PROJECT AUTHORIZATION AND REQUEST FOR ALLOTMENT OF FUNDS

PART II

ENTITY : Bureau for Development Support  
PROJECT : Pest Management Capability  
PROJECT NUMBER : 936-4071.11

I hereby authorize grant funds not to exceed \$81,000 for 12 months of program development and support activities with the United States Department of Agriculture (USDA) starting October 1, 1980 and ending September 30, 1981.

This agreement will provide professionally qualified personnel in the area of integrated crop protection to advise and assist the DS/AGR Food Crop Production Division, the Regional Bureaus, the Missions and the LDCs on problems relating to project development and evaluation as defined in the scope of work attached to the Action Memorandum.

Tony Babb  
Deputy Assistant Administrator

## STATEMENT OF WORK

Project: Pest Management Capability

Project Number: 931-4071.11

PASA: AG-DSB-4071-4-79

A. Objective

The PASA will enable A.I.D. to draw upon the professional and technical expertise of a highly competent USDA specialist in the general field of pest management with particular reference to plant disease control where very limited direct-hire capability currently exists.

B. Description of Work

The major work activities to be performed will include the following:

1. Provide professional expertise to A.I.D. in formulation of appropriate broad policies and programs relating to problems in the plant protection field in the LDCs with particular reference to integrated plant pest and disease control programs.
2. Design specific project for implementation by the Food Crop Production Division of DS/AGR, arrange for project budget development and review, technical staff management and monitoring functions as may be appropriate.
3. Give professional and technical advice and assistance to other Bureaus and Offices within A.I.D., Missions and host countries on matters related to plant protection.
4. Participate, when called upon by other entities within A.I.D., in reviews and evaluations of proposed or on-going projects related to plant protection or containing a plant protection component therein, and give advice on technical sufficiency and appropriateness of project design.
5. Represent A.I.D. at appropriate levels in meetings and discussions of plant protection problems with officials of other agencies.
6. In collaboration with the Project Leader of the centrally-funded Pest Management and Related Environmental Project, organize seminars and training programs in LDCs and the United States to meet program needs in developing countries.
7. Prepare publications on selected aspects of plant protection with particular reference to integrated plant pest and disease control programs.

### C. Expertise Required

The USDA will provide a plant pest and disease control specialist, GS-14/15 from within the USDA to serve as a staff member of the Food Crop Production Division, Office of Agriculture, Bureau for Development Support, A.I.D. The specialist will be responsible for identifying key problems relating to improving crop production by reducing preharvest losses caused by plant pests and diseases and for designing practical solutions to these problems. He will serve as the senior professional for A.I.D. dealing with plant pest and disease control problems, develop plans for improved plant protection programs in the LDCs, and recommend specific projects to deal with the problems through technical assistance, education and research.

The specialist will be the Agency's principal expert in dealing with policy and actions relating to plant pest and disease emergencies; will develop and propose programs, which will contribute to institution building and to training LDC scientists in plant pest and disease control; and provide the expert leadership necessary to formulate and guide a broad scale plan relating thereto.

### D. Supervision and Guidance

The plant pest and disease control specialist will receive guidance from and consult with the Food Crop Production Division Chief, the Pesticide Management Specialist and the Environmental Coordinator, Office of Agriculture and other professional staff with respect to broad A.I.D. policy directives in the area of development goals. His work will be reviewed in terms of fulfillment of broad program objectives and national foreign assistance goals and in terms of the achievement of high quality research/assistance programs and contributions to the science in meeting new goals and finding solutions to new problems.

ACTION MEMORANDUM FOR THE DEPUTY ASSISTANT ADMINISTRATOR FOR FOOD AND NUTRITION, BUREAU FOR DEVELOPMENT SUPPORT

FROM : DS/AGR, Ray Solem

SUBJECT : Pest Management Capability - PASA with USDA

Problem: Your approval is required for an extension of a PASA (Project Number 936-4071.11) with the USDA to obtain the services of a pest management specialist, qualified in both plant pest and disease control, to assist the Regional Bureaus (RBs), Missions, LDCs, and the Food Crop Production Division, DS/AGR for a 12-month period at a cost not to exceed \$81,000.

Discussion: In recent years, the Food Crops Production Division, DS/AGR has had a continuing need for staff support to provide highly specialized technical and professional services to RBs, Missions and LDCs regarding integrated crop protection programs in basic cropping systems used by small farmers in LDCs worldwide. This situation has been significantly ameliorated by the recruitment of an integrated pest management specialist under a PASA with the USDA approved by your office in July 1979. The PASA position was filled in November 1979 by Dr. Mark A. Smith, USDA/APHIS/PPQ. Dr. Smith is a plant pathologist with extensive professional experience in the field of plant pest and disease prevention and control. He currently serves as project manager for the Integrated Crop Protection planning grant with Purdue University, the Pest Management - Root-knot Nematode Project with North Carolina State University and the Aflatoxin Reduction in Maize Project with the University of Missouri.

The current crop protection team of Drs. Whittemore and Smith and Mr. Collier supply DS/AGR with much needed technical expertise in the field of pest and pesticide management related problems and initiatives. DS/AGR can now more efficiently and effectively supply the assistance required by RBs, Missions and LDCs in areas of research and technical assistance, project design, implementation and evaluation of ongoing and proposed activities in integrated crop protection.

The procedures for extending a PASA call for a statement of work and budget. A statement of work for a 12-month period is attached to this Memorandum. The estimated budget for this period also is attached.

Recommendation: I recommend that you indicate your approval for a 12 month extension of the PASA, Project Number 936.4071.11 with the USDA from October 1, 1980 to September 30, 1981 in the amount of \$81,000 by signing the attached PAF, Part II.
