			<p><u>Continuation from Page 1</u></p> <p><u>Narrative</u></p> <p>This State-of-the Art project conducted by Practical Concepts Incorporated is the first step in a TA/EHR effort to develop a project using two-way audio communications for delivering social services in the rural area of developing countries. The contractor was asked to survey all social service projects which have or are using media for two-way interaction between central headquarters and field personnel.</p> <p>The final report went well beyond what was originally asked for in the contract. Particularly, the economic analysis was much more detailed than was requested and not necessarily of the highest utility to us since so many assumptions had to be made in ordering the data that few conclusions could legitimately be drawn. The survey work was comprehensive and well done. The report provided the solid conceptual background upon which a future full scale demonstration in an LDC can be based.</p> <p>The contract report was not intended for distribution beyond TA/EHR. A meeting will be held with health officials from regional bureaus in February to discuss the conclusions of the report and the proposed follow-on project.</p>
