III. INTRODUCTION

This report is prepared in three volumes. Book I presents a summary and evaluation statement of the program, some discussions of the factors leading to its termination, the probable effects on the Cambodian economy of the termination, recommendations in the event any future economic aid to Cambodia should be contemplated, and lastly, a description of the actual operations involved in closing the Mission. Book II presents a more detailed description and evaluation of the program by field of activity and individual project.

This Book (III) provides the available financial and statistical summaries of the program from its inception until its termination. The data contained in this book have been derived from a variety of sources. While they have been reviewed by the USAID Controller neither time nor staff were available for detailed verification with the records of the Controller's Office. Should there be differences between the data presented in this report and official reports of the Controller's Office, the latter should be accepted as correct.

In view of the large number of individual projects, sufficient financial summaries for each project in the program were prepared for only ten copies of Book III. They appear in copies 1-10.

K. SPECIAL FINANCIAL SUMMARY Total project program obligation and anticipated obligation as of November 20, 1963.

The following financial summary presents the entire project program in one schedule. It also includes the future funding requirements for each project as anticipated when the program was terminated and the project opening and closing dates. The sector organization of the program in this summary is according to the standard established by AID/W and differs slightly from the summaries above which are organized in accordance with the actual organization of the program as it was being implemented. This difference is not major, however, and applies principally to the grouping of a relatively small number of projects in several sectors only, and to the sector titles.

The numbers of participants and man/year figures are estimates due to the lack of detailed records for the early years of the program. Needless to say, the anticipated future funding requirements are also estimates.
