HECTO

1. The referenced PROP has been reviewed and approved for continuation through FY 71.

2. AID/Washington is presently unable to approve the project through its suggested termination in FY 75 for the same reasons that the Mission acknowledges in Par. D(3) on page 8 of referenced airgram, namely, that it lacks reasonably accurate benchmarks and quantitative measurements during the life of the project. The fact that the Mission also indicates that by its very nature elements of the project are a "calculated risk" and that much of its success is contingent upon the efforts by the GOH Director of the Budget (only one individual) give the project a rather tentative ring.

3. Your efforts to quantify goals for both short term and mid-term sub-projects should serve as a reasonable basis for project approval hopefully in the near future.
