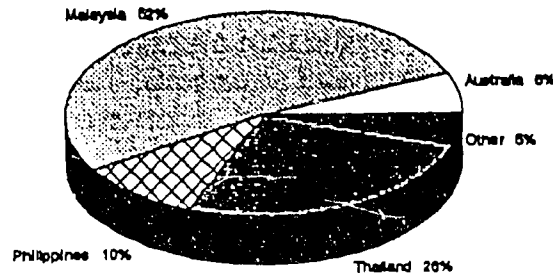

Source: Government of Singapore

Of the overall volume imported, 52 percent entered from Malaysia, followed by Thailand (26%), the Philippines (10%), and Australia (6%). While it is impossible to break down the data with a perfect degree of certainty, it can be safely assumed based on higher unit values that the majority of product entering from Australia, New Zealand and the United States are of avocados. Assuming that they are the primary suppliers, the avocado would appear to be a high-value fruit (much more so than the mango) and that Australia supplied the vast majority of import requirements in 1991. If we are again to assume that the other suppliers are primarily

providing mangoes, market shares in this subset would appear as follows: Malaysia (56%), Thailand (28%), the Philippines (11%), Pakistan (4 percent), and India (under 1 percent).

Import Market Share - Avocados, Mangos, Guavas & Mangoesens, Fresh/Dried, 1991, by weight

Source: Government of Singapore

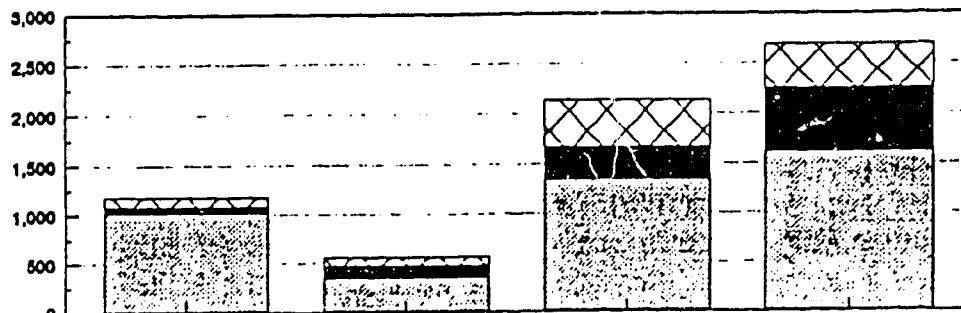

For "probable" avocado suppliers, average import unit values ranged from US\$2,428/MT for Australia, to US\$3,278/MT for New Zealand and US\$4,523/MT for the United States. The Hass variety is thought to command a high premium.

Unit values of Malaysian mangoes (US\$352/MT) are significantly lower than those for Thailand (US\$513/MT), the Philippines (US\$1,968/MT), and Pakistan (US\$1,739/MT). It is reported that this may be due to a preference for the non-Malaysian varieties, such as the Thai honey mango. (Harmon, 1990)

Berries

Strawberries are included in one overall berry category in Singapore's import statistics. However, it can be assumed that the vast majority of these imports are of strawberries. Fresh berry imports fell dramatically in volume terms from 1990 to 1991 (1,183 MTs to 564 MTs),

Singapore Imports of Fresh Berries, 1990-1991

	1990 (MTs)	1991 (MTs)	1990 (US\$'000s)	1991 (US\$'000s)
United States	1,019	343	1,336	1,619
New Zealand	63	131	335	630
Other	101	90	461	436

Source: Government of Singapore

but increased in overall value from US\$2.1 million to US\$2.7 million. Imports, however, have shown a generally upward trend over the past decade, and are still very much higher than 1980 levels of 64 MTs (US\$300 thousand).

In 1991, the United States accounted for 61 percent of all berry imports, down substantially from 86 percent in 1990. The overall drop in imports over the period corresponds to the drop in imports from the United States. Other major suppliers include New Zealand (23 percent) and Australia (11 percent). China and France also supplied small quantities in 1991.

Import Market Share - Fresh Berries
1991, by weight

Source: Government of Singapore

Of the top three suppliers, the United States had the lowest unit value (US\$4,721/MT) followed by New Zealand (US\$4,810/MT) and Australia (US\$5,397/MT). Monthly supplies are generally constant, although very large monthly shipments are sometimes reported by the trade data. Most berries are consumed by the baking (primarily blueberries) and hotel sectors. Future increases in consumption, therefore, will depend on the continued expansion of tourist arrivals.

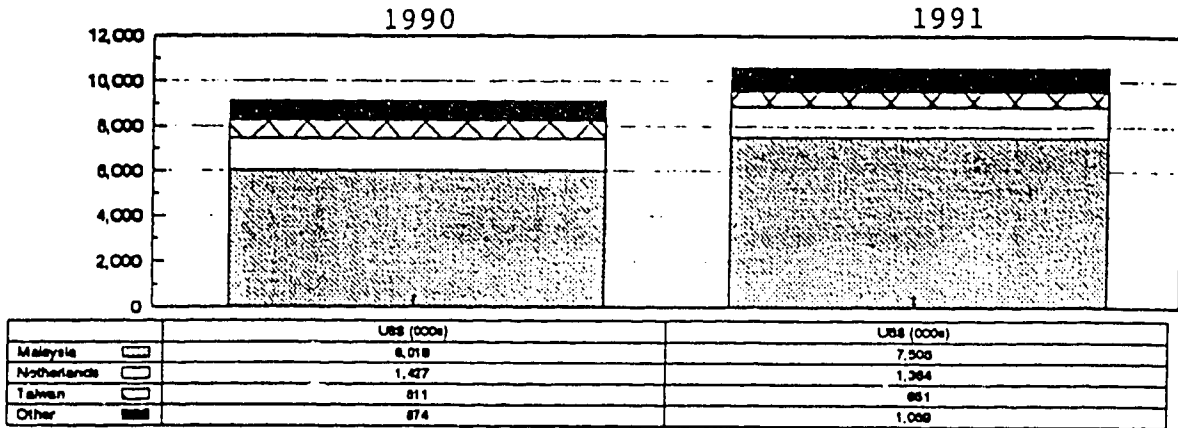

Cut Flowers

There are no separate statistics for carnation, rose, or static imports into Singapore. Total imports of fresh cut flowers (except orchids) were US\$10.6 million in 1991, up from US\$9.1 million in 1990. Quantities are not reported.

Malaysia supplied 71 percent of the market (by value) in 1991. Other major suppliers included the Netherlands (13%), Taiwan (6%), New Zealand (4%), and Thailand (4%). In 1992, imports were substantially higher in January. Field research will be needed to collect additional information.

SECTION III: PROCESSED PRODUCE IMPORT TRENDS

As with many of the trade statistics from Hong Kong and Singapore, reporting authorities aggregate a number of products into one category. This greatly diminishes the worth of the information for any statistical analysis. Field research should be conducted to obtain additional data on these markets.

Provisionally Preserved Fruits and Vegetables

Imports under the category vegetables provisionally preserved in brine increased from 1990 to 1991, going from US\$2.3 million (5,973 MTs) to US\$3.7 million (6,252 MTs). China accounted for 51 percent of imports, followed by Taiwan (41%), Thailand (4%), and Hong Kong (2%).

Imports of provisionally prepared fruits and nuts is minimal, totaling only US\$384 thousand (268 MTs) in 1991. This, however, is up from 1990 imports of US\$245 thousand (161 MTs). China supplied 51 percent of all imports in 1991, with the next largest supplier being Malaysia (21 percent import share).

Frozen Fruits and Vegetables

Singapore's imports of frozen vegetables stood at US\$5.8 million (5,594 MTs) in 1990, increasing to US\$7.6 million (7,400 MTs) in 1991. The United States accounted for 45 percent (by weight) of imports in 1991. Other major suppliers included Canada (18%), New Zealand (16%), Belgium (5%), China (4%), and Taiwan (4%). No other supplier shipped more than 200 MTs in 1991.

Singapore imported only US\$366 thousand (172 MTs) worth of frozen fruit in 1991, compared to 1990 levels of US\$407 thousand (152 MTs). The United States accounted for 44 percent of imports (by weight), followed by Australia (33%), France (11%), and Malaysia (6%).

Dried Fruits and Vegetables

Other dried vegetable imports (not including roots, tubers, beets, mushrooms) fell from 1990 to 1991, going from US\$31.3 million (52,407 MTs) to US\$28.8 million (42,476 MTs). China supplied 82 percent of import market requirements, followed by Hong Kong (12%), and India (3%).

Other dried fruit imports (not including citrus, bananas, plantains, grapes, nuts, dates, figs, pineapples, avocados, mangoes, guavas, and mangosteens) witnessed a slight increase over the same period, going from US\$6.2 million (2,400 MTs) to US\$6.8 million (2,446 MTs). The

United States supplied 42 percent of imports, followed by China (21%), Taiwan (9%), Philippines (7%), India (5%), and Hong Kong (4%).

Fruit and Vegetable Juices

Imports of fruit or vegetable juices (not including citrus, pineapple, tomato, blackcurrant, or mixtures) neared US\$6.5 million (5,639 kiloliters) in 1991, up from US\$5.4 million (4,595 KLS) in 1990. The United States supplied 26 percent (by volume) of total imports, followed by Malaysia (24%), Australia (11%), Taiwan (8%), and France (6%). US\$27 thousand was imported from African nations in 1991.

Singapore imported US\$1.6 million (1,361 KLS) of fruit or vegetable juice mixtures in 1991, up from US\$1.0 million (940 KLS) in 1990. Malaysia was the largest supplier with 32 percent of all imports, followed by the United States (19%), Australia (16%), and the Philippines (8%).

Other Prepared or Preserved Fruits and Vegetables

Imports of fruit jams, jellies, purees, and pastes are included in one statistical category. Imports declined slightly from US\$5.3 million (2,703 MTs) in 1990 to US\$5.1 million (2,677 MTs) in 1991. Over 22 countries supplied the market in 1991, with eight (the U.S., Malaysia, the U.K., India, Australia, Switzerland, the Netherlands, and the Philippines) accounting for 81 percent of all imports.

Imports of other prepared or preserved fruit (not including pineapples, peaches, lychees, longans, fruit cocktail, and all frozen/dried fruits and fruit juices) increased nearly 23 percent from 1990 to 1991, from US\$17.0 million (9,543 MTs) to US\$20.8 million (12,365 MTs). Major suppliers are China (32 percent of 1991 imports), Taiwan (18%), Thailand (13%), the United States (12 percent), and Japan (10%).

Singapore imported over US\$28.3 million (25,940 MTs) of other prepared or preserved vegetables (except by vinegar) in 1991, up from US\$23.9 million (25,940 MTs) in 1990. China accounted for 40 percent of all imports, followed by the United States (29%), Thailand (7%), and Malaysia (5%).

Vegetables, fruits, and nuts in vinegar imports fell from US\$4.2 million (4,026 MTs) in 1990 to US\$3.8 million (1,963 MTs) in 1991. Taiwan was the largest supplier with a 32 percent import market share. Other key supplying countries included China (28%), the United States (13%), and Thailand (12%).
