This document was made possible through support provided by the U.S. Agency for International Development, under the terms of cooperative agreement number HRN-A-00-00-00016-00. The opinions expressed herein are those of the author(s) and do not necessarily reflect the views of the U.S. Agency for International Development.

About RPM Plus

Rational Pharmaceutical Management (RPM) Plus works in more than 20 developing and transitional countries to provide technical assistance to strengthen pharmaceutical and health commodity management systems. The program offers technical guidance and assists in strategy development and program implementation both in improving the availability of health commodities—pharmaceuticals, vaccines, supplies, and basic medical equipment—of assured quality for maternal and child health, HIV/AIDS, infectious diseases, and family planning, and in promoting the appropriate use of health commodities in the public and private sectors.

Note: Although Management Sciences for Health (MSH)/RPM Plus Program has made every effort to ensure the accuracy of product, manufacturer, price, supplier, procurement agency, and other information presented in this document, the data and information contained herein are being provided as is; MSH/RPM Plus and the U.S. Agency for International Development (USAID) make no representation or warranties, either express or implied, as to its accuracy, completeness, or fitness for a particular purpose.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by USAID or RPM Plus in preference to others of a similar nature that are not mentioned. Errors or omissions excepted, the names of proprietary products are distinguished by initial capital letters.

This document may be reproduced if credit is given to RPM Plus. Please use the following citation.

WHO	World Health Organization

GLOSSARY

Efficacy	Efficacy is the ability of a drug or pharmaceutical product to produce a particular effect as determined by scientific methods.
FDA approval	FDA approval means that the product has met the standards of the U.S. Food and Drug Administration for safety, efficacy, and quality for the proposed application.
Incoterms¹	This is short for “International Commercial Terms.” They are standard trade definitions (devised and published by the International Chamber of Commerce) commonly used in international sales contracts. ² Examples are ex works (EXW); free on board (FOB); and cost, insurance, and freight (CIF).
Origin	The origin of a pharmaceutical product is the country in which it was produced.
Pharmaceutical products	For the purposes of USAID procurement regulations, pharmaceutical products are defined as drugs, vitamins, oral rehydration salts, biologicals, and some in vitro diagnostic reagents/test kits (including HIV test kits and antibiotic susceptibility test kits).
Quality	The quality of a pharmaceutical product is determined by its identity, purity, potency, uniformity of dosage form, bioavailability, and stability.
Safe medical product	The FDA defines a safe medical product as one that poses reasonable risks given the magnitude of the benefit expected and the alternatives available.
Sensitivity	The sensitivity of a test is the probability of testing positive if infection is truly present. As the sensitivity of a test increases, the number of false negatives decreases.
Source	The source of a commodity is the country it is shipped from and does not include free ports or bonded warehouses. The source can be the cooperating country, if that is where the commodity is located at the time of purchase.
Specificity	The specificity of a test is the probability of testing negative if infection/disease is truly absent. As the specificity of a test increases, the number of false positives decreases.

¹ See the Incoterms Glossary for a list of incoterms used in this document and their corresponding explanations. A full glossary of incoterms used in the document starts on page ix.

² International Chamber of Commerce. 2007. “Understanding Incoterms.” www.iccwbo.org/incoterms/id3042/index.html (accessed Jan. 15, 2007).

INCOTERMS

Cost, insurance, and freight (CIF)	The selling costs include the cost of goods, the freight or transport costs, and also the cost of marine insurance. The seller's responsibility for the goods ends when the goods have been delivered on board a shipping vessel. ³
Carriage and Insurance Paid (CIP)	The passing of risk occurs when the goods have been delivered into the custody of the first carrier. This means that the buyer bears all risk and any additional costs occurring after the goods have been so delivered. ⁴
Delivered Duty Unpaid (DDU)	The seller pays for all transportation costs and bears all the risk until the goods have been delivered, but does not pay for the duty. ⁵
Ex works (EXW)	Seller X has the goods ready for collection at his premises (works, factory, warehouse, plant) on the date agreed upon. The buyer pays all transportation costs and also bears the risks for bringing the goods to their final destination. The term requires that the buyer must be able to carry out export formalities in the country of supply, these days almost impossible. Therefore in the vast majority of cases where terms are quoted EXW they actually intend the seller to carry out export formalities, which means the correct term is FCA (seller's premises).
Free carrier (FCA)	The seller delivers the goods into the custody of the first carrier, and this is where the risk passes from the seller to the buyer. The buyer pays for transportation. ⁶
Free on board (FOB)	The seller pays for the transportation of the goods to the port of shipment, plus loading costs. The buyer pays freight, insurance, unloading costs and transportation from the port of destination to the factory. The passing of risk occurs when the goods pass the ship's rail at the port of shipment. ⁷

INTRODUCTION

The Management Sciences for Health (MSH)/Rational Pharmaceutical Management (RPM) Plus Program is pleased to present the fifth edition of the *HIV Test Kits Listed in the USAID Source and Origin Waiver: Procurement Information Document*. This update replaces the fourth edition, published in 2007. The U.S. Agency for International Development (USAID) Office of HIV/AIDS (OHA) funded the preparation of this document.

Background

Prior to 1998, the U.S. Centers for Disease Control and Prevention (CDC) recommended withholding the results of an initially positive HIV test until a confirmatory Western blot test report had been received; because of this, market demand for U.S. Food and Drug Administration (FDA)-approved rapid HIV test kits in the United States was low. Although the CDC revised its recommendations in 1998 and encouraged wider use of rapid HIV testing, many of the rapid HIV test kits presently included in the HIV testing algorithms of developing and transitional countries are not available from U.S. sources and are not of U.S. origin; few are approved by the FDA.

In 2000, USAID's Division of HIV/AIDS (DHIV) (now OHA) requested assistance from the Rational Pharmaceutical Management (RPM) Project to review the guidelines and procedures for USAID-funded procurement of HIV/AIDS-related pharmaceutical products. RPM's findings and recommendations are outlined in a report entitled *USAID-Funded Procurement of HIV/AIDS-Related Pharmaceutical Products: Constraints and Options for Improvement*.⁸ During the development of this report, the lack of information on non-U.S. suppliers and sources of pharmaceutical products was identified as a constraint by several USAID-funded cooperating agencies (CAs). In addition, the complexity of the process to prepare requests for approval to procure rapid HIV test kits in view of the "Buy America" objectives of USAID procurement procedures and the need for USAID to be confident of the quality, safety, and efficacy of all pharmaceutical commodities purchased with USAID funding was reported to result in delays in procuring USAID-funded HIV test kits.

In January 2001, the USAID Administrator approved the USAID Source and Origin Waiver for HIV/AIDS Diagnostic Materials to facilitate the process of preparing requests for approval to procure HIV test kits. DHIV also provided funding to the RPM Plus Program, the RPM Project's successor, to develop this procurement information document to assist USAID Missions and CAs in identifying manufacturers and international agencies and suppliers of HIV test kits listed in Tab 1 (Approved List of Testing Kit Products and Manufacturers) of the USAID Source and Origin Waiver.

⁸ Keene, D., and H. Walkowiak. 2000. *USAID-Funded Procurement of HIV/AIDS-Related Pharmaceutical Products: Constraints and Options for Improvement*. Published for the U.S. Agency for International Development by the Rational Pharmaceutical Management Project. Arlington, VA: Management Sciences for Health.

Objective

The first edition of the HIV test kits listed in the USAID Source and Origin Waiver was published in 2002 with subsequent editions published in 2004, 2005 and 2007. The primary aim of the document is to facilitate the process of procuring the HIV test kits listed in the USAID Source and Origin Waiver. The HIV test kits are eligible for procurement from Geographic Code 935 (see Annex 2) countries (any country or area excluding foreign policy restricted countries) by USAID Missions and USAID-funded CAs to use in HIV projects or programs. In addition to assisting USAID Missions and CAs to identify procurement sources, the document also contains information that is useful for planning for procurement, including information on prices, shelf life on delivery, and the source and origin of the product.

HIV Test Kits Procurement Information Document: Fifth Edition

The USAID Source and Origin Waiver for HIV/AIDS Diagnostic Materials is periodically reviewed and amended to remove discontinued products and include additional test kits. The HIV test kits included in the waiver have been reviewed by USAID and found to meet all the necessary suitability and price criteria for approval of a source and origin waiver. The CDC has also reviewed the listed HIV kits for safety and efficacy and recommends their use in resource-constrained settings.

The current edition of this document, which replaces the fourth edition published in 2007, and is November 3, 2008 List of Approved HIV/AIDS Rapid Test Kits, which forms a part of the USAID Acquisition and Assistance Policy Directive (AAPD) 06-01. The AAPD is the policy document from USAID that provides the information on the approval of new HIV test kits to be included in the waiver. Annex 1 provides detailed information on the process of amending the waiver and the requirements of HIV test kits listed in the waiver.

There are 35 HIV test kits featured in this edition and 11 suppliers (national and international) and procurement agencies.⁹ As in previous editions, we have included the HIV test kit procurement information for the United Nations Population Fund (UNFPA), the United Nations Children's Fund (UNICEF), and the World Health Organization (WHO).

Methodology

The same procedures used to prepare the previous editions were followed for the fifth edition of this document. Specifically, RPM Plus administered questionnaires to the manufacturers of the HIV test kits that appear in the List of Approved HIV/AIDS Rapid Test Kits as of November 3, 2008 to collect the information presented in this document. Questionnaires were also administered to procurement agencies and suppliers (international and national). It is important to point out that inclusion on this list does not imply that the product, manufacturer, or supplier or agency is endorsed by USAID or MSH/RPM Plus or preferred over any other.

⁹ The number of test kits and suppliers is subject to change depending on announcements from USAID.

Who Is This Procurement Information Document for?

This document has been developed to assist USAID Missions and CAs to identify procurement sources for the HIV test kits listed that appear on the November 3, 2008 List of Approved HIV/AIDS Rapid Test Kits. In addition, information is provided to assist in writing requests for approval to procure these HIV test kits using USAID funding.

How to Use This Document

The procurement information found in this document is intended for use by USAID Missions and CAs as an initial reference for identifying manufacturers and suppliers and for planning for procurement. Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional shipping and handling charges may apply as well as import duties in some countries.

Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure HIV test kits.

Updates and Evaluation

RPM Plus has been requested by USAID to produce this updated edition to reflect both changes in the procurement information and additions or deletions from Tab 1 of the Source and Origin Waiver. In addition to printed copies, this update will be posted on the RPM Plus website (www.msh.org/projects/rpmplus/3.3.2b.cfm) in both HTML and PDF format. Feedback about the content, usefulness, ease of use, completeness, and timeliness of information can be mailed to—

CHAPTER 1: HIV TEST KITS LISTED IN THE USAID SOURCE AND ORIGIN WAIVER

This list of HIV test kits listed in the USAID source and origin waiver is revised as U.S.-manufactured HIV test kits or new HIV test kits from sources in Geographic Code 935 (Special Free World) (see Annex 2 for a description of geographic codes) that meet USAID program requirements become available.

The List of Approved HIV/AIDS Rapid Test Kits as of November 3, 2008 is as follows—

1. Aware™ HIV-1/2 BSP Rapid Test (Calypse Biomedical)
2. Aware™ HIV-1/2 OMT (Calypse Biomedical)
3. Bioline HIV 1/2 3.0 (Standard Diagnostics, Inc.)
4. Bionor™ HIV-1&2 (Bionor A/S)
5. Bundi HIV 1/2 (Bundi International Diagnostics Ltd)
6. Capillus™ HIV-1/HIV-2 (Trinity Biotech, Plc)
7. CareStart™ HIV 1-2-O (Access Bio, Inc)
8. Clearview® COMPLETE HIV 1/2 (Inverness Medical Innovations)
9. Clearview® COMPLETE HIV1/2 – US Labeling (Inverness Medical Innovations)
10. Clearview® COMPLETE HIV1/2 STAT-PAK (Inverness Medical Innovations)
11. Combaids – RS Advantage (Span Diagnostics)
12. Determine™ HIV-1/2 (Inverness Medical Innovations and Abbott Laboratories)
13. DoubleCheck™ HIV 1&2 (Inverness Medical Innovations and Orgenics, Ltd.)
14. DoubleCheck Gold™ HIV 1&2 (Inverness Medical Innovations and Orgenics, Ltd)
15. EZ-TRUST Rapid Anti-HIV (1&2) Test (CS Innovation)
16. First Response® HIV 1-2.0 (Premier Medical Corporation, Ltd.)
17. Genie II HIV-1/HIV-2 (Bio-Rad Laboratories)
18. HIV 1/2 Rapid Screen Test Kit (Medinostics Int'l)
19. HIV 1/2 Gold Rapid Screen Test (Medinostics Int'l)
20. HIVSav 1&2 Rapid SeroTest™ (Savyon Diagnostics)
21. HIV 1/2 Stat-Pak™ Assay (Chembio Diagnostics, Inc.)
22. HIV 1/2 Stat-Pak™ Dipstick (Chembio Diagnostics, Inc.)
23. HIV (1+2) Antibody Colloidal Gold (KHB)
24. ImmunoComb™ HIV 1&2 BioSpot (Inverness Medical Innovations and Orgenics, Ltd.)
25. InstantCHEK™ HIV 1+2 (EY Laboratories)
26. INSTI™ HIV Rapid Antibody Test (Biolytical Laboratories)
27. Multispot™ HIV-1/HIV-2 Antibody Test (Bio-Rad Laboratories)
28. OraQuick® ADVANCE™ Rapid HIV-1/2 (OraSure Technologies)
29. OraQuick® HIV-1/2 Rapid Antibody Test (OraSure Technologies, Inc.)
30. Rapid 1-2-3® Hema HIV Dipstick (Hema Diagnostics Systems)
31. Rapid 1-2-3® Hema Express™ Test (Hema Diagnostics Systems)
32. Reveal™ G3 Rapid HIV-1 Antibody Test (MedMira)
33. Signal HIV 1+2 (Span Diagnostics)
34. Uni-Gold™ HIV (Trinity Biotech, Plc)
35. Uni-Gold™ Recombigen® HIV (Trinity Biotech, Plc)

Chapter 1 presents general information on each HIV test kit together with manufacturer information. Information on procurement agencies and suppliers (international and national) is presented in Chapter 2. The information presented in Chapter 1 is intended to be used as an initial reference for identifying manufacturers and planning for procurement.

Prices are given as an indication only and may vary according to currency exchange rates. Additional shipping and handling charges may apply. Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure the HIV test kits. Inclusion in this document does not imply that the products or manufacturer are endorsed by USAID or MSH/RPM Plus or preferred over any other product or manufacturer.

What Is in This Section?

The following information is provided for each test kit—

- Technical information, including a basic description
- Product information
- Procurement information

Technical Information

This section contains a brief description of the product, including sensitivity, specificity, the test principle,¹⁰ ease of use, methodology, types of samples used (e.g., whole blood, urine), and the time needed to conduct the test procedure.

Product Information

Number of tests per kit	Number of test kits that are available in one kit; all order quantities must be in multiples of this number.
Items included in kit	Information specifying what is included and packed as part of the kit. Test kit components cannot be ordered separately.
Additional items required but not included	Usually standard laboratory equipment such as disposable gloves, biohazard bags, blood collection equipment, and disinfectant are sufficient, but some test kits have special requirements (e.g., reagents, centrifuges).
FDA approved	This section lists whether the test kit has been approved by the U.S. Food and Drug Administration. This information is needed when preparing a request for USAID approval to procure HIV test kits.

¹⁰ Current rapid tests are based on one of four test principles: particle agglutination, immunodot (dipstick), immunofiltration (flow-through testing), or immunochromatography (lateral-flow device).

Approved by other regulatory agency	This section lists whether the HIV test kit has been approved by regulatory body other than the FDA, such as the European Agency for the Evaluation of Medicinal Products (EMA).
Shelf life of the HIV test kit	This is the length of time before the HIV test kit reaches its expiry date. After expiry, a product can no longer be safely used and accurate results cannot be expected. Shelf life is measured from the date of manufacture and should reflect the expiration date of the first component in the kit to reach expiry (for rapid test kits, usually months). Shelf life assumes that the storage conditions specified by the manufacturer are met.
Language of package insert	Specifies the languages in which the standard package insert is written. Special language requirements must be negotiated and included in the procurement contract.
Recommended storage conditions	Manufacturer-recommended storage conditions that need to be adhered to during shipping, delivery, and storage to ensure that the quality and performance of the product are not compromised.
Weight/dimensions/volume of kits or tests	This information will help programs plan for proper storage and transportation requirements during distribution. Planning for adequate and appropriate storage is particularly important when refrigeration is required.

Procurement Information

The first item addressed in this section is whether USAID Missions and CAs can purchase the HIV test kits directly from the manufacturers.

Average price for one test/price for one kit	Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional handling and shipping charges may apply. Also, because changes may have been made since the publication of this document, the manufacturer should be contacted to verify the information before an order is placed or a request for USAID approval to procure HIV test kits is prepared. The applicable incoterm used by the supplier is included in all price quotes
Additional pricing information	This section gives information on special prices offered to developing countries and nonprofit organizations working in resource-constrained settings.

Donation programs	Over the past few years, some manufacturers have set up donation programs to provide HIV test kits to selected programs in resource-constrained settings. Information on available donation programs and how to access them is included in this section.
Available from U.S. sources	This section lists sources in the United States from which the kit can be procured, if any. This information is needed when preparing a request for USAID approval to procure HIV test kits.
Minimum order from manufacturer	The minimum order is usually one kit, but some manufacturers require that more than one kit be ordered at a time.
Average minimum shelf life on delivery	The remaining time (usually months) for which a product can be safely used and accurate results can be expected after delivery by the manufacturer. Assuring that the shelf life can be maintained as stated on the product packaging is dependent on the product being stored and handled according to the conditions specified by the manufacturer. These instructions must be included in every package, carton, and/or shipping unit. The minimum accepted shelf life on delivery must be negotiated and included in the procurement contract.
Stock on hand	This section specifies whether kits are stocked or manufactured on demand. If stock is kept on hand, the order lead time is generally less. However, manufacturing kits upon receipt of an order has the advantage of providing a product with the longest shelf life.
Average time to fill order	This information helps programs ensure that orders are placed in sufficient time to prevent stock-outs.
Quality issues	Describes the company policy if the customer experiences problems with the quality of the test kits.
Payment method to manufacturer	Any general requirements for method of payment; these requirements are often country-, program-, or quantity-specific. The manufacturer may need to be contacted for additional information.
Available from	Indicates the international procurement agencies or suppliers who have stated that they either stock or can supply the product (see Chapter 2 for more information).

Aware[®] HIV-1/2 BSP Rapid Test

Manufactured by Calypte Biomedical Corporation, Thailand and China

For further information, please contact:

Chris Kafka

VP Business Development

16290 SW Upper Boones Ferry Road

Portland, OR, 97224

USA

Tel: +1 (502) 601-6203

Fax: +1-503-601-6299

E-mail: customerservice@calypte.com

Website: www.calypte.com

Information current as of May 2008

Photo appears courtesy of Calypte Biomedical Corporation

Technical Information

Calypte's Aware[™] HIV-1/2 OMT test is a single use, qualitative, visually read, *in vitro* immunoassay for the detection of antibodies to Human Immunodeficiency Virus Type 1 (HIV-1) and Type 2 (HIV-2) in human oral fluid specimens (oral mucosal transudate).

The Aware[®] OMT rapid test performs oral fluid testing and has been evaluated in numerous field studies in a wide range of locations that include Cameroon, China, India, Kenya, Russia, South Africa, Tanzania, Thailand and the USA. With over 7,000 samples tested, including almost 2,000 that were HIV positive, Aware[®] OMT has demonstrated a sensitivity of 99.4% and specificity of 99.9%.¹¹

Product Information

Number of tests per kit	1, 25 or 50
Items included in kit	Test strips, BSP sample buffer, test tube and sample loops
Additional items required but not included	None
FDA approved	No
Approved by other regulatory agency	It is approved by regulatory agencies in Kenya, Uganda, Russia, South Africa, UAE and India
Shelf life of the HIV test kit	18 months

¹¹ Calypte Biomedical. 2005. *Aware HIV-1/2 BSP Package Insert*. Rockville, MD: Calypte Biomedical Corporation.

Language of package insert	English, Spanish, Portuguese, Arabic, French. Russian and Afrikaans available on request
Recommended storage conditions	2-30°C (36-86°F)
Weight/dimensions/volume for one kit (50 tests)	Weight: 0.9 kg (2lbs) Dimensions: 18 x 22 x 14cm (7 x 9 x6 in) Volume: 5544cm ³ (0.20cu ft)

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 2.50 – 3.70 per test (FOB – depending on the location of purchase)
Additional pricing information	Special pricing is available for developing countries through local distributors
Donation programs	The company has donation programs, additional information can be obtained by contacting the company directly. Applications are evaluated on a case-by-case basis
Available from U.S. sources	It is not available for use in the United States
Minimum order from manufacturer	1 test kit
Minimum average shelf life on delivery	12 months
Stock on hand	Stock is maintained in the inventory
Average time to fill order	3 weeks
Quality issues	Calypte has a comprehensive quality program in place. All customer complaints are thoroughly investigated and there is also a special recall procedure for the HIV test kit
Payment method to manufacturer	Cash/LOC payment is required in advance
Available from	The manufacturer also has a number of distributors in several countries that can supply the HIV test kit (contact the manufacturer for additional information).

Information current as of November 2008

Technical Information

Aware™ HIV-1/2 OMT is a single-use, qualitative, visually read in vitro immunochromatographic assay for the detection of antibodies to HIV-1 and HIV-2 in human oral fluid specimens (oral mucosal transudate). The Aware™ OMT rapid test can generate results in 20 minutes.¹² The sensitivity and specificity of the rapid HIV test kit are 99.5% and 99.98%.¹³

Product Information

Number of tests per kit	25 or 50
Items included in kit	Test strips, oral fluid sample collection swab, and capped individual-use tubes containing oral fluid sample buffer
Additional items required but not included	None
FDA approved	No
Approved by other regulatory agency	It is approved by regulatory agencies in China, Georgia, India, Kenya, Russia, South Africa, Uganda, and United Arab Emirates. Registrations are being pursued in other countries.
Shelf life of the HIV test kit	18 months from date of manufacture
Language of package insert	English, Spanish, Portuguese, Arabic, French, and Chinese; available upon request: Russian, Georgian, and Afrikaans
Recommended storage conditions	2–30°C (36–86°F)

¹² www.calypte.com/pdf/OMT-EN-insert.pdf (accessed November 18, 2008)

¹³ www.calypte.com/pdf/LN-20832%20A,%20Data%20Sheet,%20Aware%20HIV-1,2%20OMT.pdf (accessed November 18, 2008)

Weight/dimensions/volume for one kit (50 tests) Weight: 0.9 kg (2 lb)
Dimensions: 18 x 22 x 14 cm (7 x 9 x 6 in)
Volume: 5,544 cm³ (0.20 cu ft)

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit	USD 2.50–3.70 per test (FOB: depending on the location of purchase)
Additional pricing information	Special pricing is available for developing countries through local distributors.
Donation programs	The company has donation programs; additional information can be obtained by contacting the company directly. Applications are evaluated on a case-by-case basis.
Available from U.S. sources	Yes, but not available for use in the United State
Minimum order from manufacturer	1 kit (25 or 50 tests)
Minimum average shelf life on delivery	12 months
Stock on hand	Stock is maintained in the inventory.
Average time to fill order	3 weeks
Quality issues	Complaint Procedures and Preventive Corrective Actions Policy in compliance with ISO 9001 and FDA Quality System Regulations; there is also a special recall procedure for the HIV test kit.
Payment method to manufacturer	Cash/letter of credit payment is required in advance.
Available from	Crown Agents; the manufacturer also has a number of distributors in several countries that can supply the HIV test kit (contact the manufacturer for additional information).

Information current as of September, 2006

Technical Information

Standard Diagnostics (SD) Bioline HIV 1/2 3.0 is a rapid immunochromatographic test for the detection of antibodies of all isotypes (IgG, IgM, IgA) specific to HIV-1—including subtype O and HIV-2 simultaneously—in human serum, plasma, or whole blood.¹⁴ Sensitivity is 100%, and specificity is 99.8% (WHO evaluation: sensitivity, 100%; specificity, 99.3%¹⁵). It takes 5 to 20 minutes to get the results.¹⁶

Product Information

Number of tests per kit	30 (25 tests/kit package available at customer's request)
Items included in kit	30 test devices (in individual aluminum pouches with silica gel), assay buffer (4 mL/vial)
Additional items required but not included	Lancets, pipettes, and capillary tubes
FDA approved	No
Approved by other regulatory agency	Korean Food and Drug Agency (KFDA)
Shelf life of the HIV test kit	24 months
Language of package insert	English, French, Spanish (for larger orders, other languages can be provided)
Recommended storage conditions	1–30°C (34–86°F)

¹⁴ Correspondence with manufacturer.

¹⁵ World Health Organization (WHO)/Joint United Nations Programme on HIV/AIDS (UNAIDS). 2004. *HIV Assays: Operational Characteristics (Phase I): Report 14 Simple/Rapid Tests*. Geneva: WHO.

¹⁶ Correspondence with manufacturer.

Weight/dimensions/volume for one kit (30 tests) Weight: 0.3 kg (0.66 lb)
Dimensions: 22 × 12.4 × 7.0 cm (8.66 × 4.889 × 2.76 in)
Volume: 318,000 cm³ (0.318 m³) (11.230064 cu ft)

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit	Approximately USD 0.80–0.85 per test; ~USD 24.00–25.50 per kit (FCA South Korea) Price varies depending on the quantity being procured
Additional pricing information	Special prices are offered to developing countries, according to circumstances (contact company representative for additional information). Special prices can be negotiated for nonprofit groups or other organizations for certain programs based on long-term procurement contracts and annual value of requirements.
Donation programs	Donation programs will be considered if the company receives a formal request (e-mail, letter, or fax) from an organization/agency.
Available from U.S. sources	No
Minimum order from manufacturer	1 kit
Minimum average shelf life on delivery	18 months (24 months from Manufacturing date)
Stock on hand	Limited stock maintained (approximately 1,000 kits) for immediate shipment
Average time to fill order	For regular orders: on board in 1 week from order confirmation; for special orders: on board in 1–2 weeks; for emergencies: overnight delivery is provided from stock
Quality issues	In case of quality problems, the local supplier or manufacturer is informed by e-mail or fax. If there is a problem with a test kit, it is recalled and replaced after a quality assurance evaluation.
Payment method to manufacturer	International bank transfer (SWIFT) before order shipment is preferred. For large orders and tenders, the company will accept a letter of credit. For NGOs, 30 days from date of invoice by wire transfer is acceptable.

Available from

Crown Agents, IDA Foundation, Medical Export Group (MEG), Missionpharma A/S, Tri-Med, UNFPA and UNICEF. The product is also available through the WHO Bulk Procurement Scheme. The company also uses Health Alliance International (HAI) (see <http://depts.washington.edu/haiuw> for additional information) for distribution of this product.

Bionor™ HIV-1&2

Manufactured by Bionor AS, Norway

NO-3703 Skien

Norway

Tel: +47 35 50 57 50

Fax: +47 35 50 57 01

E-mail: gunnar.flaten@bionor.no

Website: www.bionor.no

Information current as of October 2006

Photo appears courtesy of Bionor A/S

Technical Information

Bionor™ HIV-1&2 is a rapid enzyme immunoassay (EIA) that uses synthetic peptides and recombinant p24 proteins to detect antibodies to HIV-1 and HIV-2. The sensitivity (tested on 1542 samples) was found to be 100% (1264 HIV-1 positive and 278 HIV-2 positive), and the specificity (of 5274 samples) was found to be 98.9%.¹⁷ The test can produce results in 30 minutes.

Product Information

Number of tests per kit	250
Items included in kit	Pipettes and ready-to-use reagents in dropper vials
Additional items required but not included	Testing station that can be operated on 115 or 230 volts (V) of electrical current or on a 12V solar or car battery. The dimensions of the testing station are 35 × 20 × 12 cm (13.8 × 7.9 × 4.7 in).
FDA approved	No
Approved by other regulatory agency	No
Shelf life of the HIV test kit	12 months at 2-30 °C (36–86°F). 24 months at 2–8°C (36–46°F).
Language of package insert	English (for larger orders, other languages can be provided)

¹⁷ World Health Organization (WHO)/Joint United Nations Programme on HIV/AIDS (UNAIDS). 2002. *Operational Characteristics of Commercially Available Assays to Determine Antibodies HIV-1/HIV-2 in Human Sera: Report 11*. WHO/BCT/02.07. Geneva: WHO.

Recommended storage conditions	Store kit at 2–30°C (36–86°F). Additional shelf life (total 24 months) can be obtained if the kit is stored at 2–8°C (36–46°F). Do not leave kits in strong heat or light.
Weight/dimensions/volume for 4 kits (1,000 tests)	Weight: 7.35 kg (16.17 lb) Dimensions: 50.5 × 37 × 23.6 cm (19.9 × 14.6 × 9.3 in) Volume: 44,097 cm ³ (0.0441 m ³) (2,691 cu in [1.557 cu ft])

Procurement Information

Average price for one test/price for one kit	Price per test ~USD 1.20-1.90 (EXW, Norway)
Additional pricing information	Prices may vary according to quantities ordered and whether supplied directly or through a distributor.
Donation programs	No information provided
Available from U.S. sources	No
Minimum order from manufacturer	1 kit (250 tests) but preferably not fewer than 1,000 tests (4 kits, which fill one export polystyrene box)
Minimum average shelf life on delivery	10 months
Stock on hand	Approximately 50 kits are kept on hand. However, to obtain the longest possible shelf life, kits are mostly manufactured on demand.
Average time to fill order	One day if supplied from stock held or approximately 3–4 weeks if a new batch is manufactured
Quality issues	Quality problems are resolved by replacing the kit. Bionor AS also runs a quality control test on the reference kit of the same batch. Subsequent actions taken usually depend on the outcome of the quality control test.
Payment method to manufacturer	Prepayment or letter of credit. MasterCard® and Visa® credit cards are also accepted.
Available from	Crown Agents, Medical Export Group (MEG), Missionpharma A/S, UNFPA, UNICEF and WHO.

Information current as of December 2006

Technical Information

Bundi™ HIV-1/2 is a qualitative, membrane based immunoassay for the detection of antibodies to HIV in serum or plasma. The test can produce results in 10 minutes and has a sensitivity of 100% and a specificity of 99.5%.¹⁸

Product Information

Number of tests per kit	1 or 25
Items included in kit	Package Insert (all), Buffer (all), Alcohol Prep Pad (single kit), Lancet (single kit) and Disposable Plastic Calibrated Pipette (all)
Additional items required but not included	None
FDA approved	No
Approved by other regulatory agency	National Agency for Food, Drug Administration and Control – Nigeria (NAFDAC)
Shelf life of the HIV test kit	18 months
Language of package insert	English, Yoruba, Hausa and Ibo
Recommended storage conditions	4–30°C (39–86°F)
Weight/dimensions/volume for one test (25 tests)	Weight: 0.05kg (0.11lb) Dimensions: 14 x 8.5 x 2 cm (3.5 x 3.4 x 0.8in) Volume: 238 cm ³ (0.01 cu ft)

¹⁸ Correspondence with manufacturer.

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit	USD 1.50-2.50 (CIF Nigeria)
Additional pricing information	An organization can get the best price by signing a long-term contract with the company (minimum five years). Delivery is free to any location in Nigeria
Donation programs	Planned for the future
Available from U.S. sources	No
Minimum order from manufacturer	None
Minimum average shelf life on delivery	Nine months
Stock on hand	Stock is maintained
Average time to fill order	This depends on the quantity ordered. Delivery can be done in batches within two weeks
Quality issues	These are handled through the customer complaint handling system. There is a recall procedure for HIV test kits
Payment method to manufacturer	Wire transfer or bank draft
Available from	Crown Agents and Medical Export Group

Capillus™ HIV-1/HIV-2

**Manufactured by Trinity Biotech,
Plc, Ireland**

For further information, please contact:
*Fidelma Loftus, International Product
Manager*

*Trinity Biotech, Plc
IDA Business Park
Bray, Co. Wicklow
Ireland*

Tel: +353-1-276 9800

Fax: +353-1-276 9888

E-mail:

fidelma.loftus@trinitybiotech.com

Website: www.trinitybiotech.com

Information current as of October 2006

Technical Information

Capillus™ HIV-1/HIV-2 is a rapid assay that uses the particle agglutination principle for the detection of antibodies to HIV-1 and/or HIV-2 in human whole blood, serum, or plasma. The sensitivity and specificity of Capillus™ HIV-1/HIV-2 has been reported by WHO to be 100%. It is estimated that the test can produce results in three minutes.¹⁹

Product Information

Number of tests per kit	100
Items included in kit	Reagents, controls, slides, pipettes, disposable pipette tips, and interpretation station
Additional items required but not included	Disposable gloves, biohazard bags, blood collection equipment, and disinfectant
FDA approved	No
Approved by other regulatory agency	This HIV test kit is approved by regulatory agencies in a number of countries (contact the manufacturer for additional information).
Shelf life of the HIV test kit	15 months
Language of package insert	English (other languages can be provided on request)

¹⁹ World Health Organization (WHO)/Joint United Nations Programme on HIV/AIDS (UNAIDS). 2002. *HIV Simple/Rapid Assays: Operational Characteristics (Phase 1): Report 12, Whole Blood Specimens*. WHO/BCT/02.07. Geneva: WHO.

Recommended storage conditions	Optimum storage is at 2–8°C (32–46°F). Stable for short periods (up to 4 weeks) at 25°C (77°F). The package insert contains instructions for testing negative and positive controls if users are concerned that product performance may have been adversely affected by temperature.
Weight/dimensions/volume for one kit (100 tests)	Weight: 0.5 kg (1.1 lb) Dimensions: 22 × 14 × 8 cm (8.7 × 5.5 × 3.1 in) Volume: 2,464 cm ³ (0.00246 m ³) (150.4 cu in [0.09 cu ft])

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit	Price per test ~USD 1.50 to 1.75; price for kit varies from USD 150 to USD 175 (EXW, Ireland)
Additional pricing information	No handling charges are added, but shipping and insurance are extra. Prices may vary by quantity and region. Concessionary prices are offered to WHO, other UN agencies, and major international procurement agencies. Discounts from the listed price can be negotiated on a case-by-case basis either directly through the manufacturer or through local distributors.
Donation programs	There are currently no donation programs for this HIV test kit.
Available from U.S. sources	No
Minimum order from manufacturer	5 kits (500 tests)
Minimum average shelf life on delivery	10–11 months (kits are usually delivered with 75% of their shelf life remaining)
Stock on hand	Some stock is held, but levels vary according to demand.
Average time to fill order	6 weeks
Quality issues	Any quality problem with the product is investigated through the in-house quality control system. If a product problem is confirmed, replacement product or product notes are issued. The manufacturer does not have a specific recall procedure for the HIV test kit, but it has implemented standard operating procedures (SOPs) for the management of postmarketing activities including customer complaint handling, adverse event reporting, and product recalls. These SOPs have been developed in accordance with all relevant ISO, EU, and FDA requirements.

Payment method to manufacturer

The required payment method is up-front payments for three orders, after which credit terms can be accepted. Credit card orders are also accepted.

Available from

Crown Agents, Durbin PLC, IDA Foundation), Medical Export Group (MEG), Missionpharma A/S, UNFPA and UNICEF. The product is also available through the WHO Bulk Procurement Scheme. In addition, the manufacturer has exclusive/non-exclusive local suppliers in a large number of countries (contact the manufacturer for additional information).

Information current as of October 2008

Technical Information

The Combaids – RS Advantage is a dot immunoassay for the detection of antibodies to HIV-1 and HIV-2 in whole blood, human serum, and plasma. The manufacturer reports that a panel of confirmed positive serum samples for HIV-1 and -2 demonstrated a sensitivity of 100%, and comparative evaluation on blood bank samples with other leading international brands indicates a specificity of 100%.²⁸

Product Information

Number of tests per kit	24, 48, or 96
Items included in kit	Washing buffer, colloidal gold signal reagent, sample diluent, negative and positive control, antigen and control reagent coated combs (each comb with 8 arms), wash tray, 8 microwell strips with 4 row frame, seal bag, disposable plastic droppers, rubber teats, and clamp
Additional items required but not included	Timer, dust cover, absorbent pad, bleach (5% sodium or calcium hypochlorite), disposable gloves, 100-milliliter measuring cylinder, 100-microliter micropipettes, and pipette tips
FDA approved	No
Approved by other regulatory agency	No information available

²⁸ *Combaids – RS Advantage HIV 1+2 Immunodot Test Kit Package Insert.*

Shelf life of the HIV test kit	15 months
Language of package insert	English (other languages can be provided on request)
Recommended storage conditions	2–8°C (36–46°F)
Weight/dimensions/volume for one kit (24 tests)/ (48 tests)/(96 tests)	Weight: 0.355 kg (0.7716 lb) (355 g)/0.40 kg (0.8818 lb) (400g)/0.6 kg (1.32 lb) (600 g) Dimensions: 15.5 × 11.5 × 11.5 cm (6.1 × 4.5 × 4.5 in)

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for 10 tests/price for one kit	USD 0.80 per test (FOB Shanghai)
Additional pricing information	Special prices are offered to developing countries. Please contact manufacturer for a lower price of USD 0.49 per test.
Donation programs	Yes, please contact the manufacturer for additional information.
Available from U.S. sources	No
Minimum order from manufacturer	N/A
Minimum average shelf life on delivery	12 months
Stock on hand	Stock is maintained
Average time to fill order	3–4 weeks
Quality issues	The company has a recall procedure for defective kits. For additional information, please contact the manufacturer by email at khibd@sh163.net or the Technical Service Hotline at +86-21-649-5065.
Payment method to manufacturer	Prepayment or letter of credit
Available from	Crown Agents; the manufacturer has distributors that can supply the test kit (contact the manufacturer for additional information).

Website: www.determinetest.com

Information current as of November 2006

Technical Information

Determine™ HIV-1/2 is an assay that uses the immunochromatographic principle for the detection of antibodies to HIV-1 and HIV-2 in human serum, plasma, and whole blood with finger-stick blood samples. A total of 1,594 serum and plasma specimens from Asia, West Africa, and North America were tested, and specificity was found to be 99.75%. A total of 869 HIV-1 and HIV-2 antibody-positive serum and plasma specimens from Asia, Africa, and North and South America were tested, and sensitivity was found to be 100%. In addition 368 negative and 102 positive paired serum, plasma and whole blood specimens from Thailand were tested and the specificity and sensitivity were both found to be 100%. It is estimated that the test can produce results in 17 minutes.²⁹

Product Information

Number of tests per kit	100
Items included in kit	Test cards and reagents
Additional items required but not included	Pipettes, pipette tips, lancets, and EDTA (ethylenediaminetetraacetic acid) capillary tubes
FDA approved	No
Approved by other regulatory agency	No information provided
Shelf life of the HIV test kit	14 months
Language of package insert	English, French, German, Portuguese, and Spanish

²⁹ Abbott Laboratories. 2006. *Determine™ HIV-1/2 Package Insert*. Abbott Park, IL: Abbott Laboratories.

Recommended storage conditions	Store the kit at room temperature up to 30°C (86°F)
Weight/dimensions/volume for one kit (100 tests)	Weight: 0.15 kg (0.33 lb) Dimensions: 27 × 16 × 1 cm (10.6 × 6.3 × 0.4 in) Volume: 432 cm ³ (0.000432 m ³) (26.36 cu in [0.015 cu ft])

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer or from an Abbott country office.³⁰

Average price for one test/price for one kit	USD 1.20 per test; USD 120 per kit (FOB, Japan)
Additional pricing information	For nonprofit organizations ordering volumes in the thousands, price is dependent on quantities purchased and is determined by the country-specific Abbott Diagnostics Division office. Shipping costs are extra.
Donation programs	As part of the prevention of mother-to-child-transmission (PMTCT) donations program, Abbott Laboratories donates the HIV test kits in eligible countries for pregnant women, their spouses, and children (18 months and older) of those women who test HIV-positive. ³¹
Available from U.S. sources	No
Minimum order from manufacturer	1 kit
Average minimum shelf life on delivery	Less than 14 months
Stock on hand	Country-dependent
Average time to fill order	Country-dependent
Quality issues	If a kit is defective for any reason, the client will be asked to send the kit back to the relevant Abbott Diagnostics Division country office, where it will be tested. If the defect is confirmed, Abbott will replace the kit free of charge.
Payment method to manufacturer	Payment options depend on the country where the kit is being purchased.

³⁰ Abbott has offices in 150 countries.

EZ-TRUST™ Rapid Anti-HIV (1&2) Test

Manufactured by CS Innovation Corporation, Singapore and China

For further information, please contact:

*Andre Han,
Senior Vice President
24 Raffles Place
#07-03/04
Clifford Centre
Singapore
048621*

Tel: +65-6325-0915

Fax: +65-6533-2901

E-mail: andrehan@csinnovation.com.sg

Website: www.csinnovation.com.sg

Information current as of September 2008

Technical Information

EZ-Trust Rapid Anti-HIV (1&2) Test is a colloidal gold enhanced rapid HIV test that uses the immunochromatographic method to detect antibodies in whole blood, serum and plasma. The manufacturer reports that an in-house laboratory study³⁴ conducted on 63 negative samples gave a specificity of 100%, and tests conducted on 32 positive samples found the sensitivity to be 100%. The test provides results within 15 minutes.³⁵

Product Information

Number of tests per kit	40
Items included in kit	Test cassettes individually sealed with silicon gel and micropipette; six diluent bottles
Additional items required but not included	There are two types of configuration available for the product. The first does not include lancets and alcohol swabs. The second configuration is designed for field use and includes alcohol swabs, diluent bottles, micropipette, lancet, and test cassette.
FDA approved	No

³⁴ www.csinnovation.com.sg/ez-h2-rapid-anti-hiv-1-2-test.html (accessed October 17, 2008).

³⁵ *ibid*

Approved by other regulatory agency	National Authority for Food and Drug Administration and Control in Nigeria
Shelf life of the HIV test kit	24 months from date of manufacture
Language of package insert	English
Recommended storage conditions	2–30°C (36–86°F)
Weight/dimensions/volume for one export carton (200 for field use/400 tests)	Weight: 9.0kg (19.84 lbs) Dimensions: 40 x 40 x 28 cm (16 x 16 x 11 in) Volume: 7.5 kg (16.53 lbs)
	Weight: 5.5 kg (12.13 lbs) Dimensions: 40 cm x 40 cm x 28 cm (16" x 16" x 11") Volume: 7.5 cm ³ (16.53 cu ft)

Procurement Information

USAID Missions and CAs can purchase the kits directly from the manufacturer.

Average price for one test/price for one kit	USD 1.05–1.51 per test (FOB Singapore)
Additional pricing information	Special pricing is available for developing countries.
Donation programs	There are no donation programs.
Available from U.S. sources	No
Minimum order from manufacturer	5,000 (packed 40 tests per box)
Minimum average shelf life on delivery	17 months
Stock on hand	Stock is maintained for daily operations and also manufactured on demand after the receipt of a confirmed order.
Average time to fill order	4–6 weeks after receipt of a confirmed order
Quality issues	The manufacturer has a recall procedure for defective HIV test kits. In addition, samples of batch certificates are tested internally and backed by a certificate of analysis. The manufacturing facilities are ISO 13485 and GMP certified.
Payment method to manufacturer	50% deposit on order, and the balance is due on delivery; the entire purchase can also be secured on an irrevocable letter of credit—the terms of which will be specified in the pro forma invoice.
Available from	Crown Agents; the company has a working arrangement with TG

Medical (Pty) Ltd based in South Africa, which is the sole supplier and distributor of EZ-Trust Rapid Anti-HIV (1&2) Test in Africa. Please contact the manufacturer directly for additional information.

Website: www.premiermedcorp.com

Information current as of October 2006

Technical Information

First Response[®] HIV 1-2.0 test is a rapid lateral-flow immunochromatographic test that can be performed on whole blood, serum, or plasma. The test requires only 10 µL of serum or 20 µL of whole blood as sample and one drop of developer solution. The sensitivity of the test is 100%, and the specificity is 99.8%. The results are obtained in 5 minutes.³⁶

Product Information

Number of tests per kit	1, 5, 10, 30,60
Items included in kit	One bottle of developer solution and sample collection droppers
Additional items required but not included	Lancet to prick finger is provided in single test pack, but not included in larger pack sizes.
FDA approved	No
Approved by other regulatory agency	This HIV test kit is approved by regulatory agencies in a number of countries (contact the manufacturer for additional information).
Shelf life of the HIV test kit	18 months
Language of package insert	English, French, Portuguese, Spanish
Recommended storage conditions	4 to30°C (39 to 86°F)

³⁶ PMC Medical (India) PVT, Ltd. n.d. *First Response[™] HIV Card Test 1-2.0 Package Insert*. Daman, India.

Weight/dimensions/volume for one kit (30 tests)	Weight: 0.03 kg (0.066 lb) Dimensions: 13 × 13 × 22 cm (5 × 5 × 9 in) Volume: 3,681 cm ³ (0.003681 m ³) (225 cu in [0.130208 cu ft]) Single test pack: 10 gms Dimensions 12cmx9cmx1cm.
---	---

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit USD 0.70–0.95 per test; (FOB Mumbai, India)

Additional pricing information All shipping charges are extra. Special prices are offered to developing countries on a case-by-case basis. The lowest price given for an annual volume off-take commitment of 2 million tests or more.

Donation programs The manufacturer states that it will consider donation of tests to PMTCT programs combined with tests for general testing purposes.

Available from U.S. sources Yes, but not for domestic use in the United States

Minimum order from manufacturer Manufacturer will ship any quantity required by courier; however, a minimum order of 50,000 tests is required to take advantage of the lowest shipping costs.

Minimum average shelf life on delivery Less than 18 months

Stock on hand Stock is always available. Large shipments exceeding 500,000 tests will require 2 weeks advance notice.

Average time to fill order 1 week

Quality issues PMC is ISO 9001-2000 and ISO 13485 certified. Product is CE marked. Certificate of analysis is provided with each shipment along with one extra kit for evaluation. The same batch of kits will be retained by the company in India and will be used for evaluation. A technician will be sent to the site to resolve problems in the event of any quality issues. The company has a recall procedure for test kits.

Payment method to manufacturer Check from a U.S. bank or a letter of credit

Available from Crown Agents, IDA Foundation, Medical Export Group (MEG), UNFPA and UNICEF. The product is also available through the WHO Bulk Procurement Scheme

Weight/dimensions/volume for one kit (25 tests)/(50 tests) Weight: 0.385 kg (0.9 lb)/0.528 kg (1.2 lb)
Dimensions: 9 × 16 × 11 cm (3.5 × 6.3 × 1.7 in)/same
Volume: 3,344 cm³ (0.0033 m³) (204.1 cu in [0.12 cu ft])/same

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 1.50 per test (FOB, Israel)
Additional pricing information	Shipping and insurance is extra. Special prices can be given to developing countries upon request if information such as the quantity of kits to be ordered is provided.
Donation programs	No information provided
Available from U.S. sources	No
Minimum order from manufacturer	1 kit
Minimum average shelf life on delivery	10 months
Stock on hand	The manufacturer stated that some stock is held but did not specify the quantity.
Average time to fill order	The order is dispatched immediately if sufficient stock is held. If the order is specially manufactured, it takes 4 weeks.
Quality issues	If there is a problem with the quality of the kit, the company will replace it.
Payment method to manufacturer	Letter of credit, prepayment, or open account, depending on the customer
Available from	Crown Agents and Medical Export Group (MEG). The manufacturer also has a number of distributors in several countries that can supply the test kit (contact the manufacturer for additional information).

Website: www.chembio.com

Information current as of November 2008

Technical Information

HIV 1/2 STAT-PAK is a single-use, immunochromatographic rapid test that uses a cocktail of antigens to detect antibodies to HIV-1 and HIV-2 in finger-stick whole blood, venous whole blood, serum, or plasma.⁴² Results from a large, controlled clinical trial on 2,700 patients demonstrated a sensitivity of 99.7% and a specificity of 99.9% on whole blood, serum, and plasma samples. Another evaluation conducted by WHO on a worldwide panel of 770 samples demonstrated a sensitivity of 99.7% and a specificity of 99.3%.⁴³ The test can produce results in 10 minutes or less.⁴⁴

Product Information

Number of tests per kit	20
Items included in kit	Running buffer, sample loops, package insert
Additional items required but not included	Timer, safety lancets, alcohol swabs, disposable gloves
FDA approved	Yes
Approved by other regulatory agency	This HIV test kit is registered for use in 35 countries (contact the manufacturer for additional information).
Shelf life of the HIV test kit	24 months
Language of package insert	English, French, Spanish

⁴² Correspondence with manufacturer.

⁴³ WHO evaluation conducted Q3 2004 to be published in Report 16, *HIV Simple/Rapid Assays: Operational Characteristics*.

⁴⁴ Correspondence with manufacturer.

Recommended storage conditions	8–30°C (46–86°F)
Weight/dimensions/volume for one kit (20 tests)	Weight: 0.28 kg (0.60 lb) Dimensions: 16.5 × 12.7 × 7 cm (6.5 × 5 × 2.75 in) Volume: 1,467 cm ³ (0.001864 m ³) (89 cu in)

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 1.45–1.60 per test; USD 29–32 per kit (EXW Medford, NY, USA)
Additional pricing information	No information provided
Donation programs	No information provided
Available from U.S. sources	Yes
Minimum order from manufacturer	1 kit
Minimum average shelf life on delivery	15–20 months
Stock on hand	Some stock is usually maintained; stock is also manufactured on demand depending on the order size.
Average time to fill order	3–4 weeks; less if it is in stock
Quality issues	Quality issues are addressed through the manufacturer’s Quality Assurance/Quality Control Department. The company has a recall procedure.
Payment method to manufacturer	Prepayment, credit card, letter of credit. Credit terms are available in specific cases.
Available from	Crown Agents, IDA Foundation, Missionpharma A/S, and UNICEF; the product is also available through the WHO Bulk Procurement Scheme (see Chapter 2 for more details). The product is also available directly from the manufacturer and from local distributors (contact the manufacturer for a list of distributors).

Information current as of November 2008

Technical Information

HIV 1 / 2 STAT-PAK[®] DIPSTICK is a single-use, immunochromatographic screening test that uses a cocktail of antigens to detect antibodies to HIV-1 and HIV-2 in whole blood, serum or plasma. In an evaluation of 770 samples conducted by the WHO, the final sensitivity demonstrated was 99.0% and the final specificity was 100% compared to the reference assays. Evaluations in Zambia with 236 specimens, in Uganda with 503 specimens and most recently, in RSA with 500 specimens, all resulted in 100% sensitivity and 100% specificity. The test can produce results in 15 minutes or less.

Information current as of September 2008

Technical Information

HIV (1+2) Antibody Colloidal Gold is an immunochromatographic assay, using the lateral flow method for the detection of antibodies to HIV-1 and HIV-2 in human serum, plasma, or whole blood. It has a sensitivity and specificity of 100%. The test, which is visually read, can produce results in 4 to 30 minutes.⁴⁶

Product Information

Number of tests per kit	50 tests
Items included in kit	Test cassettes, sample diluents, and desiccant
Additional items required but not included	Disposable tips, pipette, timer, and gloves
FDA approved	No
Approved by other regulatory agency	No
Shelf life of the HIV test kit	18 months
Language of package insert	English, Chinese, and French
Recommended storage conditions	4–30°C (39–86°F)

⁴⁵ Please note that this product appears as HIV (1+2) Rapid Test Strip, and the company name is listed as KHB on the November 2008 List of Approved Rapid HIV Test Kits.

⁴⁶ www.who.int/diagnostics_laboratory/publications/hiv_assays_rep_14.pdf (accessed November 2008).

Weight/dimensions/volume for one kit (50 tests) Weight: 0.67 kg (1.47 lb)
Dimensions: 21 × 14 × 12 cm (8 × 6 × 5 in)
Volume: 3,321 cm³ (0.003321 m³) (203 cu in [0.12 cu ft])

Procurement Information

USAID Missions and CAs can purchase kits directly from the manufacturer.

Average price for one test/price for one kit	USD 0.80 per test (FOB Shanghai)
Additional pricing information	Special pricing is available for developing countries through WHO, UNICEF, or the Clinton Foundation. The lowest price available is USD 0.49 per test.
Donation programs	Please contact the manufacturer directly for information.
Available from U.S. sources	No
Minimum order from manufacturer	N/A
Average minimum shelf life on delivery	12 months
Stock on hand	Stock is maintained.
Average time to fill order	3–4 weeks
Quality issues	Quality issues should be addressed to the technical service hotline at +86-21-64950625 or by email at khibd@sh163.net . The manufacturer has a recall procedure for the HIV test kit.
Payment method to manufacturer	Payment is required net 30 days following delivery. Contact the manufacturer directly for available payment options.
Available from	Crown Agents, UNFPA, UNICEF, and WHO

Website: www.orgenics.com

Information current as of October 2006

Technical Information

ImmunoComb[™] HIV 1&2 is a rapid test intended for the qualitative and differential detection of IgG antibodies to HIV-1 and HIV-2 in human serum or plasma. The sensitivity is 100%, and the specificity is 99.4%. The test duration is 36 minutes at room temperature.⁴⁷

Product Information

Number of tests per kit	36
Items included in kit	3 plastic combs, 3 developing plates, positive and negative controls, perforator
Additional items required but not included	Precision pipette with disposable tips, scissors, laboratory timer or watch
FDA approved	No
Approved by other regulatory agency	No information provided
Shelf life of the HIV test kit	15 months
Language of package insert	English, French, Russian, Spanish
Recommended storage conditions	2–8°C (36–46°F). Do not freeze

⁴⁷ Orgenics Limited. 2005. *Immunocomb[®] II HIV 1 & 2 BiSpot Package Insert*. Yavne, Israel.

Weight/dimensions/volume for one kit (36 tests) Weight: 0.42 kg (0.92 lb)
Dimensions: 17.5 × 13 × 5.5 cm (6.9 × 5.1 × 2.2 in)
Volume: not stated

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 1.60 per test; USD 57.60 per kit (EXW, Yavne, Israel)
Additional pricing information	Special pricing consideration is given for large orders. Special prices may also be considered for developing countries (contact the manufacturer for additional information).
Donation programs	No information provided
Available from U.S. sources	No
Minimum order from manufacturer	1 kit
Minimum average shelf life on delivery	12–14 months
Stock on hand	The manufacturer has a large stock available but may manufacture extra batches on demand, depending on quantities ordered.
Average time to fill order	If the order quantity is in stock, it is dispatched immediately. If it is a special manufacture, the order takes 2–3 weeks.
Quality issues	The company has a recall procedure for suspected defective products. In case of manufacturing problems, there is a Material Review Board. This forum convenes weekly or as needed. If required, the Troubleshooting Lab reworks the out-of-specification material. Any deviation from existing procedures is approved by the Material Review Board before implementation.
Payment method to manufacturer	Telegraphic bank transfer
Available from	Crown Agents, IDA Foundation, Medical Export Group (MEG), Tri-Med, UNFPA, UNICEF. The product is also available through the WHO Bulk Procurement Scheme (see Chapter 2 for more details).

E-mail: orders@eylabs.com

Website: www.eylabs.com

Information current as of October 2006

Technical Information

InstantCHEK™ HIV 1+2 is a rapid, qualitative in vitro test for the detection of HIV-1 and HIV-2 antibodies in human serum, plasma, or whole blood. It has 100% sensitivity⁴⁸ and 99.89% specificity for HIV-1 and HIV-2 antibodies.⁴⁹

Product Information

Number of tests per kit	20, 40, or 100
Items included in kit	Lyophilized stable controls, wash solution, sample and reagents, pipettes, lyophilized colloidal gold reagent, reconstitution solution, WBT (whole blood/urine/saliva filter tube)
Additional items required but not included	None
FDA approved	No
Approved by other regulatory agency	State Food and Drug Administration (SFDA) (China)
Shelf life of the HIV test kit	12 months
Language of package insert	English and Chinese (other languages can be provided on request)
Recommended storage conditions	5–25°C (41–77°F)

⁴⁸ Based on Boston Biomedica, Inc., panel and internal positive and negative sample study.

⁴⁹ Correspondence with manufacturer.

Weight/dimensions/volume for one kit (100 tests) Weight: 0.81 kg (1.78 lb)
Dimensions: 28 × 16 × 14 cm (11 × 6.3 × 5.5 in)
Volume: 6,072 cm³ (0.006072 m³) (370.5 cu in [0.2144 cu ft])

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/ price for one kit	1–10 kits, USD 1.20 per test; per 20-test kit, USD 24; per 40-test kit, USD 48; per 100-test kit, USD 120 (FOB, Hong Kong)
Additional pricing information	Special prices are offered to developing countries. An organization/agency can get the lowest price depending on the volume ordered and length of contract with the company. It can be lower than USD 0.50 per test depending on the volume.
Donation programs	Open for discussion with the manufacturer
Available from U.S. sources	Yes, but not for domestic use in the United States
Minimum order from manufacturer	Subject to negotiation to suit the customer's needs and depending on the quantity ordered
Average minimum shelf life on delivery	Less than 12 months
Stock on hand	Some stock is available; kits are manufactured on demand when more than 100 kits are ordered.
Average time to fill order	Small orders can be filled within 1–3 days. Large orders of more than 10,000 tests require 1 week to 1 month, depending on the quantity ordered.
Quality issues	The company has Good Manufacturing Practices (GMP) and ISO 9002. The company has a recall procedure.
Payment method to manufacturer	Net 30 days; alternatives available for negotiation
Available from	Crown Agents, Medical Export Group (MEG), Missionpharma A/S, UNFPA, UNICEF, and the WHO Bulk Procurement Scheme (see Chapter 2 for more details).

E-mail: rgalli@biolytical.com

Website: www.biolytical.com

Information current as of December

2006

Technical Information

The INSTI™ HIV-1/HIV-2 Rapid Antibody Test is a single use, rapid (60 seconds), membrane-based flow-through in vitro qualitative immunoassay for the detection of antibodies to HIV-1 and HIV-2 in human EDTA-whole blood, fingerstick blood, serum or EDTA-plasma. The device also contains a built-in IgG capture control to ensure proper sample addition. In large-scale national and international clinical trials of INSTI™, sensitivity ranged from 99.4 to 100%, with positive predictive values of 97.9 to 100%, and specificity of 99.3 to 100% with negative predictive values of 99.6-100%. The test is intended for use by trained personnel in medical facilities, clinical laboratories, emergency care situations, VCT and point-of-care settings, and physicians' offices as a diagnostic test.⁵⁰

Product Information

Number of tests per kit	1 or 24 packs
Items included in kit	Single-use lancets, alcohol swab, transfer pipette
Additional items required but not included	No
FDA approved	No
Approved by other regulatory agency	Medical Devices Bureau, Health Canada

⁵⁰ Correspondence with manufacturer.

Shelf life of the HIV test kit	15 months
Language of package insert	English (other languages available on request)
Recommended storage conditions	15-30°C (59-86°F)
Weight/dimensions/volume for one kit (100/500 tests)	Weight: 0.5kg (1.1lb) Dimensions: (10 x 15 x 25 cm) 4 x 6 x 10 in Volume: not stated

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 3.85-4.35 per test (FOB Vancouver)
Additional pricing information	Special prices are available for developing countries. Contact the company directly for additional information
Donation programs	Donation programs are available through the INSTI™ Foundation. Contact the company directly for additional information
Available from U.S. sources	No
Minimum order from manufacturer	500 single tests or 20 kits of 24 tests each
Minimum average shelf life on delivery	12 months
Stock on hand	Limited stock is maintained but larger orders are produced on demand
Average time to fill order	6-8 weeks
Quality issues	These are addressed through the documented ISO 9001-2000 and ISO 13485 quality system program in place at bioLytical. There is a recall procedure for HIV test kits
Payment method to manufacturer	50% of payment of total order is required upfront, 50% is required after the order has been fulfilled.
Available from	Crown Agents and Medical Export Group (MEG)

Information current as of October 2006

Technical Information

OraQuick® HIV-1/2 Rapid Antibody Test is a qualitative *in vitro* immunoassay. It detects antibodies to human immunodeficiency virus types 1 and 2 (HIV-1/2) in human oral fluid, whole blood, serum, or plasma.⁵⁵ The assay is read visually and is intended for the detection of such antibodies from individuals infected by HIV 1 or HIV 2. The sensitivity is 100%, and the specificity is 98.1%.⁵⁶

Product Information

Number of tests per kit	100 or 500
Items included in kit	In the 100-test kit: 100 devices, 10 reusable test stands, 1 pack of 5 specimen collection loops, and 1 package insert In the 500-test kit: 500 devices, 20 reusable test stands, 25 collection loops, and 1 package insert.
Additional items required but not included	Quality controls are available for purchase from the manufacturer. Each kit control contains a package insert and three vials (one HIV-1 positive control, one HIV-2 positive control, and one negative control). Other items needed are gloves, sterile lancet to obtain finger-stick or materials to obtain venipuncture whole blood sample, timer or watch, antiseptic wipe, sterile gauze pad, biohazard waste container, phlebotomy materials, and disposable absorbent workspace cover.

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 4–5 per test (for both the 100- and 500-test kits) (EXW, Thailand)
Additional pricing information	Special prices can be negotiated based on the volume of test kits ordered.
Donation programs	Product donations are considered on a case by case basis.
Available from U.S. sources	Yes
Minimum order from manufacturer	1 kit (100-count case)
Minimum average shelf life on delivery	Less than 6 months
Stock on hand	Kits are manufactured on demand, depending on the order quantity.
Average time to fill order	4–5 weeks
Quality issues	There is a recall procedure for faulty test kits. Stability studies are conducted on selected manufacturing batches each year to ensure that the product meets the established specifications over the assigned shelf life.
Payment method to manufacturer	Wire transfer of funds (there is an additional USD 25 fee for this). Letters of credit and credit card payments are also accepted.
Available from	Crown Agents, Medical Export Group (MEG), Missionpharma A/S, UNFPA and UNICEF

Fax: +1-902-450-1580

E-mail: info@medmira.com

Website: www.medmira.com

Information current as of November 2006

Technical Information

The *Reveal™* G3 Rapid HIV-1 Antibody Test is a single use, qualitative immunoassay intended for use as a point-of-care test to aid in the diagnosis of infection with HIV-1. It detects antibodies to HIV-1 in human serum or plasma. It is a manually performed, visually interpreted rapid immunoassay. It is comprised of a single-use cartridge containing an immunoreactive test membrane comprised of a combination of synthetic peptides corresponding to conserved regions of HIV structural proteins coated onto a membrane matrix, which functions to capture anti-HIV-1 antibodies present in human serum or plasma when a drop of specimen is applied. The run-time for the test is approximately three minutes. The test has a sensitivity of 99.8% and a specificity of 99.1% for serum specimens and 98.6% for plasma specimens.⁶⁰

Product Information

Number of tests per kit	30
Items included in kit	Universal buffer and test control package
Additional items required but not included	None
FDA approved	Yes
Approved by other regulatory agency	Health Canada and SFDA (China)
Shelf life of the HIV test kit	12 months
Language of package insert	English
Recommended storage conditions	2–30°C (36–86°F)

⁶⁰ Correspondence with manufacturer.

Weight/dimensions/volume for 1 kit (30 tests) Weight: 0.91 kg (2 lb)
Dimensions: 23 × 18 × 18 cm (9 × 7 × 7 in)
Volume: 7,362 cm³ (449 cu in [0.01 m³])

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 15.00–16.00 per test or USD 450–480 per kit (FOB, Halifax)
Additional pricing information	Special pricing consideration is offered to developing country clients who contact MedMira directly. Price will depend on the volume.
Donation programs	No information available
Available from U.S. sources	Yes, from Cardinal Health through MedMira’s distribution partner (American Health Partners)
Minimum order from manufacturer	1,000 tests
Average minimum shelf life on delivery	The company will not ship any product that has less than 75% of shelf life on it unless agreed by the customer
Stock on hand	HIV tests are manufactured on demand
Average time to fill order	Three weeks
Quality issues	No information provided
Payment method to manufacturer	For the first three orders, half of the total payment is required up-front
Available from	Crown Agents, Cardinal Health through MedMira’s distribution partner (American Health Partners)

266-5757*

E-mail: overseas@span.co.in

Website: www.span.in

Information current as of October 2008

Technical Information

The Signal® HIV 1+2 is a flow-through immune-dot test for the qualitative detection of antibodies to HIV-1 and -2 in human serum or plasma. The test can demonstrate results in 2 to 10 minutes. The manufacturer reports that evaluations of confirmed positive serum samples for HIV-1 and HIV-2 demonstrate a sensitivity of 100%, and an in-house evaluation of blood bank samples indicates a specificity of 100%.⁶¹

Product Information

Number of tests per kit	100
Items included in kit	Test device, wash buffer, signal reagent, and disposable plastic droppers; cassettes, reagents, controls, and pipettes
Additional items required but not included	Disposable gloves, timer, sodium, and calcium hydrochloride, biohazard bags, blood collection equipment, and disinfectant
FDA approved	No
Approved by other regulatory agency	No information provided
Shelf life of the HIV test kit	15 months
Language of package insert	English (other languages can be provided on request)
Recommended temperature storage conditions	2–8°C (36–46°F)

⁶¹ Span Diagnosticss Ltd *Signal®HIV Package Insert*.

Weight/dimensions/volume for one kit (100 tests) Weight: 0.115 kg (0.253 lb) (115g)
Dimensions: 6.5 × 15 × 7 cm (3 × 6 × 3 in)

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for 10 tests/price for one kit	USD 12.00 for 10 tests and USD 50.00 for 50 tests (FOB Mumbai)
Additional pricing information	Freight charges are extra. Reduced prices are not given to developing countries. The above quoted prices are the best rates for developing countries.
Donation programs	Not available
Available from U.S. sources	No
Minimum order from manufacturer	10 kits of 50 tests
Minimum average shelf life on delivery	80% of the original shelf life
Stock on hand	The manufacturer states that some stock is held but does not specify the quantity. In addition, stock is manufactured for bulk quantities.
Average time to fill order	The order is dispatched within 30 to 45 days after the receipt of 100% advance payment.
Quality issues	If there is a problem with the quality of the kit, the customer is expected to contact the manufacturer through e-mail, fax, or telephone. There is a special division that handles product-related problems. There is no recall procedure for defective HIV test kits.
Payment method to manufacturer	Telegraphic wire transfer
Available from	Crown Agents; the manufacturer has distributors that can supply the test kit (contact the manufacturer for additional information).

Fax: +353-1-276 9888

Email: fidelma.loftus@trinitybiotech.com

Website: www.trinitybiotech.com

Information current as of February 2007

Technical Information

Uni-Gold™ HIV is a single reagent assay that uses the immunochromatographic sandwich principle for the detection of antibodies to HIV-1 and HIV-2 in serum, plasma, or whole blood. It has been evaluated by a number of independent organizations. The WHO evaluation recorded 100% sensitivity and 100% specificity for the product.⁶² The test is estimated to produce results in 11 minutes.⁶³

Product Information

Number of tests per kit	20
Items included in kit	Devices, wash buffer, and disposable pipettes
Additional items required but not included	Timer or stopwatch, disposable gloves, biohazard bags, blood collection equipment, and disinfectant
FDA approved	No
Approved by other regulatory agency	This HIV test kit is approved by regulatory agencies in a number of countries (contact manufacturer for additional information).
Shelf life of the HIV test kit	15 months
Language of package insert	English (other languages can be provided on request)

⁶² World Health Organization (WHO)/Joint United Nations Programme on HIV/AIDS (UNAIDS). 2002. *HIV Simple/Rapid Assays: Operational Characteristics (Phase 1): Report 12, Whole Blood Specimens*. WHO/BCT/02.07. Geneva: WHO.

⁶³ Trinity Biotech PLC. n.d. *Uni-Gold™ HIV Catalogue No: 1206502 Package Insert*. Wicklow, Ireland: Trinity Biotech.

Recommended storage conditions	2–27°C (32–81°F)
Weight/dimensions/volume for one kit (20 tests)	Weight: 0.2 kg (0.44 lb) Dimensions: 23.5 × 14 × 8 cm (9.25 × 5.5 × 3.15 in) Volume: 3,360 cm ³ (0.00336 m ³) (205.04 cu in [0.118657 cu ft])

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 1.50 per test; USD 30 per kit (EXW, Ireland)
Additional pricing information	No handling charges are added, but shipping and insurance are extra. Prices may vary by quantity and region. Concessionary prices are offered to WHO, other UN agencies, and major international procurement agencies. Discounts from the listed price can be negotiated on a case-by-case basis either directly through the manufacturer or through local distributors.
Donation programs	There are currently no donation programs for this HIV test kit.
Available from U.S. sources	Yes, but not for domestic use in the United States
Minimum order from manufacturer	5 kits (100 tests)
Minimum average shelf life on delivery	10–11 months (kits are usually delivered with 75% of their shelf life remaining)
Stock on hand	Stocks are held, but levels vary with demand.
Average time to fill order	6 weeks
Quality issues	Any quality problem with the product is investigated through the in-house quality control system. If a product problem is confirmed, replacement product or product notes are issued. The manufacturer does not have a specific recall procedure for the HIV test kit, but it has implemented SOPs for the management of postmarketing activities including customer complaint handling, adverse event reporting, and product recalls. These SOPs have been developed in accordance with all relevant ISO, EU, and FDA requirements.
Payment method to manufacturer	Up-front payments for three orders, after which credit terms can be established. Credit card orders may be accepted.

Available from

Crown Agents, Durbin PLC, IDA Foundation, Joint Medical Stores (Uganda), Medical Export Group (MEG), Missionpharma A/S, UNICEF, and UNFPA. The product is also available through the WHO Bulk Procurement Scheme (see Chapter 2 for more details). The manufacturer has exclusive/non-exclusive local suppliers in a large number of countries (contact the manufacturer for additional information).

Information current as of April 2007

Technical Information

Uni-Gold™ Recombigen® HIV is a single use rapid immunoassay for the qualitative detection of antibodies to HIV-1 in serum, plasma and whole blood (venipuncture and fingerstick). The sensitivity of the test is 100% and the specificity of the test is 99.7%. Test results are available after 10 minutes.⁶⁴

Product Information

Number of tests per kit	20
Items included in kit	Wash solution, 20 disposable finger-stick sample collection and transfer pipettes.
Additional items required but not included	Timer or stopwatch, blood collection devices (for testing of venipuncture whole blood, serum or plasma), biohazard disposal container, disposable gloves. For fingerstick samples the following additional materials are required: adhesive bandages, lancet capable of producing a 50µl droplet, sterile wipes and sterile gauze pads.
FDA approved	Yes
Approved by other regulatory agency	N/A
Shelf life of the HIV test kit	12 months
Language of package insert	English

⁶⁴ Correspondence from the manufacturer.

Recommended storage conditions	2-27°C (36–81°F) Do not freeze
Weight/dimensions/volume for one kit (20 tests)	Weight: 0.4 kg (0.8 lb) Dimensions: 24 × 14.5 × 10 cm (9.5 × 5.7 × 3.9 in) Volume: 3480cm ³ (0.00348 m ³) (212.36cu in [0.122 cu ft])

Procurement Information

USAID Missions and CAs can purchase the kit directly from the manufacturer.

Average price for one test/price for one kit	USD 16.50 per test; USD 330.00 per kit (EXW,)
Additional pricing information	Special pricing is also given to developing countries please contact the manufacturer directly for more information.
Donation programs	Humanitarian pricing is available through a number of organizations. Please contact the manufacturer for additional information.
Available from U.S. sources	Yes ⁶⁵
Minimum order from manufacturer	None
Average minimum shelf life on delivery	6 months
Stock on hand	Some stock is held.
Average time to fill order	1–2 weeks
Quality issues	Quality issues are handled through an official customer complaints process. There is a recall procedure for faulty test kits
Payment method to manufacturer	Bank transfer.
Available from	Crown Agents, Durbin PLC and Missionpharma A/S. The product is also available directly from the manufacturer and from local distributors (contact the manufacturer for a list of distributors).

⁶⁵ The Trinity Biotech U.S. office supplies the U.S. customer base. For shipments of the product to regions outside of the United States, please contact the office in Ireland. See website for contact information.

CHAPTER 2: PROCUREMENT AGENCIES AND SUPPLIERS

Chapter 2 contains HIV test kit procurement information from selected procurement agencies and suppliers (both national and international).

A supplier maintains a warehouse and sends items directly to customers. The following international suppliers responded to this survey—

- Action Medeor
- IDA Foundation

Also included in this fifth edition are national suppliers who procure and supply pharmaceuticals and other commodities for programs within countries or regions. The following national supplier responded to the survey—

- Joint Medical Stores (JMS), Uganda

A procurement agency negotiates prices and places purchase orders for clients and may often order from a vendor. An agency usually charges a fee for its services over and above the CIF price of the product or test kit. The following international procurement agencies responded to the survey—

- Crown Agents
- Durbin PLC
- Medical Export Group
- Missionpharma A/S
- Tri-Med Group

Also featured in this section are three UN agencies that have been involved in the procurement of HIV test kits: UNICEF, UNFPA, and WHO. UNFPA assists countries to procure HIV test kits for general use, while UNICEF assists countries to procure HIV test kits for their PMTCT programs. WHO directs and manages the HIV Test Kit Bulk Procurement Scheme for several other UN agencies and civil society organizations involved in programs that require test kits.

The information in this chapter is current as of July 2007 and is intended to be used as an initial reference for identifying procurement agencies and suppliers and for procurement planning. Inclusion in this document does not imply that the supplier or agency is endorsed by USAID or MSH/RPM Plus or preferred over any other supplier or agency.

Prices are given as an indication only and may vary according to quantities ordered and with fluctuations on the international market or in currency exchange rates. Additional handling and shipping charges may apply. Due to the time-sensitive nature of the procurement information included in this guide, the supplier or agency should be contacted to verify the information, particularly with regard to price and availability, prior to placing an order or preparing a request for USAID approval to procure HIV test kits.

What Is in This Section?

To obtain relevant information on the HIV test kits listed in the USAID Source and Origin Waiver, surveys were sent to the procurement agencies and suppliers of the HIV test kits. The responses from these agencies and suppliers provide the information that appears in this section. Also noted is whether a representative of the U.S. Government can purchase test kits from the specified procurement agency or supplier. The information included for each company is as follows, with some exceptions—

Product(s) supplied	Names of the test kits listed in the Source and Origin Waiver that the procurement agency or supplier stocks or supplies.
Listed price (range) and terms and suggested retail price	Prices are given as an indication only. The supplier or agency should be contacted to verify the information.
Additional pricing information	Additional procurement information is listed here, such as whether the manufacturer provides special discounts for nonprofits or other organizations working on certain programs.
Minimum order quantity	This lists the minimum order quantity required, if any.
Average minimum shelf life on delivery	The remaining time (usually months) for which a product can be safely used and accurate results can be expected after purchase from the manufacturer. Assuring that the shelf life can be maintained as stated on the product packaging is dependent on the product being stored and handled according to the conditions specified by the manufacturer. These instructions must be included in every package, carton, and/or shipping unit. The minimum accepted shelf life on delivery must be negotiated and included in the procurement contract.
Stock on hand	Specifies whether stock is maintained or if the kit is manufactured on demand. If stock is held, the lead time is generally shorter. However, having the kits manufactured on receipt of the order has the advantage of a longer shelf life.

Average time to fill an order	This information assists programs in planning for procurement to ensure that orders are placed in sufficient time to avoid product unavailability.
Delivery information	Details the delivery locations the company serves, if applicable.
Payment method	Any general requirements for method of payment are given in this section. These requirements are often country-, program-, or quantity-specific. The procurement agency or supplier may need to be contacted for additional information.
Quality issues	Information on the company's policy if the customer experiences problems with the quality of the test kits.
Additional information	Other information that might be useful in the procurement of HIV test kits is given here, if any.

Information current as of September 2008

USAID Missions and CAs can purchase kits directly from this supplier.

Products supplied	All HIV test kits that appear on the November 3, 2008, USAID List of Approved Rapid HIV/AIDS Test Kits ⁶⁶
Listed price (range) and terms and suggested retail price	All prices are EXW and are negotiated directly with the manufacturers. Prices can be provided with shipping/insurance charges included. There is no handling charge.
Additional pricing information	The price for each kit is available to all customers, regardless of the type of organization. Prices are not dependent upon the quantity ordered, but large or long-term contracts would attract a negotiated discount.
Minimum order quantity	None
Minimum average shelf life on delivery	Crown Agents procures freshly manufactured products to maximize shelf life at delivery.

⁶⁶ The USAID List of Approved Rapid HIV/AIDS Test Kits contains all 36 HIV test kits and is available at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.

Stock on hand	Stock is not maintained. Products are ordered on demand.
Average time to fill an order	Usually 1–2 weeks from order to shipment but may be up to 6 weeks, depending upon the manufacturer. Scheduled deliveries to meet the client’s requirements can be arranged.
Payment method	The preferred method is payment at order placement. However, other options are negotiable.
Quality issues	Quality problems are resolved according to the nature of the problem and the preferred solution of the customer (e.g., replacement of the damaged product or a refund).

Information current as of October 2008

USAID Missions and CAs can purchase kits directly from this supplier.

Products supplied	Bioline HIV 1/2 3.0, Capillus™ HIV-1/HIV-2, Determine™ HIV-1/2, DoubleCheck™ HIV 1&2, DoubleCheck Gold™ HIV 1&2, First Response® HIV 1-2.0, Genie II HIV-1/HIV-2, HIV 1/2 Stat-Pak™ Assay, HIV 1/2 Stat-Pak™ Dipstick, ImmunoComb™ HIV 1&2, OraQuick® ADVANCE™, Uni-Gold™ HIV
Listed price (range) and terms and suggested retail price	Prices are EXW (Amsterdam); transportation and insurance are extra charges. Prices vary based on volume and destination. The latest prices and complete product range can be found at www.idafoundation.org/en-us/content.aspx?cid=152 .
Additional pricing information	Prices are fixed; however, special prices may be requested from specific manufacturers who provide a volume discount. IDA is a nonprofit supplier, and therefore charges a minimal margin on the cost of products. Organizations and agencies can get a lower price, which varies per product and manufacturer, by bundling orders and applying for a volume discount.
Minimum order quantity	A value of EUR 1,500, or, in some cases, certain manufacturers request a minimum order of 10 packs of 15-50 units.
Minimum average shelf life on delivery	Varies according to the product and depends on the batch of the product received.

Stock on hand	Stock of Determine™ HIV-1/2 is kept in the warehouse. Other products are requested on demand, especially for large volumes.
Average time to fill an order	2 weeks if supplied from IDA stock. Otherwise, varies by manufacturer.
Payment method	Payment varies according to the established relationship with the customer. First-time customers will need to prepay.
Quality issues	The company will resolve any quality problems directly with the manufacturer of the specific product.

Listed price (range) and terms and suggested retail price ⁶⁷	Determine™: USD 84.45 for 100 tests HIV 1/2 Stat-Pak™ Dipstick: USD 27.62 for 30 tests Uni-Gold™: USD 46.64 for 20 tests (CIF, Kampala, Uganda)
Additional pricing information	Prices do not depend on the quantity ordered. There is one uniform price for all customers.
Minimum order quantity	None
Minimum average shelf life on delivery	8–10 months
Stock on hand	Stock is maintained.
Average time to fill an order	1–4 days, depending on the size of the order.
Payment method	Cash and carry: full payment on confirmation of the order details by the customer.
Quality issues	Independent laboratory testing is carried out for all HIV test kits. When problems are encountered, the company follows up with the manufacturer.

⁶⁷ Please note that all prices listed in U.S. dollars (USD) are based on conversions from Ugandan Shillings (UGX). Conversions were carried out at www.xe.com on October 15, 2008.

Information current as of December 2008

The WHO procurement service for diagnostics was established in 1990 to facilitate access to HIV test kits for Member States at a reasonable cost. WHO's procurement services cover diagnostics for a range of priority diseases including HIV. WHO also carries out a prequalification program for HIV and malaria diagnostic kits.⁶⁸ Additional information is available at www.who.int/diagnostics_laboratory/update%20Q1%202008.pdf.

The following HIV test kits that appear on the November 2008 USAID List of Approved HIV/AIDS Rapid Kits have been evaluated by WHO—

1. Bioline HIV 1/2 3.0 (Standard Diagnostics)
2. Capillus™ HIV-1/HIV-2 (Trinity Biotech)
3. Determine™ HIV-1/2 (Inverness Medical Innovations and Abbott Laboratories)
4. HIV (1+2) Antibody Colloidal Gold (Shanghai Kehua Bio-Engineering Co. (KHB))
5. DoubleCheck™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd.)
6. DoubleCheck Gold™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd)
7. First Response® HIV 1-2.0 (Premier Medical Corporation, Ltd.)
8. Genie II HIV-1/HIV-2 (Bio-Rad Laboratories)
9. HIV 1/2 Stat-Pak™ Assay (Chembio Diagnostics Systems)
10. HIV 1/2 Stat-Pak™ Dipstick (Chembio Diagnostics Systems)
11. ImmunoComb™ HIV 1&2 (Inverness Medical Innovations and Organics, Ltd.)
12. InstantCHEK™ HIV 1+2 (EY Laboratories)
13. OraQuick Rapid ADVANCE® Rapid HIV-1/2 Antibody Test (OraSure Technologies)
14. Uni-Gold™ HIV (Trinity Biotech, Plc)

ANNEX 1. USAID SOURCE AND ORIGIN WAIVER FOR HIV/AIDS DIAGNOSTIC MATERIALS

This annex section contains the list of all the USAID source and origin waiver related documents and AAPDs issued since January 2001 starting with the most recent.

Acquisition & Assistance Policy Directive (AAPD)

From the Director, Office of Acquisition & Assistance Issued: , 2006

AAPD 06 -

Procurement of HIV-AIDS Test Kits from Code 935 Countries

Subject Category: *Assistance, Acquisition Management*
Type: *Policy and Procedure*

AAPDs provide information of significance to all agency personnel and partners involved in the Acquisition and Assistance process. Information includes (but is not limited to): advance notification of changes in acquisition or assistance regulations; reminders; procedures; and general information. Also, AAPDs may be used to implement new requirements on short-notice, pending formal amendment of acquisition or assistance regulations.

AAPDs are EFFECTIVE AS OF THE ISSUED DATE unless otherwise noted in the guidance below; the directives remain in effect until this office issues a notice of cancellation.

This AAPD: Is New Replaces/ Amends CIB/AAPD No: 05-01

<p>Applicable to:</p> <p><input checked="" type="checkbox"/> Existing awards; <input type="checkbox"/> Modification required</p> <p><input type="checkbox"/> No later than</p> <p><input type="checkbox"/> As noted in guidance below</p> <p><input checked="" type="checkbox"/> RFPs/RFAs issued on or after the effective date of this AAPD; all other Pending Awards, i.e., 8(a), sole source, IQC</p> <p><input type="checkbox"/> Other or N/A</p>	<p>Precedes change to:</p> <p><input type="checkbox"/> AIDAR Part(s) Appendix</p> <p><input checked="" type="checkbox"/> USAID Automated Directives System (ADS) Chapters 302, 303</p> <p><input type="checkbox"/> Code of Federal Regulations</p> <p><input type="checkbox"/> Other</p> <p><input type="checkbox"/> No change to regulations</p>
--	---

Michael F. Walsh, Director

AAPD 06-xx-- Procurement of HIV-AIDS Test Kits from Code 935 Countries

PURPOSE:

1. This AAPD replaces AAPD 05-01.
2. The USAID List of Approved HIV/AIDS Test Kits has been updated.
3. The AAPD confirms that OAA –restricted commodity” approval under ADS 312.5.3c is not required for the test kits on the list.
4. AA/M no longer approves test kits; the authority has been delegated to Director of the Office of HIV/AIDS, Bureau for Global Health (GH/OHA). GH/OHA establishes the technical requirements and issues technical guidance for test kits. The List, technical requirements, technical guidance and points of contact are at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html
5. Under contracts and agreements in effect prior to the issuance of this AAPD, Contracting and Agreement officers (COs and AOs) are encouraged to give advance approval for procurement of approved test kits under the source/origin or –restricted commodity” provisions of the Mandatory Standard Provisions for U.S., Nongovernmental Recipients "USAID Eligibility Rules For Goods And Services", the AIDAR provision 752.225-70, "Source, Origin and Nationality Requirements", or similar provisions. For contracts and agreements obligated after the issuance of this AAPD, COs and AOs should include language in the schedule or elsewhere that indicates that CO/AO approval is not needed for procurement of approved test kits under the above clauses or similar provisions.
- 56 CO's may give advance approval for procurements of test kits in excess of the simplified acquisition threshold and any other consent required under FAR clause 52.244-2 or comparable provisions in the implementing instrument.

ACTION REQUIRED: COs/AOs, in coordination with Cognizant Technical Officers (CTOs), amend current agreements and include language in new agreements to implement AAPD, as appropriate.

BACKGROUND: On January 11, 2001, the Administrator of USAID authorized the procurement of certain listed test kits from Geographic Code 935 countries. In an Action Memorandum dated September 26, 2006 the Administrator modified the basis for the waiver and delegated the authority to approve test kits to the Director of the Office of HIV/AIDS, Bureau for Global Health.

GUIDANCE:

- a. The “USAID List of Approved HIV/AIDS Test Kits” is at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.
- b. **Office of Acquisition and Assistance (OAA) and Contracting and Agreement Officer (CO/AO) Approval.**

1. OAA approval under ADS 312.5.3c is not required for approved test kits.

2. Under contracts and agreements in effect prior to the issuance of this AAPD, COs and AOs may and are encouraged to give advance approval for procurement of approved test kits under the source/origin or "restricted commodity" provisions of the Mandatory Standard Provisions for U.S., Nongovernmental Recipients "USAID Eligibility Rules For Goods And Services", the AIDAR provision 752.225-70, "Source, Origin and Nationality Requirements", or similar provisions. For contracts and agreements obligated after the issuance of this AAPD, COs and AOs should include language in the schedule or elsewhere that indicates that CO/AO approval is not needed for procurement of approved test kits under the above clauses or similar provisions.

3. COs are encouraged to give advance approval to procurements of approved test kits in amounts in excess of the simplified acquisition threshold and any other consent required under FAR clause 52.244-2 or comparable provisions in the implementing instrument.

b. Technical Requirements and Considerations.

AA/M no longer approves test kits; that is now done by GH/OHA. GH/OHA establishes the technical requirements and issues technical guidance for test kits. The technical requirements, technical guidance and points of contact are at www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.

POINT OF CONTACT: Please direct questions about the AAPD to Diane Howard, M/OAAP, Phone (202) 712-0206. For points of contact on questions about test kits see the website, www.usaid.gov/our_work/global_health/aids/TechAreas/scms/scms.html.

USAID
FROM THE AMERICAN PEOPLE

Acquisition & Assistance Policy Directive (AAPD)

**From the Director, Office of Acquisition & Assistance
Issued: February 10, 2005**

AAPD 05-01

Procurement of HIV-AIDS Test Kits from Code 935 Countries

(signed copy on file)

Kimberly Triplett, Acting Director

AAPD 05-01 -- Procurement of HIV-AIDS Test Kits from Code 935 Countries

PURPOSE: The purpose of this AAPD is to update the list of Testing Kits included in Contract Information Bulletin (CIB) 01-04 that were approved for purchase for HIV/AIDS programs from Geographic Code 935 countries (any country or area excluding foreign policy restricted countries). The updated list is included in the GUIDANCE section below and may be revised and updated yearly or as necessary by the Office of HIV/AIDS (OHA), Bureau for Global Health, with the approval of AAM, and issued through an amendment to this AAPD.

BACKGROUND: On January 11, 2001, the Administrator of USAID authorized the procurement of certain listed test kits from Geographic Code 935 countries. Test kits eligible for this procurement were listed in Tab 1 to that waiver. The waiver also delegated authority to AAM to amend the list at Tab 1 to the waiver, to add new testing kits which could be determined to meet the same criteria. This waiver was included in CIB 01-04.

GUIDANCE:

a. Procurement in Geographic Code 935 countries is authorized for the test kits listed below.

Approved List of Testing Kit Products and Manufacturers as of February 2005

Product	Source Country	Manufacturer
Bioline	South Korea	Standard Diagnostics
Bionor	Norway	Bionor A/S
Capillus	Ireland	Trinity Biotech*
Determine	Japan	Abbott Laboratories*
DoubleCheck	Israel	Orgenics
First Response	India	Premier Medical Corporation
Genie II	France	BioRad
Hema-Strip	Singapore	Saliva Diagnostic Systems, Ltd.*
HIVsav 1&2	Israel	Sayvon Diagnostics Ltd.
HIV 1 / 2 Stat-Pak	USA	ChemBio Diagnostics, Inc.
Immunocomb	Israel	Orgenics
Instant Screen	Germany	GAIFAR GmbH
InstantCHEK	USA	EY Laboratories
OraQuick	Singapore	OraSure Technologies
SeroCard	Ireland	Trinity Biotech*
Sero-Strip	Israel	Saliva Diagnostic Systems, Ltd.*
SureCheck HIV	USA	ChemBio Diagnostics, Inc.
Unigold	Ireland	Trinity Biotech
* Parent Company is a United States based firm		

b. Choosing test kits for country programs

While purchase of kits on the approved list is authorized, different kits are appropriate for different countries and testing situations. We recommend that kits be evaluated in country for their performance as part of a national testing algorithm. Guidance on HIV rapid test kit evaluation is available at www.phppo.cdc.gov/dls/pdf/HIV%20Test%20Guidelines%20Africa.pdf .

c. Adding additional test kits to the list

For an HIV/AIDS test kit to be added to the list of those approved for procurement from Geographic Code 935 countries, the following information regarding such test kit must be submitted to OHA:

1. Whether it has FDA-approval;
2. Whether its producer has FDA-approval;
3. Whether the facility and production site where it is manufactured has FDA-approval;
4. Whether the test kit, producer, or production site has approval of a stringent regulatory authority;⁶⁹ and
5. Why the proposed test kit is necessary and appropriate for the country/countries concerned.

Alternatively, OHA will accept notification from the Department of Health and Human Services Centers for Disease Control and Prevention (“CDC”) that they have evaluated the test kit and find that it meets the attached criteria.

⁶⁹ A stringent regulatory authority is a drug regulatory body that closely resembles FDA in standards utilized in its operations. Currently, countries that participate in the International Conference on Harmonization (ICH) are considered as stringent regulatory authorities. The ICH regulatory bodies include: the U.S. FDA; the Japanese Ministry of Health, Labor, and Welfare; the European Agency for the Evaluation of Medicinal Products (EMA) centralized procedure; and the European Free Trade Area (represented by the Swiss Medic). The Canadian drug regulatory authority, the Therapeutic Products Directorate, Health Canada, is an observer to the ICH and is also considered a stringent regulatory authority. Other countries may be considered having a stringent regulatory body if they have implemented ICH guidelines and resemble the U.S. FDA in operation, but would be considered on a case-by-case basis. It should be noted that the World Health Organization (WHO) has a pre-qualification program for procurement purposes. The WHO is not a regulatory authority, and acceptance of a manufacturer or product by the WHO pre-qualification program would not be considered equivalent to approval of a product by a stringent regulatory authority.

1. Attachment: RAPID HIV TEST KIT TECHNICAL REQUIREMENTS

POINT OF CONTACT: Please direct any questions pertaining to the test kits to Katharine Kripke, GH/OHA/TLR, Phone: (202) 712-1452, e-mail: kkripke@usaid.gov. Please direct questions about the AAPD to Diane Howard, M/OAAP, Phone (202) 712-0206.

Attachment to AAPD 05-01 -- Procurement of HIV-AIDS Test Kits from Code 935 Countries

2. RAPID HIV TEST KIT TECHNICAL REQUIREMENTS

1. HIV Rapid Test Kits:

HIV rapid tests are defined as assays for detection of antibodies to HIV-1, HIV-2, or both, from which test results can be read directly, within 30 minutes of the time specimen is applied to the device, without calibration, interpretation, or calculations. Qualifications for HIV rapid test kits are listed below. The only acceptable kits are those meeting the test characteristics described below. Acceptable kits may change periodically as evaluation data on kit performance is updated.

A. Test Characteristics:

- i. Documentation from manufacturer studies that test has sensitivity of at least 99% and specificity of at least 98% for detection of HIV-1 in each sample matrix for which the test is designed (e.g., whole blood, serum, plasma, oral fluid or urine). Data should be based on at least 500 HIV negative and 500 HIV-1 positive specimens. If test claims to detect both HIV-1 and HIV-2, sensitivity for HIV-2 should be demonstrated with evaluation of 50 HIV-2 positive specimens, and must be at least 99%.
- ii. One or more credible evaluations by internationally recognized independent institutions validating that sensitivity and specificity of the tests are within 95% +/- 2% confidence interval of that demonstrated in manufacturer's studies (criterion i.). Approximately 200 HIV-positive and 200 HIV-negative specimens are needed to provide 95% confidence intervals of less than $\pm 2\%$ for both the estimated sensitivity and specificity. A document that describes the process of such an evaluation can be found at:

www.phppo.cdc.gov/dls/pdf/HIV%20Test%20Guidelines%20Africa.pdf

- iii. Presence of a normal internal control or other failure alert mechanism to notify the operator if the assay malfunctions. Also, having external controls that assure the presence of functional test antigens in the test platform will be very useful.

B. Performance Characteristics:

- 1). Use direct, unprocessed specimens (e.g., unprocessed whole blood or oral fluid) or samples that require minimal processing (e.g., serum or plasma).
- 2). All reagents including diluents are included in kit, and require no technique-dependent reagent manipulation (e.g., no reconstitution)
- 3). No operator intervention or procedural steps during the analysis after initial addition of specimen and reagents.
- 4). No requirements for assay-specific equipment.
- 5). Kits and all reagents stored at temperatures recommended by manufacturers shall have a minimum 1-year shelf life when received by contractors.

C. Manufacturing Characteristics:

The HIV rapid test kits must be purchased from manufacturers of those kits that meet the test characteristics and performance characteristics, described in sections A. and B., and manufacturing characteristics described below. As the list of tests is updated, the eligible manufacturers may change.

Eligible manufacturers must have:

- i. Documented production capacity to provide the number of kits needed by USG programs for current and projected assay usage (e.g., 200,000 – 500,000 test kits needed annually), and ability to deliver a minimum of 45,000 test kits within 90 days of order.

- ii. Availability of data to document reproducible performance across different lots of assay.
- iii. Ability to ship to international sites.
- iv. Documentation of export certificate, when required.

ACTION MEMORANDUM

TO: AA/M, John Marshall

FROM: AA/GH, E. Anne Peterson

SUBJECT: The HIV/AIDS and Infectious Disease Initiatives:
Update of Source and Origin Waiver for HIV/AIDS
Diagnostic Materials (testing kits)

ISSUE FOR DECISION

Whether to authorize the amendment of the approved and updated list of HIV rapid test kits that can be procured under the January 2001 source and origin waiver

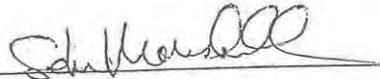

ESSENTIAL FACTORS

In a January 11, 2001 action memorandum (Tab 2), the former Administrator approved the source and origin waiver from Geographic Code 000 to Code 935 for the procurement of rapid HIV test kits (Tab 1). To meet the requirements of safety and efficacy, this authority was limited to a list of approved products, based on review and evaluation by the Centers for Disease Control (CDC). The January 11, 2001 memorandum delegated authority to AA/M to amend the approved list from time to time to add new code 935 testing kits when they meet the same criteria.

RECOMMENDATION

We recommend that, based on the findings above, you authorize the amendment of the list of HIV test kits approved for procurement under the January 11, 2001, source and origin waiver

Approve _____

Disapprove _____

Date _____

Dec 6 2001

Attachments:

Tab 1 - Contains an updated list of testing kits that have been reviewed internally and found to meet all the necessary suitability and price criteria in the applicable waiver regulations cited above. CDC has reviewed and approved the items on the list for safety and efficacy.

Tab 2 - Original Waiver, January 11, 2001. Note that the former Administrator delegated authority to Assistant Administrator of the Management Bureau.

⁷⁰ Changes that have been made to Tab 1 since its approval in October 2001 are indicated in footnotes.

⁷¹ The product is manufactured by EY Laboratories for Ortho-Clinical Diagnostics Systems; however, the product may have been discontinued in August 1997, according to personal communication with a representative of Ortho-Clinical Diagnostics Systems. The details were unable to be determined.

⁷² Bio-Rad Laboratories acquired Sanofi Diagnostics Pasteur in 1999.

⁷³ The manufacture of this product has been discontinued by the company.

⁷⁴ A recent e-mail communication with a representative of Bio-Rad Laboratories indicated that the company has discontinued production of this product.

⁷⁵ On June 17, 2002, OraSure Technologies (created when Epitope, Inc., merged with STC Technologies in September 2000) announced that it had entered into an agreement with Abbott Laboratories for the co-exclusive distribution of OraQuick tests in the United States.

[Approved by J. Brady Anderson, USAID Administrator, on January 11, 2001 and effective from this date.]

January 11, 2001

ACTION MEMORANDUM

TO: The Administrator
FROM: A-AA/G Barbara Turner /s/
SUBJECT: The HIV/AIDS and Infectious Disease Initiatives:
Source and Origin and Waiver for HIV/AIDS Diagnostic
Materials (testing kits)

ISSUE FOR DECISION

Whether to authorize the procurement of testing kits from Code 935 countries (any country or area excluding foreign policy restricted countries).

ESSENTIAL FACTORS

In a December 19, 2000, Action Memorandum (See Tab 2) you approved certain waivers and expedited procedures to acquire services and commodities for the Agency's HIV/AIDS and Infectious Diseases Initiatives. While the December 19th Memorandum authorizes expedited procurement procedures for testing kits, it does not waive source and origin requirements because more research was required on their availability in the United States and the efficacy and cost of offshore testing kits.

Having completed this research, we are seeking your approval of a source and origin waiver from Geographic Code 000 (United States) to Geographic Code 935 for specific testing kits identified in Tab 1. Consistent with the December 19th Memorandum, your approvals below will be in effect through the year 2007 and apply to all sources of funds including prior year funds. Records will be kept on all uses of the waiver authorities. Annual reviews will determine the adequacy of the waiver authorities and their continuing need. The list at Tab 1 will be revised and updated should U. S. manufactured testing kits, or new or improved testing kits from Code 935 sources become available that meet USAID program requirements.

Effective counseling and testing for HIV is a critical component of any HIV/AIDS strategy. While testing provides information to

individuals regarding their HIV status, it also provides information regarding the extent of the epidemic among target groups and indicates where additional resources may be needed. We anticipate that between one million to three million testing kits will be purchased annually over the seven-year life of the HIV/AIDS initiative. At an estimated average cost of \$3 per test, the aggregate procurement value will be approximately 45 to 55 million dollars. However, this amount will be substantially reduced if, as expected, the average cost per testing kits is reduced as new products come on stream.

The applicable statute and regulations covering USAID's "buy America" requirements (including testing kits) appear in section 604 (a) of the Foreign Assistance Act, ADS section 312.5.3c (2), and in 22CFR 228. Taken together, these sometimes overlapping regulations provide that pharmaceuticals be purchased outside of the United States only if information is available to attest to the safety, efficacy and quality of the product, or the product meets the standards of the Food and Drug Administration (FDA) or other U.S. controlling authority. ADS Section E312.5c (3) adds a further requirements that patent laws be honored. Such items may be purchased in Geographic Code 935 countries if you determine that: 1) the items are not produced or available in the United States, or if available , they cost more than 50 percent of comparable items, or 2) offshore procurement is necessary to promote efficiency in the use of foreign assistance resources and avoid impairment of foreign assistance objectives. While the United States Centers for Disease Control (CDC) is not controlling authority, approval by CDC is good evidence that may be used as a basis for authorizing non-U.S. procurement of products that are not approved by the FDA.

With respect to test kits, the criteria supporting a waiver are met. The most commonly available United States testing kits are based on the Elisa Reader method. The cost per test of these kits is approximately \$20. This cost is more than 50 percent higher than the cost of offshore alternatives. Further, these products require high quality lab facilities and highly trained personnel that are not widely available in target countries. Even where this kind of physical and human infrastructure is available in urban centers, there are insurmountable logistical problems in transporting thousands of blood specimens to and from rural sites to urban laboratories. It takes days or weeks to obtain tests results using Elisa Reader method. This is too long, given that in some target countries more than 30 percent of clients tested by these systems fail to return for the test results.

Recently, a new "simple-rapid" type pf HIV test costing \$1-3 per test has become available offshore. These tests are easy to use, no central laboratory is needed, and they deliver test results within a few hours instead of days to weeks. There is currently only one United States-manufactured HIV rapid test that is FDA approved. It costs about \$9 and the manufacturer has recently suspended production of this product.

Tab 1 contains a list of testing kits that have been reviewed internally and found to meet all the necessary suitability and price criteria in the applicable waiver regulations cited above. CDC has reviewed and approved the items on the Tab 1 list for safety and efficacy.

RECOMMENDATIONS

- A. We recommend that, based on the findings above, you authorize the procurement in Code 935 countries of testing kits identified in Tab 1

Approve _____

Disapprove _____

Date _____

- B. We recommend that you delegate authority to AA/M to amend the Tab 1 approved list from time to time to add new Code 935 testing kits when they meet the same criteria

ANNEX 2. USAID GEOGRAPHIC CODES

USAID Geographic Code	Description
Code 000 – The United States	The United States of America; any state of the United States; the District of Columbia; and areas of U.S.-associated sovereignty, including commonwealths, territories, and possessions.
Code 899 – Free World	Any area or country except the cooperating country itself and the following foreign policy–restricted countries: Libya, Cuba, Laos, Iraq, Iran, North Korea, and Syria.
Code 935 – Special Free World	Any area or country in the Free World including the cooperating country but excluding the foreign policy–restricted countries.
Code 941 – Selected Free World	The United States and any independent country in the Free World (excluding foreign policy–restricted countries), except the cooperating country itself and the following: Albania, Andorra, Angola, Armenia, Austria, Australia, Azerbaijan, Bahamas, Bahrain, Belgium, Bosnia and Herzegovina, Bulgaria, Belarus, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Gabon, Georgia, Germany, Greece, Hong Kong, Hungary, Iceland, Ireland, Italy, Japan, Kazakhstan, Kuwait, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia,* Malta, Moldova, Monaco, Mongolia, Montenegro,* Netherlands, New Zealand, Norway, Poland, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Serbia,* Singapore, Slovak Republic, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan,* Tajikistan, Turkmenistan, Ukraine, United Arab Emirates, United Kingdom, Uzbekistan, and Vatican City.

* Has the status of “geopolitical entity” rather than independent country.
