## **FOREWORD**

i

This document contains the preliminary results of the 1991-1992 Primary School Census which was conducted by the Education Management Information System (EMIS) Cell of the Research, Development & Evaluation (RD&E) Wing of the Directorate of Primary Education, North West Frontier Province, Pakistan, as part of the USAID funded Primary Education Development (PED) Programme. These data reflect the status of government primary education during the month of October, 1991. The data are "preliminary" since they include only those schools which have reported data to the EMIS Cell. There are still a few school census questionnaires which have not been returned yet.

We would like to acknowledge the contribution of the Directorate of Secondary Education which kindly provided the Directorate of Primary Education with data for the primary sections of middle, high, and higher secondary schools.

Finally, although there are 18 districts represented in our database, all data are reported in the format of 16 districts. This was done in order to incorporate the data provided by the Directorate of Secondary Education which reported data in this manner. Specifically, data regarding district Buner are reported as part of district Swat; data regarding district Haripur are reported as part of district Abbottabad.
