The bibliography is subdivided into the following topics:

1. Agrarian Economy (includes: Rice Agriculture, Agricultural Statistics)
2. Peasant Economics
3. Land Reform
4. Land Tenure
5. Village Studies
6. Regional Studies (varies by country)
7. Peasant Politics and Unrest (includes Rural Government)
8. Cultures, Values, and Social Structure
9. Economic Development
10. National Politics
11. Bibliographies

In particular, we have tried to emphasize those studies which deal with social structure and peasant politics. The bibliography will therefore be of most value to those scholars who wish to relate economic change to social structure and politics. Purely technical studies and crop research have not been included. Where items seemed to merit inclusion in more than one category, they have been multiple-listed.

We would be grateful to receive notice of any important omissions and errors in order to improve any future editions.

Among the general sources used to compile this bibliography were the following: Southeast Asia: An Annotated Bibliography of Selected Reference Sources in Western Languages, compiled by Cecil Hobbs (Orientalia Division, Reference Department, Library of Congress, 1964, revised and enlarged); Southeast Asia: A Critical Bibliography, by Kennedy G.
