HIV Test Kits Listed in the USAID Source and Origin Waiver: Procurement Information Document

Fifth Edition

Edited by Abiola Johnson

January 2009
This document was made possible through support provided by the U.S. Agency for International Development, under the terms of cooperative agreement number HRN-A-00-00-00016-00. The opinions expressed herein are those of the author(s) and do not necessarily reflect the views of the U.S. Agency for International Development.

**About RPM Plus**

Rational Pharmaceutical Management (RPM) Plus works in more than 20 developing and transitional countries to provide technical assistance to strengthen pharmaceutical and health commodity management systems. The program offers technical guidance and assists in strategy development and program implementation both in improving the availability of health commodities—pharmaceuticals, vaccines, supplies, and basic medical equipment—of assured quality for maternal and child health, HIV/AIDS, infectious diseases, and family planning, and in promoting the appropriate use of health commodities in the public and private sectors.

**Note:** Although Management Sciences for Health (MSH)/RPM Plus Program has made every effort to ensure the accuracy of product, manufacturer, price, supplier, procurement agency, and other information presented in this document, the data and information contained herein are being provided as is; MSH/RPM Plus and the U.S. Agency for International Development (USAID) make no representation or warranties, either express or implied, as to its accuracy, completeness, or fitness for a particular purpose.

The mention of specific companies or of certain manufacturers’ products does not imply that they are endorsed or recommended by USAID or RPM Plus in preference to others of a similar nature that are not mentioned. Errors or omissions excepted, the names of proprietary products are distinguished by initial capital letters.

This document may be reproduced if credit is given to RPM Plus. Please use the following citation.

**Acknowledgments**

We thank the representatives of the manufacturing companies, procurement agencies, and suppliers for their cooperation and for providing us with information regarding their products and the services that they provide.

The editor would like to acknowledge the contributions of the RPM Plus staff members who provided technical assistance and direction for this edition.

GLOSSARY

Efficacy
Efficacy is the ability of a drug or pharmaceutical product to produce a particular effect as determined by scientific methods.

FDA approval
FDA approval means that the product has met the standards of the U.S. Food and Drug Administration for safety, efficacy, and quality for the proposed application.

Incoterms
This is short for “International Commercial Terms.” They are standard trade definitions (devised and published by the International Chamber of Commerce) commonly used in international sales contracts. Examples are ex works (EXW); free on board (FOB); and cost, insurance, and freight (CIF).

Origin
The origin of a pharmaceutical product is the country in which it was produced.

Pharmaceutical products
For the purposes of USAID procurement regulations, pharmaceutical products are defined as drugs, vitamins, oral rehydration salts, biologicals, and some in vitro diagnostic reagents/test kits (including HIV test kits and antibiotic susceptibility test kits).

Quality
The quality of a pharmaceutical product is determined by its identity, purity, potency, uniformity of dosage form, bioavailability, and stability.

Safe medical product
The FDA defines a safe medical product as one that poses reasonable risks given the magnitude of the benefit expected and the alternatives available.

Sensitivity
The sensitivity of a test is the probability of testing positive if infection is truly present. As the sensitivity of a test increases, the number of false negatives decreases.

Source
The source of a commodity is the country it is shipped from and does not include free ports or bonded warehouses. The source can be the cooperating country, if that is where the commodity is located at the time of purchase.

Specificity
The specificity of a test is the probability of testing negative if infection/disease is truly absent. As the specificity of a test increases, the number of false positives decreases.

---

1 See the Incoterms Glossary for a list of incoterms used in this document and their corresponding explanations. A full glossary of incoterms used in the document starts on page ix.
## INCOTERMS

<table>
<thead>
<tr>
<th>Description</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cost, insurance, and freight (CIF)</strong></td>
<td>The selling costs include the cost of goods, the freight or transport costs, and also the cost of marine insurance. The seller’s responsibility for the goods ends when the goods have been delivered on board a shipping vessel.³</td>
</tr>
<tr>
<td><strong>Carriage and Insurance Paid (CIP)</strong></td>
<td>The passing of risk occurs when the goods have been delivered into the custody of the first carrier. This means that the buyer bears all risk and any additional costs occurring after the goods have been so delivered.⁴</td>
</tr>
<tr>
<td><strong>Delivered Duty Unpaid (DDU)</strong></td>
<td>The seller pays for all transportation costs and bears all the risk until the goods have been delivered, but does not pay for the duty.⁵</td>
</tr>
<tr>
<td><strong>Ex works (EXW)</strong></td>
<td>Seller X has the goods ready for collection at his premises (works, factory, warehouse, plant) on the date agreed upon. The buyer pays all transportation costs and also bears the risks for bringing the goods to their final destination. The term requires that the buyer must be able to carry out export formalities in the country of supply, these days almost impossible. Therefore in the vast majority of cases where terms are quoted EXW they actually intend the seller to carry out export formalities, which means the correct term is FCA (seller’s premises).</td>
</tr>
<tr>
<td><strong>Free carrier (FCA)</strong></td>
<td>The seller delivers the goods into the custody of the first carrier, and this is where the risk passes from the seller to the buyer. The buyer pays for transportation.⁶</td>
</tr>
<tr>
<td><strong>Free on board (FOB)</strong></td>
<td>The seller pays for the transportation of the goods to the port of shipment, plus loading costs. The buyer pays freight, insurance, unloading costs and transportation from the port of destination to the factory. The passing of risk occurs when the goods pass the ship’s rail at the port of shipment.⁷</td>
</tr>
</tbody>
</table>

---

INTRODUCTION

Background

Prior to 1998, the U.S. Centers for Disease Control and Prevention (CDC) recommended withholding the results of an initially positive HIV test until a confirmatory Western blot test report had been received; because of this, market demand for U.S. Food and Drug Administration (FDA)-approved rapid HIV test kits in the United States was low. Although the CDC revised its recommendations in 1998 and encouraged wider use of rapid HIV testing, many of the rapid HIV test kits presently included in the HIV testing algorithms of developing and transitional countries are not available from U.S. sources and are not of U.S. origin; few are approved by the FDA.

In 2000, USAID’s Division of HIV/AIDS (DHIV) (now OHA) requested assistance from the Rational Pharmaceutical Management (RPM) Project to review the guidelines and procedures for USAID-funded procurement of HIV/AIDS-related pharmaceutical products. RPM’s findings and recommendations are outlined in a report entitled USAID-Funded Procurement of HIV/AIDS-Related Pharmaceutical Products: Constraints and Options for Improvement. During the development of this report, the lack of information on non-U.S. suppliers and sources of pharmaceutical products was identified as a constraint by several USAID-funded cooperating agencies (CAs). In addition, the complexity of the process to prepare requests for approval to procure rapid HIV test kits in view of the “Buy America” objectives of USAID procurement procedures and the need for USAID to be confident of the quality, safety, and efficacy of all pharmaceutical commodities purchased with USAID funding was reported to result in delays in procuring USAID-funded HIV test kits.

In January 2001, the USAID Administrator approved the USAID Source and Origin Waiver for HIV/AIDS Diagnostic Materials to facilitate the process of preparing requests for approval to procure HIV test kits. DHIV also provided funding to the RPM Plus Program, the RPM Project’s successor, to develop this procurement information document to assist USAID Missions and CAs in identifying manufacturers and international agencies and suppliers of HIV test kits listed in Tab 1 (Approved List of Testing Kit Products and Manufacturers) of the USAID Source and Origin Waiver.

Objective

The first edition of the HIV test kits listed in the USAID Source and Origin Waiver was published in 2002 with subsequent editions published in 2004, 2005 and 2007. The primary aim of the document is to facilitate the process of procuring the HIV test kits listed in the USAID Source and Origin Waiver. The HIV test kits are eligible for procurement from Geographic Code 935 (see Annex 2) countries (any country or area excluding foreign policy restricted countries) by USAID Missions and USAID-funded CAs to use in HIV projects or programs. In addition to assisting USAID Missions and CAs to identify procurement sources, the document also contains information that is useful for planning for procurement, including information on prices, shelf life on delivery, and the source and origin of the product.

HIV Test Kits Procurement Information Document: Fifth Edition

The USAID Source and Origin Waiver for HIV/AIDS Diagnostic Materials is periodically reviewed and amended to remove discontinued products and include additional test kits. The HIV test kits included in the waiver have been reviewed by USAID and found to meet all the necessary suitability and price criteria for approval of a source and origin waiver. The CDC has also reviewed the listed HIV kits for safety and efficacy and recommends their use in resource-constrained settings.

The current edition of this document, which replaces the fourth edition published in 2007, and is November 3, 2008 List of Approved HIV/AIDS Rapid Test Kits, which forms a part of the USAID Acquisition and Assistance Policy Directive (AAPD) 06-01. The AAPD is the policy document from USAID that provides the information on the approval of new HIV test kits to be included in the waiver. Annex 1 provides detailed information on the process of amending the waiver and the requirements of HIV test kits listed in the waiver.

There are 35 HIV test kits featured in this edition and 11 suppliers (national and international) and procurement agencies. As in previous editions, we have included the HIV test kit procurement information for the United Nations Population Fund (UNFPA), the United Nations Children’s Fund (UNICEF), and the World Health Organization (WHO).

Methodology

The same procedures used to prepare the previous editions were followed for the fifth edition of this document. Specifically, RPM Plus administered questionnaires to the manufacturers of the HIV test kits that appear in the List of Approved HIV/AIDS Rapid Test Kits as of November 3, 2008 to collect the information presented in this document. Questionnaires were also administered to procurement agencies and suppliers (international and national). It is important to point out that inclusion on this list does not imply that the product, manufacturer, or supplier or agency is endorsed by USAID or MSH/RPM Plus or preferred over any other.

9 The number of test kits and suppliers is subject to change depending on announcements from USAID.
Who Is This Procurement Information Document for?

This document has been developed to assist USAID Missions and CAs to identify procurement sources for the HIV test kits listed that appear on the November 3, 2008 List of Approved HIV/AIDS Rapid Test Kits. In addition, information is provided to assist in writing requests for approval to procure these HIV test kits using USAID funding.

How to Use This Document

The procurement information found in this document is intended for use by USAID Missions and CAs as an initial reference for identifying manufacturers and suppliers and for planning for procurement. Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional shipping and handling charges may apply as well as import duties in some countries.

Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure HIV test kits.

Updates and Evaluation

RPM Plus has been requested by USAID to produce this updated edition to reflect both changes in the procurement information and additions or deletions from Tab 1 of the Source and Origin Waiver. In addition to printed copies, this update will be posted on the RPM Plus website (www.msh.org/projects/rpmplus/3.3.2b.cfm) in both HTML and PDF format. Feedback about the content, usefulness, ease of use, completeness, and timeliness of information can be mailed to—

CHAPTER 1: HIV TEST KITS LISTED
IN THE USAID SOURCE AND ORIGIN WAIVER

This list of HIV test kits listed in the USAID source and origin waiver is revised as U.S.-manufactured HIV test kits or new HIV test kits from sources in Geographic Code 935 (Special Free World) (see Annex 2 for a description of geographic codes) that meet USAID program requirements become available.

The List of Approved HIV/AIDS Rapid Test Kits as of November 3, 2008 is as follows—

1. Aware™ HIV-1/2 BSP Rapid Test (Calypte Biomedical)
2. Aware™ HIV-1/2 OMT (Calypte Biomedical)
3. Bioline HIV 1/2 3.0 (Standard Diagnostics, Inc.)
4. Bionor™ HIV-1&2 (Bionor A/S)
5. Bundi HIV 1/2 (Bundi International Diagnostics Ltd)
6. Capillus™ HIV-1/HIV-2 (Trinity Biotech, Plc)
7. CareStart™ HIV 1-2-O (Access Bio, Inc)
8. Clearview® COMPLETE HIV 1/2 (Inverness Medical Innovations)
9. Clearview® COMPLETE HIV1/2 – US Labeling (Inverness Medical Innovations)
10. Clearview® COMPLETE HIV1/2 STAT-PAK (Inverness Medical Innovations)
11. Combaids – RS Advantage (Span Diagnostics)
12. Determine™ HIV-1/2 (Inverness Medical Innovations and Abbott Laboratories)
13. DoubleCheck™ HIV 1&2 (Inverness Medical Innovations and Orgenics, Ltd.)
14. DoubleCheck Gold™ HIV 1&2 (Inverness Medical Innovations and Orgenics, Ltd)
15. EZ-TRUST Rapid Anti-HIV (1&2) Test (CS Innovation)
16. First Response® HIV 1-2.0 (Premier Medical Corporation, Ltd.)
17. Genie II HIV-1/HIV-2 (Bio-Rad Laboratories)
18. HIV 1/2 Rapid Screen Test Kit (Medinostics Int’l)
19. HIV 1/2 Gold Rapid Screen Test (Medinostics Int’l)
20. HIVSav 1&2 Rapid SeroTest™ (Savyon Diagnostics)
21. HIV 1/2 Stat-Pak™ Assay (Chembio Diagnostics, Inc.)
22. HIV 1/2 Stat-Pak™ Dipstick (Chembio Diagnostics, Inc.)
23. HIV (1+2) Antibody Colloidal Gold (KHB)
24. ImmunoComb™ HIV 1&2 BioSpot (Inverness Medical Innovations and Orgenics, Ltd.)
25. InstantCHEK™ HIV 1+2 (EY Laboratories)
26. INSTI™ HIV Rapid Antibody Test (Biolytical Laboratories)
27. Multispot™ HIV-1/HIV-2 Antibody Test (Bio-Rad Laboratories)
28. OraQuick® ADVANCE™ Rapid HIV-1/2 (OraSure Technologies)
29. OraQuick® HIV-1/2 Rapid Antibody Test (OraSure Technologies, Inc.)
30. Rapid 1-2-3® Hema HIV Dipstick (Hema Diagnostics Systems)
31. Rapid 1-2-3® Hema Express™ Test (Hema Diagnostics Systems)
32. Reveal™ G3 Rapid HIV-1 Antibody Test (MedMira)
33. Signal HIV 1+2 (Span Diagnostics)
34. Uni-Gold™ HIV (Trinity Biotech, Plc)
35. Uni-Gold™ Recombigen® HIV (Trinity Biotech, Plc)
Chapter 1 presents general information on each HIV test kit together with manufacturer information. Information on procurement agencies and suppliers (international and national) is presented in Chapter 2. The information presented in Chapter 1 is intended to be used as an initial reference for identifying manufacturers and planning for procurement.

Prices are given as an indication only and may vary according to currency exchange rates. Additional shipping and handling charges may apply. Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure the HIV test kits. Inclusion in this document does not imply that the products or manufacturer are endorsed by USAID or MSH/RPM Plus or preferred over any other product or manufacturer.

What Is in This Section?

The following information is provided for each test kit—

- Technical information, including a basic description
- Product information
- Procurement information

Technical Information

This section contains a brief description of the product, including sensitivity, specificity, the test principle, ease of use, methodology, types of samples used (e.g., whole blood, urine), and the time needed to conduct the test procedure.

Product Information

<table>
<thead>
<tr>
<th>Description</th>
<th>Information provided</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of tests per kit</td>
<td>Number of test kits that are available in one kit; all order quantities must be in multiples of this number.</td>
</tr>
<tr>
<td>Items included in kit</td>
<td>Information specifying what is included and packed as part of the kit. Test kit components cannot be ordered separately.</td>
</tr>
<tr>
<td>Additional items required but not included</td>
<td>Usually standard laboratory equipment such as disposable gloves, biohazard bags, blood collection equipment, and disinfectant are sufficient, but some test kits have special requirements (e.g., reagents, centrifuges).</td>
</tr>
<tr>
<td>FDA approved</td>
<td>This section lists whether the test kit has been approved by the U.S. Food and Drug Administration. This information is needed when preparing a request for USAID approval to procure HIV test kits.</td>
</tr>
</tbody>
</table>

Current rapid tests are based on one of four test principles: particle agglutination, immunodot (dipstick), immunofiltration (flow-through testing), or immunochromatography (lateral-flow device).
<table>
<thead>
<tr>
<th>Section</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approved by other regulatory agency</td>
<td>This section lists whether the HIV test kit has been approved by a regulatory body other than the FDA, such as the European Agency for the Evaluation of Medicinal Products (EMEA).</td>
</tr>
<tr>
<td>Shelf life of the HIV test kit</td>
<td>This is the length of time before the HIV test kit reaches its expiry date. After expiry, a product can no longer be safely used and accurate results cannot be expected. Shelf life is measured from the date of manufacture and should reflect the expiration date of the first component in the kit to reach expiry (for rapid test kits, usually months). Shelf life assumes that the storage conditions specified by the manufacturer are met.</td>
</tr>
<tr>
<td>Language of package insert</td>
<td>Specifies the languages in which the standard package insert is written. Special language requirements must be negotiated and included in the procurement contract.</td>
</tr>
<tr>
<td>Recommended storage conditions</td>
<td>Manufacturer-recommended storage conditions that need to be adhered to during shipping, delivery, and storage to ensure that the quality and performance of the product are not compromised.</td>
</tr>
<tr>
<td>Weight/dimensions/volume of kits or tests</td>
<td>This information will help programs plan for proper storage and transportation requirements during distribution. Planning for adequate and appropriate storage is particularly important when refrigeration is required.</td>
</tr>
</tbody>
</table>

**Procurement Information**

The first item addressed in this section is whether USAID Missions and CAs can purchase the HIV test kits directly from the manufacturers.

| Average price for one test/price for one kit | Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional handling and shipping charges may apply. Also, because changes may have been made since the publication of this document, the manufacturer should be contacted to verify the information before an order is placed or a request for USAID approval to procure HIV test kits is prepared. The applicable incoterm used by the supplier is included in all price quotes. |
| Additional pricing information         | This section gives information on special prices offered to developing countries and nonprofit organizations working in resource-constrained settings. |
Over the past few years, some manufacturers have set up donation programs to provide HIV test kits to selected programs in resource-constrained settings. Information on available donation programs and how to access them is included in this section.

### Available from U.S. sources
This section lists sources in the United States from which the kit can be procured, if any. This information is needed when preparing a request for USAID approval to procure HIV test kits.

### Minimum order from manufacturer
The minimum order is usually one kit, but some manufacturers require that more than one kit be ordered at a time.

### Average minimum shelf life on delivery
The remaining time (usually months) for which a product can be safely used and accurate results can be expected after delivery by the manufacturer. Assuring that the shelf life can be maintained as stated on the product packaging is dependent on the product being stored and handled according to the conditions specified by the manufacturer. These instructions must be included in every package, carton, and/or shipping unit. The minimum accepted shelf life on delivery must be negotiated and included in the procurement contract.

### Stock on hand
This section specifies whether kits are stocked or manufactured on demand. If stock is kept on hand, the order lead time is generally less. However, manufacturing kits upon receipt of an order has the advantage of providing a product with the longest shelf life.

### Average time to fill order
This information helps programs ensure that orders are placed in sufficient time to prevent stock-outs.

### Quality issues
Describes the company policy if the customer experiences problems with the quality of the test kits.

### Payment method to manufacturer
Any general requirements for method of payment; these requirements are often country-, program-, or quantity-specific. The manufacturer may need to be contacted for additional information.

### Available from
Indicates the international procurement agencies or suppliers who have stated that they either stock or can supply the product (see Chapter 2 for more information).
Technical Information

Calypte’s Aware™ HIV-1/2 OMT test is a single use, qualitative, visually read, in vitro immunoassay for the detection of antibodies to Human Immunodeficiency Virus Type 1 (HIV-1) and Type 2 (HIV-2) in human oral fluid specimens (oral mucosal transudate).

The Aware® OMT rapid test performs oral fluid testing and has been evaluated in numerous field studies in a wide range of locations that include Cameroon, China, India, Kenya, Russia, South Africa, Tanzania, Thailand and the USA. With over 7,000 samples tested, including almost 2,000 that were HIV positive, Aware® OMT has demonstrated a sensitivity of 99.4% and specificity of 99.9%.11

Product Information

Number of tests per kit 1, 25 or 50
Items included in kit Test strips, BSP sample buffer, test tube and sample loops
Additional items required but not included None
FDA approved No
Approved by other regulatory agency It is approved by regulatory agencies in Kenya, Uganda, Russia, South Africa, UAE and India
Shelf life of the HIV test kit 18 months

### Language of package insert
- English, Spanish, Portuguese, Arabic, French, Russian and Afrikaans available on request

### Recommended storage conditions
- 2-30°C (36-86°F)

### Weight/dimensions/volume for one kit (50 tests)
- Weight: 0.9 kg (2lbs)
- Dimensions: 18 x 22 x 14cm (7 x 9 x 6 in)
- Volume: 5544 cm³ (0.20 cu ft)

---

#### Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

<table>

Information current as of November 2008

Technical Information

Aware™ HIV-1/2 OMT is a single-use, qualitative, visually read in vitro immunochromatographic assay for the detection of antibodies to HIV-1 and HIV-2 in human oral fluid specimens (oral mucosal transudate). The Aware™ OMT rapid test can generate results in 20 minutes. The sensitivity and specificity of the rapid HIV test kit are 99.5% and 99.98%.

Product Information

Number of tests per kit 25 or 50
Items included in kit Test strips, oral fluid sample collection swab, and capped individual-use tubes containing oral fluid sample buffer
Additional items required but not included None
FDA approved No
Approved by other regulatory agency It is approved by regulatory agencies in China, Georgia, India, Kenya, Russia, South Africa, Uganda, and United Arab Emirates. Registrations are being pursued in other countries.
Shelf life of the HIV test kit 18 months from date of manufacture
Language of package insert English, Spanish, Portuguese, Arabic, French, and Chinese; available upon request: Russian, Georgian, and Afrikaans
Recommended storage conditions 2–30°C (36–86°F)

Weight/dimensions/volume for one kit (50 tests)  
Weight: 0.9 kg (2 lb)  
Dimensions: 18 x 22 x 14 cm (7 x 9 x 6 in)  
Volume: 5,544 cm³ (0.20 cu ft)

**Procurement Information**

USAID Missions and CAs can purchase kits directly from the manufacturer.

- **Average price for one test/price for one kit**  
  USD 2.50–3.70 per test (FOB: depending on the location of purchase)
- **Additional pricing information**  
  Special pricing is available for developing countries through local distributors.
- **Donation programs**  
  The company has donation programs; additional information can be obtained by contacting the company directly. Applications are evaluated on a case-by-case basis.
- **Available from U.S. sources**  
  Yes, but not available for use in the United States
- **Minimum order from manufacturer**  
  1 kit (25 or 50 tests)
- **Minimum average shelf life on delivery**  
  12 months
- **Stock on hand**  
  Stock is maintained in the inventory.
- **Average time to fill order**  
  3 weeks
- **Quality issues**  
  Complaint Procedures and Preventive Corrective Actions Policy in compliance with ISO 9001 and FDA Quality System Regulations; there is also a special recall procedure for the HIV test kit.
- **Payment method to manufacturer**  
  Cash/letter of credit payment is required in advance.
- **Available from**  
  Crown Agents; the manufacturer also has a number of distributors in several countries that can supply the HIV test kit (contact the manufacturer for additional information).
Bioline HIV 1/2 3.0
Manufactured by Standard Diagnostics, Inc., Republic of Korea

Website: www.standardia.com
Information current as of September, 2006

Technical Information
Standard Diagnostics (SD) Bioline HIV 1/2 3.0 is a rapid immunochromatographic test for the detection of antibodies of all isotypes (IgG, IgM, IgA) specific to HIV-1—including subtype O and HIV-2 simultaneously—in human serum, plasma, or whole blood.\(^{14}\) Sensitivity is 100%, and specificity is 99.8% (WHO evaluation: sensitivity, 100%; specificity, 99.3%\(^{15}\)). It takes 5 to 20 minutes to get the results.\(^{16}\)

Weight/dimensions/volume for one kit (30 tests)

- Weight: 0.3 kg (0.66 lb)
- Dimensions: 22 × 12.4 × 7.0 cm (8.66 × 4.889 × 2.76 in)
- Volume: 318,000 cm³ (0.318 m³) (11.230064 cu ft)

**Procurement Information**

USAID Missions and CAs can purchase kits directly from the manufacturer.

- **Average price for one test/price for one kit**: Approximately USD 0.80–0.85 per test; ~USD 24.00–25.50 per kit (FCA South Korea)
- **Price varies depending on the quantity being procured**

**Additional pricing information**

- Special prices are offered to developing countries, according to circumstances (contact company representative for additional information). Special prices can be negotiated for nonprofit groups or other organizations for certain programs based on long-term procurement contracts and annual value of requirements.

**Donation programs**

- Donation programs will be considered if the company receives a formal request (e-mail, letter, or fax) from an organization/agency.

**Available from U.S. sources**

- No

**Minimum order from manufacturer**

- 1 kit

**Minimum average shelf life on delivery**

- 18 months (24 months from Manufacturing date)

**Stock on hand**

- Limited stock maintained (approximately 1,000 kits) for immediate shipment

**Average time to fill order**

- For regular orders: on board in 1 week from order confirmation;
- for special orders: on board in 1–2 weeks;
- for emergencies: overnight delivery is provided from stock

**Quality issues**

- In case of quality problems, the local supplier or manufacturer is informed by e-mail or fax. If there is a problem with a test kit, it is recalled and replaced after a quality assurance evaluation.

**Payment method to manufacturer**

- International bank transfer (SWIFT) before order shipment is preferred. For large orders and tenders, the company will accept a letter of credit. For NGOs, 30 days from date of invoice by wire transfer is acceptable.
Available from Crown Agents, IDA Foundation, Medical Export Group (MEG), Missionpharma A/S, Tri-Med, UNFPA and UNICEF. The product is also available through the WHO Bulk Procurement Scheme. The company also uses Health Alliance International (HAI) (see http://depts.washington.edu/haiuw for additional information) for distribution of this product.
Bionor™ HIV-1&2

Website: www.bionor.no
Information current as of October 2006

Technical Information

Bionor™ HIV-1&2 is a rapid enzyme immunoassay (EIA) that uses synthetic peptides and recombinant p24 proteins to detect antibodies to HIV-1 and HIV-2. The sensitivity (tested on 1542 samples) was found to be 100% (1264 HIV-1 positive and 278 HIV-2 positive), and the specificity (of 5274 samples) was found to be 98.9%. The test can produce results in 30 minutes.

Recommended storage conditions

Store kit at 2–30°C (36–86°F). Additional shelf life (total 24 months) can be obtained if the kit is stored at 2–8°C (36–46°F). Do not leave kits in strong heat or light.

Weight/dimensions/volume for 4 kits (1,000 tests)

Weight: 7.35 kg (16.17 lb)
Dimensions: 50.5 × 37 × 23.6 cm (19.9 × 14.6 × 9.3 in)
Volume: 44,097 cm³ (0.0441 m³) (2,691 cu in [1.557 cu ft])

Procurement Information

Average price for one test/price for one kit

Price per test ~USD 1.20-1.90 (EXW, Norway)

Additional pricing information

Prices may vary according to quantities ordered and whether supplied directly or through a distributor.

Donation programs

No information provided

Available from U.S. sources

No

Minimum order from manufacturer

1 kit (250 tests) but preferably not fewer than 1,000 tests (4 kits, which fill one export polystyrene box)

Minimum average shelf life on delivery

10 months

Stock on hand

Approximately 50 kits are kept on hand. However, to obtain the longest possible shelf life, kits are mostly manufactured on demand.

Average time to fill order

One day if supplied from stock held or approximately 3–4 weeks if a new batch is manufactured

Quality issues

Quality problems are resolved by replacing the kit. Bionor AS also runs a quality control test on the reference kit of the same batch. Subsequent actions taken usually depend on the outcome of the quality control test.

Payment method to manufacturer

Prepayment or letter of credit. MasterCard® and Visa® credit cards are also accepted.

Available from

Crown Agents, Medical Export Group (MEG), Missionpharma A/S, UNFPA, UNICEF and WHO.

Recommended storage conditions

Optimum storage is at 2–8°C (32–46°F). Stable for short periods (up to 4 weeks) at 25°C (77°F). The package insert contains instructions for testing negative and positive controls if users are concerned that product performance may have been adversely affected by temperature.

Weight/dimensions/volume for one kit (100 tests)

Weight: 0.5 kg (1.1 lb)
Dimensions: 22 × 14 × 8 cm (8.7 × 5.5 × 3.1 in)
Volume: 2,464 cm³ (0.00246 m³) (150.4 cu in [0.09 cu ft])

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit

Price per test ~USD 1.50 to 1.75; price for kit varies from USD 150 to USD 175 (EXW, Ireland)

Additional pricing information

No handling charges are added, but shipping and insurance are extra. Prices may vary by quantity and region. Concessionary prices are offered to WHO, other UN agencies, and major international procurement agencies. Discounts from the listed price can be negotiated on a case-by-case basis either directly through the manufacturer or through local distributors.

Donation programs

There are currently no donation programs for this HIV test kit.

Available from U.S. sources

No

Minimum order from manufacturer

5 kits (500 tests)

Minimum average shelf life on delivery

10–11 months (kits are usually delivered with 75% of their shelf life remaining)

Stock on hand

Some stock is held, but levels vary according to demand.

Average time to fill order

6 weeks

Quality issues

Any quality problem with the product is investigated through the in-house quality control system. If a product problem is confirmed, replacement product or product notes are issued. The manufacturer does not have a specific recall procedure for the HIV test kit, but it has implemented standard operating procedures (SOPs) for the management of postmarketing activities including customer complaint handling, adverse event reporting, and product recalls. These SOPs have been developed in accordance with all relevant ISO, EU, and FDA requirements.

E-mail: overseas@span.co.in
Website: www.span.in

Information current as of October 2008

Technical Information

The Combaids – RS Advantage is a dot immunoassay for the detection of antibodies to HIV-1 and HIV-2 in whole blood, human serum, and plasma. The manufacturer reports that a panel of confirmed positive serum samples for HIV-1 and -2 demonstrated a sensitivity of 100%, and comparative evaluation on blood bank samples with other leading international brands indicates a specificity of 100%.  

Product Information

Number of tests per kit: 24, 48, or 96
Items included in kit:
- Washing buffer, colloidal gold signal reagent, sample diluent, negative and positive control, antigen and control reagent coated combs (each comb with 8 arms), wash tray, 8 microwell strips with 4 row frame, seal bag, disposable plastic droppers, rubber teats, and clamp

Additional items required but not included:
- Timer, dust cover, absorbent pad, bleach (5% sodium or calcium hypochlorite), disposable gloves, 100-milliliter measuring cylinder, 100-microliter micropipettes, and pipette tips

FDA approved: No

Approved by other regulatory agency: No information available

Elaine Kerr, Group Product Manager
Inverness Medical
Priory Business Park
Bedford
MK44 3UP
UK
Tel: +44 (0)1234-835229
Fax: +44 (0)1234-835009
E-mail: elaine.kerr@unipath.com
Website: www.determinetest.com

Technical Information

Determine™ HIV-1/2 is an assay that uses the immunochromatographic principle for the detection of antibodies to HIV-1 and HIV-2 in human serum, plasma, and whole blood with finger-stick blood samples. A total of 1,594 serum and plasma specimens from Asia, West Africa, and North America were tested, and specificity was found to be 99.75%. A total of 869 HIV-1 and HIV-2 antibody-positive serum and plasma specimens from Asia, Africa, and North and South America were tested, and sensitivity was found to be 100%. In addition 368 negative and 102 positive paired serum, plasma and whole blood specimens from Thailand were tested and the specificity and sensitivity were both found to be 100%. It is estimated that the test can produce results in 17 minutes.29

Product Information

- Number of tests per kit: 100
- Items included in kit: Test cards and reagents
- Additional items required but not included: Pipettes, pipette tips, lancets, and EDTA (ethylenediaminetetraacetic acid) capillary tubes
- FDA approved: No
- Approved by other regulatory agency: No information provided
- Shelf life of the HIV test kit: 14 months
- Language of package insert: English, French, German, Portuguese, and Spanish

---

Recommended storage conditions
Store the kit at room temperature up to 30°C (86°F)

Weight/dimensions/volume for one kit (100 tests)
Weight: 0.15 kg (0.33 lb)
Dimensions: 27 × 16 × 1 cm (10.6 × 6.3 × 0.4 in)
Volume: 432 cm$^3$ (0.000432 m$^3$) (26.36 cu in [0.015 cu ft])

**Procurement Information**

USAID Missions and CAs can purchase kits directly from the manufacturer or from an Abbott country office.30

Average price for one test/price for one kit
USD 1.20 per test; USD 120 per kit (FOB, Japan)

Additional pricing information
For nonprofit organizations ordering volumes in the thousands, price is dependent on quantities purchased and is determined by the country-specific Abbott Diagnostics Division office. Shipping costs are extra.

Donation programs
As part of the prevention of mother-to-child-transmission (PMTCT) donations program, Abbott Laboratories donates the HIV test kits in eligible countries for pregnant women, their spouses, and children (18 months and older) of those women who test HIV-positive.31

Available from U.S. sources
No

Minimum order from manufacturer
1 kit

Average minimum shelf life on delivery
Less than 14 months

Stock on hand
Country-dependent

Average time to fill order
Country-dependent

Quality issues
If a kit is defective for any reason, the client will be asked to send the kit back to the relevant Abbott Diagnostics Division country office, where it will be tested. If the defect is confirmed, Abbott will replace the kit free of charge.

Payment method to manufacturer
Payment options depend on the country where the kit is being purchased.

---

30 Abbott has offices in 150 countries.
Available from Action Medeor, Crown Agents, IDA Foundation, Joint Medical Stores (Uganda), Medical Export Group (MEG), Missionpharma A/S, UNFPA, UNICEF, and the WHO Bulk Procurement Scheme

Information current as of October 2006

Technical Information

DoubleCheck™ HIV 1&2 is a dual-recognition enzyme immunoassay (EIA) that uses a combined application of immunochromatography and immunoconcentration for the detection of antibodies to HIV-1 and HIV-2 in human serum or plasma. A clinical evaluation of 108 HIV-positive and 179 HIV-negative individuals revealed a sensitivity and specificity of 100%. It is estimated that the test will produce results in 11 minutes.

**Technical Information**

EZ-TRUST™ Rapid Anti-HIV (1&2) Test is a colloidal gold enhanced rapid HIV test that uses the immunochromatographic method to detect antibodies in whole blood, serum and plasma. The manufacturer reports that an in-house laboratory study conducted on 63 negative samples gave a specificity of 100%, and tests conducted on 32 positive samples found the sensitivity to be 100%. The test provides results within 15 minutes.

**Product Information**

- **Number of tests per kit**: 40
- **Items included in kit**: Test cassettes individually sealed with silicon gel and micropipette; six diluent bottles
- **Additional items required but not included**: There are two types of configuration available for the product. The first does not include lancets and alcohol swabs. The second configuration is designed for field use and includes alcohol swabs, diluent bottles, micropipette, lancet, and test cassette.
- **FDA approved**: No

English, French

### Recommended storage conditions
2–8°C (32–46°F). Do not freeze.

### Weight/dimensions/volume for one kit (40 tests)
- Weight: 1.01 kg (2.2 lb)
- Dimensions: 26 × 18.5 × 14 cm (10.2 × 7.3 × 5.5 in)
- Volume: 6,700 cm³ (0.0067 m³) (408.9 cu in [0.237 cu ft])

---

## Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

### Average price for one test
- Fewer than 75 kits: ~USD 3.45 per test; USD 138 per kit
- 75–200 kits: ~USD 3.12 per test; USD 125 per kit
- More than 200 kits: ~USD 2.77; USD 111 per kit

### Additional pricing information
Special pricing is available for developing countries through bulk procurement at USD 2.60 per test (USD 104 per kit)

### Donation programs
No information provided

### Available from U.S. sources
No

### Minimum order from manufacturer
Minimum order value of ~USD 280

### Minimum average shelf life on delivery
6–9 months

### Stock on hand
The manufacturer has stock available to cover an average of 1.5 months’ worth of sales; large quantities may be staggered or need to be ordered at least 2 months in advance.

### Average time to fill order
9 days; can be longer for unexpected orders

### Quality issues
Complaints should be addressed to Bio-Rad’s technical support staff in France at diags-support@bio-rad.com. Complaints are usually investigated, and if the quality problem is confirmed, the product is either replaced or a credit note is issued. The company has a recall procedure.

### Payment method to manufacturer
The required payment method for orders worth more than USD 14,000 is a letter of credit. Orders between USD 7,000 and USD 14,000 require a 50% payment in advance and the remainder on delivery. For orders less than USD 7,000, 30 days credit is given.
Available from Crown Agents, IDA Foundation, Medical Export Group (MEG), Missionpharma A/S, UNICEF and UNFPA and through the WHO Bulk Procurement Scheme.

HIVSav 1/2/0 Rapid SeroTest™
Manufactured by Savyon Diagnostics, Israel
For further information, please contact:
Elana Bitton, Marketing Assistant
Savyon Diagnostics
3 Habosem Street
Ashdod 77610
Israel
Tel: +972-8-856-2920 Ext. 202
Fax: +972-8-852-3176
E-mail: elana@savyondiagnostics.com
Website: www.savyondiagnostics.com
Information current as of October 2006

Technical Information
The HIVSav 1/2/0 Rapid SeroTest™ is a rapid chromatographic immunoassay for the qualitative detection of antibodies to HIV-1, HIV-2, and Subtype O in whole blood, serum or plasma to aid in the diagnosis of HIV infection. Results from clinical studies demonstrate a sensitivity of greater than 99.9% and a specificity of 99.8%.41

Product Information
Number of tests per kit: 25 or 50
Items included in kit: Cassettes, reagents, controls, and pipettes
Additional items required but not included: Disposable gloves, biohazard bags, blood collection equipment, and disinfectant
FDA approved: No
Approved by other regulatory agency: No information provided
Shelf life of the HIV test kit: 15 months
Language of package insert: English (other languages can be provided on request)
Recommended storage conditions: Room Temperature 2–30°C

41 Savyon Diagnostics. n.d. “HIVSav 1/2/0 Rapid SeroTest.”
Weight/dimensions/volume for one kit (25 tests)/(50 tests)

Weight: 0.385 kg (0.9 lb)/0.528 kg (1.2 lb)
Dimensions: 9 × 16 × 11 cm (3.5 × 6.3 × 1.7 in)/same
Volume: 3,344 cm³ (0.0033 m³) (204.1 cu in [0.12 cu ft])/same

**Procurement Information**

USAID Missions and CAs can purchase the kit directly from the manufacturer.

- **Average price for one test:** USD 1.50 per test (FOB, Israel)
- **Additional pricing information:** Shipping and insurance is extra. Special prices can be given to developing countries upon request if information such as the quantity of kits to be ordered is provided.
- **Donation programs:** No information provided
- **Available from U.S. sources:** No
- **Minimum order from manufacturer:** 1 kit
- **Minimum average shelf life on delivery:** 10 months
- **Stock on hand:** The manufacturer stated that some stock is held but did not specify the quantity.
- **Average time to fill order:** The order is dispatched immediately if sufficient stock is held. If the order is specially manufactured, it takes 4 weeks.
- **Quality issues:** If there is a problem with the quality of the kit, the company will replace it.
- **Payment method to manufacturer:** Letter of credit, prepayment, or open account, depending on the customer
- **Available from:** Crown Agents and Medical Export Group (MEG). The manufacturer also has a number of distributors in several countries that can supply the test kit (contact the manufacturer for additional information).
HIV 1/2 STAT-PAK® Assay
Manufactured by Chembio Diagnostic Systems, Inc., USA

For further information, please contact:

Information current as of November 2008

Technical Information

HIV 1/2 STAT-PAK is a single-use, immunochromatographic rapid test that uses a cocktail of antigens to detect antibodies to HIV-1 and HIV-2 in finger-stick whole blood, venous whole blood, serum, or plasma. Results from a large, controlled clinical trial on 2,700 patients demonstrated a sensitivity of 99.7% and a specificity of 99.9% on whole blood, serum, and plasma samples. Another evaluation conducted by WHO on a worldwide panel of 770 samples demonstrated a sensitivity of 99.7% and a specificity of 99.3%. The test can produce results in 10 minutes or less.

Information current as of November 2008

Technical Information

HIV 1/2 STAT-PAK® DIPSTICK is a single-use, immunochromatographic screening test that uses a cocktail of antigens to detect antibodies to HIV-1 and HIV-2 in whole blood, serum or plasma. In an evaluation of 770 samples conducted by the WHO, the final sensitivity demonstrated was 99.0% and the final specificity was 100% compared to the reference assays. Evaluations in Zambia with 236 specimens, in Uganda with 503 specimens and most recently, in RSA with 500 specimens, all resulted in 100% sensitivity and 100% specificity. The test can produce results in 15 minutes or less.

Product Information

Information current as of December 2006

---

**Technical Information**

The INSTITM HIV-1/HIV-2 Rapid Antibody Test is a single use, rapid (60 seconds), membrane-based flow-through in vitro qualitative immunoassay for the detection of antibodies to HIV-1 and HIV-2 in human EDTA-whole blood, fingerstick blood, serum or EDTA-plasma. The device also contains a built-in IgG capture control to ensure proper sample addition. In large-scale national and international clinical trials of INSTITM, sensitivity ranged from 99.4 to 100%, with positive predictive values of 97.9 to 100%, and specificity of 99.3 to 100% with negative predictive values of 99.6-100%. The test is intended for use by trained personnel in medical facilities, clinical laboratories, emergency care situations, VCT and point-of-care settings, and physicians’ offices as a diagnostic test.

Technical Information

The OraQuick® ADVANCE™ Rapid HIV 1/2 Antibody Test is a single-use, qualitative immunoassay to detect antibodies to HIV-1 and HIV-2 in oral fluid, fingerstick whole blood, venipuncture whole blood and plasma specimens. The OraQuick ADVANCE Rapid HIV 1/2 Antibody Test is intended for use as a point of care test to aid in the diagnosis of infection with HIV-1 and HIV-2. This test is read visually and results are read between 20 and 40 minutes. Sensitivity is 100% and the specificity is 99.87%.

Technical Information

OraQuick® HIV-1/2 Rapid Antibody Test is a qualitative in vitro immunoassay. It detects antibodies to human immunodeficiency virus types 1 and 2 (HIV-1/2) in human oral fluid, whole blood, serum, or plasma. The assay is read visually and is intended for the detection of such antibodies from individuals infected by HIV 1 or HIV 2. The sensitivity is 100%, and the specificity is 98.1%.55

Product Information

Number of tests per kit 100 or 500
Items included in kit
- In the 100-test kit: 100 devices, 10 reusable test stands, 1 pack of 5 specimen collection loops, and 1 package insert
- In the 500-test kit: 500 devices, 20 reusable test stands, 25 collection loops, and 1 package insert.

Additional items required but not included
- Quality controls are available for purchase from the manufacturer. Each kit control contains a package insert and three vials (one HIV-1 positive control, one HIV-2 positive control, and one negative control). Other items needed are gloves, sterile lancet to obtain finger-stick or materials to obtain venipuncture whole blood sample, timer or watch, antiseptic wipe, sterile gauze pad, biohazard waste container, phlebotomy materials, and disposable absorbent workspace cover.

Information current as of November 2006

**Technical Information**

The *Reveal™* G3 Rapid HIV-1 Antibody Test is a single use, qualitative immunoassay intended for use as a point-of-care test to aid in the diagnosis of infection with HIV-1. It detects antibodies to HIV-1 in human serum or plasma. It is a manually performed, visually interpreted rapid immunoassay. It is comprised of a single-use cartridge containing an immunoreactive test membrane comprised of a combination of synthetic peptides corresponding to conserved regions of HIV structural proteins coated onto a membrane matrix, which functions to capture anti-HIV-1 antibodies present in human serum or plasma when a drop of specimen is applied. The runtime for the test is approximately three minutes. The test has a sensitivity of 99.8% and a specificity of 99.1% for serum specimens and 98.6% for plasma specimens.

Information current as of October 2008

### Technical Information

The Signal® HIV 1+2 is a flow-through immune-dot test for the qualitative detection of antibodies to HIV-1 and -2 in human serum or plasma. The test can demonstrate results in 2 to 10 minutes. The manufacturer reports that evaluations of confirmed positive serum samples for HIV-1 and HIV-2 demonstrate a sensitivity of 100%, and an in-house evaluation of blood bank samples indicates a specificity of 100%.\(^{61}\)

\(^{61}\) Span Diagnostics Ltd Signal® HIV Package Insert.
Weight/dimensions/volume for one kit (100 tests) 

| Weight: 0.115 kg (0.253 lb) (115g) | Dimensions: 6.5 × 15 × 7 cm (3 × 6 × 3 in) |

**Procurement Information**

USAID Missions and CAs can purchase the kit directly from the manufacturer.

| Average price for 10 tests/price for one kit | USD 12.00 for 10 tests and USD 50.00 for 50 tests (FOB Mumbai) |
| Additional pricing information | Freight charges are extra. Reduced prices are not given to developing countries. The above quoted prices are the best rates for developing countries. |
| Donation programs | Not available |
| Available from U.S. sources | No |
| Minimum order from manufacturer | 10 kits of 50 tests |
| Minimum average shelf life on delivery | 80% of the original shelf life |
| Stock on hand | The manufacturer states that some stock is held but does not specify the quantity. In addition, stock is manufactured for bulk quantities. |
| Average time to fill order | The order is dispatched within 30 to 45 days after the receipt of 100% advance payment. |
| Quality issues | If there is a problem with the quality of the kit, the customer is expected to contact the manufacturer through e-mail, fax, or telephone. There is a special division that handles product-related problems. There is no recall procedure for defective HIV test kits. |
| Payment method to manufacturer | Telegraphic wire transfer |
| Available from | Crown Agents; the manufacturer has distributors that can supply the test kit (contact the manufacturer for additional information). |
**Technical Information**

Uni-Gold™ HIV is a single reagent assay that uses the immunochromatographic sandwich principle for the detection of antibodies to HIV-1 and HIV-2 in serum, plasma, or whole blood. It has been evaluated by a number of independent organizations. The WHO evaluation recorded 100% sensitivity and 100% specificity for the product. The test is estimated to produce results in 11 minutes.62

Recommended storage conditions

Weight/dimensions/volume for one kit (20 tests)

- Weight: 0.2 kg (0.44 lb)
- Dimensions: 23.5 × 14 × 8 cm (9.25 × 5.5 × 3.15 in)
- Volume: 3,360 cm³ (0.00336 m³) (205.04 cu in [0.118657 cu ft])

### Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

- **Average price for one test/price for one kit:** USD 1.50 per test; USD 30 per kit (EXW, Ireland)

- **Additional pricing information:** No handling charges are added, but shipping and insurance are extra. Prices may vary by quantity and region. Concessionary prices are offered to WHO, other UN agencies, and major international procurement agencies. Discounts from the listed price can be negotiated on a case-by-case basis either directly through the manufacturer or through local distributors.

- **Donation programs:** There are currently no donation programs for this HIV test kit.

- **Available from U.S. sources:** Yes, but not for domestic use in the United States

- **Minimum order from manufacturer:** 5 kits (100 tests)

- **Minimum average shelf life on delivery:** 10–11 months (kits are usually delivered with 75% of their shelf life remaining)

- **Stock on hand:** Stocks are held, but levels vary with demand.

- **Average time to fill order:** 6 weeks

- **Quality issues:** Any quality problem with the product is investigated through the in-house quality control system. If a product problem is confirmed, replacement product or product notes are issued. The manufacturer does not have a specific recall procedure for the HIV test kit, but it has implemented SOPs for the management of postmarketing activities including customer complaint handling, adverse event reporting, and product recalls. These SOPs have been developed in accordance with all relevant ISO, EU, and FDA requirements.

- **Payment method to manufacturer:** Up-front payments for three orders, after which credit terms can be established. Credit card orders may be accepted.
Available from Crown Agents, Durbin PLC, IDA Foundation, Joint Medical Stores (Uganda), Medical Export Group (MEG), Missionpharma A/S, UNICEF, and UNFPA. The product is also available through the WHO Bulk Procurement Scheme (see Chapter 2 for more details). The manufacturer has exclusive/non-exclusive local suppliers in a large number of countries (contact the manufacturer for additional information).

CHAPTER 2: PROCUREMENT AGENCIES AND SUPPLIERS

Chapter 2 contains HIV test kit procurement information from selected procurement agencies and suppliers (both national and international).

A supplier maintains a warehouse and sends items directly to customers. The following international suppliers responded to this survey—

- Action Medeor
- IDA Foundation

Also included in this fifth edition are national suppliers who procure and supply pharmaceuticals and other commodities for programs within countries or regions. The following national supplier responded to the survey—

- Joint Medical Stores (JMS), Uganda

A procurement agency negotiates prices and places purchase orders for clients and may often order from a vendor. An agency usually charges a fee for its services over and above the CIF price of the product or test kit. The following international procurement agencies responded to the survey—

- Crown Agents
- Durbin PLC
- Medical Export Group
- Missionpharma A/S
- Tri-Med Group

Also featured in this section are three UN agencies that have been involved in the procurement of HIV test kits: UNICEF, UNFPA, and WHO. UNFPA assists countries to procure HIV test kits for general use, while UNICEF assists countries to procure HIV test kits for their PMTCT programs. WHO directs and manages the HIV Test Kit Bulk Procurement Scheme for several other UN agencies and civil society organizations involved in programs that require test kits.

The information in this chapter is current as of July 2007 and is intended to be used as an initial reference for identifying procurement agencies and suppliers and for procurement planning. Inclusion in this document does not imply that the supplier or agency is endorsed by USAID or MSH/RPM Plus or preferred over any other supplier or agency.

Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional handling and shipping charges may apply. Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure HIV test kits.
What Is in This Section?

To obtain relevant information on the HIV test kits listed in the USAID Source and Origin Waiver, surveys were sent to the procurement agencies and suppliers of the HIV test kits. The responses from these agencies and suppliers provide the information that appears in this section. Also noted is whether a representative of the U.S. Government can purchase test kits from the specified procurement agency or supplier. The information included for each company is as follows, with some exceptions—

<table>
<thead>
<tr>
<th>Product(s) supplied</th>
<th>Names of the test kits listed in the Source and Origin Waiver that the procurement agency or supplier stocks or supplies.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listed price (range) and terms and suggested retail price</td>
<td>Prices are given as an indication only. The supplier or agency should be contacted to verify the information.</td>
</tr>
<tr>
<td>Additional pricing information</td>
<td>Additional procurement information is listed here, such as whether the manufacturer provides special discounts for nonprofits or other organizations working on certain programs.</td>
</tr>
<tr>
<td>Minimum order quantity</td>
<td>This lists the minimum order quantity required, if any.</td>
</tr>
<tr>
<td>Average minimum shelf life on delivery</td>
<td>The remaining time (usually months) for which a product can be safely used and accurate results can be expected after purchase from the manufacturer. Assuring that the shelf life can be maintained as stated on the product packaging is dependent on the product being stored and handled according to the conditions specified by the manufacturer. These instructions must be included in every package, carton, and/or shipping unit. The minimum accepted shelf life on delivery must be negotiated and included in the procurement contract.</td>
</tr>
<tr>
<td>Stock on hand</td>
<td>Specifies whether stock is maintained or if the kit is manufactured on demand. If stock is held, the lead time is generally shorter. However, having the kits manufactured on receipt of the order has the advantage of a longer shelf life.</td>
</tr>
<tr>
<td>Category</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Average time to fill an order</td>
<td>This information assists programs in planning for procurement to ensure that orders are placed in sufficient time to avoid product unavailability.</td>
</tr>
<tr>
<td>Delivery information</td>
<td>Details the delivery locations the company serves, if applicable.</td>
</tr>
<tr>
<td>Payment method</td>
<td>Any general requirements for method of payment are given in this section. These requirements are often country-, program-, or quantity-specific. The procurement agency or supplier may need to be contacted for additional information.</td>
</tr>
<tr>
<td>Quality issues</td>
<td>Information on the company’s policy if the customer experiences problems with the quality of the test kits.</td>
</tr>
<tr>
<td>Additional information</td>
<td>Other information that might be useful in the procurement of HIV test kits is given here, if any.</td>
</tr>
</tbody>
</table>

Information current as of September 2008

USAID Missions and CAs can purchase kits directly from this supplier.

Products supplied
All HIV test kits that appear on the November 3, 2008, USAID List of Approved Rapid HIV/AIDS Test Kits

Listed price (range) and terms and suggested retail price
All prices are EXW and are negotiated directly with the manufacturers. Prices can be provided with shipping/insurance charges included. There is no handling charge.

Additional pricing information
The price for each kit is available to all customers, regardless of the type of organization. Prices are not dependent upon the quantity ordered, but large or long-term contracts would attract a negotiated discount.

Minimum order quantity
None

Minimum average shelf life on delivery
Crown Agents procures freshly manufactured products to maximize shelf life at delivery.

Additional pricing information

Freight charges, which depend on the quantity ordered and the final destination, are not included in pricing.

Minimum order quantity

Depends on minimum order quantities determined by the manufacturers of the HIV test kits.

Minimum average shelf life on delivery

In general, Medical Export Group supplies goods with a shelf life of at least 75%.

Stock on hand

Stock is usually maintained for customers who have long-term agreements.

Average time to fill an order

2–6 weeks for average quantities

Payment method

30 days net of receipt of invoice and other documents

Quality issues

Medical Export Group has a recall procedure for all products with a batch number. Immediate action is taken to ensure that the product is taken off the market as soon as possible.

**Additional pricing information**  
Prices are based on quantities ordered. A discount is offered for purchases made in bulk. To receive the discounted price, an organization/agency will need to specify the quantity needed in the request.

**Minimum order quantity**  
None

**Minimum average shelf life on delivery**  
Shelf life varies according to product.
Stock on hand  Stock is not maintained because of the short shelf life of the products. HIV test kits are procured on demand.

Average time to fill an order  4–8 weeks

Delivery information  The company can deliver to facilities within a country or to a single address/warehouse, according to the customer’s request.

Payment method  Prepayment is required for new customers. Established customers are given 30 days to make payments.

Quality issues  Kits with quality problems will be replaced or a refund will be issued, depending on the customer’s preference. The quality assurance/quality control department is responsible for the visual control of samples from each consignment and for verifying each certificate of analysis. The company adheres to the WHO Good Manufacturing Practices (GMP) rules.

Products supplied

Pricing information
Prices vary according to the product and are fixed as part of the WHO Bulk Procurement Scheme. All prices are FCA to the nearest airport. An organization can receive a reduced price by purchasing pooled quantities through the WHO Bulk Procurement Scheme.

Stock on hand
UNICEF supplies to the public sector and partner organizations. Stock is maintained based on the type of test kit.

Average time to fill an order
4–6 weeks

Minimum average shelf life on delivery
UNICEF requires 80% remaining shelf life on delivery; in most cases, freshly manufactured batches are sent to fill orders.

Delivery information
Kits are delivered CIF to the destination airport.

Payment method
Advance payment to UNICEF
The WHO procurement service for diagnostics was established in 1990 to facilitate access to HIV test kits for Member States at a reasonable cost. WHO’s procurement services cover diagnostics for a range of priority diseases including HIV. WHO also carries out a prequalification program for HIV and malaria diagnostic kits. Additional information is available at www.who.int/diagnostics_laboratory/update%20Q1%202008.pdf.

The following HIV test kits that appear on the November 2008 USAID List of Approved HIV/AIDS Rapid Kits have been evaluated by WHO—

1. Bioline HIV 1/2 3.0 (Standard Diagnostics)
2. Capillus™ HIV-1/HIV-2 (Trinity Biotech)
3. Determine™ HIV-1/2 (Inverness Medical Innovations and Abbott Laboratories)
4. HIV (1+2) Antibody Colloidal Gold (Shanghai Kehua Bio-Engineering Co. (KHB))
5. DoubleCheck™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd.)
6. DoubleCheck Gold™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd)
7. First Response® HIV 1-2.0 (Premier Medical Corporation, Ltd.)
8. Genie II HIV-1/HIV-2 (Bio-Rad Laboratories)
9. HIV 1/2 Stat-Pak™ Assay (Chembio Diagnostics Systems)
10. HIV 1/2 Stat-Pak™ Dipstick (Chembio Diagnostics Systems)
11. ImmunoComb™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd.)
12. InstantCHEK™ HIV 1+2 (EY Laboratories)
13. OraQuick Rapid ADVANCE® Rapid HIV-1/2 Antibody Test (OraSure Technologies)

ANNEX 1. USAID SOURCE AND ORIGIN WAIVER FOR HIV/AIDS DIAGNOSTIC MATERIALS

This annex section contains the list of all the USAID source and origin waiver related documents and AAPDs issued since January 2001 starting with the most recent.

Acquisition & Assistance Policy Directive (AAPD)
From the Director, Office of Acquisition & Assistance   Issued: , 2006

AAPD 06 -

Procurement of HIV-AIDS Test Kits from Code 935 Countries

Subject Category: Assistance, Acquisition Management
Type: Policy and Procedure

AAPDs provide information of significance to all agency personnel and partners involved in the Acquisition and Assistance process. Information includes (but is not limited to): advance notification of changes in acquisition or assistance regulations; reminders; procedures; and general information. Also, AAPDs may be used to implement new requirements on short-notice, pending formal amendment of acquisition or assistance regulations.

AAPDs are EFFECTIVE AS OF THE ISSUED DATE unless otherwise noted in the guidance below; the directives remain in effect until this office issues a notice of cancellation.

This AAPD:  Is New  X Replaces/ Amends CIB/AAPD No: 05-01

Michael F. Walsh, Director
AAPD 06-xx-- Procurement of HIV-AIDS Test Kits from Code 935 Countries

PURPOSE:

1. This AAPD replaces AAPD 05-01.
2. The USAID List of Approved HIV/AIDS Test Kits has been updated.
3. The AAPD confirms that OAA "restricted commodity" approval under ADS 312.5.3c is not required for the test kits on the list.
4. AA/M no longer approves test kits; the authority has been delegated to Director of the Office of HIV/AIDS, Bureau for Global Health (GH/OHA). GH/OHA establishes the technical requirements and issues technical guidance for test kits. The List, technical requirements, technical guidance and points of contact are at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html
5. Under contracts and agreements in effect prior to the issuance of this AAPD, Contracting and Agreement officers (COs and AOs) are encouraged to give advance approval for procurement of approved test kits under the source/origin or "restricted commodity" provisions of the Mandatory Standard Provisions for U.S., Nongovernmental Recipients "USAID Eligibility Rules For Goods And Services", the AIDAR provision 752.225-70, "Source, Origin and Nationality Requirements", or similar provisions. For contracts and agreements obligated after the issuance of this AAPD, COs and AOs should include language in the schedule or elsewhere that indicates that CO/AO approval is not needed for procurement of approved test kits under the above clauses or similar provisions.

ACTION REQUIRED: COs/AOs, in coordination with Cognizant Technical Officers (CTOs), amend current agreements and include language in new agreements to implement AAPD, as appropriate.

BACKGROUND: On January 11, 2001, the Administrator of USAID authorized the procurement of certain listed test kits from Geographic Code 935 countries. In an Action Memorandum dated September 26, 2006 the Administrator modified the basis for the waiver and delegated the authority to approve test kits to the Director of the Office of HIV/AIDS, Bureau for Global Health.

GUIDANCE:

b. Office of Acquisition and Assistance (OAA) and Contracting and Agreement Officer (CO/AO) Approval.

1. OAA approval under ADS 312.5.3c is not required for approved test kits.
2. Under contracts and agreements in effect prior to the issuance of this AAPD, COs and AOs may and are encouraged to give advance approval for procurement of approved test kits under the source/origin or "restricted commodity" provisions of the Mandatory Standard Provisions for U.S., Nongovernmental Recipients "USAID Eligibility Rules For Goods And Services", the AIDAR provision 752.225-70, "Source, Origin and Nationality Requirements", or similar provisions. For contracts and agreements obligated after the issuance of this AAPD, COs and AOs should include language in the schedule or elsewhere that indicates that CO/AO approval is not needed for procurement of approved test kits under the above clauses or similar provisions.

3. COs are encouraged to give advance approval to procurements of approved test kits in amounts in excess of the simplified acquisition threshold and any other consent required under FAR clause 52.244-2 or comparable provisions in the implementing instrument.

b. Technical Requirements and Considerations.

AA/M no longer approves test kits; that is now done by GH/OHA. GH/OHA establishes the technical requirements and issues technical guidance for test kits. The technical requirements, technical guidance and points of contact are at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.

POINT OF CONTACT: Please direct questions about the AAPD to Diane Howard, M/OAA/P, Phone (202) 712-0206. For points of contact on questions about test kits see the website, www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.
Acquisition & Assistance Policy Directive (AAPD)

From the Director, Office of Acquisition & Assistance
Issued: February 10, 2005

AAPD 05-01

Procurement of HIV-AIDS Test Kits from Code 935 Countries

Subject Category: Assistance, Acquisition Management
Type: Policy and Procedure

AAPDs provide information of significance to all agency personnel and partners involved in the Acquisition and Assistance process. Information includes (but is not limited to): advance notification of changes in acquisition or assistance regulations; reminders; procedures; and general information. Also, AAPDs may be used to implement new requirements on short-notice, pending formal amendment of acquisition or assistance regulations.

AAPDs are EFFECTIVE AS OF THE ISSUED DATE unless otherwise noted in the guidance below; the directives remain in effect until this office issues a notice of cancellation.

This AAPD: ☐ Is New ☐ Replaces/ ☑ Amends CIB/AAPD No: 01-04

☐ New Provision/Clause Provided Herein: If checked, scheduled update to Prodoc:

(signed copy on file)

Kimberly Triplett, Acting Director
AAPD 05-01 -- Procurement of HIV-AIDS Test Kits from Code 935 Countries

**PURPOSE:** The purpose of this AAPD is to update the list of Testing Kits included in Contract Information Bulletin (CIB) 01-04 that were approved for purchase for HIV/AIDS programs from Geographic Code 935 countries (any country or area excluding foreign policy restricted countries). The updated list is included in the GUIDANCE section below and may be revised and updated yearly or as necessary by the Office of HIV/AIDS (OHA), Bureau for Global Health, with the approval of AA/M, and issued through an amendment to this AAPD.

**BACKGROUND:** On January 11, 2001, the Administrator of USAID authorized the procurement of certain listed test kits from Geographic Code 935 countries. Test kits eligible for this procurement were listed in Tab 1 to that waiver. The waiver also delegated authority to AA/M to amend the list at Tab 1 to the waiver, to add new testing kits which could be determined to meet the same criteria. This waiver was included in CIB 01-04.

**GUIDANCE:**

a. Procurement in Geographic Code 935 countries is authorized for the test kits listed below.

---

b. Choosing test kits for country programs

While purchase of kits on the approved list is authorized, different kits are appropriate for different countries and testing situations. We recommend that kits be evaluated in country for their performance as part of a national testing algorithm. Guidance on HIV rapid test kit evaluation is available at www.phppo.cdc.gov/dls/pdf/HIV%20Test%20Guidelines%20Africa.pdf.

c. Adding additional test kits to the list

For an HIV/AIDS test kit to be added to the list of those approved for procurement from Geographic Code 935 countries, the following information regarding such test kit must be submitted to OHA:

1. Whether it has FDA-approval:
2. Whether its producer has FDA-approval;
3. Whether the facility and production site where it is manufactured has FDA-approval;
4. Whether the test kit, producer, or production site has approval of a stringent regulatory authority, and
5. Why the proposed test kit is necessary and appropriate for the country/countries concerned.

Alternatively, OHA will accept notification from the Department of Health and Human Services Centers for Disease Control and Prevention (CDC) that they have evaluated the test kit and find that it meets the attached criteria.

---

A stringent regulatory authority is a drug regulatory body that closely resembles FDA in standards utilized in its operations. Currently, countries that participate in the International Conference on Harmonization (ICH) are considered as stringent regulatory authorities. The ICH regulatory bodies include: the U.S. FDA; the Japanese Ministry of Health, Labor, and Welfare; the European Agency for the Evaluation of Medicinal Products (EMEA) centralized procedure; and the European Free Trade Area (represented by the Swiss Medic). The Canadian drug regulatory authority, the Therapeutic Products Directorate, Health Canada, is an observer to the ICH and is also considered a stringent regulatory authority. Other countries may be considered having a stringent regulatory body if they have implemented ICH guidelines and resemble the U.S. FDA in operation, but would be considered on a case-by-case basis. It should be noted that the World Health Organization (WHO) has a pre-qualification program for procurement purposes. The WHO is not a regulatory authority, and acceptance of a manufacturer or product by the WHO pre-qualification program would not be considered equivalent to approval of a product by a stringent regulatory authority.
1. Attachment: RAPID HIV TEST KIT TECHNICAL REQUIREMENTS

POINT OF CONTACT: Please direct any questions pertaining to the test kits to Katharine Kripke, GH/OHA/TLR, Phone: (202) 712-1452, e-mail: kkripke@usaid.gov. Please direct questions about the AAPD to Diane Howard, M/OAA/P, Phone (202) 712-0206.

Attachment to AAPD 05-01 -- Procurement of HIV-AIDS Test Kits from Code 935 Countries

2. RAPID HIV TEST KIT TECHNICAL REQUIREMENTS

1. HIV Rapid Test Kits:

HIV rapid tests are defined as assays for detection of antibodies to HIV-1, HIV-2, or both, from which test results can be read directly, within 30 minutes of the time specimen is applied to the device, without calibration, interpretation, or calculations. Qualifications for HIV rapid test kits are listed below. The only acceptable kits are those meeting the test characteristics described below. Acceptable kits may change periodically as evaluation data on kit performance is updated.

A. Test Characteristics:

i. Documentation from manufacturer studies that test has sensitivity of at least 99% and specificity of at least 98% for detection of HIV-1 in each sample matrix for which the test is designed (e.g., whole blood, serum, plasma, oral fluid or urine). Data should be based on at least 500 HIV negative and 500 HIV-1 positive specimens. If test claims to detect both HIV-1 and HIV-2, sensitivity for HIV-2 should be demonstrated with evaluation of 50 HIV-2 positive specimens, and must be at least 99%.

ii. One or more credible evaluations by internationally recognized independent institutions validating that sensitivity and specificity of the tests are within 95% +/- 2% confidence interval of that demonstrated in manufacturer’s studies (criterion i.). Approximately 200 HIV-positive and 200 HIV-negative specimens are needed to provide 95% confidence intervals of less than ± 2% for both the estimated sensitivity and specificity. A document that describes the process of such an evaluation can be found at:
iii. Presence of a normal internal control or other failure alert mechanism to notify the operator if the assay malfunctions. Also, having external controls that assure the presence of functional test antigens in the test platform will be very useful.

B. Performance Characteristics:

1. Use direct, unprocessed specimens (e.g., unprocessed whole blood or oral fluid) or samples that require minimal processing (e.g., serum or plasma).

2. All reagents including diluents are included in kit, and require no technique-dependent reagent manipulation (e.g., no reconstitution)

3. No operator intervention or procedural steps during the analysis after initial addition of specimen and reagents.

4. No requirements for assay-specific equipment.

5. Kits and all reagents stored at temperatures recommended by manufacturers shall have a minimum 1-year shelf life when received by contractors.

C. Manufacturing Characteristics:

The HIV rapid test kits must be purchased from manufacturers of those kits that meet the test characteristics and performance characteristics, described in sections A. and B., and manufacturing characteristics described below. As the list of tests is updated, the eligible manufacturers may change.

Eligible manufacturers must have:

i. Documented production capacity to provide the number of kits needed by USG programs for current and projected assay usage (e.g., 200,000 – 500,000 test kits needed annually), and ability to deliver a minimum of 45,000 test kits within 90 days of order.
ii. Availability of data to document reproducible performance across different lots of assay.

iii. Ability to ship to international sites.

iv. Documentation of export certificate, when required.
ACTION MEMORANDUM

TO: AA/M, John Marshall

FROM: AA/GH, E. Anne Peterson

SUBJECT: The HIV/AIDS and Infectious Disease Initiatives:
Update of Source and Origin Waiver for HIV/AIDS
Diagnostic Materials (testing kits)

ISSUE FOR DECISION

Whether to authorize the amendment of the approved and updated
list of HIV rapid test kits that can be procured under the
January 2001 source and origin waiver

ESSENTIAL FACTORS

In a January 11, 2001 action memorandum (Tab 2), the former
Administrator approved the source and origin waiver from
Geographic Code 000 to Code 935 for the procurement of rapid HIV
test kits (Tab 1). To meet the requirements of safety and
efficacy, this authority was limited to a list of approved
products, based on review and evaluation by the Centers for
Disease Control (CDC). The January 11, 2001 memorandum delegated
authority to AA/M to amend the approved list from time to time
to add new code 935 testing kits when they meet the same
criteria.

RECOMMENDATION

We recommend that, based on the findings above, you authorize
the amendment of the list of HIV test kits approved for
procurement under the January 11, 2001, source and origin waiver

[Signature]

Approve

Disapprove___________________

Date Dec 6 2001

70 Changes that have been made to Tab 1 since its approval in October 2001 are indicated in footnotes.
71 The product is manufactured by EY Laboratories for Ortho-Clinical Diagnostics Systems; however, the product may have been discontinued in August 1997, according to personal communication with a representative of Ortho-Clinical Diagnostics Systems. The details were unable to be determined.
72 Bio-Rad Laboratories acquired Sanofi Diagnostics Pasteur in 1999.
73 The manufacture of this product has been discontinued by the company.
74 A recent e-mail communication with a representative of Bio-Rad Laboratories indicated that the company has discontinued production of this product.
75 On June 17, 2002, OraSure Technologies (created when Epitope, Inc., merged with STC Technologies in September 2000) announced that it had entered into an agreement with Abbott Laboratories for the co-exclusive distribution of OraQuick tests in the United States.
ACTION MEMORANDUM

TO: The Administrator
FROM: A-AA/G Barbara Turner /s/
SUBJECT: The HIV/AIDS and Infectious Disease Initiatives: Source and Origin and Waiver for HIV/AIDS Diagnostic Materials (testing kits)

ISSUE FOR DECISION

Whether to authorize the procurement of testing kits from Code 935 countries (any country or area excluding foreign policy restricted countries).

ESSENTIAL FACTORS

In a December 19, 2000, Action Memorandum (See Tab 2) you approved certain waivers and expedited procedures to acquire services and commodities for the Agency’s HIV/AIDS and Infectious Diseases Initiatives. While the December 19th Memorandum authorizes expedited procurement procedures for testing kits, it does not waive source and origin requirements because more research was required on their availability in the United States and the efficacy and cost of offshore testing kits.

Having completed this research, we are seeking your approval of a source and origin waiver from Geographic Code 000 (United States) to Geographic Code 935 for specific testing kits identified in Tab 1. Consistent with the December 19th Memorandum, your approvals below will be in effect through the year 2007 and apply to all sources of funds including prior year funds. Records will be kept on all uses of the waiver authorities. Annual reviews will determine the adequacy of the waiver authorities and their continuing need. The list at Tab 1 will be revised and updated should U. S. manufactured testing kits, or new or improved testing kits from Code 935 sources become available that meet USAID program requirements.

Effective counseling and testing for HIV is a critical component of any HIV/AIDS strategy. While testing provides information to
individuals regarding their HIV status, it also provides information regarding the extent of the epidemic among target groups and indicates where additional resources may be needed. We anticipate that between one million to three million testing kits will be purchased annually over the seven-year life of the HIV/AIDS initiative. At an estimated average cost of $3 per test, the aggregate procurement value will be approximately 45 to 55 million dollars. However, this amount will be substantially reduced if, as expected, the average cost per testing kits is reduced as new products come on stream.

The applicable statute and regulations covering USAID’s “buy America” requirements (including testing kits) appear in section 604 (a) of the Foreign Assistance Act, ADS section 312.5.3c (2), and in 22CFR 228. Taken together, these sometimes overlapping regulations provide that pharmaceuticals be purchased outside of the United States only if information is available to attest to the safety, efficacy and quality of the product, or the product meets the standards of the Food and Drug Administration (FDA) or other U.S. controlling authority. ADS Section E312.5c (3) adds a further requirements that patent laws be honored. Such items may be purchased in Geographic Code 935 countries if you determine that: 1) the items are not produced or available in the United States, or if available, they cost more than 50 percent of comparable items, or 2) offshore procurement is necessary to promote efficiency in the use of foreign assistance resources and avoid impairment of foreign assistance objectives. While the United States Centers for Disease Control (CDC) is not controlling authority, approval by CDC is good evidence that may be used as a basis for authorizing non-U.S. procurement of products that are not approved by the FDA.

With respect to test kits, the criteria supporting a waiver are met. The most commonly available United States testing kits are based on the Elisa Reader method. The cost per test of these kits is approximately $20. This cost is more than 50 percent higher than the cost of offshore alternatives. Further, these products require high quality lab facilities and highly trained personnel that are not widely available in target countries. Even where this kind of physical and human infrastructure is available in urban centers, there are insurmountable logistical problems in transporting thousands of blood specimens to and from rural sites to urban laboratories. It takes days or weeks to obtain tests results using Elisa Reader method. This is too long, given that in some target countries more than 30 percent of clients tested by these systems fail to return for the test results.
Recently, a new “simple-rapid” type pf HIV test costing $1-3 per test has become available offshore. These tests are easy to use, no central laboratory is needed, and they deliver test results within a few hours instead of days to weeks. There is currently only one United States-manufactured HIV rapid test that is FDA approved. It costs about $9 and the manufacturer has recently suspended production of this product.

Tab 1 contains a list of testing kits that have been reviewed internally and found to meet all the necessary suitability and price criteria in the applicable waiver regulations cited above. CDC has reviewed and approved the items on the Tab 1 list for safety and efficacy.

RECOMMENDATIONS

A. We recommend that, based on the findings above, you authorize the procurement in Code 935 countries of testing kits identified in Tab 1

Approve ____________________
Disapprove__________________
Date_______________________

B. We recommend that you delegate authority to AA/M to amend the Tab 1 approved list from time to time to add new Code 935 testing kits when they meet the same criteria
