# OVERVIEW

## USAID WORKS TO STRENGTHEN PARTNERSHIPS WITH PRIVATE VOLUNTARY ORGANIZATIONS

### INTRODUCTION

The past year has produced many exciting developments at USAID. Beginning in January with the swearing-in as Administrator of Dr. Rajiv Shah, the Agency has embarked on a concerted effort to more effectively fulfill its mission and achieve strong development results. As Dr. Shah noted on the occasion of his swearing-in, "If we are to fulfill our charge of creating positive change throughout the world, we must be prepared to create change within our Agency." One of the areas that USAID is focusing on to advance the Agency's capacity to achieve high-impact development is in procurement, where reform efforts seek to change how USAID's assistance is designed and delivered, leading to enhanced competition, a broadened partner base, and greater long-term sustainable impact.

Consistent with these important changes, USAID's Private and Voluntary Cooperation Division in the Office of Development Partners (ODP/PVC) has continued its effort to strengthen the Registry of U.S. and international Private Voluntary Organizations (PVOs) during the past year. ODP/PVC is continuing to streamline the online registration system, which was put into operation in 2008 and replaced the previous paper-based

procedure. Efforts to improve the online system are ongoing, and ODP/PVC welcomes any feedback or suggestions for enhancing the submission process.

USAID registers PVOs that wish to compete for assistance funding such as grants and cooperative agreements available from the Agency. Only registered PVOs are eligible to compete for development assistance grants and cooperative agreements.

The purpose of the PVO registration process is to—

- Identify PVOs that engage in, or intend to engage in, voluntary foreign aid operations
- Determine whether PVOs meet certain general operating guidelines and accountability standards
- Certify that PVOs are eligible to apply for USAID assistance

### OPERATIONAL DEVELOPMENTS

Partnerships are a central component of USAID's 21st century business model for international development and the Agency's ongoing initiatives to increase its reach and effectiveness in meeting its development objectives. ODP/PVC leads the Agency's partnership building with PVOs, local nongovernmental organizations (NGOs), and cooperatives. In this role, ODP/PVC—

- serves as an institutional bridge between the Agency and the PVO, NGO, and cooperative communities;
- provides support and services to Agency staff and partners that are developing strategic partnerships involving NGOs, PVOs, or cooperatives;
- informs Agency efforts to develop innovative, effective programs that strengthen PVOs, NGOs, and cooperatives in USAID partner countries; and
- provides leadership for the Agency's outreach to the PVO, NGO, and cooperative communities as well as for policy formulation on issues of concern to the PVO, NGO, and cooperative communities.

Within this context, ODP/PVC manages the registration of U.S. PVOs and promotes and facilitates the exchange of information pertaining to U.S. and international PVOs within the Agency. It also manages Agency programs that contribute to stronger partnerships with local NGOs and cooperatives. Specifically, ODP/PVC coordinates the Development Grants Program (DGP), a small competitive grants program initiated in 2008 that provides opportunities for nascent U.S. PVOs and local NGOs that have limited experience working directly with USAID. The DGP's organizational and technical strengthening components assist grantees to improve their implementation planning and management, monitoring and evaluation, and other organizational systems so critical to effective service delivery and organizational sustainability.

With the U.S. Peace Corps, ODP/PVC oversees the Small Project Assistance (SPA) Interagency Agreement that enables collaboration between USAID Missions and Peace Corps volunteers in the field. PVC also manages the Cooperative Development Program, which encourages the development of cooperatives and cooperative management principles in USAID's overseas programs. During the past year, the Division also assumed responsibility for the Limited Excess Property Program (LEPP), which coordinates access

to U.S. Government excess property for use by PVOs in support of their overseas programs.

This past year also brought the devastating earthquake that struck Haiti on January 12, 2010, killing as many as 200,000, by Haitian Government estimates, and leaving many more hundreds of thousands injured or without food or shelter. USAID's PVO Registry played a critical role in the humanitarian aid community's response to the tragedy, providing important data on PVOs operating in the country and supporting efforts to identify the strengths and capabilities of organizations wishing to participate in the humanitarian relief effort.

U.S. PVOs received \$20.4 billion in support from U.S. citizens and private sources, almost seven times the \$3.0 billion from USAID.

## 2010 VolAG REPORT

The *Report of Voluntary Agencies Engaged in Overseas Relief and Development (VolAg Report)* provides a snapshot of the work of the U.S. and international PVOs that are registered with USAID. As defined by USAID (see 22 CFR 203.2), a PVO is a tax-exempt, nonprofit organization working in international development that receives some portion of its annual support from the private sector (demonstrating its private nature) and also receives voluntary contributions of money, staff time, or in-kind support from the general public (demonstrating its voluntary nature). PVOs register with USAID to establish and maintain eligibility to compete for grants and cooperative agreements. Information about registration can be found at [www.usaid.gov](http://www.usaid.gov) | **Keyword: PVO Registration.**

The *2010 VolAg Report* includes a brief description and a summary of financial activities for the 565 U.S. PVOs, 78 international PVOs, and 6 U.S. Cooperative Development Organizations (CDOs) registered with USAID as of June 30, 2010. The information contained in this report is also available through the online PVO Registry, a searchable database that is updated daily, on the USAID Web site at [www.usaid.gov](http://www.usaid.gov) | **Keyword: PVO Registry.**

## LEVERAGING PRIVATE RESOURCES FOR DEVELOPMENT

PVOs and local NGOs help USAID support local capacities to address local needs, bringing additional resources to bear and facilitating sustainable development worldwide. By enlisting the PVO community's expertise and program delivery capacities, USAID is better able to direct humanitarian relief and development assistance to areas of need. As the data presented in this report indicate, the privately generated resources that PVOs spend on international development activities far exceed the resources they receive from USAID or the U.S. Government.

During fiscal year 2008, U.S. PVOs registered with USAID received \$20.4 billion in support from non-U.S. Government and private sources, almost seven times the \$3 billion that USAID channeled to USAID registered PVOs. Other U.S. Government agencies and international organizations provided an additional \$3.2 billion, bringing the total private and public support and revenue for registered U.S. PVOs to \$26.7 billion.

USAID also provided more than \$107 million to registered international PVOs in 2008, augmenting

their \$2.7 billion in direct spending on international relief and development activities. Meanwhile, U.S. CDOs received \$286 million from USAID during 2008, as well as \$421 million from other sources, to support their efforts to build and strengthen cooperative organizations overseas.

## DOING BUSINESS WITH USAID

To implement its worldwide humanitarian and development activities, USAID uses various acquisition and assistance instruments, including contracts, grants, cooperative agreements, and purchase orders. USAID negotiates and initiates these instruments to obtain the commodities and technical assistance the Agency requires to achieve its objectives. Organizations seeking to work with USAID will find useful policy and business information at the following Web sites:

The *VolAg Report* is the culmination of the annual effort by the Office of Development Partners' Private and Voluntary Cooperation Division staff to collect, validate, and disseminate a clear, factual report that helps inform the Congress, Agency staff, partner organizations, and the general public about the activities of the PVO community. We hope you find it a useful resource.

ASI flies where other air carriers cannot—or will not—fly. ASI provides safe, reliable, and cost-effective air transportation to fellow humanitarian relief and development agencies working primarily in remote, transportation-deficient regions of the world. ASI's pilots fly small yet agile single- and twin-engine airplanes and helicopters, carrying relief workers into stricken areas of Africa, Asia, the Caribbean, Central America, Eastern Europe, and the Middle East. ASI's operations impart a multiplier effect on donor dollars, as the organizations receiving transport share the costs. These organizations are then able to concentrate on their areas of expertise, leaving the logistics to the experts at ASI.

Brings real and lasting change to children living in poverty. By working in partnership with its contributors, Children International strives to reduce children's daily struggles, invest in their potential, and provide them with the opportunity to grow up healthy, educated, and prepared to contribute to society. From the time children first enter the organization's sponsorship program between the ages of 2 and 9 to the time they graduate at the age of 19, they receive benefits that foster their growth and development. Basic assistance such as health care, educational support, clothes, and shoes form the basis of this support, but dental and nutritional care, family support, and community assistance further enrich the children's lives. When the time comes for sponsored youths to graduate, it is Children International's hope that they are healthy, educated, and self-reliant individuals with the skills and ability to break free from poverty and help improve the world around them.

Reduces water-related illness and death in developing countries by building self-sustaining projects that make safe drinking water accessible to the poor and empowers local churches to bring physical, social, and spiritual healing to their communities. The communities targeted by HWI are often overlooked for aid because they have municipal water systems in place. Unfortunately, many of

these systems deliver contaminated water, and commercially bottled water is a luxury the poor cannot afford. Attributes of HWI's water programs include the following: (1) projects are financially self-sustaining through water sales; (2) the water is tested monthly to guarantee purity; (3) bottle-rinsing equipment ensures that clean water doesn't go into dirty containers; (4) accountability systems allow donors to monitor the ongoing performance of their projects; and (5) revenues help fund additional community service projects.

IDE's guiding principle is that the rural poor are natural entrepreneurs who, if given the opportunity, will invest their limited resources to ensure their families' food supply and generate income. IDE empowers rural farmers to pull themselves out of poverty by making available quality inputs, training, affordable technologies, capital, and access to markets. Simple, low-cost water technologies increase income generation by allowing farmers to cultivate high-value, labor-intensive crops. These technologies have enabled families to become more efficient agricultural producers, generally doubling their net annual income in the first year. For 25 years, CPAR has been targeting some of the most vulnerable rural areas of Ethiopia, Malawi, Tanzania, and northern Uganda with important interventions related to food security, water and sanitation, and access to primary health services. CPAR's work is guided by the underlying belief that everything is connected: specifically, that health

is determined not only by the existence of health care services but also by social, economic, and environmental factors. Therefore, CPAR's work not only involves direct health interventions—ensuring a continuum of care between clinic and community—but also addresses the determinants of health, which include access to clean water, adequate food, and a safe and healthy environment. All CPAR projects are designed to be sustainable, and the organization trains beneficiaries to manage projects so benefits continue to accrue long after CPAR's direct involvement.
