Forward:

The User's Guide to the Center for Population, Health and Nutrition is a guide to the functions, staff, and projects in USAID's Population, Health, and Nutrition (PHN) sector.

Part I of the guide provides a basic overview of USAID's PHN program, as well as a short description of the PHN Center and the offices that comprise it. Parts III, IV and V give a comprehensive listing of PHN projects, including selected regional bureau projects. The descriptions are organized by office, and within the offices by division, and include a short description of the services and activities that each project performs, as well as names of contractors and USAID contact persons. Part II briefly describes the service and functions of the Office of Field and Program support. Part VI of the guide includes a number of phone and contact lists, which should prove useful to both to Washington and overseas staff.

This document was composed in Adobe PageMaker, version 5, though much of the information can be transmitted to the field in Wordperfect. Due to the many different types of computers, printers and software that the various missions employ, it is not presently possible to transmit an attractive version via email, though a functional (albeit less attractive) version can be sent via email upon request. In addition, much of this guide will soon be available on USAID's homepage in a slightly different format.

Any questions, comments, or suggestions concerning this guide can be sent to:

Part I: Introduction to the Center for Population, Health and Nutrition

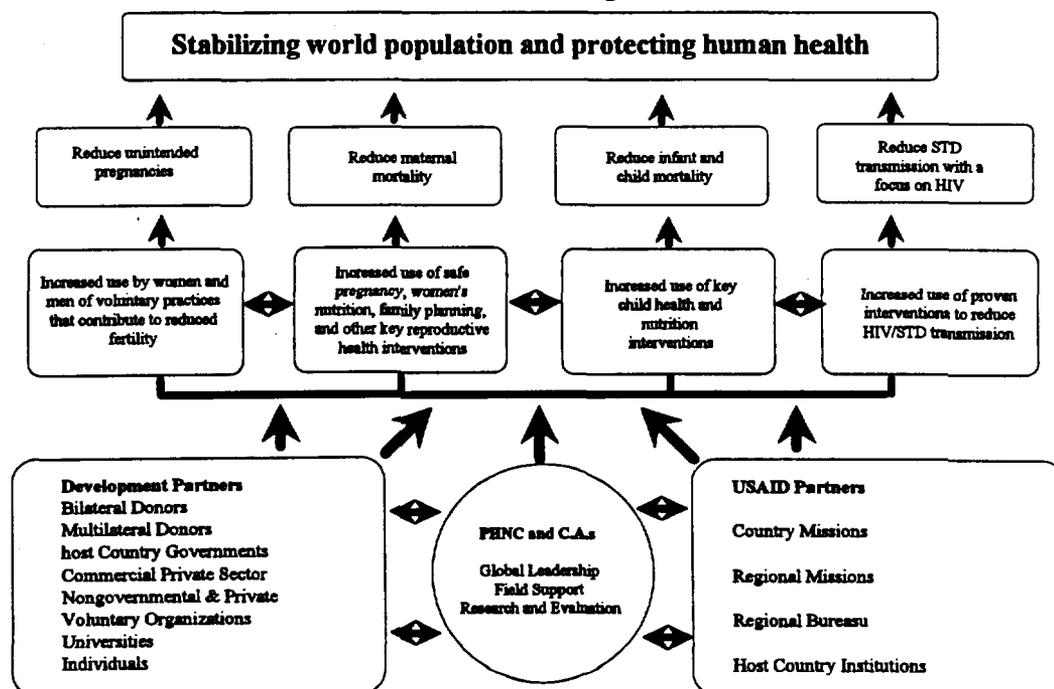

The Challenge Ahead

The coming decade is a particularly important one for the population, health and nutrition (PHN) sector. Millions of young people are entering their reproductive years and, even under the medium fertility assumption of the United Nations, world population is projected to reach 10 billion by the year 2050. Over 150 million women have an expressed unmet need for family planning. More than 12 million children under five still die each year in the developing world. WHO estimates that close to 500,000 women die annually from preventable pregnancy-related causes. The total global number of HIV infected persons is expected to double from 20 million to 40 million by the year 2000.

USAID's Strategy for its Population, Health and Nutrition Program

Based on these challenges and the lessons learned over the past 30 years, USAID's goals in the population, health and nutrition sector are to stabilize world population growth and to protect human health. In order to achieve these goals, the Agency has adopted a strategy based on four strategic objectives: reducing unintended pregnancies; reducing maternal mortality; reducing infant and child mortality; and reducing STD transmission with a focus on HIV/AIDS. These are a refinement of the historical strategic direction of the Population, Health and Nutrition sector. Figure 1 illustrates how the program outcomes for the Center for Population, Health and Nutrition (PHNC) contribute to the Agency strategic objectives and goal for the sector. Looking to the future, the PHNC's strategy also incorporates principles from the Cairo Program of Action and reflects Agency mandates in the areas of gender and women's empowerment. The PHN program focus, therefore, is on improving the quality, availability, and use of key family planning, reproductive health, and other health interventions in the PHN sector, with sustainability and program integration as essential crosscutting themes.

Role of the PHNC in Achieving USAID Goals

Funding

For over 30 years USAID has strongly supported PHN activities through a wide range and variety of programs in many countries. From 1985 to 1995, USAID provided \$8.843 billion dollars in PHN assistance to developing countries, making it the largest international donor in this sector in the world. In FY 1994, obligations in the sector totalled \$1.047 billion.

Programming and Resource Allocation

Implementation of the Agency's and PHNC's strategy is taking place in an environment of serious resource limitations. Consequently, priorities must be established in terms of both the countries PHNC focuses on and the activities it supports. These priorities are empirically based, considering both efficiency and impact.

The PHNC and the Missions are in the process of developing and implementing the Joint Programming and Planning Country Strategy (JPPC). JPPC is a framework that identifies priority countries for the PHN sector and establishes mechanisms to maximize access to resources for the highest priority countries. The joint programming and planning process brings field staff, regional bureau staff and the PHNC together to plan the effective allocation of USAID resources to achieve the objectives of country programs. Within the JPPC strategy, Joint Programming countries are those with the highest potential for worldwide, as well as local or regional, impact across sectors in the PHN arena. A significant level of PHNC resources, both in terms of technical staffing and field support, will be committed to achieving results in these countries. Joint Planning countries are other sustainable development countries that are lower priority in terms of global impact but have PHN sector activities in the form of bilateral programs. Although relatively fewer resources are committed to them by the PHNC than to Joint Programming countries, Joint Planning countries still receive support from the PHNC. These countries may also access PHNC technical resources through field support funding, OYB transfers, or buy-ins. The PHNC is committed to developing and maintaining strong responsive relationships with these countries and to support their initiatives in the PHN sector. One of the important lessons learned over the 30 years of USAID's efforts in the PHN sector is that maintaining a close connection between field implementation and technical innovations is critical to achieving a lasting impact. Below are listed the JPPC countries.

Joint Programming Countries

Ethiopia, Ghana, Kenya, Nigeria, South Africa, Tanzania, Uganda, Bangladesh, Egypt, India, Indonesia, Morocco, Nepal, Philippines, Peru

Special Circumstance Countries

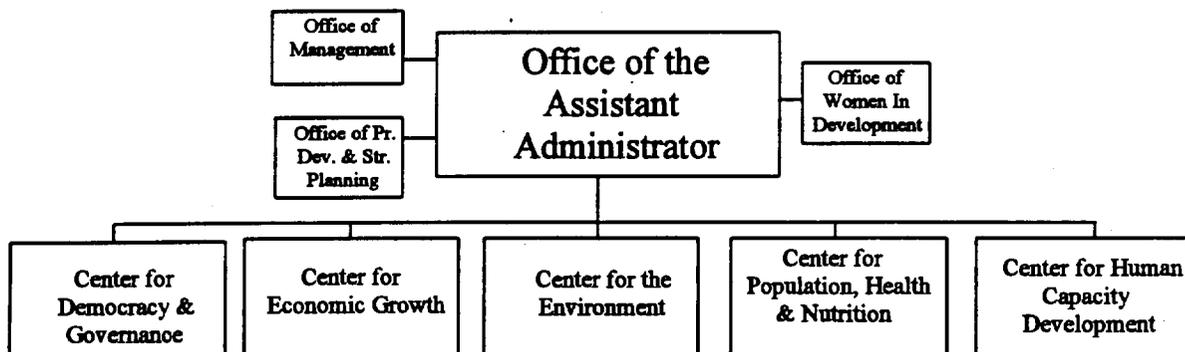

Significant Investment - Brazil, Colombia, Mexico, Turkey
Policy - Cambodia, West Bank/Gaza, Pakistan, Regional Support Mission (RSM), Russia
Crisis - Haiti, Rwanda/Burundi

Joint Planning Countries and Regions

Benin, Eritrea, Guinea, Madagascar, Malawi, Mali, Niger, Zambia, Mozambique, Senegal, Zimbabwe, Jordan, Yemen, Ukraine, Romania, Krygyz Republic, Tajikistan, Turkmenistan, Uzbekistan, Dominican Republic, Bolivia, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Nicaragua, Paraguay, West Africa, Southern Africa, Greater Horn of Africa, LAC Regional, Central American Regional

Organization of Assistance

The technical structure of the Agency is organized into four Regional Bureaus and the Bureau for Global Programs, Field Support and Research. The Regional Bureaus provide technical and programmatic expertise to the missions in each of the four regions (Asia, Africa, Latin America/Caribbean and Europe/NIS). The Global Bureau is divided into five centers of excellence, each corresponding to one of the Agency's five focus areas.

As its name suggests, the Global Bureau focuses its efforts on global leadership, technical support to the field, and research and evaluation. The Center for Population, Health and Nutrition performs these functions in AID/W for the PHN sector. Integral to performing these functions is the pivotal relationship of the PHNC to its partners and stakeholders within USAID, such as missions and regional bureaus, and outside of the Agency, such as the NGO community, host governments and multilateral organizations.

Global Leadership: USAID is a recognized world leader in the population, health and nutrition sector. Over the last thirty years a number of major programmatic innovations in the population, health and nutrition field can be linked to USAID, and especially to the programs managed by the PHNC. Examples include the leadership provided by the PHNC in the development and introduction of new and improved contraceptive methods, improved public and private sector service delivery systems, the Child Survival initiative, and the mobilization of the international community in response to the HIV/AIDS pandemic. One of the most important strengths of USAID has been the partnerships between missions and PHNC.

Technical Support to the Field: The PHNC serves as home to the PHN technical staff and offers “one-stop shopping” to provide support to missions and address a wide range of field needs. In this capacity, the PHNC has developed projects that provide access to state-of-the-art technical assistance through a network of CAs and contractors. The PHNC also works with missions to translate Global Bureau initiatives to country-specific situations and provides a ready mechanism by which missions can benefit from the experience and knowledge that USAID has gained worldwide. Working closely with Missions, USAID is developing new approaches for the changing needs of the PHN sector. USAID maximizes the global impact of its programs through support for effective strategic planning at the country level and the allocation of resources across country programs.

Research and Evaluation: In this area, a future-focused approach is essential. USAID will continue to provide innovative leadership in the arena of research and evaluation, supporting the development, testing and dissemination of new technologies and methodologies that address key technical problems and constraints to program implementation in developing countries. The results of USAID-supported biomedical, operations, demographic, evaluation, applied, and social science research will form the basis to improve services and enhance the impact of population, health and nutrition programs worldwide. Indeed, the Demographic and Health Surveys (DHS) has now been further refined and is recognized as providing the best worldwide data available in the PHN sector. The Congress, other stakeholders, the general public, and other donors and international agencies rely heavily on these data and analyses for program planning and evaluation.

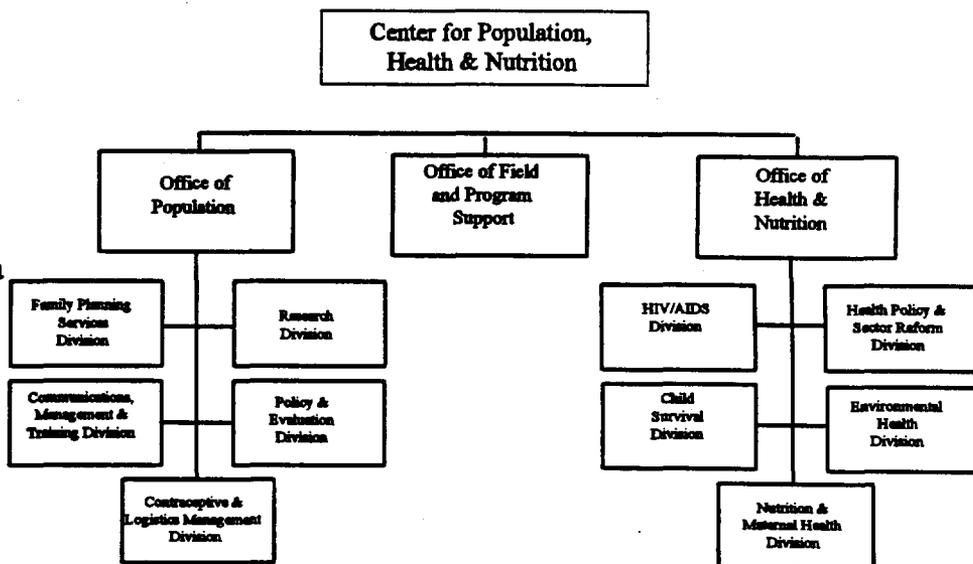

The PHN Center provides high-quality quick-response technical assistance, and advances state-of-the-art knowledge through field-relevant research carried out by its network of collaborating institutions. The Center's field support, research and technical leadership functions are synergistically interrelated: needs are identified in the field, research is undertaken to determine how best to respond to those needs, and on-the-ground experience with various interventions feeds back into program development and new initiatives. The Center also plays an important role in the sector in coordinating with other donors and encouraging them to direct their resources in support of sector goals.

The PHN Center is composed of three offices with complementary objectives and activities — the Office of Population, the Office of Health and Nutrition, and the Office of Field and Program Support. These offices work together to support the field and accomplish the goals and objectives of USAID in this sector. Each office, its divisions, and their functions are described below.

The Office of Population (POP):

Commodities and Logistics Management Division (CLM): Provides a centralized system for contraceptive procurement, maintains a database on commodity assistance, and supports a program for contraceptive logistics management.

Communications, Management, and Training Division (CMT): Increases the awareness, acceptability, and use of family planning methods and expands and strengthens the managerial and technical skills of family planning and health personnel.

Family Planning Services Division (FPSD): Increases availability and quality of family planning and related services through strengthening government programs, local private voluntary organizations, for-profit organizations, and commercial channels.

Policy & Evaluation Division (P&E): Improves demographic research and data collection, assists policymakers and researchers in understanding the impact of rapid population growth on other development objectives, supports the development of appropriate policies and programs, and guides efforts to evaluate program impact.

Research Division (R): Supports biomedical research to increase understanding of contraceptive methods and to develop new fertility regulation technologies and, through operations research, improves the delivery of family planning and reproductive health services.

The Office of Health and Nutrition (HN):

Child Survival Division (CS): Provides technical guidance and assists in strategy development and program implementation in child survival, including interventions aimed at child morbidity and infant and child nutrition.

Nutrition and Maternal Health Division (NMH): Provides technical guidance and assists in strategy development and program implementation in nutrition and women's health, especially maternal health.

Health Policy and Sector Reform Division (PS): Assists in the design, implementation, research and evaluation of health and nutrition policy reform, management and financing issues, including health care financing, quality assurance, pharmaceuticals, private sector and data activities.

Environmental Health Division (EH): Assists in the design, implementation, research and evaluation of environmental health activities and issues, including water and sanitation, hazardous wastes, vector-borne tropical diseases, food hygiene, solid waste, air pollution and occupational health.

HIV/AIDS Division (AIDS): Provides technical guidance and assists in strategy development, program design and implementation of HIV/AIDS control activities worldwide.

The Office of Field and Program Support (OFPS)

The Office of Field and Program Support (OFPS) was created as a demand driven, service-oriented unit within the PHN Center to ensure that state-of-the-art technical direction is translated into field strategies and programs which achieve impact both globally and at the country level. OFPS has two major functions, as follows.

Field Support: includes Joint Programming and Planning, coordination between the Global Bureau, Regional Bureaus, other donors and the field, and significant technical input into strategic planning and performance monitoring.

Program Support: includes programming/budgeting for the Center, personnel management, and other tasks related to the global management of PHN resources.

The Office of Field and Program Support (OFPS)

OFPS was created as part of the Population, Health and Nutrition (PHN) Center when the Global Bureau was formed. It has two primary roles: overall programming, budgeting and administrative functions of the Center; and coordination of all health, population and nutrition assistance provided by the Global Bureau to the USAID missions in the field, as well as to the Regional Bureaus.

The Office serves as the primary Global Bureau contact for Missions on development of strategies and programs in PHN, as well as for requests for technical assistance. It serves as a central coordination point for all of the Joint Country Programming Teams in the Center which oversee and coordinate each country's overall strategy, programs and budgets from the Center's perspective. OFPS is responsible for communicating new technical programs and developments to field missions, as well as programmatic and budgetary information. As part of its administrative functions OFPS coordinates all travel requests and approvals with the Center's leadership, as well as personnel issues and management of automated data processing systems.

In programming and budgeting, the Office is charged with coordinating the collection and reporting of field budget requests, submission of the Center's annual budget request, congressional notifications, and tracking of disbursements under each of the Center's projects. Staffed with technical experts in programming and budgeting, the Office also offers budget advice to individual project managers, and maintains the official files of each country's critical annual program documents.

On the Field Support side, OFPS' cadre of experienced field officers offer a field perspective to program and project managers in the Center, especially through their relationship with each of the Joint Country Teams. OFPS Regional Coordinators provide services such as coordination of the budget process, technical analysis of Center and Mission activities, arrangement of field visits by Center personnel, and visits of Mission and host country officials from the field. These Regional Coordinators also liaise closely with the regional bureaus to ensure that the programming process of action plans, annual budget submissions, and memoranda of understanding on field support is completed for each Mission worldwide.

Population Program Activities Support

Cooperating Agency JORGE Scientific Corporation

Project Number 936-3070

Agreement Number CCP-3070-C-00-6003-00

Duration Nov 1995 - June 1996
Geographic Scope USAID/Washington

Purpose:

To provide administrative support to the G/PHN Office of Population and its non-direct hire technical staff.

Description:

G/PHN/POP projects are designed to strengthen USAID assistance to country family planning programs worldwide. The Office of Population accounts for over half of USAID population assistance. G/PHN/POP carries out its activities through approximately 43 grants, agreements and contracts with other U.S. government organizations and private agencies. The assistance provided by JORGE Scientific supports PHN/POP and USAID mission population programs in meeting Agency objectives.

Contraceptive Procurement

Cooperating Agency N/A
Project Number 936-3018
Agreement Number N/A

Duration 1981 - Ongoing
Geographic Scope Worldwide

Purpose:

To provide a consolidated G/PHN/POP budget for centrally funded contraceptives that are provided to centrally supported subprojects of Cooperating Agencies and to selected governmental programs in developing countries.

Description:

G/PHN/POP aggregates the contraceptive needs of family planning subprojects supported under various centrally funded Cooperating Agency agreements. During FY 94, G/PHN/POP funded the contraceptive needs of governmental programs in countries funded by USAID's Development Assistance fund, Development Fund for Africa, and Economic Support fund accounts. G/PHN/POP, as the manager of contraceptive supply for worldwide USAID programs, also budgets funds for the maintenance of warehouse stocks to meet unplanned program needs of all programs. The funds budgeted in 936-3018 are transferred each fiscal year to the Central Contraceptive Procurement project (936-3057) which pools all USAID funds - central, Mission, and regional - designated for contraceptive procurement and serves as the common fund for all contraceptive procurement contracts.

Project Director

Contractors are designated under central project 936-3057.

Fax: (703) 875-4413
danderson@usaid.gov

CLM Division

Central Contraceptive Procurement

Cooperating Agency Various
Project Number 936-3057
Agreement Number Various

Duration 1990 - ongoing
Geographic Scope Worldwide

Purpose:

To provide an efficient mechanism for consolidated USAID purchases of contraceptives based on the transfer of all funds from all USAID accounts that support contraceptive procurement to a single central procurement account at the beginning of each operational year for implementation of the procurement process.

Description:

This project was established in FY 90 to provide an efficient central contraceptive procurement mechanism for all USAID offices whose programs require contraceptive supplies. Funds are transferred annually to this project through OYB transfers from each of the USAID accounts that support contraceptive procurement (e.g. DA, DFA, AIDS, ESF), and G/PHN/POP directs the use of these funds through a series of procurement contracts to provide the contraceptive supplies required by USAID programs worldwide. This project consolidates the procurement actions but leaves responsibility for the estimation of contraceptive needs in the USAID offices that support family planning delivery systems.

The central procurement system undertakes the purchase of several differently-packaged condoms; oral contraceptives; vaginal foaming tablets; NORPLANT®; the Copper T-380-IUD; and Depo-provera. For details on formulation, brands, prices, contract terms, and ordering procedures, please refer to the guidance issued by G/PHN/POP as part of its guidance for estimating contraceptive procurement needs. All shipping and warehousing of USAID-supplied contraceptives is provided by Panalpina, Inc.

Project Director

AID/W

Contractors may change annually because of competitive contract procedures. FY 94 contractors include:

Family Planning Logistics Management (FPLM)

Cooperating Agency John Snow, Inc. (JSI)
Project Number 936-3038
Agreement Number CCP-3038-C-00-5028-00

Duration Sept 1995 - Sept 2000
Geographic Scope Worldwide

Purpose:

To improve the capability of developing country public and private sector organizations to administer more effective and efficient contraceptive logistics systems; and to provide support to G/PHN/POP in managing the Office's Population Projects Database (PPD) and the management system for tracking contraceptive orders, shipments and financial accounts (NEWVERN).

Description:

JSI collaborates with the Centers for Disease Control and Prevention (CDC) and provides assistance to G/PHN/POP, USAID missions, and developing country family planning organizations to implement the following activities: 1) strengthen the ability of family planning programs to manage and implement efficient logistics systems; 2) institutionalize the capacity of family planning programs to forecast their contraceptive requirements; 3) develop the capacity of family planning programs to implement sound quality assurance programs; 4) implement and maintain G/PHN/POP's commodities management information system (NEWVERN) which tracks the procuring, shipping, storing, and financing of USAID supplied contraceptives; and 5) undertake special analyses on cross-cutting issues related to contraceptive logistics and USAID population programs. The logistics assistance activities are managed out of the Washington office and from regional offices in Latin America, and East and West Africa, as well as country offices.

Project Number 936-3038

Agreement Number DPE-3038-X-HC-1015-00

Duration April 1991 - August 1996
Geographic Scope Worldwide

Purpose:

To improve the management and operation of FP programs in developing countries through the use of more effective logistics systems, the collection and analysis of demographic data, and the use of targeted epidemiological activities.

Description:

The five-year PASA with the Division of Reproductive Health at the Centers for Disease Control and Prevention (DRH/CDC) provides technical assistance to developing country family planning organizations in four areas: 1) logistics management - to improve the ability of local FP organizations to more effectively and efficiently manage their contraceptive supplies; 2) contraceptive prevalence surveys - to assist FP organizations in determining the patterns of contraceptive knowledge and use; 3) clinic management - to provide developing country family planning programs with the capability to use Patient Flow Analysis (PFA) to enhance the efficiency of clinic operations; and 4) epidemiological training and research - to conduct workshops and applied research on epidemiological issues related to contraceptive safety and reproductive health. In general, the local (in-country) costs of these activities are borne by the host organization.

Population Information Program

Cooperating Agency Center for Communication Programs

The Johns Hopkins University

Project Number 936-3052

Agreement Number DPE-3052-A-00-0014-00

Duration July 1990 - July 1996

Geographic Scope Worldwide

Purpose:

To support the effective delivery of appropriate information, education and communication (IEC) on family planning (FP) and reproductive health (RH) to selected audiences in developing countries. To develop in-country capacity to initiate, implement, and sustain effective communication programs for population and FP/RH service delivery. Also, to inform population/FP/RH professionals and policy-makers in developing countries of new developments in population, FP, and related reproductive health issues.

Description:

The Population Information Program (PIP) supplies information to the developing world through the authoritative review Population Reports, an international journal which covers important issues in population, FP, and related health literature. The online bibliographic database, POPLINE, is the world's largest database on population, FP, and related reproductive health literature. POPLINE searches can be obtained on line through the National Library of Medicine's MEDLARS system, by writing PCS/PIP, and on POPLINE CD-ROM. PCS and PIP were merged in December 1992.

Information, Education and Communication Support Project

Cooperating Agency Johns Hopkins University
Project Number 936-3052
Agreement Number CCP-3052-A-00-6001-00

Duration Nov 1995 - Nov 2000
Geographic Scope Worldwide

Purpose:

To support the effective delivery of appropriate information on family planning and reproductive health to developing country audiences.

Description:

Population Communication Services (PCS) will 1) provide resources and technical assistance to transfer Family Planning Information, Education and Communication (IEC) technologies, techniques, and expertise to countries receiving project services; 2) develop in-country capacity to design, sustain and evaluate IEC activities, 3) evaluate the impact of family planning IEC activities, 4) disseminate project results and other state of the art information about IEC for family planning, and 5) support essential knowledge and expertise about family planning programming and technologies among policy makers, program planners, and researchers in the developing world.

The PCS program will emphasize: 1) a full spectrum of traditional and modern communication approaches to achieve maximum coverage and increased sustainability; 2) optimizing synergies among community mobilization, interpersonal communication, and mass media; 3) working with women to increase their knowledge about and demand for family planning and other reproductive health services; 4) supporting the development and implementation of national family planning and other reproductive health IEC strategies to identify problems, define goals, and coordinate different family planning IEC players and approaches; 5) extending the reach and scope of IEC and modern communication technology; 6) maximizing behavioral impacts of family planning and other reproductive health IEC efforts; and 7) working responsively with USAID Missions.

Family Planning Management Development (FPMD)

Cooperating Agency Management Sciences for
Health
Project Number 936-3055
Agreement Number DPE-3055-A-00-5000-00

Duration Sept 1995 - Sept 2000
Geographic Scope Worldwide

Purpose:

To promote institutional development and strengthen the management capabilities of public and private family planning organizations in order to enhance the quality, coverage and sustainability of their services.

Description:

The FPMD project provides a broad menu of management interventions at the country and institutional level focusing on the concept of a "fully functional service delivery point" and stages of organizational development. Customized management interventions include, but are not limited to strategic planning, study tours, client surveys, management systems development, management training workshops, financial management planning, clinic management, and marketing.

Additional priority areas for FPMD are the dissemination of management techniques, approaches, and quality improvement tools to developing country managers, other CAs and population partners; an emphasis on south-to-south exchanges; the development of an on-line network of family planning providers; and research areas such as cost and revenue collection efficiency and alternative financing schemes.

Primary Providers' Education and Training in Reproductive Health

Cooperating Agency INTRAH, University of
North Carolina

Project Number 936-3072

Agreement Number CCP-0372-C-00-5005-00

Duration January 1995-January 2000
Geographic Scope Worldwide

Purpose:

To improve access to and quality of family planning and reproductive health care services.

Description:

PRIME is a worldwide human resources development project which provides assistance in family planning and reproductive health care training to a full spectrum of providers including nurses, midwives, traditional birth attendants, and potential service providers in the non-formal sector. PRIME is designed to establish sustainable family planning and reproductive health care training systems through the development of national strategic training and human resources development plans. The project focuses on the linkage between training and service delivery for the improvement of service quality and access. Project interventions to enhance the effectiveness and efficiency of primary providers include policy activities to reduce medical and regulatory barriers, evaluation of impact data, and special studies.

Training in Reproductive Health (JHPIEGO)

Cooperating Agency JHPIEGO
Project Number 936-3069
Agreement Number CCP-3069-A-00-3020-00

Duration Aug 1993 - Sept 1998
Geographic Scope Worldwide

Purpose:

To develop host country training capacity and to train selected health providers in modern reproductive health knowledge and skills, emphasizing voluntary surgical contraception, IUDs, injectables and implants.

Description:

The Johns Hopkins Program for International Education in Reproductive Health (JHPIEGO) works to: 1) establish the capacity of countries to train their own health care personnel to deliver quality FP/RH services, emphasizing long term methods, through the development of national training systems; 2) meet the short-term national family planning needs, especially in long-term methods, through the training of service providers; 3) eliminate medical barriers and training policies which limit access to family planning and reproductive health services; 4) improve effectiveness and efficiency of reproductive health training materials; 5) expand international reproductive health training resources and systems; and 6) adapt and introduce new training technologies and methodologies.

Population Leaders Program

Cooperating Agency Western Consortium for
Public Health

Project Number 936-3070

Agreement Number CCP-3070-A-00-4014-00

Duration Sept 1994 - Sept 1999
Geographic Scope Worldwide

Purpose:

To enhance the effectiveness of USAID-sponsored population/family planning /reproductive health programs by providing technical and management consultation and offering an executive education forum to participating technical experts to enhance their leadership capacity.

Description:

The Population Leaders Program (PLP) recruits, places and administratively supports mid- to senior-level specialists in USAID, host government and non-governmental organizations for an assignment of two years. Assignments are governed by a scope of work developed in collaboration with the host organization. Leadership and management skills will be strengthened through mentoring and training and a network of population/family planning/reproductive health specialists will be developed which will provide on-going leadership to the field.

CMT Division

Population Services Fellowship Program (Michigan Fellows)

Cooperating Agency University of Michigan
Project Number 936-3054
Agreement Number CCP-3054-A-00-5004-00

Duration August 1995 - July 2000
Geographic Scope Worldwide

Purpose:

1) To provide FP programs in developing countries with professional technical expertise in population and related areas, such as environment and reproductive health; and 2) to provide international training for recent university graduates or mid-career professionals through fellowships overseas. The program has recently established a new initiative to place fellows with agencies working to integrate population and environment activities.

Description:

This project provides programs in the private and the public sectors with the skills of fellows who are recent graduates or mid-career professionals in population and development-related fields. It simultaneously provides entry level professionals with valuable field experience and training. The technical assistance and training provided covers a wide range of program needs: data collection and analysis; policy formulation and implementation; communication and education; training; management; service delivery; and program evaluation. Fellows are recruited through universities, international organizations, professional publications, and meetings. They are selected competitively on the basis of their academic and professional experience, and according to the skills required by the host institution.

Fellows are placed in developing country governmental and non-governmental agencies and universities, as well as in national and international organizations which support population activities in developing countries. The fellowship term is 18 to 24 months overseas.

FPSD

Access to FP Through Women Managers (ACCESS)

Cooperating Agency Center for Development
and Population Activities
Project Number 936-3059
Agreement Number DPE-3059-A-00-1022-00

Duration Aug 1991 - Aug 1997
Geographic Scope Worldwide

Purpose:

To improve access to quality family planning and reproductive health services by utilizing the resources of trained women managers in developing countries.

Description:

The ACCESS project builds on CEDPA's experience in reaching new family planning users through women's networks, alternative development institutions and private sector organizations. For the past 15 years CEDPA has been training leaders around the world as managers of family planning programs. Through CEDPA's extensive network of nearly 4,000 "alumnae" in 100 countries, the project is able to effectively advocate for support of, and to meet increased demands for family planning services. An important CEDPA strength is its ability to work through local partners to deliver services in more traditional communities. ACCESS works with alumnae to ensure that women's concerns and perspectives are incorporated in the design and management of family planning programs and in policy development. CEDPA and its partners place particular emphasis on assuring quality of community-based distribution programs and developing the institutional capacity of NGOs and women's groups.

Program for Voluntary and Safe Contraception (AVSC)

Cooperating Agency AVSC, International
Project Number 936-3068
Agreement Number CCP-3068-A-00-3017-00

Duration Aug 1993 - Aug 1998
Geographic Scope Worldwide

Purpose:

To provide support to AVSC's program to introduce, expand and improve voluntary surgical contraception services and other long-term contraceptive methods.

Description:

AVSC works around the world to make safe and voluntary surgical contraception a known and accessible choice for women and men. AVSC's work emphasizes high quality service delivery of female sterilization, vasectomy, implants, intrauterine devices, and injectables.

AVSC's field and technical staff work in partnership with country counterparts, USAID missions, other major donors, and cooperating agencies to establish, expand, and improve sustainable clinical contraceptive services. AVSC provides technical and other assistance to countries and donors in the following areas; conducting needs assessments and planning for clinical contraception service delivery; managing effective client-centered service delivery systems; conducting service-based training; developing service guidelines and quality assurance systems; establishing client counseling and information and education services; introducing contraceptive technologies; determining medical equipment/supply needs; doing service-based programmatic research; and evaluating the impact of programs and activities.

Population & Family Planning Expansion (CARE)

Cooperating Agency CARE
Project Number 936-3058
Agreement Number DPE-3058-A-00-1011-00

Duration May 1991 - May 1997
Geographic Scope Worldwide

Purpose:

To lower fertility by increasing the availability and use of voluntary family planning services.

Description:

CARE, the largest private non-sectarian development and relief agency in the world, has made population a priority. CARE is adding family planning to their on-going worldwide, multisector development program. With USAID assistance, CARE is developing the technical resources and systems necessary to integrate family planning services into their programs through development of partnerships with government and non-governmental organizations. CARE is testing new approaches to providing family planning information, services, and supplies to rural and other hard-to-reach populations. CARE provides matching funds with its ten CARE international members and other donors to increase resources available.

Family Planning Services (Pathfinder)

Cooperating Agency Pathfinder International
Project Number 936-3062
Agreement Number CCP-3062-A-00-2025-00

Duration Sept 1992 - July 1997
Geographic Scope Worldwide

Purpose:

To introduce voluntary family planning services, information, and training in developing countries and to make existing family planning service systems more effective in both public and private sectors.

Description:

Pathfinder International is a non-profit organization headquartered in Boston and founded in 1957 to initiate and encourage family planning programs and activities throughout the developing world. Since USAID funding began in 1967, Pathfinder International has sponsored over 2,400 projects in 85 countries and has helped encourage the establishment of national family planning associations in several Asian and African countries. Under this Cooperative Agreement, Pathfinder provides a range of different services that complement USAID field mission programs in fifteen countries. Pathfinder provides local subgrantees with administrative and financial support, technical assistance of different kinds, training, upgrading of facilities, and commodities. Pathfinder works broadly in a number of program areas, including community-based distribution programs, clinical services, information and education, institutional development, contraceptive social marketing, and services for young adults. Country activities are designed to support accomplishment of USAID strategic objectives in the PHN sector.

Promoting Financial Investments and Transfers (PROFIT)

Cooperating Agency Deloitte and Touche
Project Number 936-3056
Agreement Number DPE-3056-C-00-1040-00
DPE-3056-Q-00-1041-00

Duration Sept 1991 - Sept 1996
Geographic Scope Worldwide

Purpose:

To expand the commercial sector's involvement in family planning service and product delivery, thus contributing to national family planning and reproductive health objectives. PROFIT's assistance is directed to a limited number of developing countries having more viable commercial sectors.

Description:

Realizing that all sectors - public, private non-profit, and commercial - need to play a role in contributing to successful family planning programs, the PROFIT project was initiated to facilitate the commercial sector's greater participation in this effort. PROFIT employs a number of strategies to facilitate this greater participation: 1) expanding family planning services and coverage provided by private health care groups (e.g. doctors/other clinical professionals, HMOs, insurance groups, commercial clinics, hospitals, etc.); 2) expanding large employer groups' participation in health and family planning benefits programs for their employees; 3) reducing trade, regulatory, and policy barriers that adversely affect the commercial sector's greater involvement in family planning; 4) assessing the appropriateness and financial viability of commercial family planning product/service ventures; and 5) investing in innovative commercial ventures, where appropriate, that result in greater availability of family planning services, and more affordable and available contraceptive methods. PROFIT also provides short term technical assistance to USAID Missions on these and other commercial sector family planning strategies and issues.

FP Service Expansion & Technical Support II (SEATS)

Cooperating Agency John Snow, Inc.
Project Number 936-3048
Agreement Number DPE-3048-Z-9011-00
CCP-3048-C-00-4004-00

Duration January, 1995 - January, 2000
Geographic Scope Selected countries in Africa, Asia, the Near East and the New Independent States

Purpose:

To expand the development of national Family Planning/Reproductive Health (FP/RH) programs; increase access to, and use of quality FP/RH services in currently underserved populations; and ensure that unmet demand for these services is addressed through the provision of appropriate financial, technical and human resources.

Description:

The SEATS project focuses on developing and strengthening national FP/RH service delivery programs in selected countries in Africa, Asia, the Near East and the New Independent States. SEATS has three overall program emphases: 1) strategic planning, program design, and management support for national FP programs; 2) development of innovative approaches to large scale FP/RH program expansion; and 3) implementation of FP and reproductive health service delivery programs in 15 to 20 countries. Technical staff are based in two regional offices and headquarters (Washington, DC), with resident advisors based in priority countries. SEATS provides assistance in program planning and management, IEC, training, commodity distribution, and management information systems.

International Planned Parenthood Federation (IPPF)

Cooperating Agency IPPF

Project Number 936-3071

Agreement Number CCP-3071-G-00-3013-00

Duration Aug 1993 - Aug 1998

Geographic Scope Worldwide

Purpose:

The purpose of this grant is to enable the International Planned Parenthood Federation (IPPF) to introduce, expand, and improve family planning and reproductive health information and services through its extensive affiliated network of indigenous family planning associations.

Description:

IPPF is the largest non-profit, non-governmental family planning and reproductive health organization in the world. IPPF is an international federation of 130 autonomous local Family Planning Associations (FPAs) working primarily among disadvantaged urban and rural populations which are marginalized from existing health service delivery systems.

USAID grant funds contribute to core support and technical support that IPPF provides to its affiliates. USAID grant funds are used to increase the strength and effectiveness of IPPF FPAs to introduce and expand programs that address the strategic goals articulated in the IPPF strategic plan, VISION 2000. Programmatic emphases under VISION 2000 include: 1) Safeguarding the individual's right to free and informed choices in sexual and reproductive health; 2) Removing political, legal and administrative barriers to the provision of sexual and reproductive health care services; 3) Working for the establishment of equal rights for women to enable them to exercise control over their own reproductive and sexual health choices; 4) Eliminating the high incidence of unsafe abortion; 5) Increasing men's commitment and joint responsibility in all areas of sexual and reproductive health; and 6) Increasing the access of young people to appropriate information, education and services in addressing their needs for reproductive and sexual health care. The USAID contributions also enables FPAs to improve their management and evaluation capabilities.

Expansion/Improvement of FP Services in Latin America (IPPF/WHR)

Cooperating Agency IPPF/WHR

Project Number 936-3065

Agreement Number CCP-3065-A-00-2018-00

Duration July 1992 - June 1997

Geographic Scope Latin America and the
Caribbean

Purpose:

To improve and expand family planning services in Latin America and the Caribbean and to assist Family Planning Associations (FPAs) to make the transition to sustainable programs without USAID funding.

Description:

Incorporated as a U.S. private voluntary organization in 1955, IPPF/WHR currently has 45 member associations. The current Transition Project focuses on strengthening the self-reliance of the FPAs in Brazil, Colombia, Mexico, Peru, Paraguay, Uruguay, Chile and other selected countries. Non-FPAs in Mexico and the Caribbean also receive support from the Transition Project. Funds awarded to FPAs are matched with non-Federal funds on a one-to-one basis. A buy-in from the Office of Health supports the incorporation of HIV-AIDS/STD prevention into family planning programs.

FPSD

Contraceptive Social Marketing III (CSM III)

Cooperating Agency The Futures Group
Project Number International
Agreement Number 936-3051
CCP-3051-C-00-2016-00
CCP-3051-Q-00-2017-00

Duration Sept 1992 - Sept 1997
Geographic Scope Worldwide

Purpose:

To increase the availability and use of contraceptives among low and middle income groups using commercial marketing techniques, and to establish realistic cost recovery schemes and targets in all sales programs.

Description:

Contraceptive Social Marketing III (CSM III) projects utilize the techniques and resources of commercial enterprises to increase the availability and use of contraceptives. The CSM III Project has several primary objectives: 1) to increase modern method prevalence rates using commercial distribution channels; 2) to design programs to pursue the dual objectives of cost recovery and maximized access; 3) to maximize use of alternative sources of commodities, eliminating reliance on USAID-source commodities wherever possible; 4) to increase correct, effective use of contraceptives; 5) to develop innovative promotion and advertising techniques; and, 6) to enhance institutionalization of local skills in IEC, strategic marketing, and financial management. This contract also undertakes expansion of efforts in several areas that have received limited emphasis. These efforts are: the inclusion of long-term contraceptives in the array of methods promoted by the program, and the marketing of family planning services, in addition to the current approach to marketing products.

Improving the Health and Well-Being of Young Adults

Cooperating Agency Pathfinder International
Project Number 936-3073
Agreement Number CCP-3073-A-00-6002-00

Duration Nov 1995 - Nov 2000
Geographic Scope Worldwide

Purpose:

The purpose of the Improving the Health and Well-being of Young Adults (YAP) Program is to help reduce death and illness among young adults, through the promotion of responsible behavior, delaying exposure to sexual activity and related incidence of sexually transmitted diseases, including HIV/AIDS, and high risk pregnancies. The program will also promote positive health behaviors including breastfeeding, improved nutrition, and child spacing to improve both the health of the mother and child survival.

Description:

The four key outcomes of the PHN Center program are:

1. Improved policy environment for reproductive health for young adults;
2. Increased skills and competencies of USAID and its partners to design, implement, monitor and evaluate reproductive health programs for youth;
3. Improved and tested tools and technologies for reproductive health for youth; and
4. Development and implementation of strategies for the expansion of reproductive health for youth programs and services.

Demographic and Health Surveys (DHS)

Cooperating Agency Macro International, Inc.
Project Number 936-3023
Agreement Number CCP-3023-C-00-2012-00
CCP-3023-Q-00-2013-00

Duration Sept 1992 - Sept 1997
Geographic Scope Worldwide

Purpose:

To improve the information base for family planning and health program management through sample surveys.

Description:

DHS III continues successful elements utilized in DHS II, while giving increased emphasis to data dissemination, further analysis and utilization, and strengthening host-country capabilities. DHS III is in the process of conducting 31 standard DHS surveys; one knowledge, attitudes and practices survey; one panel survey; and five experimental surveys, as well as providing limited technical assistance in a few additional countries. As in DHS II, DHS III prepares and disseminates country reports; holds in-country seminars, further analysis and data processing workshops at the country and regional level; and produces a series of comparative studies. New activities of DHS III include special trend reports for countries with two or more surveys, and collaborative studies with developing country researchers.

While DHS III surveys continue to focus on fertility, contraceptive knowledge and use, and maternal and child health, the surveys have an added emphasis on reproductive health. The surveys also collect data on marriage, education and work. Some surveys incorporate special modules on such topics as HIV/AIDS and STDs, social marketing of contraceptives, women's employment, female circumcision, and domestic violence. In many countries DHS III collects information on men and family planning service providers through separate surveys occurring concurrently with the main survey.

Expert Studies of Population Issues

Cooperating Agency The National Academy of
Sciences (NAS)

Project Number 936-3078

Agreement Number DPE-3078-A-00-5000-00

Duration Sept 1995 - Sept 2000

Geographic Scope Worldwide

Purpose:

To support the Committee on Population in conducting research on population issues of special interest to the international population community.

Description:

The Committee will organize panel studies, conferences, workshops, and meetings designed both to synthesize and to elicit research on the issues in population, reproductive health, and family planning that will confront USAID and its development partners in the next decades.

The Committee's agenda is worked out on a continuing basis at its meetings, and between meetings in staff discussions with sponsoring agencies. Proposed topics include: Reproductive Health; Mortality and Fertility; and Education and Fertility.

The POLICY Project

Cooperating Agency The Futures Group
International
Project Number 936-3078
Agreement Number CCP-3078-C-00-5023-00

Duration Sept 1995 - Sept 2000
Geographic Scope Worldwide

Purpose:

To help build a supportive policy environment for family planning and reproductive health programs through promotion of a participatory policy process and the development and implementation of population policies that are effective in responding to client needs.

Description:

The POLICY Project is the centerpiece of G/PHN's population policy portfolio. POLICY streamlines earlier population policy assistance efforts by combining successful elements of the RAPID and OPTIONS projects and embarks in new directions by incorporating research and participation elements. Expected outcomes of the POLICY Project are: 1) increased and improved policy dialogue and formulation; 2) a democratized policy process; 3) improved national strategic planning and resource allocation; and 4) policy-relevant research and dissemination.

Special attention will be given to seven cross-cutting themes-- reproductive health, intersectoral linkages, gender issues, participation, dissemination, partnerships, and results. In pursuit of these outcomes, POLICY will provide technical assistance, training, and equipment. The project will support long-term advisors, short- and long-term training, regional and national workshops, commissioned research, observational travel, a small grants program to expand the capacity of local NGOs/PVOs to participate effectively in the policy process, and South-to-South interaction.

P&E Division

Population Reference Bureau (PRB)

Cooperating Agency Population Reference
Bureau (PRB)

Project Number 936-3046

Agreement Number CCP-3046-A-00-3018-00

Duration Sept 1993 - Sept 1997

Geographic Scope Worldwide

Purpose:

To disseminate population research and information to policy-making audiences.

Description:

PRB plays an important role in bridging the gap between the population research community and policy audiences who need research findings to make informed policy choices. Under the Cooperative Agreement, PRB produces and distributes policy booklets in multiple languages as well as the World Population Data Sheet. PRB also works with the mass media, reaching developed and developing country audiences through wire service stories, press releases, news packs, and seminars for journalists. Finally, PRB conducts small-scale technical assistance activities for specific dissemination efforts or to help developing country institutions design communications strategies.

Missions and regional bureaus may make ad hoc requests and obtain bulk or single copies of PRB materials, briefing packets, or slides free of charge. PRB can also respond to larger requests for technical assistance or the production of special booklets and analyses, as well as the updating, reprinting, and/or translating of existing PRB materials. PRB manages two intern programs: one placing young professionals in PRB as well as the Office of Population, and one improving policy communications skills and providing financial support for developing country graduate students in population and health fields.

Resources for the Awareness of Population Impacts on Development (RAPID IV)

Cooperating Agency The Futures Group
International

Duration Sept 1991 - Sept 1996
Geographic Scope Worldwide

Project Number 936-3046

Agreement Number DPE-3046-C-00-1047-00
DPE-3046-Q-00-1048-00

Purpose:

To raise leadership awareness of relationships between population growth and development and about the positive socio-economic and health effects of family planning and reproductive health interventions.

Description:

The RAPID IV project supports collaborative analyses of the implications of population growth for national development, health, and environment. Analyses also estimate FP and HIV/AIDS program requirements to meet expected future demand for RH services. Analyses use microcomputer-based simulations that project population growth under alternative fertility and FP program assumptions. A major emphasis of the RAPID IV approach is strengthening of local institutional capabilities to conduct population analyses. This is accomplished through technical training in country-based and regional workshops.

East-West Center Program on Population (EWCPOP)

Cooperating Agency The East-West Center
Program on Population

Project Number 936-3046

Agreement Number CCP-3046-A-00-3015-00

Duration Aug 1993 - Aug 1997

Geographic Scope Asia-Pacific Region

Purpose:

To strengthen the capacity of institutions in the Asia-Pacific region to analyze and use demographic and FP data in population policy and family planning program applications.

Description:

Under a Cooperative Agreement, the East-West Center Program on Population (EWCPOP) carries out activities grouped into four categories: technical assistance (research, design, data analysis); training (workshops held at EWCPOP and in developing countries in Asia); collaborative research (senior researchers from Asia work with EWCPOP research associates and computer specialists); and dissemination (including conferences and publications for policy-makers, family planning program managers, and researchers). The substantive themes covered by the Cooperative Agreement are: 1) understanding the nature and determinants of fertility and mortality decline; 2) assessing the benefits of family planning programs and lowered population growth for national objectives; and 3) improving family planning and maternal and child health programs.

Demographic Data Initiatives (BuCen)

Cooperating Agency U.S. Bureau of the
Census (BuCen)

Project Number 936-3046

Agreement Number CCP-3046-P-00-4012-00

Duration Sept 1994 - Sept 1997
Geographic Scope Worldwide

Purpose:

To strengthen the capability of developing countries to collect and use population information for designing, implementing, and evaluating policies and programs; and to raise awareness among national leaders of population structure and growth and of their impact on development.

Description:

The PASA with BuCen has two main components. First, BuCen provides technical support for the implementation of censuses in developing countries. Activities include: 1) workshops and technical consultations to USAID missions and developing country statistical agencies on the entire range of census activities, including initial assessment and planning visits, census management procedures, data collection and processing, demographic data analysis, and dissemination and use of census data; 2) development and dissemination of software packages and instructional materials for taking and analyzing censuses and surveys; and 3) on-going contact and support for users of BuCen software packages. Second, BuCen compiles and analyzes worldwide demographic data. Activities include: 1) development and maintenance of a comprehensive worldwide demographic database; 2) biennial publication of worldwide population statistics; 3) preparation of Population Trends reports on individual countries; and 4) preparation of special reports from the international database in response to ad hoc requests from USAID/W, USAID missions, and cooperating agencies.

Women's Studies Project

Cooperating Agency Family Health
International

Project Number 936-3060

Agreement Number CCP-3060-A-00-3021-00

Duration Sept 1993 - Sept 1998
Geographic Scope Worldwide

Purpose:

To conduct a program of research and other activities on the impact of family planning programs on women's lives.

Description:

Specific purposes of the Women's Studies Project are to: 1) support social and behavioral science research on the immediate and long-term consequences for women of family planning programs and methods and 2) help improve family planning and related reproductive health policies and programs through increased knowledge of the needs and perspectives of women. In addition to cross-country and comparative research, the project supports country-specific research in as many as eight developing countries. Financial and technical assistance is provided to in-country researchers to implement research projects and disseminate findings. Research approaches and priorities are shaped with input from in-country advisory groups as well as an international technical advisory committee. The project communicates research findings to policy-makers, researchers, women's groups, program managers, and service providers.

The Population Council Program (POP Council)

Cooperating Agency The Population Council
Project Number 936-3050
Agreement Number CCP-3050-A-00-4013-00

Duration Sept 1994- Sept 1999
Geographic Scope Worldwide

Purpose:

To develop and appropriately introduce contraceptive technology, to expand contraceptive choice in family planning programs; to provide technical information on contraceptive methods to the international population and family planning community; and to provide technical assistance to institutions in developing countries for research, evaluation, training, and limited work on service delivery systems.

Description:

Research in the contraceptive development area is heavily focused on activities related to NORPLANT® implants and reformulated NORPLANT II® rods, the development of second generation subdermal implants, hormone-releasing vaginal rings, transdermal contraception, and long acting hormonal methods for male contraception. The Council's efforts in contraceptive introduction are aimed at expanding contraceptive choice by broadening the range and availability of contraceptive options for women and men. Through a combined program of field-based research, technical assistance, and policy dialogue, the Council's work addresses those issues that impact on the quality of care as contraceptive methods are incorporated into family planning programs. In addition, research and technical assistance are supported in such areas as post-partum family planning, breastfeeding promotion, and development of assessment tools for examining specific issues surrounding family planning for adolescents.

Contraceptive Technology Research

Cooperating Agency Family Health International
Project Number 936-3041
Agreement Number CCP-3079-A-00-5022-00

Duration Sept 1995 - Sept 2000
Geographic Scope Worldwide

Purpose:

To develop, evaluate and introduce a range of safe, effective, and acceptable methods of family planning, and to enhance the capacity of family planning researchers and programs in developing countries to evaluate and provide these methods.

Description:

The project includes the following activities: 1) developing new contraceptive methods and providing the documentation for regulatory approval of these methods; 2) conducting clinical trials and epidemiologic studies to evaluate the safety and efficacy of various contraceptive methods, as well as other reproductive health technologies, under different conditions; 3) assessing the acceptability and impact on users and programs of various contraceptive methods; 4) carrying out surveillance and testing of contraceptive commodities to ensure product quality; 5) training overseas clinicians in reproductive health technology; and 6) collecting, analyzing and disseminating research findings.

Priority areas are: development of new and improved barrier methods and spermicides for pregnancy and HIV-AIDS/STD prevention; non-surgical sterilization; contraceptive quality; contraceptive benefits and risks; improving access to contraception through reduction of medical barriers; improving cost-effectiveness of programs; and the introduction of new methods such as DMPA.

This project has documented the comparative safety, efficacy, and acceptability in different developing country settings of methods such as minilap and laparoscopic sterilization, NORPLANT, copper IUDs, low-dose oral contraceptives, post-partum IUDs, and various barrier contraceptives including condoms. Work under this project supported the application to the FDA for marketing approval of the Reality® female condom. Applications for the Filshie Clip and a thermoplastic male condom are pending FDA approval.

Research Division

Contraceptive Research and Development (CONRAD)

Cooperating Agency Eastern Virginia Medical
School (EVMS)

Project Number 936-3044

Agreement Number CCP-3044-A-00-2015-00

Duration June 1992 - May 1997

Geographic Scope Worldwide

Purpose:

To develop improved and new methods of family planning for use in developing countries. In addition, the program supports research leading to technologies which may prevent the transmission of sexually transmitted diseases (STDs) including HIV.

Description:

The primary focus of the CONRAD program is the early stages of contraceptive research and development, beginning with targeted or applied research studies and progressing through the first two phases of clinical testing in humans. This program supports subprojects conducted by collaborating investigators worldwide, as well as laboratory and clinical research conducted at the Jones Institute for Reproductive Medicine, EVMS. Areas of research that are considered to be important for the development of better, safer, and more acceptable methods of contraception include, but are not limited to: 1) new barrier methods and spermicides with virucidal properties; 2) long-acting injectable and implantable contraceptives for women and men; 3) nonsurgical and/or reversible sterilization techniques; 4) methods suitable for lactating women; and 5) contraceptive vaccines directed against human gamete antigens and gonadotropins. CONRAD also supports research on the mechanisms and control of the heterosexual transmission of HIV, and on how contraceptives can contribute to prevention of heterosexual transmission of HIV and other STDs. International workshops and technical meetings that bring together collaborating scientists and other leading experts are sponsored to focus research efforts and to disseminate technical information.

Strategy for Improving Service Delivery/Operations Research (OR)

Cooperating Agency	The Population Council	Duration	Sept 1998 (AFR)
Project Number	936-3030		Jan 1998 (ANE)
Agreement Number	CCP-3030-C-00-3008-00 (AFR)		March 2000 (LAC)
	CCP-3030-Q-00-3009-00 (AFR)	Geographic Scope	Regional, as per agreement
	DPE-3030-C-00-0022-00 (ANE)		
	DPE-3030-Q-00-0023-00 (ANE)		
	CCP-3030-C-00-5007-00 (LAC)		
	CCP-3030-Q-00-5008-00 (LAC)		

Purpose:

To improve the quality, accessibility, and cost-effectiveness of FP, reproductive health, and maternal/child health delivery systems through operations research (OR) and technical assistance (TA); and to strengthen developing country institutional capabilities to use OR as a management tool to diagnose and solve service delivery problems.

Description:

The project provides TA and funding for OR to both public and private sector service providers. Priorities for the project include using OR and TA to: 1) increase access to FP and other reproductive health services; 2) increase the availability and use of under-utilized contraceptive methods; 3) improve the efficiency and sustainability of programs; 4) improve the quality of existing services; 5) provide more acceptable services to special populations, including adolescents, women who have experienced an unsafe abortion, indigenous groups, men, and post-partum women; and 6) test the integration of other reproductive health services into family planning programs. To date, more than 350 subprojects have been completed, and 100 are ongoing in more than 55 countries in Asia and the Near East (ANE), Latin America and the Caribbean (LAC), and sub-Saharan Africa (AFR).

Initiatives in NFP and Breastfeeding (Georgetown U.)

Cooperating Agency Georgetown University
Project Number 936-3061
Agreement Number DPE-3061-A-00-1029-00

Duration July 1991 - June 1996
Geographic Scope Worldwide

Purpose:

To improve fertility awareness and the acceptability, availability, and effectiveness of Natural Family Planning (NFP) and Breastfeeding (BF) for childspacing.

Description:

This project was created to improve the information and technical resources on NFP and BF available to FP service providers and consumers, researchers, educators, and developing country policymakers. This project undertakes a wide range of activities that include biomedical, social science and operations research; information, education, communication, and training; technical assistance and policy support; and service delivery. Other NFP and BF activities include developing ovulation prediction and detection kits; fertility awareness education; assessing the fertility impact of BF, specifically the effectiveness of the lactational amenorrhea method (LAM); training NFP trainers in health and FP organizations; improving and expanding service delivery by incorporating BF and LAM; developing BF guidelines for use in suboptimal and long-term conditions; publishing findings in journals and presentations at scientific meetings; and collaborating with international groups and organizations. The project is implemented by the Institute for Reproductive Health (IRH) at the Department of Ob-Gyn, Georgetown University Medical Center. The IRH is divided into two divisions (NFP and BF) which share equally the total project funds. Under this project, the International Federation for Family Life Promotion (IFFLP) is a major subcontractor responsible, among other things, for supporting NFP services in selected developing countries. The IRH is a major international resource for supporting BF for birthspacing.

Population Technical Assistance

Cooperating Agency Basic Health Management, Inc.

Project Number 936-3024

Agreement Number CCP-3024-00-C-00-3011-00

CCP-3024-00-Q-00-3012-00

Duration Dec 1993 - Dec 1998

Geographic Scope Worldwide

Purpose:

To improve the effectiveness of the design, implementation, management and evaluation of USAID-funded family planning and population programs worldwide by providing technical assistance.

Description:

The project provides professional short-term consultants in response to specific requests for technical assistance from missions and USAID/W in a broad spectrum of disciplines including demography, population policy, maternal and child health care, IE&C, fiscal management, medical science, training, administration, evaluation, logistics and other areas of family planning services delivery.

Research Division

International Center for Research on Women

Cooperating Agency International Center for Research
on Women

Project Number 936-9572

Agreement Number DPE-5972-A-00-0036-00

Duration Dec 1993 - Dec 1998

Geographic Scope Worldwide

Purpose:

The International Center for Research on Women (ICRW) is conducting a research program to evaluate the current definition and measurement of unmet need from the perspective of women, men, and adolescents, and to investigate the economic, sociocultural, and service-related barriers they face in regulating their fertility.

Description:

The International Center for Research on Women (ICRW), with support from the Office of Population and the Office of Women in Development, is conducting a research program to evaluate the current definition and measurement of unmet need from the perspective of women, men, and adolescents, and to investigate the economic, sociocultural, and service-related barriers they face in regulating their fertility. The purpose of the program is to propose recommendations for the measurement of unmet need, and to suggest policy and program modifications that will reduce the barriers that women, men and adolescents face in limiting and spacing births and in using reproductive health services. The program will draw from the large body of data on women and men's sexual and reproductive health attitudes and behavior gathered through ICRW's Women and AIDS Research Program, which is supported by the Office of Health and Nutrition and the Office of Women in Development of USAID. Using qualitative and quantitative research methods, the studies will examine the causes underlying unmet need for fertility regulation among married women, adolescents, and men, as well as to assess the definition and measurement of unmet need.

Technical Advisors in AIDS and Child Survival

Cooperating Agency As per Subprojects
Project Number 936-5970
Agreement Number As per Subprojects

Duration Sept 1987 - Sept 1997
Geographic Scope Worldwide

Purpose:

Established under specific Congressional authorization, this program provides a means of obtaining the services of senior technical experts to assist in the implementation of child survival, HIV-AIDS, and family planning programs.

Description:

Technical Advisors in AIDS and Child Survival are detailed from the US Public Health Service, state agencies, universities and private and voluntary organizations for long-term positions. These advisors have direct-hire authority and can function as full USAID project officers. They do not count against USAID personnel ceilings. Their functions are defined by the requesting missions or offices.

Institutions currently providing staff for this program include: Office of International Health/HHS, Centers for Disease Control and Prevention, Centre for Development and Population Activities (CEDPA), and the American Red Cross (ARC).

Health & Child Survival Fellows (HCSF) Program

Cooperating Agency Johns Hopkins University
Project Number 936-6004.08
Agreement Number DPE-5951-A-00-9033-00

Duration May 1989 - Sept 1999
Geographic Scope Worldwide

Purpose:

Identification, placement, and supervision of Health and Child Survival Fellows and Senior Technical Advisors in Residence (STARs) in field assignments and USAID/W.

Description:

This program identifies, places, and supervises junior and mid-level experts in field assignments and USAID/W that will contribute to the Agency's health and child survival programs, as well as to the career development and commitment of the experts themselves. A limited number of Senior Technical Advisors in Residence (STARs) are also placed through this program. The program includes:

A national secretariat at The Johns Hopkins University Institute for International Programs (JHU/IIP), responsible for management and administration of the program and ensuring the full and effective participation of a broad range of institutions and the selection of the most qualified and committed candidates as Fellows.

A collaborating network of schools of public health and Historically Black Schools of Medicine. A roster of applications and advisors from these and other institutions is maintained by the HCSF secretariat as a basis for recruitment, and supervision of Fellows. A National Advisory Board assists the secretariat in carrying out its responsibilities.

AIDS Control and Prevention Project (AIDSCAP)

Cooperating Agency Family Health International

Project Number 936-5972.31

Agreement Number DPE-5972-A-00-1031-00

DPE-5972-C-00-4001-00

DPE-5972-Q-00-4002-00

Duration May 1991 - Sept 1997

Geographic Scope Worldwide

Purpose:

To provide technical, research and policy leadership in the worldwide efforts against HIV/AIDS.

Description:

AIDSCAP builds local capacity to prevent HIV/AIDS by working with government ministries and non-governmental organizations to design, implement and evaluate prevention interventions. 80% of AIDSCAP activities in developing countries are carried out by NGOs and U.S. based PVOs. Family Health International, the contractor, works with nine subcontractors: PATH, PSI, JSI, Ogilvy Adams and Rinehart, The University of Washington in Seattle, The University of North Carolina at Chapel Hill and the Institute for Tropical Studies at the University of California at San Francisco.

AIDSCAP plays a critical role in the global HIV/AIDS Prevention arena by creating developing country capacity (especially among NGOs) to respond to the epidemic, developing and evaluating key HIV prevention strategies, (e.g., syndromic management of STD, peer education models, model interventions targeting core transmitters, etc.). Some other areas where AIDSCAP has provided country specific and global leadership are:

- use of socio/economic impact studies;
- training for effective policy development;
- training on the use of the media for prevention and policy development; and
- demonstrating the effectiveness of condom social marketing in increasing demand and utilization of condoms for HIV/STD prevention.

AIDS

Other Selected AIDS Technical Support Subprojects/Activities

National Council on International Health (NCIH)

Subproject Number: 936-5972.43 PACD: July, 1999
Agreement Number: DPE-5929-A-00-1010-00 Scope: Worldwide

NCIH is designed to strengthen the capacity of international and indigenous networks of PVOs and NGOs to respond to the AIDS epidemic. Additionally, NCIH has been a major U.S. PVO/NGO representative at several international HIV/AIDS for a including the Paris AIDS Summit and with the WHO General Management Committee. NCIH uses newsletters, workshops, policy dialogue and technical assistance to increase the capacity of both health and non-health sector PVOs/NGOs to implement HIV/AIDS prevention programs in developing countries.

International HIV/AIDS Alliance

Subproject Number: 936-5972.51 PACD: September, 1997
Agreement Number: HRN-5972-G-00-4013-00 Scope: Worldwide

The Alliance was created by a multi-donor initiative as a flexible mechanism with low overhead which functions to increase the capacity of indigenous NGOs to develop and implement community-based HIV/AIDS prevention and care activities. The London based Alliance establishes NGO linking organizations in select developing countries through which funds and technical assistance are allocated within a given country.

The Women and AIDS Research Program

Subproject Number: 936-5972.26 PACD: September, 1997
Agreement Number: DPE-5972-A-00-0036-00 Scope: Worldwide

The Women and AIDS Research Program supports social science research on ways to reduce women's risk of HIV infection in developing countries and to use research findings to design and implement pilot AIDS prevention projects. The Women and AIDS Research Program is also conducting a study on the unmet need for family planning through the Office of Population.

United Nations Joint Programme on AIDS (UNAIDS)

Cooperating Agency UNAIDS
Project Number 936-5965
Agreement Number TBD

Duration TBD
Geographic Scope Worldwide

Purpose:

To provide technical and policy leadership in the global fight against HIV/AIDS; to coordinate research activities and global surveillance of the epidemic; to facilitate international donor cooperation; and to assist countries with strategic prevention and control interventions.

Description:

Beginning January 1, 1996, the Joint United Nations Programme on AIDS (UNAIDS) will be fully operational, and will consolidate the United Nations' HIV/AIDS efforts which are currently being undertaken through WHO (GPA), UNICEF, UNDP, UNFPA, and the World Bank. Prior to that date, USAID will negotiate a formal relationship with the UNAIDS and terminate the existing grant with WHO (GPA). Through UNAIDS country-level "theme group," donor support for country-specific activities can be provided.

Child Survival

Basic Support for Institutionalizing Child Survival (BASICS)

Cooperating Agency The Partnership for Child Health Care, Inc., AED, JSI, MSH **Duration** Sept 1993 - Sept 1998
Project Number 936-6006.01 **Geographic Scope** Worldwide
Agreement Number HRN-6006-C-00-3031-00
HRN-6006-Q-00-3032-00

Purpose:

The goal of this project is to continue and sustain reductions in morbidity and mortality among infants and children in developing countries. The purpose is to increase and institutionalize the effective, efficient and sustainable delivery of EPI, CDD, ARI, malaria, and other Child Survival services.

Description:

This contract is designed to assist USAID missions, regional bureaus, and USAID-assisted countries meet the dual challenges facing child survival programs in the 1990's: extending access to and use of child survival interventions (immunization, control of diarrheal diseases and acute respiratory infections, case management of malaria), and institutionalizing those interventions through strengthened health service delivery systems, sustained behavior change, and policies that support child health and child survival.

To meet these dual challenges, BASICS will provide expertise both in the focused technical interventions of child survival and in cross-cutting areas of service delivery support (supervision, training, information systems, logistics and supply, operations research), strategies for behavior change, communications and marketing, and primary health care management, planning, and policy.

The greatest part of the contract's resources are dedicated to providing several modes of technical assistance (regional advisors; long term, including resident country advisors; periodic assistance to continuing activities; short term). Other services provided under the contract include support for in-country, regional, and US-based short term training; information dissemination; support for conferences and workshops; operations research and model projects; a focused small grants projects to test innovative service delivery approaches in collaborations with indigenous NGO's; and limited implementation support for critical inputs to child survival programs. These services are provided both through central funds and through buy-ins from field missions and other bureaus.

Other CAs: Clark Atlanta University; Emory University; Johns Hopkins University; The Kingsbury Group; PATH; Porter Novelli

Child Survival

Opportunities for Micronutrient Interventions (OMNI) (Field Support)

Cooperating Agency John Snow, Inc.
Project Number 936-5122.01
Agreement Number HRN-5122-C-00-3025-00
HRN-5122-Q-00-3026-00

Duration Dec 1992 - Sept 1998
Geographic Scope Worldwide

Purpose:

To assist governments, donor agencies and the private sector to implement expanded, more effective and sustainable programs and policies to reduce micronutrient deficiencies.

Description:

This portion of the OMNI project will assist USAID Missions and host country collaborators to develop integrated programs and strategies to reduce and eliminate major micronutrient deficiencies. Participating country selection is based on the extent and type of micronutrient malnutrition problems, the commitment by local officials (private and public) and the capacity to achieve and sustain a demonstrable impact. The contract carrying out this activity includes universities, private consulting companies, NGOs and PVOs. Objectives of this subproject are to: assist host countries in designing, implementing and evaluating multi faceted, micronutrient intervention programs; organize and conduct workshops, seminars and conferences to raise awareness of micronutrient deficiency problem and potential strategies and programs for problem elimination; increase knowledge of scientific information on micronutrient deficiencies through management of the international micronutrient consultative groups: International Vitamin A Consultative Group (IVACG) and International Nutritional Anemia Consultative Group (INACG); and strengthen institutional capacity and improve skills of public and private sector health, agriculture, education, food industry and microenterprise development providers as well as policymakers and PVOs and NGOs through training.

Child Survival

Opportunities for Micronutrient Interventions (OMNI) (Research Support)

Cooperating Agency International Life Science
Institute
Project Number 936-5122.02
Agreement Number HRN-5122-A-00-3046-00

Duration Dec 1992 - Sept 1998
Geographic Scope Worldwide

Purpose:

To assist governments, donor agencies and the private sector to implement expanded, more effective and sustainable programs and policies to reduce micronutrient deficiencies.

Description:

OMNI Research supports technology development and operations research to support the field focused activities of the overall OMNI project. It awards small grants to individuals and institutions worldwide to assist in the development of intervention strategies to better guide the development of country micronutrient programs. The lessons learned through OMNI Research support will provide creative solutions to micronutrient malnutrition at all levels — community, regional and national. Objectives of this subproject are to: identify constraints and resources for control of micronutrient malnutrition at the household to national level in a variety of country settings; test innovative solutions to micronutrient deficiency including food fortification, integration with public health programs and information activities; and determine the role of gender/age/socioeconomic differences in micronutrient deficiency and test program options.

Child Survival

International Center for Epidemiologic and Preventive Ophthalmology (ICEPO): Vitamin A for Health

Cooperating Agency Johns Hopkins University,
ICEPO

Project Number 936-5116.01

Agreement Number DAN-5116-0045-A-00-5094-00

Duration Aug 1988 - Sept 1996
Geographic Scope Worldwide

Purpose:

To assist developing countries in assessing their vitamin A deficiency problems, and developing, implementing and evaluating programs for the prevention of blindness, morbidity and increased mortality in children due to vitamin A deficiency.

Description:

Johns Hopkins University conducts research on the role of vitamin A deficiency in child survival through field based studies in collaboration with host-country counterparts. These findings, through central and mission support, form the basis for interventions, programs and policies to control vitamin A deficiency in LDC countries. Objectives of this activity are to:

- Define and validate the role of vitamin A deficiency in childhood mortality;
- Evaluate efficacy of varying vitamin A supplementation dosages;
- Define and explore immune functions in vitamin A deficient children;
- Perform epidemiologic research to assess risk factors for vitamin A deficiency;
- Develop and test field appropriate assessment tools;
- Provide technical assistance and training; and
- Publish and distribute findings of research and synthesize major findings for policy and program managers.

Child Survival

Center for Human Nutrition, Institute for International Programs (IIP): Vitamin A for Health

Cooperating Agency Johns Hopkins University,
IIP

Project Number 936-5116.02

Agreement Number DAN-5116-0045-A-00-8051-00

Duration Aug 1988 - Sept 1996

Geographic Scope Zambia, Uganda, Zanzibar,
Guatemala, India

Purpose:

To assist developing countries in assessing their vitamin A deficiency problems, and developing, implementing and evaluating programs for the prevention of blindness, morbidity and increased mortality in children due to vitamin A deficiency.

Description:

This subproject performs research that examines relationships between vitamin A and other micronutrient status of individuals and populations in LDCs and specific health outcomes, especially morbidity from infectious diseases. Objectives of the project are to: explore causative links between child morbidity and vitamin A and other micronutrient status; refine methods for accurate assessment of vitamin A and other micronutrient status; identify determinants of adequate nutrition and malnutrition and the role of micronutrients; share information and train public health professionals, government and special interest groups in LDCs; and explore the multi-disciplinary nature of nutritional deficiencies, particularly micronutrients.

Duration July 1990 - December 1995
Geographic Scope Worldwide

Purpose:

To support the development and deployment of low-cost child survival technologies

Description:

The HealthTech Project supports the development, testing and introduction of low-cost child survival technologies and infectious disease diagnostics. A principal focus is the development of more effective immunization technologies, including one or more non-reusable injection devices and heat-sensitive vaccine vial monitors. The project encourages local production of new tools to introduce new and more effective child health technologies through the private sector in developing countries (e.g., field offices in Indonesia and Kenya).

Child Survival

International Center for Diarrheal Disease Research/Bangladesh (Child Health Research)

Cooperating Agency International Center for
Diarrheal Disease Research
Project Number 936-5986.01
Agreement Number DPE-5986-A-00-1009-00

Duration Feb 1991 - Dec 1995
Geographic Scope Worldwide

Purpose:

To support multi-disciplinary research and evaluation for improved child health and dissemination of research results in less developed countries. Emphasis is placed on translating research results into institutional, rational and global policy and improving measurement of childhood morbidity and mortality.

Description:

This agreement provides for research in the areas of invasive diarrhea, persistent diarrhea, cholera and other watery diarrhea, nutrition including Vitamin A, respiratory disease, and water and sanitation. The project also supports the training of scientists world-wide at the ICDDR/B in the field of health and population science and provides a unique demographic research setting for the evaluation of interventions such as new vaccines. Services include: a laboratory reference center; field testing of vaccines; training in Diarrheal Disease case-management, laboratory diagnosis, and epidemiology; and technical assistance and training for cholera epidemic control and diarrheal disease control.

Project Director

Child Survival

WHO Control of Diarrheal and Respiratory Diseases (CDR) (Child Health Research)

Cooperating Agency WHO/CDR
Project Number 936-5986.02
Agreement Number DPE-5986-G-00-1028-00

Duration Feb 1991 - Aug 1996
Geographic Scope Worldwide

Purpose:

To support multi-disciplinary research and evaluation for improved child health, and dissemination of research results in less developed countries. Emphasis is placed on translating research results into institutional, rational and global policy and improving measurement of childhood morbidity and mortality.

Description:

This grant provides support to the research activities of the Programs for the Control of Diarrheal Diseases and the Control of Acute Respiratory Infections. The grant includes support for clinical, behavioral, epidemiological, implementation, and vaccine-related research for diarrheal and respiratory disease. Research results are used in the formulation of global policies. The programs have the lead coordinating roles within WHO for cholera control and the development of treatment algorithms and training for the integrated management of the sick child. Services include provision of training manuals and workshops; technical assistance in the design of vaccine field trials and other interventions, and field-directed research and evaluation.

Other CAs:

UNICEF; numerous developing country NGOs; London School of Hygiene and Public Health Medical Research Council

Child Survival

Applied Diarrheal Disease Research (ADDR) (Child Health Research)

Cooperating Agency Harvard Institute for
International Development
Project Number 936-5986.04
Agreement Number DPE-5986-A-00-2010-00

Duration Feb 1991 - July 1996
Geographic Scope Worldwide

Purpose:

To support multi-disciplinary research and evaluation for improved child health, and dissemination of research results in less developed countries. Emphasis is placed on translating research results into institutional, national and global policy and improving measurement of childhood morbidity and mortality.

Description:

This project strengthens the capacity of developing country institutions and individuals to conduct applied research on priority child health problems. Research projects are designed by developing country researchers and reviewed and revised with the assistance of ADDR staff and consultants. An important dimension of the project is the emphasis placed upon the involvement of social science researchers. ADDR provides assistance in proposal development and implementation, data collection and analysis, and dissemination of research results. Research priorities include: behavioral studies of caretakers and health care providers; use of foods and fluids for case management; prevention of diarrhea and pneumonia through identification of risk factors and intervention studies. Persistent and invasive diarrhea, cholera, and pneumonia will receive special emphasis. Activities are underway in Indonesia, Mexico, Pakistan, Nigeria, Peru, Guatemala, Ecuador, Ghana, Ivory Coast, and Cameroon. Services include technical assistance for research capacity building, research advisory services as part of a competitive research grants program, and institutional support for LDC institutions. Other CAs include UNICEF, Population Council, Ford Foundation, and numerous developing country research institutes and Universities.

Child Survival

Vaccine Independence Initiative (VII) (Children's Vaccine Program (CVP))

Cooperating Agency UNICEF
Project Number 936-6000.01
Agreement Number HRN-6000-G-00-2011-00

Duration Jan 1992 - July 1997
Geographic Scope Worldwide

Purpose:

To promote the sustainability of national immunization programs by providing a mechanism for the forecasting, financing and procurement of high quality vaccines.

Description:

Childhood immunization programs have been one of the great public health success stories in the past two decades, with an estimated 2.5 million child deaths now prevented annually through national Expanded Programs for Immunization (EPI). However, the sustainability of these achievements is jeopardized by the dependence of many developing countries on donations of vaccines from UNICEF and bilateral donors. Due to financial constraints of donors, and concerns about sustainability, many countries that currently receive vaccines by donations are being encouraged to start purchasing at least a portion of their own vaccines. Yet many are unable to:

- accurately forecast and plan vaccine needs
- prepare a vaccine tender and negotiate directly with manufacturers
- supply the hard currency that manufacturers require in advance of vaccine delivery.

In 1992 USAID Children's Vaccine Initiative Project, in partnership with UNICEF, designed the Vaccine Independence Initiative (VII) to help countries overcome these obstacles. The VII is a vaccine-purchase revolving fund. It is modeled after a similar fund managed by the Pan American Health Organization that has successfully functioned in Latin America for over a decade. The potential benefits of the VII extend to all countries (outside Latin America) who are committed to buying vaccines and that could use assistance in forecasting, planning, and ordering those vaccines.

To participate in the VII, countries must formally commit, in written agreements with UNICEF, to purchase some or all of their vaccine needs. UNICEF will then provide technical assistance to the countries to enhance their capabilities in vaccine supply forecasting and planning. The fund allows participating countries to use soft or hard currency to purchase the high quality vaccines on a routine, periodic basis, and to pay, if necessary, upon receipt of the vaccines. Purchase of the vaccines is undertaken using the well-established UNICEF procurement system, which has successfully negotiated low price for high quality vaccines for many years.

Child Survival

Vaccine Quality Assurance Training Program (Children's Vaccine Program (CVP))

Cooperating Agency Massachusetts Public Health
Biologic Laboratories

Duration Sept 1995 - Sept 2000
Geographic Scope Worldwide

Project Number 936-6000.04

Agreement Number HRN-6000-A-00-5023-00

Purpose:

To improve the quality of Diphtheria, Tetanus and Pertussis (DPT) vaccine delivered in the developing countries.

Description:

The global Children's Vaccine Initiative was launched in 1991 to galvanize support for and coordinate international efforts to develop, introduce, and deliver in sustainable fashion new and improved vaccines for the world's children. The ultimate goal of the initiative is the introduction of an affordable, single-dose, combination vaccine, administered orally at or near birth that provides long lasting protection against a wide spectrum of diseases.

It is generally assumed that DPT will serve as the platform for the addition of new combinations. Since over 60% of the DPT vaccine used worldwide is produced in developing countries, for such combinations to be widely available to children in the developing world it will be necessary for developing country manufacturers to produce them.

In order to help ensure that the current DPT vaccine are of high quality and to provide an appropriate foundation for new combinations, the Office of Health and Nutrition working with the Massachusetts Public Health Biologic Laboratories (MPHBL) is developing a program that will provide theoretical and practical training in:

- current Good Manufacturing Practices (cGMP)
- Vaccine Quality Assurance (QA)
- Quality control procedures for Diphtheria, Tetanus and Pertussis Vaccine (QC)

The program will assist local manufacturers to establish or improve their QA programs. It will also assist National Control Authorities (NCA) and National Control Laboratories (NCL) to regulate and inspect vaccine manufactures and perform quality control testing.

This will be accomplished by establishing an intensive long-term relationship with a limited number of DTP manufacturers and/or National Control Authorities in developing countries that have demonstrated a commitment (meet specific program requirements) to strengthen or establish a NCA and/or a QA program to ensure that DPT is manufactured according to cGMP. Training will consist of an initial site visit by MPHBL staff to work with local personnel to identify training needs, an intensive 1-3 month training period in Massachusetts, and follow up site visits to assist in implementation.

Child Survival

UNICEF/Regional EPI Grants (Child Health Immunization Support)

Cooperating Agency UNICEF
Project Number 936-3080.01
Agreement Number DPE-3080-G-00-3188-00

Duration Oct 1993 - Sept 1998
Geographic Scope Africa

Purpose:

To improve the sustainability, coverage and effectiveness of immunization programs in selected African countries by increasing geographic access to immunization services and strengthening program management, financial planning and implementation capabilities.

Description:

The project provides support for strengthening child immunization programs in up to ten countries of sub-Saharan Africa; this support includes essential supplies and equipment, vaccines, training, social mobilization monitoring and evaluation, surveillance, cold chain improvement, logistics, and program management to assist in vaccine needs forecasting and vaccine procurement, including the use of revolving funds or other procurement mechanisms. The package of results expected from this grant include the production of national needs forecasts and vaccine supply plans in at least 4 countries and line items for vaccines in national budgets in at least 3 countries. In addition, it is expected that this grant will result in an approximately 5% increase in infant and child immunization coverage; this will mean the immunization of approximately 200,000 additional children who would otherwise be unprotected.

Countries receiving grant funding in FY 95 were: Benin, Guinea, Malawai, Tanizania, Uganda, Eritrea and Gambia.

Environmental Health

Environmental Health Project

Cooperating Agency Camp Dresser McKee
Project Number 936-5994.01
Agreement Number HRN-5994-C-00-3036-00
HRN-5994-Q-00-3037-00

Duration March 1993 - Sept 1998
Geographic Scope Worldwide

Purpose:

To help missions and bureaus and other development organizations to address both pre- and post-industrial transition environment-related health problems.

Description:

The Environmental Health Project's (EHP) primary goal is to reduce environment-related diseases and hazards, including tropical diseases, so that USAID-assisted countries can develop their full economic and social potential.

EHP seeks to:

- Develop new tools, approaches, or preventive interventions to complement clinical case management;
- Exercise leadership to influence the policies and resource allocation decisions of international and national-level institutions that work in environmental health;
- Provide technical support 1) to households and communities so that people's exposure to environmental health risks is reduced and 2) to institutions so that they will be more effective in carrying out environmental health programs.

Environmental Health

Malaria Vaccine Development Program

Cooperating Agency Varied
Project Number 936-6001
Agreement Number Varied

Duration May 1992 - April 2002
Geographic Scope Worldwide

Purpose:

To develop vaccines that will reduce malaria-associated mortality and morbidity in developing countries, especially in children.

Description:

The MVDP focuses on addressing the major bottleneck in malaria vaccine development, the translation of promising laboratory findings into vaccines that can be evaluated in humans. To accomplish this, the Program supports the:

- scaled-up production of laboratory constructs,
- manufacture of pilot lots of vaccines for evaluation in humans,
- conduct of preclinical studies,
- application to the Food and Drug Administration for approval to conduct clinical trials,
- conduct of clinical trials, and
- conduct of field trials.

These capabilities are available to the MVDP through agreements with other domestic agencies (National Institutes of Health, Centers for Disease Control and Prevention, and the Department of Defense) and international groups involved in the development of malaria vaccines (Commission of European Communities and the World Health Organization's Special Programme for Research and Training in Tropical Disease Research).

Current plans call for production of two vaccines in the spring and summer of 1995 and clinical trials in early 1996. Additional vaccines are being developed for production in 1996.

Environmental Health

Tropical Disease Research II

Cooperating Agency World Health Organization
Project Number 931-6005.01
Agreement Number HRN-6005-G-00-2046-00

Duration Aug 1992 - Sept 1996
Geographic Scope Worldwide

Purpose:

To support the World Health Organization (WHO) Special Program for Research and Training in Tropical Diseases.

Description:

USAID supports Tropical Disease Research's (TDR) program that seeks better, more economical methods for the diagnosis, treatment, prevention, and control of malaria. This grant supports the development and field testing of new tools and approaches for malaria control and prevention. In addition, USAID supports TDR training in the creation of a global network of researchers and scientific institutions in both developed and developing countries involved in research on tropical diseases.

Environmental Health

Displaced Children and Orphans Funds (Health Resources Support II)

Cooperating Agency N/A
Project Number 936-6004.50
Agreement Number N/A

Duration N/A
Geographic Scope Worldwide

Purpose:

Established by Congress in 1988, this fund provides direct humanitarian assistance for orphans and other children displaced by natural and man-made disasters.

Description:

Activities supported by the fund are identified, planned and executed at the field level and all implementation agreements are managed by USAID field missions. The overall fund is administered and monitored by the Office of Health and Nutrition which also provides technical support for program direction, design and evaluation through a special management assistance contract. The fund focuses on the improvement, expansion and/or replication of existing programs which have a demonstrated track record. Assistance provided to date has covered a wide range of support including inter alia, family reunification, placement in foster or community care institutions, and the provision of food, shelter, health care and various types of counseling, formal and non-formal education, and income and employment generation services.

G/PHN/HN administers the use and allocation of the fund. The Office of Health and Nutrition can provide information and/or technical assistance for needs assessments, project design and evaluation. The majority of activities are implemented through grants to Non-Governmental Organizations (NGOs).

Special Displaced Children and Orphans Fund activities that are authorized under this project, include grants for special programs to address the needs of unaccompanied children affected by war in Angola and Rwanda.

Environmental Health

War Victims Fund (Health Resources Support II)

Cooperating Agency N/A
Project Number 936-6004.50
Agreement Number N/A

Duration N/A
Geographic Scope Worldwide

Purpose:

The War Victims Fund was established by Congress in response to humanitarian concern for civilians disabled by civil strife.

Description:

The Fund provides assistance with medical, physical and vocational rehabilitation, with an emphasis on prosthetics. This support has focused on expanding and improving existing programs which have a financial/organizational base that will allow them to continue after USAID funding is completed.

G/PHN/HN coordinates the use of \$5 million provided through this fund each year. G/PHN/HN helps missions with needs assessments, project design and evaluations. When a set of activities is agreed upon, funds are transferred to the mission. Projects are generally implemented through grants to Non-government Organizations (NGOs).

One special activity authorized under this project and funded under the War Victims Fund was a grant to the International Society for Prosthetists and Orthotists (ISPO) for a special conference on "Appropriate Prosthetic Technology in Developing Countries" in Phnom Penh, Cambodia.

Health Policy & Sector Reform

Partnerships for Health Reform (PHR)

Cooperating Agency Abt Associates, Inc.
Project Number 936-5974.13
Agreement Number HRN-5974-C-00-5024-00

Duration Oct 1995 - Oct 2000
Geographic Scope Worldwide

Purpose:

To provide technical assistance, training and collaborative research regarding health policy and management, health financing, and health service improvement in developing countries.

Description:

This project is the principal USAID technical service resource in health policy and sector reform. As the flagship project in this field, PHR offers developing and newly independent countries state-of-the-art assistance to analyze the efficiency, effectiveness, and equity of their health systems. Assistance through the project supports health reform programs, strengthens the role of the private sector in meeting national health goals, and encourages rational pharmaceutical management. Applied research is conducted to inform and improve the assistance given. Nine health reform areas are being addressed:

- (1) **Health Policy and Management.** Health policy development and monitoring; institutional reform, decentralization, and management capacity-building; infrastructure and human resource development.
- (2) **Health Financing.** Resource generation through user fees, insurance, and managed care; resource allocation, use, and management; and finance, costing, and expenditure monitoring.
- (3) **Health Service Improvement.** Health care organization, quality, and supervision; pharmaceutical policy and management; and private sector cooperation and initiatives.

The contract gives attention to participatory approaches to the reform and strengthening of health systems, and makes a concerted effort to link financial and economic analyses to improved health outcomes. No one country would be anticipated to receive services in all these areas, but rather a focused and targeted program would be prepared as a host country strategy for improved effectiveness, governance, and sustainability in the health sector.

Subcontractors: University Research Corporation (URC); Harvard School of Public Health; Development Associates, Inc.; and Howard University.

Health Policy & Sector Reform

Quality Assurance Project (Applied Research in Child Survival Services)

Cooperating Agency Center for Human Services
Project Number 936-5992
Agreement Number DPE-5992-A-00-0050-00

Duration April 1990 - Nov 1996
Geographic Scope Worldwide

Purpose:

To adapt modern quality assurance (QA) approaches for application in developing country health systems, and to support their institutionalization through the development of organized QA programs.

Description:

Quality of care can be defined as the degree to which actual care matches the standards adopted by the program. Studies have consistently revealed widespread and serious deficiencies in quality, despite training and supervision. QA includes a range of techniques in which program staff seek solutions to quality problems on the basis of objective data.

The QA project (ARCSS) offers a series of training courses that address problem solving, development of effective standards, and the organization of QA activities. Long and short-term technical assistance are available, and the project supports operations research to improve the cost-effectiveness of QA activities.

A follow-on project is expected to become operational in 1996.

Health Policy & Sector Reform

Initiatives

Cooperating Agency John Snow Incorporated
Project Number 936-5974.07
Agreement Number HRN-5974-A-00-2053-00

Duration Sept 1992 - Sept 1997
Geographic Scope Worldwide

Purpose:

Support to and evaluation of private sector health clinics and community-based care.

Description:

This project tests the extent to which the private sector can provide financially sustainable basic health services to low-income populations in urban/periurban areas. The project provides TA/training in such areas as primary care business development, strengthening organizational structures, and preparing business and financial plans. This is a pilot activity and operates in a limited number of countries (currently Ghana, Ecuador, Nigeria and Guatemala).

Health Policy & Sector Reform

Rational Pharmaceutical Management (MSH)

Cooperating Agency Management Sciences for
Health

Project Number 936-5974.08

Agreement Number HRN-5974-A-00-2059-00

Duration Sept 1992 - Sept 1997
Geographic Scope Worldwide

Purpose:

To develop, implement and evaluate the impact of a variety of technical approaches designed to reduce financial waste, improve the allocation and use of resources, promote managerial efficiency, and foster sustainable reforms in developing country pharmaceutical systems. RPM's mandate is to develop state of the art tools, methods, software and information resources, test them in developing countries, and make them available to other USAID projects, as well as other agencies and organizations active in providing technical assistance in pharmaceutical management.

Description:

RPM employs indicator-based pharmaceutical assessments, policy dialogue, specialized training and technical assistance to improve pharmaceutical management operations. RPM's strategy emphasizes technology transfer by engaging local counterparts as active partners in problem identification and analysis, and intervention design and implementation. This collaboration leads to concrete near-term improvements and creates stake holders in the reform process. There is a separate MSH cooperative agreement for a three-year program of activities in the Russian Federation.

Health Policy & Sector Reform

Rational Pharmaceutical Management (U.S.P.)

Cooperating Agency U.S. Pharmacopeial
Convention, Inc.

Project Number 936-5974.09

Agreement Number HRN-5974-A-00-2052-00

Duration Sept 1992 - Sept 1997
Geographic Scope Worldwide

Purpose:

To expand and adapt the United States Pharmacopeia (USP) Drug Information database for use in selected developing countries, including the development of monographs for all products on the WHO Model List of Essential Drugs. This activity will serve two purposes: provision of clinically relevant, up-to-date, unbiased, and locally-specific information needed to support all areas of the health system; and the creation of a local capacity to develop, evaluate, and disseminate drug information. The USP activity is designed to work in concert with the Management Sciences for Health cooperative agreement.

Description:

This program promotes the development of country-specific pharmaceutical information resources and the rational use of drugs through improved access to authoritative and culturally appropriate drug information. Through the use of state-of-the-art computer technology, RPM will assist local counterparts in adapting the USP database to produce information that is tailored to suit local conditions of drug availability and use. The country-specific drug information database will be used in different presentations as needed for government regulatory and procurement agencies, educational institutions, prescribers, dispensers, and consumers. There is a separate USP cooperative agreement for a three-year program of activities in the Russian Federation.

Health Policy & Sector Reform

Data for Decision Making (Policytech/Harvard)

Cooperating Agency Harvard School of Public
Health
Project Number 936-5991.01
Agreement Number DPE-5991-A-00-1052-00

Duration April 1991 - Sept 1996
Geographic Scope Worldwide

Purpose:

To assist in health sector reform, by developing and applying methods & technologies to help decision makers make informed policy decisions.

Description:

Data for Decision (Policytech) project provides technical assistance to further health care reform and public-private sector linkages. Examples of Policytech work include studies conducted on the role of private health care providers on national health systems, examining national health account and tracking information, and developing political mapping methodologies to analyze the political forces underlying health sector reform.

International Clinical Epidemiology Network (INCLEN)

Cooperating Agency International Clinical
Epidemiology Network

Project Number 936-5991.03

Agreement Number HRN-5991-G-00-2081-00

Duration Sept 1992 - Sept 1996
Geographic Scope Worldwide

Purpose:

To set up clinical epidemiology units (CEU) in medical schools and trains physicians to use epidemiologic economic and other information for decision making in the health sector.

Description:

Scientists are being trained in U.S. institutions in the disciplines of epidemiology, economics, statistics and social science to staff the CEUs. The focus of the CEU is to solve public health problems which impact the health sector. The units are frequently involved in the decision making process relating to priority setting, resources distribution and identifying emerging problems such as the impact of the epidemiologic transition. They also support advocacy groups by providing analysis of relevant health data.

HRN-5991-Q-00-3042-00

Duration Sept 1993 - Sept 1998
Geographic Scope Worldwide

Purpose:

To provide health and nutrition information on Agency-wide activities conducted in USAID-assisted countries.

Description:

The Center for International Health Information (CIHI) is the continuation of eight years of USAID experience in maintaining a health information system. The project serves as a repository for health and nutrition project information, including PHNC indicators, and maintains a global data base of statistical indicators of health status for USAID-assisted countries. CIHI also maintains an active data dissemination program including preparation and distribution of sixty country profiles, an extensive number of standard reports on health indicator trends, funding trends, annual reports to Congress, statistical wall charts and other materials.

Health Policy & Sector Reform

Health Technical Services (HTS)

Cooperating Agency TvT Associates, Inc.

Project Number 936-5974.01

Agreement Number HRN-5974-C-00-3001-00

HRN-5974-Q-00-3002-00

Duration Jan 1994 - Jan 1998

Geographic Scope Worldwide

Purpose:

To improve the effectiveness of the design, implementation, management and evaluation of health and nutrition programs worldwide.

Description:

This project provides medium- and short-term technical assistance in the area of health service improvement, focusing on policy and strategy studies, project designs, monitoring and evaluation, and project assistance directly to the Office of Health and Nutrition and to Missions.

Project activities include developing strategy papers in key program areas of interest to the Office of Health and Nutrition; conducting country level sector assessments, generating studies and reports on selected health topics; organizing seminars, conferences, and workshops. Other activities include performing technical, administrative and financial analysis and conducting peer reviews, project assessments, impact studies and comparative evaluations.

Nutrition & Maternal Health

MotherCare II (Breastfeeding and Maternal and Neonatal Health)

Cooperating Agency John Snow, Inc.
Project Number 936-5966.07
Agreement Number HRN-5966-C-00-3038-00
HRN-5966-Q-00-3039-00

Duration Sept 1991 - Sept 1998
Geographic Scope Worldwide

Purpose:

This contract is designed to improve pregnancy outcomes by strengthening and improving service delivery, influencing behaviors that affect the health and nutritional status of women and infants, and enhancing policy formulation at the regional and national level for maternal and neonatal health care.

Description:

Services include short and long-term technical assistance, training, workshops, and applied research support are available within the following focus areas: 1) assessment of maternal-newborn health services; 2) behavior change for self-care, complication recognition, and referral; 3) strengthening of health referral network; 4) policy and standards formulation; 5) prevention, diagnosis and treatment of STDs; 6) prevention and treatment of micronutrient deficiencies (especially anemia) and undernutrition; 7) life-savings skills training for nurses, midwives, physicians, and traditional birth attendants; 8) service delivery improvement for prevention and treatment of causes of maternal morbidity and mortality, (including obstructed labor, hemorrhage, sepsis) and neonatal morbidity and mortality, (including suboptimal breastfeeding practices, acute respiratory infections, hypothermia, asphyxia, low birth weight, and birth injuries). Other CAs include the American College of Nurse Midwives, Family Health International, and PATH.

Nutrition & Maternal Health

Expanded Promotion of Breastfeeding Program (Breastfeeding and Maternal and Neonatal Health)

Cooperating Agency Wellstart International
Project Number 936-5966.05
Agreement Number DPE-5966-A-00-1045-00

Duration Sept 1991 - Sept 1996
Geographic Scope Worldwide

*

Purpose:

To test, expand, refine and monitor practical and successful approaches to promoting and supporting optimal breastfeeding practices.

Description:

The objectives are: 1) assist programs to expand services which enable women to follow optimal breastfeeding practices for their own health and for their infants' health and nutritional status, and survival; 2) support activities of a worldwide policy nature that will further breastfeeding efforts globally; 3) support global efforts to establish standardized breastfeeding indicators for collection of data on breastfeeding practices for international comparison; and 4) document costs of breastfeeding interventions through analysis of economic benefits and cost-effectiveness studies.

Services include short- and long-term technical assistance, training, workshops, and applied research support through central funds and Mission add-ons are available to all developing countries upon request, for activities within the following focus areas: assessment of infant feeding practices; national strategy formulation, program design and implementation; community-based support for lactating women, e.g., mother-to-mother support systems, strategies for working women, and improving maternal nutrition; policy and cost analysis; communication and social marketing; training; and evaluation and impact appraisal.

Nutrition & Maternal Health

Wellstart Lactation Management Education Program (Women's and Infants' Nutrition: a Family Focus (WIN))

Cooperating Agency Wellstart International
Project Number 936-5117.01
Agreement Number DAN-5117-A-00-9099-00

Duration Sept 1989 - Sept 1997
Geographic Scope Worldwide

Purpose:

To contribute to the institutionalized and sustained promotion, protection, and support of breastfeeding in developing countries by facilitating the availability of human resources for local, national, and regional breastfeeding programs.

Description:

Wellstart manages a program of lactation management education for teams of nutrition and health professionals from teaching hospitals and government agencies. The program includes a four week course in San Diego, in-country technical assistance in developing breastfeeding curriculum, training programs, and improving hospital practices that promote breastfeeding. In addition to improving hospital practices that support breastfeeding, Wellstart Associates serve as in-country trainers and lactation specialists to child and maternal health programs. Wellstart is designed to improve initiation rates and the duration of breastfeeding and assist in developing sustainable, in-country capability for lactation management education, service and research. Courses are offered in English, Spanish, French and Russian.

Nutrition & Maternal Health

American Public Health Association/International Clearinghouse (Women's and Infants' Nutrition: a Family Focus (WIN))

Cooperating Agency American Public Health
Association

Project Number 936-5117.04

Agreement Number DAN-5117-A-00-1087-00

Duration Sept 1991 - Sept 1996
Geographic Scope Worldwide

Purpose:

To improve developing country health practitioners' and policy makers' access to information on maternal and child nutrition and health.

Description:

The APHA Clearinghouse on Infant Feeding and Maternal Nutrition serves as an international center for field based nutrition and health information. The "Mothers and Children" newsletter is published three times a year, in Spanish, French and English, and includes resources on breastfeeding, weaning, reproductive health, micronutrients, and information technologies. The Clearinghouse provides technical assistance to field based groups on the design and management of information, particularly the use of a range of information technologies. "Information for Action" workshops are offered once a year for managers of PVO/NGO and government health and nutrition information centers and libraries.

Nutrition & Maternal Health

Food & Nutrition Monitoring & Support (IMPACT)

Cooperating Agency International Science and Technology Institute (ISTI) **Duration** July 1989 - Sept 1997
Project Number 936-5110 **Geographic Scope** Worldwide
Agreement Number DAN-5110-C-00-0013-00
DAN-5110-Q-00-0014-00

Purpose:

To promote the integration of nutritional and food security considerations into development policies and programs in the agriculture, health, microenterprise and other related areas in selected countries; and to support targeted data collection and analysis activities with an emphasis on improving household food security particularly with respect to better consumption and utilization of food.

Description:

Nutritional status at the population level reflects the cumulative effect of a wide range of development strategies and programs. To demonstrate the benefits of using nutrition as an outcome and a programming tool, the IMPACT Project is designed to link impacts of all development programs to nutritional objectives. The IMPACT project's operating principle is that relevant, reliable, and cost effective information and its sound analysis and interpretation are key elements of any strategy to improve food security and nutrition; it is essential for effective early warning, identification of vulnerable groups, targeting of scarce resources, and for a sustainable capacity to monitor and evaluate the nutritional and food security impact of interventions.

The IMPACT Project provides technical assistance to host country organizations, PVOs, and USAID missions to develop, disseminate and institutionalize appropriate nutrition and food security information systems. This includes (a) operations research to improve the availability, relevance and quality of food security and nutrition information; (b) assistance to host country and PVO assessments and surveys of nutritional status and food security; (c) short-term training and technical assistance in the development and implementation of monitoring and surveillance systems, and their use in program management and evaluation.

Other CAs include: The International Food Policy Research Institute, Tulane University, Virginia Polytechnic Institute, Community Systems Foundation, The Center to Prevent Childhood Malnutrition, and MACRO International.

Nutrition & Maternal Health

Food Technology & Enterprises (Project SUSTAIN)

Cooperating Agency National Cooperative
Business Association

Project Number 936-5120.01

Agreement Number DAN-5120-A-00-1066-00

Duration April 1991 - Sept 1996
Geographic Scope Worldwide

Purpose:

To provide access to the U.S. food processing and marketing industry by small and medium sized food processing companies, host government officials, and USAID missions in targeted developing countries.

Description:

The project is designed to increase the quantity, nutritional quality, safety, and affordability of foods in developing countries through improving the capacity of local food enterprises. Expertise from U.S. food manufacturing companies is used to create or upgrade existing food processing and marketing technologies.

SUSTAIN (Sharing U.S. Technology to Aid in the Improvement of Nutrition) provides short-term, technical assistance through volunteer professionals from the U.S. food companies, universities, and other organizations. SUSTAIN seeks to improve nutrition and food quality, expand production, and lower operating costs of locally grown and processed food through technical assistance in: food safety, sanitation and quality; food preservation and storage; food processing, packaging, and marketing; food fortification; and weaning food development.

Publications include a quarterly newsletter (SUSTAIN Notes) on food technology issues. It is provided gratis to over 1500 recipients in over 50 countries. In addition, a substantive report is prepared by the volunteer(s) following each short-term field assignment. They are available upon request.

Asia/Near East

ANE Regional HIV/AIDS Program

Cooperating Agency The ANE program operates
Project Number through a variety of Global
Agreement Number bureau Projects

Duration Varied
Geographic Scope Asia/Near East Region

Purpose:

To support the implementation of HIV/AIDS prevention activities throughout the region.

Description:

Through a variety of G/PHN projects, mostly in the G/PHN/HN/AIDS Division, the ANE bureau uses its funds to support the implementation of HIV/AIDS prevention activities throughout the region. The Bureau's HIV/AIDS strategy expands the capacity of centrally-funded and mission bilateral HIV/AIDS prevention programs and projects, which focus primarily on preventing the spread of the epidemic. Through this strategy, the ANE and Global Bureaus and Missions are coordinating the use of Agency HIV/AIDS resources to implement an integrated and comprehensive prevention program that addresses the regional dimensions of this global health problem. The Bureau's HIV/AIDS strategy has five primary objectives:

- to limit cross-border HIV/AIDS transmission
- to address regional HIV/AIDS issues
- to limit the spread of the epidemic by supporting the initiation of prevention activities in ANE countries
- to support innovative pilot projects that may be replicated throughout the region
- to support regional training, policy and research efforts

The Bureau's strategic plan was revised in late 1994 in response to the evolving epidemic in Asia and the merger of the Asia and Near East Bureaus.

Health and Human Resources Analysis for Africa (HHRAA)

Cooperating Agency Academy for Educational
Development
Project Number 698-0483
Agreement Number AOT-0483-C-00-4200-0

Duration FY 1992 - FY 1998
Geographic Scope Sub-Saharan Africa

Purpose:

To increase the utilization of research, analysis and information in support of improved health, nutrition, education and family planning strategies, policies and programs in Africa.

Description:

The project emphasis is on carrying out research, analysis and information activities that respond to major issues identified by Africans and USAID Missions, and that have the potential to influence strategic and resource allocation decisions at the regional, sub-regional and country levels. HHRAA provides a participatory process for identifying and analyzing critical and emerging issues related to African health, population and educational needs, bringing together key African decision-makers with international experts. It addresses social sector issues that are cross-cutting among family planning, child survival, HIV/AIDS and basic education, while linking research with decision-making on an Africa-wide scale, using multiple channels of communication. Finally, the project provides an opportunity to build up the capacity of African regional and national institutions, including private sector organizations, to conduct research and analysis.

Subcontractors: Tulane, MACRO, Morehouse School of Medicine, Porter Novelli, JHPIEGO and PRB.

Accelerated Immunization II

Cooperating Agency Pan American Health
Organization (PAHO)
Project Number 598-0786
Agreement Number LAC-0786-G-00-1031

Duration July 1991 - July 1996
Geographic Scope LAC Region

Purpose:

The purpose of this five-year project is to increase the efficiency and effectiveness of immunization service delivery by:

- improving geographic access to immunization services;
- reducing missed opportunities to vaccinate; and
- reducing dropout rates during primary vaccination series.

Description:

This project provides resources for PAHO to assist national programs and sub-regional laboratories in order to improve the effectiveness and efficiency of immunization services in Latin America and the Caribbean. These resources are for regional activities of technical assistance and coordination; epidemiologic surveillance and management information systems; technical meetings; laboratories; training; mobilization for supervision, surveillance, and outbreak control; research; and evaluation and certification of polio eradication.

Description:

The project has three major components:

- 1) PHN management/financing improvement, implemented by the LAC Health and Nutrition Sustainability (HNS) contract with University Research Corporation and the Cooperative Agreement with the Association of University Programs in Health Administration (AUPHA);
- 2) The LAC Regional Cholera Program, implemented by two PASAs with the US Department of Health and Human Services (USDHHS) and buy-ins/add-ons to G/PHN/HN contracts and cooperative agreements; and
- 3) Other Special Concerns, implemented by a grant to the Pan American Health Organization (PAHO) and buyins/add-ons to G/PHN/HN contracts and cooperative agreements.

Contractors and Subcontractors: University Research Corporation (URC); Association of University Programs in Health Administration; Department of Human Health Services (DHHS); 18 buy-ins to G/PHN projects; PAHO

Equitable Access Project

Cooperating Agency Pan American Health
Organization (PAHO)
Project Number 598-0831
Agreement Number to be determined

Duration 1996 - 2000
Geographic Scope LAC Regional

Purpose:

The purpose of this five-year project will be to support development, approval, and implementation of country plans/programs for reform to increase equitable access to basic health services in target countries by supporting the secretariat for network of donors, countries, NGOs, universities, and others.

Description:

The Secretariat will coordinate regional efforts of its members to:

- analyse, synthesize, and disseminate information on health reform efforts in LAC and elsewhere;
- identify needed studies and carry them out;
- identify, plan, prioritize, and provide technical assistance for target countries to plan, approve, implement, and monitor health reform; and
- monitor health reform efforts supporting equitable access to basic health services on a region-wide basis.

Project Director

To be determined, based on health services selected

Health Priorities Project

Cooperating Agency Pan American Health
Organization (PAHO)
Project Number 598-0825
Agreement Number to be determined

Duration 1996 - 2000
Geographic Scope LAC Regional

Purpose:

The purpose of this five-year project will be to improve effective delivery of selected health services.

Description:

Resources will be provided to PAHO to assist LAC country programs to:

- develop and use improved norms, standards, plans and policies;
- improve targeting of resources to neediest populations;
- increase national resources supporting selected health services.
