PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL <input checked="" type="checkbox"/> REVISION <u>1</u>	(Number) DATE 7/19/73	PAGE <u>2</u> of <u>12</u> PAGES
-------------------------------	---	-----------------------------	----------------------------------

COVER SHEET

This revision is being submitted in order to authorize a 3 year extension to the Public Safety Project, 511-11-710-091. This extension is needed so that the program, approved via AIDTO A-9 of February 12, 1971 calling for the establishment of urban patrol capabilities in La Paz and in the major cities of Cochabamba, Santa Cruz, Oruro, Sucre, Potosí, Tarija, and training programs for non-officer personnel, can be completed.

In accordance with Agency wide instructions contained in State 33632 of February 27, 1971, funding and other data is being provided only since FY 1971. This is justified since, based on a survey conducted between February and May, 1970, the emphasis of the Project was shifted from assistance to the police forces in general and the establishment of training capabilities for officer level personnel to the establishment of urban patrol capabilities in La Paz and in the major cities mentioned above and the development of training programs for lower level personnel. AID/W approval of this shift in emphasis was contained in AIDTO A-9 of February 12, 1971. Future U-203 reports and other documents, such as the Congressional Presentation and the FBS will reflect this change.

PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL, <input checked="" type="checkbox"/> REVISION	(Number) 1	DATE 7/19/73	PAGE 3 of 12 PAGES
-------------------------------	---	---------------	-----------------	--------------------

A. Program Goal

1. Statement of Goal: To assist the Government of Bolivia in developing: (a) a unified and well trained civilian police force capable of providing necessary public services in a humane, non-partisan manner so that the government, the private sector, and the public in general, can concentrate on their duties and daily life. As the country experiences more stability, this should result in an increased rate of economic progress; and (b) an effective GOB narcotics control capability.

2. Measurement of Goal Achievement

a. A civilian police force of approximately 8,500 officers and enlisted men with the three major branches of the police force, uniform police, traffic police, and detectives working in coordination under the National Commander, compared to 7,650 officers and enlisted men in June 1973 working independently in their 3 police areas.

b. Violence characteristically manifested by riots, terrorist activities and insurgency is contained and maintained at a low, non-threatening level.

c. The community's needs relative to the protection of life and property are effectively served. The citizenry is permitted to live and function freely within the community; businesses are permitted to operate openly and safely.

d. Common disorder, measurable by the incidence of common crimes and general state of lawlessness, is minimized and remains controllable at a level of about less than .9 percent per 1,000 inhabitants.

e. Increased effectiveness on the part of the GOB National Police Force and the Narcotics Unit to implement its narcotics control program.

3. Basic Assumptions

a. The Bolivian Government continues to support the development of their civil police by increasing their budget as well as by promoting the adoption and implementation of professional, humane police concepts and practices.

National Police Budget	<u>1971</u>	<u>1972</u>	<u>1973</u>
	\$b 59,749,400	\$b 83,127,900	\$b 122,316,500
	equiv. US\$ 4,979,117	equiv. US\$ 6,925,658	*equiv. US\$ 6,158,250

est.	<u>1974</u>	<u>1975</u>	<u>1976</u>
	\$b 160,000,000	\$b 210,000,000	\$b 260,000,000
	equiv. US\$ 8,000,000	equiv. US\$ 10,500,000	equiv. US\$ 13,000,000

*Bolivian peso devaluated 10/27/72 from 12 to 1 to 20 to 1 US.

PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL <input checked="" type="checkbox"/> REVISION <u>1</u>	(Number)	DATE 7/19/73	PAGE <u>4</u> of <u>12</u> PAGES
-------------------------------	---	----------	-----------------	----------------------------------

b. Social and economic realities will not contribute to a major internal security threat which would overly tax civil police resources and abort the development processes.

c. The GOB will keep the police institution free of political influence and/or control.

d. The GOB will continue its recently initiated move to separate strictly criminal detective work from political investigations, allowing for greater future USAID assistance to the detective branch of the police (D.I.N.).

e. The National Police Academy, previously established with USAID assistance for training officer level personnel of the police, will continue its excellent cadet training.

f. The National Police will continue its present capability for general police equipment repair.

B. Project Purpose

1. Statement of Purpose: (a) To establish radio patrols in 8 major cities of Bolivia, a training system for enlisted personnel, and basic response capability on the part of the civil police force in 8 major cities to control civil disturbances/ and common crimes, and (b) to improve the capability of the GOB Narcotics Control Unit to implement its narcotics control program.

2. Conditions Expected at the End of Project (1976)

a. Radio patrol service in La Paz, Cochabamba, Santa Cruz, Oruro, Potosí, Tarija, Sucre, and Trinidad able to respond within 5 minutes to any emergency call, day or night.

b. Centralized vehicle maintenance in each of the cities for minor repairs and major overhaul capability in La Paz with a maximum downtime of 10 days.

c. Repair facilities in La Paz for telecommunications equipment and other police material.

d. Ability of the Bolivian police to develop their own human resources thru:

- A fully operational recruit level and in-service training school.

- Three mobile training teams composed of 5 men each spending 6 months each in the field.

- The yearly training of 400 enlisted personnel at the training center and 600 through mobile training units.

e. A restructured civilian police force resolving management difficulties in operations and training. The present three police services, uniform, traffic, and detectives will be unified under a National Police Commander.

f. A 500 men civilian riot control force in La Paz capable of controlling all disturbances short of full scale revolutions and/or coup d'etats.

g. A nominally equipped core of 10 to 20% of the uniformed police force in the 7 major interior cities trained in riot control.

h. An awareness on the part of officer and enlisted personnel of human rights and police/community relations.

i. A strengthened GOB Narcotics Control Unit with adequate staff properly trained to implement the Narcotics and Dangerous Drugs Control Plan.

3. Basic Assumptions

a. The GOB will budget for and provide resources for necessary follow-up spare parts for vehicles and radio equipment.

b. The GOB will continue to support and budget for the declared programs of Police Administration and Organization, Police Operations, Police Training, and Narcotics Control.

PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL <input checked="" type="checkbox"/> REVISION <u>1</u>	(Number)	DATE 7/19/73	PAGE <u>6</u> of <u>12</u> PAGES
-------------------------------	---	----------	-----------------	----------------------------------

C. Project Output

1. Kind of Output

Police Administration and Organization

A restructured Police organization which promotes closer institutional coordination and can resolve management difficulties in operations and training.

Police Operations

Responsive urban radio patrol service in La Paz and in the major cities of the interior.

Centralized vehicle maintenance in La Paz to include major overhauls.

Minor vehicles repair capability in other cities.

Centralized telecommunications maintenance.

Specialized riot control capabilities in La Paz and interior areas.

2. Magnitude of Output

Enactment/adoption of appropriate Organic Law which reorganizes and unifies the police services by early FY 75 and total implementation of the law by the end of FY 76. (Although this output is dependent on the GOB, the USAID will continue to encourage prompt enactment of the law which has been drafted and is under study by the Ministry of Interior before submission to the President.)

Radio equipped urban patrol vehicles by end of FY.

	73	74	75	76	Total
La Paz	15	5			20
Cochabamba	1	1	2		4
Santa Cruz	2	1	1		4
Oruro	1	1	1		3
Potosí		1	1		2
Tarija & Border Area		1	2	1	4
Sucre		1	1		2
Trinidad		1		1	2
Totals	19	12	8	2	= 41 <u>1/</u>

A central facility constructed, staffed, equipped, and fully operational by the end of FY 74.

By the end of FY 75 the 7 other cities mentioned above should be able to keep their vehicles in good operation. By the end of FY 74 Cochabamba and Santa Cruz able to keep their vehicle in good operation. Other 5 cities, by end of FY 75.

A central telecommunications maintenance facility in La Paz by end of FY 75.

A 500 man special task force trained and equipped to serve La Paz by the end of FY 75. (There are presently 250.)

1/ 30 with AID funding and 11 from GOB and/or other donors.

Other Cities

Cochabamba	50 men	FY 75
Santa Cruz	50 men	FY 75
Oruro	50 men	FY 75
Potosí	25 men	FY 75
Tarija	30 men	FY 76
Sucre	20 men	FY 76
Trinidad	25 men	FY 76

Police Training

Bolivian police able to develop their own human resources.

2,000 enlisted police personnel trained in basic police operations, including narcotics orientation and riot control, as follows:

Fully operational recruit and in-service school.

Enlisted personnel receiving training at recruit and in-service training center:

400 in FY 76

Mobile training teams and police curriculum established.

Three mobile training teams, each operating six months a year. Personnel trained:

400	FY 74
600	FY 75
600	FY 76

Improved awareness in human rights and police/community relations.

By the end of FY 76, ten key senior officers and executives trained in the U.S. A nucleus of 30 mid career officers trained in U.S. and serving as instructors, of which 9 have been trained and 21 will be trained during the life of the project.

3. Basic Assumptions

- a. USAID Public Safety assistance is provided at the proposed level.
- b. Sufficient technically qualified Bolivian officers will be available to send for training and staff training center and the mobile training units.
- c. Physical facilities such as maintenance and training centers are provided as planned.

2. GOB

The Bolivian Government provided 11 vehicles in FY 73 at a cost of \$28,000 and will provide under this project all required training and maintenance facilities by July 1975. It will also furnish financial and commodity support to the training courses where possible, and will provide qualified instructors for the mobile training teams and the recruit school.

3. Other Donors

Brazil and Argentina: Some commodity assistance such as police helmets and revolvers and third country training by means of scholarships at a yearly cost of \$20,000.

Venezuela: Third country training by means of police scholarships at a yearly cost of \$10,000.

4. Basic Assumptions

a. The Bolivian Government will increasingly provide financial and material support to the police to achieve the goal, purpose, and output of this project.

b. Qualified participants are still available to undertake U.S. training.

c. U.S. resources are granted as proposed in this PROP.

E. Rationale

Frequent changes in government through revolutions and coups have kept Bolivia in a state of turmoil for many years and these changes have greatly set back past efforts to assist and improve the civil police. Such was the case in the revolution of November, 1964 when the military stripped the police of most of their equipment, including vehicles and weapons, after which the Public Safety Program was suspended. The program was again reinstated in August 1967 and suspended in 1969 due to the recalcitrant government's attitude. Following the request of the GOB, and a survey of police needs in May 1970, a modest Public Safety program was re-established in FY 1971. This program had as its primary objectives the creation of an effective radio patrol system for the capital city of La Paz and other major cities, and the training of troop level personnel plus organization of an effective civil disturbance control unit. Requisition of jeep vehicles and training of personnel in basic patrol and riot control techniques were undertaken, but major changes in personnel and the consequent restructuring of the police institution which occurred following the revolution of 1971 caused delays in meeting the set objectives.

Now that the restructuring is completed, the government has shown interest and a willingness to develop the kind of professional police institution that can be a humane, liberal and stabilizing force, and at the same time can be the government's first line of defense against the continuing threat of urban and rural insurgency.

PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL <input checked="" type="checkbox"/> REVISION	(Number) 1	DATE 7/19/73	PAGE 10 of 12 PAGES
-------------------------------	--	---------------	-----------------	---------------------

The GOB, through the Ministry of Interior, has made it very clear that it appreciates and needs the continuance of the modest Public Safety technical and commodity assistance as has been provided the past three years. The GOB is contributing, within its means, some vehicle and additional police equipment, but does not, at the present time, have the financial resources to provide the commodities and training called for in this PROP. The resources provided under this project are required to supplement the limited resources available from the GOB's budget until 1976 at which time the budget should be \$260,000,000. This should be sufficient to cover their needs.

Bolivia, as a major source of cocaine, also presents an international narcotics enforcement problem which requires a broad internal total police response and which is in the interest of the United States to support. The efforts of the two U.S. technicians requested under this PROP will also be directed toward overseeing the training and commodity administration called for in the Country Team's Narcotics Action Plan.

The Country Team's position on Public Safety was stated in the 1974-75 CASP, as follows: "An area of U.S. concern which has received and will continue to receive our closest attention is our interest in interdicting the export of narcotics and dangerous drugs to the U.S."

"To assist the GOB in improving the capability and professionalism of its police forces, both for general police activities and more specifically for narcotics enforcement, we have recommended that the USAID Public Safety Program be continued....."

F. Course of Action

I. Implementation Plan

The Public Safety Project will emphasize the following:

- a. Extension of effective/^{urban}radio patrol service throughout the country,
- b. Establishment of a recruit level police school,
- c. Establishment of a centralized vehicle maintenance center in La Paz,
- d. Extension of police basic training to the interior by means of mobile training teams,
- e. Improvement of the civil disturbance control capability of the National Police, through the technical assistance of two Public Safety Advisors and the necessary commodity and training support requested.

Both advisors will also assist with the Country Team's Narcotics action plan and will administer its commodity and training requirements. All training anticipated at all levels will include narcotics control orientation.

The senior advisor will assist GOB officials in planning, implementing, and liaison to assure that in-country training projects are conducted as scheduled. He will advise on the better utilization of all personnel within an improved organic structure.

The training advisor will supervise and assist in all in-country training programs at all levels. He will advise on all participant, commodity, and maintenance matters.

II. The Government of Bolivia will provide all the resources necessary to carry out this project. These will include adequate police salaries and financial support for the in-country training effort.

III. U.S. Participant Training at the International Police Academy (Washington, D.C.) for FY 74.

1. General course with the following specialized training. (7 officers)

a. Patrol Operations - 2 National Guard Officers:

Because of the GNSP expanding its motorized patrol services into the interior: Cochabamba, Santa Cruz, Potosí, Tarija, Sucre, and Trinidad, and Oruro, it is felt that the sending of one officer from La Paz and one from the interior is essential. Two other officers should attend to this course in FY 75. (Two in FY 75, one in FY 76)

Upon their return from IPA each officer would be responsible for reorganizing the patrol procedures and operations making the Patrol Division more effective, in their respective cities. Each of these officers would also be required to assist the Mobile Training Units in instructing troop level personnel in modern Patrol Operations Techniques.

b. Traffic Specialization - 1 GNSP Officer:

Not since 1963 has a GNSP Officer attended such a specialization course. One officer should attend this specialization in order that he may learn the latest techniques re: Traffic Control. Knowledge acquired not only pertains to every day normal traffic conditions, but to traffic control under abnormal conditions such as fires, disasters, civil disturbances, etc. The officer upon his return to Bolivia would be expected to help the GNSP update its traffic regulations, as well as to assist the National Police Academy revise their Traffic Curriculum and assisting in preparing lesson plans for troop level training. (One in FY 75, one in FY 76)

c. Instructor Methods - 2 Officers:

These officers upon their return from IPA would be expected to be permanently assigned to the mobile training teams going into the interior for training of troop level personnel. They would be required to teach subjects not being covered by other specialized personnel. (Two in FY 75, one in FY 76)

PROJECT NO. 511-11-710-091	SUBMISSION <input type="checkbox"/> ORIGINAL <input checked="" type="checkbox"/> REVISION <u>1</u>	(Number)	DATE 7/19/73	PAGE <u>12</u> of <u>12</u> PAGES
-------------------------------	---	----------	-----------------	-----------------------------------

d. Criminal/Security Investigation - 1 Officer:

This officer upon his return from IFA would be expected to be permanently assigned to the mobile training team going into the interior for training of troop level personnel. He would teach Preliminary Investigation and Crime Scene protection. (One in FY 75, one in FY 76)

e. Police/Community Relations - 1 Officer:

The GHSP has had no training in such areas as this. Since the image of the GHSP has been changing from that of a suppressive organization to that of a benevolent one since the initiation of the mobile patrol units, an officer should attend this course in order to study the role the police must play in society, this course also includes police/press relations. The officer would be required to instruct both cadets and troop level policemen in this material. (Two in FY 75, one in FY 76)

2. Senior Officer Command Course - 2 Ranking Officers:

A 14 week high level course dealing with Police Organization, management, operations, planning and research with modern concepts of Police/Community and Public Relations. (Two in FY 76)

To date only two ranking Bolivian police officers have attended this course.

3. Technical Investigations Course (T.I.C.) - 2 Officers:

Since there is the constant threat of terrorists activities in Bolivia, 2 officers are recommended to attend this course, which specializes in the handling and dismantling of home made explosives. At the present time there is only one qualified police officer to handle the dismantling of explosives. Upon return to Bolivia these officers would not only assist the present explosive expert, but would also give instruction to all levels of the GHSP re: what preventative measures should be taken to protect lives and property until an explosive can be neutralized.

4. Police Executive Training (Leadership Grant) - 2 Senior Officers:

This program is designed for police executives who, due to lack of time only, are unable to attend the Senior Officer Course. The program acquaints these executives with police systems and practices in the United States and can be tailored to the specific needs of the host government. (One in FY 76)
