

MILESTONE REPORT
CONTRACT NUMBER : 263-C-00-99-00017-00

To: Brenda Doe
Cognizant Technical Officer
USAID Mission to Egypt

CC: Cynthia Judge
Contracting Officer
USAID Mission to Egypt

From: Stephen Croll 
Deputy Chief of Party

Date: June 26, 2002

Task Number : 4

Task Description : *Service Environment and Delivery Enhanced in the Public and NGO Sectors*

Milestone No.: 4.4

Milestone Description: **Needs assessment for renovations and equipment identified and renovation and procurement completed.**

Source of Verification: **Commodities procurement plan document and renovations plan document.**

Planned End Date: **January 31, 2000**

Status: **Completed**

Task Number : 10

Task Description : *FP/RH Curricula for Undergraduates and House Officers Developed and Implemented in Medical Schools*

Milestone No.: 10.1

Milestone Description: **Necessary equipment, supplies, materials in place.**

Source of Verification: **Purchase requisitions, invoices.**

Planned End Date: October 31, 1999

Status: Completed

Task Number : 12

Task Description : *Partner Organization Planning and Management Systems Strengthened and Decentralized*

Milestone No.: 12.1

Milestone Description: Detailed commodities procurement and renovations plans, including management, procurement delivery and installation of all equipment and commodities plans complete.

Source of Verification: Commodity procurement plan document and renovations plan document.

Planned End Date: July 31, 2000

Status: Completed

Task Number : 12

Task Description : *Partner Organization Planning and Management Systems Strengthened and Decentralized*

Milestone No.: 12.2

Milestone Description: Equipment, materials and renovations in place in selected public, private and NGO sector sites.

Source of Verification: Commodity procurement plan document and renovations plan document.

Planned End Date: July 31, 2000

Status: Completed

Comments: The above four milestones are directly related to each other and have been accomplished together over the course of the project. The POP IV contract envisioned a process whereby the needs of implementing agencies and organizations would be approached in a holistic manner. This meant that not only would

technical assistance be provided, but that equipment and materials would also be provided to allow the counterparts to work more efficiently and effectively and to provide higher quality services for their clients.

The four milestones look at different areas of the Egyptian national family planning program. Milestone 4.4 focuses on the service delivery aspect—MOHP and NGO (CSI) service delivery sites equipped and improved. Milestone 10.1 focuses on the medical schools—providing equipment and renovated sites to better train students and interns. Milestones 12.1 and 12.2 focus on equipment and renovations to facilitate better planning and management.

Milestones 4.4, 10.1 12.1 and 12.2 Procurement of Equipment, Materials, and Supplies and Renovation

Because of the vast scope of the procurement of equipment and materials, Pathfinder hired an US-based procurement agent, American Manufacturers Export Group (AMEG) to assist with the procurement process. AMEG managed the entire process under the direction of the Deputy Chief of Party and, more importantly, the meticulous eye of Abdalla Soliman, the project's office manager, and Farouk Ihsan, the project's expeditor. Mr. Ihsan was responsible for managing the in-country customs clearance and delivery process, and working with Zust-Bachmeier, the local firm hired to handle delivery to the various sites around the country. Much credit is due to Mr. Soliman, whose involvement assured that the each counterpart received the material requested and that any problems were rapidly resolved.

The *Needs Assessment & Procurement Plan for Equipment and Material* (attachment 1) was conducted in the summer of 1999 among all the counterparts (MOHP, SIS, NPC, RCT & CSI) except the medical schools. Magdy Khaled, the Training and Medical Education Advisor, conducted the needs assessment for the 14 public sector medical schools (attachment 2).

With no budgetary guidelines provided, the initial needs assessment identified over \$130 million of materials that were desired by the counterparts. This "wish list" of supplies was the source of much discussion between Pathfinder, USAID and the various counterparts. Once the budget was clearly outlined to the counterparts, this list was reduced to a figure under \$5.2 million.

Attachment 3 is the finalized procurement list, which was reviewed and agreed to by all counterparts, along with the approval letter from USAID. Attachment 4 contains invoices for the purchase of the items on the list. Because the volume of documents related to the competitive bidding is huge, only the *pro forma* invoice is being submitted with these milestones. Back-up documentation is available at the offices of both Pathfinder and AMEG.

Attachment 5, *Pathfinder POP IV Procurement List with Delivery Dates (sorted by recipient)*, is a variation of attachment 3 and contains the details of the final procurement, along with information about changes that occurred during the process. This list provides the most detail about items that were procured, what they cost, and when they were delivered. Any changes that occurred in the process are documented on the list.

Attachment 6 contains copies of all the delivery receipts.

What follows is a discussion of the primary aspects of the procurement, delivery and renovation process as they relate to each milestone.

Milestone 4.4

The POP/FP IV contract envisioned a process whereby USAID, through the Contractor, would upgrade all elements of service delivery—through improved service provider skills, improved access to commodities, and an improved environment. Milestone 4.4 focuses on improving the service delivery environment within the public sector.

Describing Task 4, the POP/FP IV contract states “TA will be provided to identify renovations and equipment to support added services. Minor renovation and equipment needed in public sector facilities, district level MOHP FP/RH offices, MIS offices, and training centers will be funded by the MOHP using PIL-based local cost financing. It is the role of the Contractor to assist the MOHP to identify the renovations and equipment needed, to procure, distribute and install equipment, and to manage renovations.”

Attachment 1 outlines the process through which needs assessment took place. Renovations were managed and funded directly by the MOHP. Funds for the renovations were provided primarily by USAID through a PIL mechanism. Laila Kamel, Pathfinder Quality Services Advisor, was involved in much of the initial discussion concerning renovations. However, the Ministry insisted on control and ultimate management of the process.

Attachment 5 shows all equipment, supplies and other material purchased for the counterparts. Included in the MOHP and CSI portions of the list are the service delivery materials purchased—medical supplies and instruments, expendables, and related materials.

Milestone 10.1

This milestone relates to provision of equipment and supplies for the 14 public sector medical schools. The POP IV contract identifies the activities under this milestone as designed to “support renovation as needed and provide partner medical schools with basic equipment and materials to support the provision of quality FP/RH services to clients”.

The Training and Medical Education Advisor worked with deans from the obstetrics/gynecology departments within the medical schools to identify and standardize needed supplies and equipment. The needs assessment list is contained in attachment 2. Attachment 5 contains the finalized list of deliveries to the schools.

The process of organizing the renovation of medical school family planning clinics was complicated and difficult due to the myriad parties involved—contractors, universities, hospitals, etc. Salwa El Khatib, Pathfinder’s Financial Manager, managed the process—subcontracting, negotiations, financial set-up, and oversight. Although all 14 medical schools were offered funds to support the renovation of their family planning clinics, in the end only six were renovated.

Pathfinder decided to utilize the clinic renovation and management skills of CSI in managing the renovations of the schools FP clinics. The Egyptian Fertility Care Society (EFCS) conducted an initial needs assessment at each of the 14 schools. Pathfinder then developed a contract with CSI under which they did a detailed assessment the renovation needs at each facility and managed the construction firms/contractors who performed the renovation. Scopes of work for the activities are included as attachment 7.

The status of renovation at the schools is as follows:

I. Needs Assessment

A. Introduction and Background

The purchase and delivery of equipment and materials is one of the most important parts of POP/FP IV and timely arrival of the appropriate commodities is of crucial importance to the success of the undertaking. In order to accomplish the above, Pathfinder subcontracted the performance of the "Needs Assessment" and procurement related functions to American Manufacturers Export Group (AMEG).

AMEG is responsible for performing the expedited needs assessment and drafting a procurement plan. The needs assessment, conducted during the early stage of project start-up and prior to initiating procurement, broadly identifies commodity needs in all implementing organizations.

AMEG initiated the "Needs Assessment" preparations in May from its home office in Houston, Texas. AMEG has an extensive in-house commodity reference and specification library for similar type procurements that has been assembled over the years. The AMEG Needs Assessment team collected commercial catalogues, professional journals, and other technical materials that would be needed to assist the Egyptian family planning organizations identify their equipment and material requirements.

On June 14, 1999, the AMEG Needs Assessment Team arrived in Cairo, Egypt. The team included J. Wess Tribble, Executive Vice President of AMEG, Brandon Blackwelder, AMEG Vice President for Operations, and Dorothy Bazos, AMEG Public Health Specialist. There was a general introductory and informational meeting with the Pathfinder Chief of Party, Dr. Waleed Al Khateeb. The team was introduced to Thomas Burola, Pathfinder Deputy Chief of Party. Mr. Burola was responsible for serving as the liaison between the AMEG team and the counterpart Egyptian family planning organizations, arranging meetings, providing logistics and administrative support for the effort.

B. Chronology of Meeting, Contacts, Field Trips

1. **DATE:** June 14, 1999
LOCATION: Pathfinder, Egypt
TIME: 10 am
PARTICIPANTS: Dr. Waleed Alkhateeb, Chief of Party/Pathfinder
Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Brandon Blackwelder,
Dorothy Bazos

a. **Objective**

General Introductions

Introduction to goals and objectives of Pathfinder Pop IV Project overall, and particularly in regard to this procurement initiative.

b. **Highlights**

Priorities for procurement initiative were established. Assessment and procurement of Administrative equipment and furniture for the Pathfinder, Egypt office is to take first priority and is to be accomplished as quickly and efficiently as possible. Concurrently the AMEG team will be meeting with all Pathfinder counterpart (field) agencies to assess their needs for equipment and supplies.

In-country support (counterpart capacity for training, maintenance, and utilization) will be carefully considered for all procurement of equipment and supplies.

c. **Outcome**

A plan of action for assessing the needs of counterpart agencies was agreed upon. Thomas Burola will establish meetings with all lead counterpart agencies and attend these meetings with the AMEG team. Counterpart agencies will be encouraged to define needs over the next several days. A series of meetings will follow with each counterpart agency and AMEG until a final list of needs is established for each agency.

2. **DATE:** June 14, 1999
LOCATION: Pathfinder, Egypt
TIME: 1 PM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Brandon Blackwelder,
Dorothy Bazos

a. **Objective**

Develop a plan for assessing the needs and procuring administrative equipment and supplies for the Pathfinder Office, Egypt.

b. **Highlights**

Various officers of the Pathfinder Team have been assigned responsibility for a portion of the administrative needs assessment. The AMEG team is to work closely with these officers to develop a procurement plan as quickly as possible:

MIS:

Luigi Jaramillo

MIS and Contraceptive Logistics Advisor

**Dr Safa Elbaz , Executive Director
The Regional Center for Training in Family Planning
and Reproductive Health
Ain Shams University: e-mail: rct@rct.edu.eg**

a. **Objective**

This is an initial introductory meeting for the purpose of meeting Dr Safa Elbaz and explaining our need to ascertain her needs for equipment and supplies as soon as possible.

b. **Highlights**

Dr Safa provided a brief summary of the goals and objectives of the Regional Center for Training (RCT). This public sector training center was established in 1988 and was funded by USAID until 1995. Starting in October 1995, USAID funding was decreased to 70% with USAID funding all equipment and furniture. The Government of Egypt (GOE) funds electricity, water, and the outpatient clinic building operations. The RCT is located in the OB/GYN section of Ain Shams University Hospital. This is a public teaching hospital with a 700 bed capacity. Care here is free. The Family Planning (FP) clinic sees about 1400 women/month . The main work of the RCT is to train physicians, nurses, social workers etc in the methods of FP practice. Outpatient clinic clients are the customer of the FP clinic. The RCT is the training institute for the Ministry of Health (MOH), the Clinical Services Improvement Project (CSI). Dr Safa provided us with a tour of her administrative offices and of her clinic.

From touring the facility it is clearly apparent that the entire clinic needs to be upgraded. Clinic exam rooms are dark, dingy and damp. Exam tables are very old, sometimes torn and dirty. Sterile soaks are done in very old, discolored plastic basins on rickety stands. There are no cupboards at all. Instruments are made in Pakistan and are autoclaved at the main hospital center. This is a problem for Dr. Safa as she has no control on when her instruments will be returned to her clinic, thus she would prefer to have a small autoclave in her clinic. In order to be able to tell if a newly trained physician or nurse is inserting IUDs properly, Dr Safa has requested an ultrasound. Presently she sends her clinic patients to the x-ray department of the hospital to have positioning checked. However, since clients have to pay for this and since the x-ray department is not easily accessible, most clients do not follow up with this procedure.

There is a need for audiovisual equipment as well as for new training models. The models that are currently being used are old and torn. At a bare minimum the training center will need new torso models, a torso model with a transparent abdominal section , breast exam models. A needs assessment for MIS equipment has already been initiated at the RCT and Dr Safa provided us with a draft list of computers and equipment needs.

c. **Outcome**

AMEG provided Dr Safa with information regarding equipment for her clinic, lab and offices. In addition Dr Safa was provided with a standard list of equipment and supplies that was developed by USAID/Jordan to upgrade FP clinics there. The opportunity to establish a "standard" for clinics was discussed. It was agreed that having the same basic equipment at the RCT, CSI and MOH would facilitate and expedite training and performance of professionals. A follow up meeting was scheduled.

8. **DATE:** June 20, 1999
LOCATION: CSI: Clinical Services, Improvement Project, Egypt
TIME: 12:30 PM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Dorothy Bazos
Mohamed Edress, M.D., Executive Director CSI
Sanaa Helmi, MD, Assistant Executive Director CSI
CSI Staff

a. **Objectives**

Introductions and initial needs assessment

b. **Highlights**

CSI overview: CSI is an NGO started in 1988 with work focused on FP and Reproductive Services. Presently CSI has 90 centers located in rural and urban areas of both upper and Lower Egypt. It has no presence in Cairo. CSI is affiliated with the GOE FP organizations. CSI's goal is to become an independent institution and they are looking to POP/FP IV for support to facilitate this change. CSI has an executive committee of 11 members, all specialists in their fields (policy, FP, etc). There is a central headquarters in Cairo, 14 management offices and 90 centers. Each center employs one female physician. A senior physician oversees several centers. 25 of the centers have laboratory services. CSI maintains agreements with the MOH. Presently CSI centers see between 12.4-14.1 clients/day. The goal is to see 17.5 clients/day. CSI has an aggressive outreach program. At each center basic family planning services are offered (contraceptives, counseling). It is the hope of the directors that CSI will be able to expand their services to include midlife counseling (menopause), antenatal care, medical check-ups, STD counseling and screening, and fertility testing and follow-up. CSI depends on the RCT for technical training of their staff.

c. **Outcome**

Although CSI does not yet have a finalized plan for procurement they were able to prioritize their needs: 1) vehicles (3-4 vans), 2)ultrasound equipment (30-40), 3)VCR and TV, 4)medical kits. The assistant director of CSI explained that ultrasound was needed in order to attract clients to CSI clinics. Many other (even public sector providers) offered these services, thus the service has become expected by clients. A follow up meeting was set to finalize procurement needs.

9. **DATE:** June 21, 1999
LOCATION: SDP Project, Ministry of Health, Egypt
TIME: 11:00 AM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Dorothy Bazos
Dr. Mashira, Director
Dr. Yehia El Hadidi
Josephine Youssef, Consultant, Financial Management
MOH, STP Staff

a. **Objective**

Informational and introductory meeting: AMEG and Pathfinder agree that it is imperative for us to meet with Dr. Misara and learn what her priorities and objectives are for this procurement effort.

Medical Schools Clinics Renovation Status Report

| <i>Medical School</i> | <i>Status</i> |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| 1 - Cairo, Kasr El Einy | Completed. |
| 2 - Alexandria | Completed. |
| 3 - Zagazig | Completed. |
| 4 - Assiut | Completed. |
| 5 - Tanta | Completed. |
| 6 - Menia | Completed. |
| 7 - El Azhar for Boys | Hospital renovated by university. FP clinic renovated during hospital renovation. |
| 8 - El Azhar for Girls | Hospital renovated by university. FP clinic renovated during hospital renovation. |
| 9 - Suez Canal | Hospital renovated by university. FP clinic renovated during hospital renovation. |
| 10- Mansoura | Hospital renovated by university. FP clinic renovated during hospital renovation. |
| 11- Benha | Cancelled due to inappropriate available clinic space. University could not provide space that could be renovated into FP clinic. |
| 12- Sohag | Cancelled due to inappropriate available clinic space. University could not provide space that could be renovated into FP clinic. |
| 13- Menofia | Cancelled due to inappropriate available clinic space. University could not provide space that could be renovated into FP clinic. |
| 14- Ein Shams | Cancelled due to inappropriate available clinic space. University could not provide space that could be renovated into FP clinic. |

Milestones 12.1 and 12.2

These two milestones are flip sides of the same coin. 12.1 on the needs assessment and 12.2 focuses on provision of the equipment. Regarding milestone 12.1, the contract states: "The Contractor will conduct an expedited 'Needs Assessment' immediately after the contract award...the assessment will identify commodity and equipment needs in all implementing agencies. A detailed commodity plan will be developed and submitted to USAID for approval." A detailed procurement plan is included as part of AMEG's needs assessment (attachment 1). The detailed commodity plan is in attachment 3, along with USAID's approval of the items to be purchased.

The contract description of milestone 12.2 states: "The purchase and delivery of equipment and materials is an important part of the POP/FP IV project." Delivery receipts from each of the counterparts are included in attachment 5. As noted under milestone 4.4 above, renovations were managed at the MOHP's insistence almost entirely without the involvement of the Pathfinder team. The renovation status as of 31 March 2002, the last date for which a report is available, is included as attachment 8.

While most of the equipment and supplies delivered required no installation or set-up, there were some equipment items that required installation and training. Attachment 9 contains receipts for the installation of colposcopes, sonography equipment, the mammography machine, and In-focus projectors.

10. **DATE:** June 22, 1999
LOCATION: RCT, Egypt
TIME: 11:00 AM
PARTICIPANTS: AMEG Team: Wess Tribble, Dorothy Bazos,
Dr Safa Elbaz , Executive Director
The Regional Center for Training in Family Planning
and Reproductive Health
Ain Shams University: e-mail: rct@rct.edu.eg
Dr. Shawkat, Director Outpatient Clinic, OBGYN
Dr. Anwar, Administration/Finance

a. **Objective**

This is a follow-up meeting to our meeting of June 16. The purpose of the meeting is to begin to complete and refine the procurement needs for the RCT.

b. **Highlights**

The RCT requests that AMEG bring more medical catalogues into the country as they are not readily available to them and internet searches for equipment specifications are slow and difficult. In addition Dr. Anwar has requested AMEGs prospectus. Ultrasound equipment was discussed. Dr Safa thinks that most in Egypt are German made. Orascom does have some in country and is U.S. made. Dr Safa is to find specific machines that she likes and give AMEG the specifications so that they can match these for the procurement. AV and AC equipment needs still need to be assessed.

c. **Outcome**

Dr Safa and team will develop a needs list for ultrasound, AV and AC equipment. Dr Safa will also assess her need for a project vehicle. She has not felt that she has needed a vehicle in the past, however with USAID's move to the "desert" she feels that one vehicle would facilitate her communication and access to both Pathfinder and to USAID. AMEG will begin to refine the procurement specifications for the medical equipment. Communication during the next week for refinement of these lists will be by e-mail.

11. **DATE:** June 22, 1999
LOCATION: Pathfinder, Egypt
TIME: 3:00 PM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Dorothy Bazos,
Ahmed Amin, Xerox (0122166211)

a. **Objectives**

General introduction to SOW of Pop IV project especially in regard to need for Xerox equipment and procurement process. Assessment of Xerox capability for meeting administrative needs of the Project.

b. **Highlights**

Xerox 220 equipment is not made in the US. Thus, USAID has a blanket waiver to purchase copy equipment in-country. Since the estimated dollar value of two Xerox copiers is less than \$25,000 AMEG does not have to advertise this procurement. In this case procurement is competed by and RFQ (Request for Quotation). Bids are competed on price, in-country capability for support (must have local representation,

forward and would focus on presentation capabilities (TV, VCR, etc). SIS has funding directly from USAID for local procurement of AV equipment up to \$100,000. Production equipment has already been procured for this agency under POP/FP 111. SIS local information offices will need AV equipment for presentation.

c. Outcome

The AMEG team will meet with the director of SIS on June 27, 1999. This meeting will be a general introductory meeting. Mr. Hess will continue to work with SIS to develop specifications for their AV needs. SIS will be encouraged to develop a list of needs for all other equipment as soon as possible.

14. **DATE:** June 23, 1999
LOCATION: National Population Council
TIME: 4:00 PM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
Salwa El Khateeb, Finance/Pathfinder
AMEG Team: Wess Tribble, Dorothy Bazos,
Mr. Ibrahim El Etreby, IDP Project Director & First
Under- Secretary of NPC
Miss Manal ElFeky, IMS Manager
Mr. Ibrahim Zaky, IMS Specialist

a. Objectives

Introductory meeting to explain the procurement process to the NPC and to begin the process of developing their needs assessment.

b. Highlights

NPC has already completed an assessment of their needs for computer equipment. Thomas Burola explained the parameters of the procurement under POP IV and encouraged NPC to consider other needs such as for vehicles, AC, AV, furniture, training materials etc.

c. Outcome

A follow-up meeting date was set for Tuesday June 29 at 10am to refine and complete NPC's needs assessment.

15. **DATE:** June 23, 1999
LOCATION: Pathfinder, Egypt
TIME: 2 PM
PARTICIPANTS: Dr. Waleed Alkhateeb, Chief of Party/Pathfinder
Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG Team: Wess Tribble, Dorothy Bazos,
Pathfinder Team and all Consultants

a. Objective

Staff Meeting

b. Highlights

Overview and update of Project progress. AMEG provided a summary of our work in-country as of this date.

coordination effort would provide providers trained at the RCT with the same equipment and supplies they will be using when working for CSI. The need for a media-van for outreach was discussed. CSI would like to equip a van that could be self-contained with AV equipment (TV, VCR etc). The notion is that the van could be parked anywhere and opened up into a functional center for education and awareness training of consumers. Distribution of equipment and supplies for the 90 clinics under CSI was discussed briefly. A follow-up meeting with CSI is planned for July 6 to finalize a draft of their needs based upon the information they acquire from RCT.

NPC, Institution Development Project: Ibraheim El Itriby and Manal El Feki, Mr. Abdel Fattah Sayed (Training Director) and Mr. Kamel El Bashar (Strategic Planning): Although the NPC has done much work to begin to clarify their needs for equipment and supplies under this procurement initiative, they have requested more time to finalize a draft of materials needed.

18. **DATE:** June 30, 1999
LOCATION: Fayoum Governorate, Egypt
TIME: Day trip
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
Mark Schultz, Pathfinder
AMEG: Dorothy Bazos
Josephine Youssef, Consultant, Financial Management, SDP
- a. **Sites Visited:** Governorate Office
Dr. Abdel Raouf El Sayed Arafat,
General Director of Directorate
Dr. Mona Aziea, Family Planning Director,
Gynecologist
- Urban Medical Center
Hadka
Dr. Wafaa Victor
- Urban Medical Center
Senoures
Dr. Hazem Mohammed Bakri
- Rural Clinic
Dr. Hayam Ahmad Ismail
- MOH Training Center at the Directorate
- b. **Objective**
- At the suggestion of Dr. Mishira (SDP, MOH), the AMEG team and Thomas Burola, Pathfinder requested that Josephine Youssef facilitate site visits to both rural and urban family planning units in two different Governorates .
19. **DATE:** July 1, 1999
LOCATION: Alexandria Governorate, Egypt

these test kits. He now offers them at a very small price (50 piasters) and subsidizes the remainder of the cost himself.

- It was reported at several clinics that there are frequently there is a loss of electricity. When a physician is in the middle of a procedure (inserting an IUD), he must stop his work and wait for the electricity to return. The need for lights that would continue to burn for a short time when electricity is lost was established.
- Broken sterilizing or autoclave equipment results in inability to provide care. Since each clinic is provided a minimum of medical equipment (speculums etc.) it becomes impossible to continue to provide care if a sterilizer becomes non-functioning. The need for a back up piece of sterilizing equipment was identified.
- Record storage and retrieval are becoming a burden on the units. Presently client records are stored at each unit. Records are kept by hand. Client records are stored in four drawer file cabinets. There are no hanging files. The record keeping system poses two problems for clinic staff. First, in many urban clinics the records have become so numerous that having adequate space for storing them is an issue. In one small urban clinic the filing cabinets are full and records are stored in boxes. These boxes now take up about ¼ of the available clinic floor space. In addition to storage, retrieval of records is a time consuming task. Since there are no hanging files, folders containing client records are piled one on top of the other in all available drawers. Although clinic staff have a process in place for locating client records, this process will continue to become more time consuming and difficult as the number of files increases. Hanging files and an adequate number of filing cabinets might provide a cost-effective temporary solution for the present problem.
- Laundry: At several clinics the sheets used in the clinic are taken home by the staff and washed in their homes. Often this is accomplished by hand washing. In light of the need for infection control, the family planning directors should consider procurement of one washing machine at the level of each unit.
- Clorox Bleach is being purchased by the local staff at several of the clinics visited.
- Waste: The family planning units have no adequate means of getting rid of waste products. The need for an incinerator was discussed.
- Pap Smear: Although the RCT and new MOH Training Units are teaching about the need for annual pap smears, the clinics do not have the capacity to do the tests or have the tests read.
- Mammogram: The clinics teach women breast self-examination. It was mentioned in the Fayoum Governorate that mammogram was only available in Cairo.

20. DATE: July 5, 1999

a. Equipment and Supplies

maintaining and servicing copiers after they are purchased. We informed Xerox that the bid tender for copiers would be evaluated on lowest price as well as on ability to provide in-country service and maintenance as per US standards. Mr. Mohamed Fathy promised to send Pathfinder a written document explaining the in-country process of service and maintenance established for Xerox technicians.

21. **DATE:** July 6, 1999
LOCATION: CSI, Egypt
TIME: 9:30 AM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
AMEG: Dorothy Bazos
Dr. Mohammed Edrees, Director, CSI

a. **Objective**

The objective of this meeting was to finalize the list of equipment, supplies and furniture needed by the CSI organization under the POP IV Project.

b. **Highlights**

A draft list of items was presented by CSI to Pathfinder and to AMEG. These needs were discussed in detail in order to clarify and specify items. Pathfinder and AMEG were invited to accompany CSI staff on a field trip to visit one clinic. The purpose of this visit would be to educate AMEG and Pathfinder on the standards and level of service provided by CSI clinics. CSI was particularly interested in our understanding the importance of their standardization of process in regard to procedures for care and cleanliness, color scheme of clinics, and logo. Each of these factors has been developed to increase awareness of the CSI clinics and to link an image of quality to the logo and color scheme of the clinics.

c. **Outcome**

A field trip has been planned for July 8th. At that time CSI will give AMEG a final draft of their procurement requirement.

22. **DATE:** July 6, 1999
LOCATION: SIS, Egypt
TIME: 1 PM
PARTICIPANTS: Thomas Burola, Deputy Chief of Party/Pathfinder
Ron Hess/Pathfinder
AMEG: Dorothy Bazos
Salah Al Toukhi, Director, SIS

a. **Objective**

To finalize the assessment of needs for furniture, equipment and AV equipment for the SIS organization under the POP IV Project.

b. **Highlights**

Ron Hess was extremely helpful in focusing this meeting to a productive conclusion. A draft list of needs was discussed in detail, edited and corrected. Several items were identified as being missing from this draft and were included.

replacement. There is an inadequate number of file cabinets and photocopy equipment, fax, and computer equipment is old and outdated.

b. Specific Observations

The blue and white color motif in this family planning clinic is striking and should be preserved wherever possible for awareness and marketing purposes.

There is a TV in the patient reception area to provide clients with something to do as they wait for care.

There is a separate record storage room in the clinic. Client records are stored in vertical cubbies. Records are numbered and filed in numbered order with the Clients name on the cover of the record. Old records are stored in a separate storage room (which we did not see). Clients are given an identity card when admitted to the clinic. A master list of clients is kept by name and by record number.

Counseling materials have been standardized throughout the CSI system and the counseling method is presented to the client in picture format.

The gynecological beds preferred by the MDs are those which have a drop out piece at the bottom. Stirrups are not used except for anti-natal care.

The autoclave for an LMO clinic must be large. Boilers are seldom used

Desks should be raised on legs so as not to rot or rust due to methods used for cleaning the floors. The preferred color for desks is white.

Most of the furniture, including instrument supply cabinets are made and were purchased in Egypt.

24. DATE: July 8, 1999
LOCATION: Pathfinder / AMEG Offices

AMEG Team: Phase out process was organized between Dorothy Bazos and Brandon Blackwelder. A detailed debriefing was provided by Ms. Bazos regarding her field trips to counterpart agencies. Mr. Blackwelder will continue to collect any outstanding clarifications with counterpart agencies, begin gathering pricing for "Wants Lists", sort through administrative furniture specifications and provide a debriefing to Dr. Waleed regarding status of needs assessment. He will then return to AMEG/Houston to help finalize the Needs Assessment/Procurement Plan.

25. DATE: July 10, 1999
LOCATION: Marriott Zamalek
TIME: 7:00 PM
PARTICIPANTS: Tomas Grafe, Tamer Kadry (Zust Bachmier)
Brandon Blackwelder, Dorothy Bazos, AMEG
Team

a. Objective:
Meeting objectives were to familiarize a potential forwarding agent with overall project goals with specific concentration on the procurement element.

AMEG, discussed forwarding matters with Thomas Burola. AMEG provided consultation in regard to handling the disposal or storage of replaced items, consolidation and staging of project commodities, delivery schedules etc. MOH has their own warehousing and distribution set-up, however the other counterpart agencies would need turn-key services.

c. **Outcome:**

A meeting was schedule to introduce Thomas Burola to Zust Bachmier to further discuss project-shipping requirements.

28. **DATE:** July 13, 1999
LOCATION: MOH/SDP Ministry of Health, El Shaab St.,
Cairo
TIME: 10:30 AM – 3:00 PM
PARTICIPANTS: MOH/SDP: Ms. Josephine K. Youssef,
Dr. Ahmed Gasser
AMEG: Brandon Blackwelder, Dorothy Bazos

a. **Objective:**

To precisely clarify all medical requirement specifications and develop a master list to send to each of the 27 Governorates for approval.

b. **Highlights:**

Dr. Gasser is the newly appointed physician who will assist with clinical equipment specifications. AMEG provided numerous catalogs to allow Dr. Gasser and Josephine to sit with the AMEG team and go through the MOH list item by item in order to clarify equipment for each of the 27 Governorates. This was a very thorough process that was facilitated by Dr. Gasser's presence. Most of the glitches were due to equipment translations. For instance, the original list had a line item, which in its translation was simply called "Crocodile". AMEG was at a loss as to what this line item could possibly be. When asked, Dr. Gasser thumbed through the catalog and pointed to a pair of Alligator Forceps. We all had a good laugh at this. Dr. Gasser has a wonderful sense of humor. The meeting was four hours with no breaks however. This was probably the most productive meeting of the trip, since the clarifications would standardize lists from every counterpart agency.

MOH administrative equipment specifications required additional information (i.e. TV sizes, water fountain information, in-line water pump information etc.). Josephine agreed to work on these this week.

c. **Outcome:**

AMEG would prepare a reformatted specification list and send this list to Josephine for distribution to the 27 Governorates. The Governorates are to review the refined list for accuracy and apply quantities. Josephine is to return this list to AMEG prior to July 22nd.

30. **DATE:** July 15, 1999
LOCATION: Pathfinder Office
TIME: 10:00 AM
PARTICIPANTS: Orascom:
Mr. Kevin Struve (Manager Corp. Investments)
Talaat Nazeer (Projects Manager)

a. Meeting:

A meeting was arranged to explore the capabilities of Orascom / Egypt. Mr. Struve is an American who has worked for Orascom /US for a number of years and is now Manager of Corporate Investments for Orascom/Egypt. Mr. Struve is well versed on USAID procurement regulations and has agreed to assist with some budget pricing for the AMEG Procurement Report. Mr. Struve was asked about their subsidiary company IIS (International Integrated Systems). He said that they were a good sales company however, would not recommend them as a service provider. AMEG was quite surprised but pleased with his frankness, given the fact that IIS was actually owned by Orascom. Based on this information, Thomas Burola and AMEG will continue to search out other DELL certified service providers. Mr. Struve was a wealth of information as to what US vendors/competitors are still continuing to supply USAID Population Projects in Egypt.

b. Other Activities:

AMEG continued to clarify and consolidate specification lists. Contacted MOH to see how they were progressing. Josephine has distributed the lists to the 27 Governorates but has not had a response.

31. **DATE:** July 18, 1999
LOCATION: Pathfinder Office

AMEG met with Mr. Farouk Ihsan who is the Pathfinder administrative Consultant. Mr. Farouk will be in charge of coordinating customs clearance once commodities have arrived in Egypt. Mr. Farouk is very knowledgeable on the clearance requirement of GOE. He provided the same assistance for the POP III Project. A meeting was arranged between AMEG, Mr. Farouk and Tamer Kader of Zust Bachmier, Egypt.

AMEG met with Thomas Burola regarding administrative furniture and began specifying items from the LUI catalog. A decision was made to contact a local LUI rep in Houston so that they might assist with specifications and options. Pat Hluchanek, AMEG/Houston was contacted to begin this process.

Continued to work on counterpart specification files. Reminded MOH/SDP that we needed their clarifications and quantities for the 27 Governorates.

32. **DATE:** July 19, 1999
LOCATION: Pathfinder Office

Meeting with a certified DELL support provider by the name of Pan Arab Computer Center (PACC), Mr. Aly Ismail, General Manager. Mr. Aly was familiar with current

unique process for sterilizing supplies and equipment and different sterilizers were used in a unique way. It might be more cost effective and efficient in the future to consider the development of a standardized method of sterilization using one type of sterilizer. (The POP III standards recommend that each clinic have either an autoclave, or a hot oven, or a boiler).

Washing Machines should be considered for the clinics. The clinic staff in several clinics visited take the clinic laundry home for washing, often by hand.

The MOH has requested the purchase of many file cabinets. In order to use these cabinets efficiently for record keeping and retrieval, the MOH should provide clinics with an adequate number of hanging file folders.

200 ultrasounds were requested from the SDP project. A portable ultrasound costs between \$15,000-\$21,000 and may not have the capability to provide the sophisticated diagnostic and screening procedures that the MOH wanted to provide their clients. A standard, non-portable ultrasound costs about \$40,000.

Considering that there are almost 4,000 clinics, the quantity of basic equipment requested is relatively conservative.

2. RCT

Organization: The Regional Center for Training in Family Planning and Reproductive Health, Ain Shams University (RCT)

Contact: Dr Safa Elbaz , Executive Director

Phone: 2831956 – 23859422, Fax: 2825825, E-Mail: RCT@RCT.EDU.EG

Notes: Dr. Safa is a quiet very gracious woman. Her command of English is excellent. Much of our communication has been through e-mail.

The Regional Center for Training (RCT) is a public sector training center. This center was established in 1988 and was funded by USAID until 1995. Starting in October 1995, USAID funding was decreased to 70%, with USAID funding all equipment and furniture. The Government of Egypt (GOE) funds electricity, water, and the outpatient clinic building operations. The RCT is located in the OB/GYN section of Ain Shams University Hospital. This is a public teaching hospital with a 700 bed capacity. Care here is free. The Family Planning (FP) clinic sees about 1400 women/month . The main work of the RCT is to train physicians, nurses, social workers etc in the methods of FP practice. Outpatient clinic clients are the customer of the FP clinic. The RCT is the training institute for the Ministry of Health (MOH), the Clinical Services Improvement Project (CSI). Dr Safa provided us with a tour of her administrative offices and of her clinic.

Notes: From touring the facility it is clearly apparent that the entire training center and clinic needs to be upgraded. Clinic exam rooms are dark, dingy and damp. Exam tables are very old, sometimes torn and dirty. Sterile soaks are done in very old, discolored plastic basins on rickety stands. There are no cupboards at all. Instruments are made in Pakistan and are autoclaved at the main hospital center. This is a problem for Dr. Safa, as she has no control on when her instruments will be returned to her clinic, thus she would prefer to have a small autoclave in her clinic. In order to be able to tell if a newly trained physician or nurse is inserting IUDs properly, Dr Safa has requested an ultrasound. Presently she sends

order. Furniture (desks and chairs) is in good condition, although could be updated and/or freshened up.

At the Banha Center it appears that resources have been put into the client areas first and administrative areas last. Administrative desks are old and in need of replacement. There is an inadequate number of file cabinets and photocopy equipment, fax, and computer equipment is old and outdated.

Autoclaves, copiers, and microscopes were old and outdated, although functioning.

Although CSI has requested equipment and supplies that are congruent with POP III Standards, AMEG is concerned with the quantity of their requests. We understand they have 90 clinics and some mobile clinics. They have requested basic equipment and supplies for every clinic. TVs are used in client waiting rooms. In the clinic visited, the TV was functional.

The CSI is focusing much of their energy on outreach. Media Vans and data show would provide them with the means to expand this function.

CSI has stated that they will need ultrasound to make them more competitive in an expanding market and to provide total reproductive health services. Again, the level of technology needed should be carefully assessed, as this is a very expensive purchase (see MOH summary above).

4. SIS

Organization: State Information Service (SIS)

Contact: Salah Al Toukhi

Notes: Salah Al Toukhi has limited command of English. Ron Hess has been very helpful in assisting in the development of the procurement list.

Phone: 356-0560 354-5586, Fax: 355-6688 355-6722, E-Mail: NONE

Under POP/FP IV, SIS will be established as an IEC Resource Center and Clearinghouse for FP IEC materials as well as continue in its role of providing IEC support to the family planning program nationally. Ron Hess has taken the lead in assessing the need for furniture and equipment for this organization. In AMEG's opinion, he has been extremely conservative in doing so.

5. NPC

Organization: National Population Council, Institution Development Project

Contact: Manal El Fiki, IMS Manager

D.

E. Needs Analysis

Upon the return of the AMEG team to the U.S., a major effort was initiated to analyze and refine the information contained in the family planning organizations work sheets. AMEG technical staff employed their extensive years of experience to properly identify the items listed and ensure that a proper description was obtained.

A format was developed for the "Needs Assessment Master List" which provides spaces for insertion of information such as : item name, description, manufacturer, model, quantity, unit price, and extended price. Individual lists are compiled for each of the five counterpart family planning organizations.

After the items were sufficiently described to develop more detailed specifications, AMEG proceeded to collect pricing information. This work is highly labor intensive. In many instances, AMEG utilized cost data from similar procurements that were recently completed. Commercial catalogues containing published vendor pricing were scrutinized. In some cases, it was necessary to contact manufacturers and suppliers to obtain the price for certain items.

In such cases, AMEG solicited budget pricing based on indefinite quantities. The rationale for this approach was based on the fact that quantities are currently not fixed and budget resources are insufficient to cover needs. If certain line items are financed, we are confident that quantity discounts can be obtained.

The role of AMEG was to assist the Egyptian family planing organizations to identify the equipment and materials needed. There are five (5) individual family planning organizations that were surveyed. Since there were no budgetary guidelines or restrictions provided, it is not surprising that the "wants" far surpass POP/FP IV commodity financing resources. The estimated value of commodity needs by organization is:

| | |
|-------------------------------------|-----------------------|
| Ministry of Health (MOH) | \$ 118.4 Million |
| Clinical Services Improvement (CSI) | \$ 13.0 Million |
| State Information Services (SIS) | \$ 0.7 Million |
| Regional Center for Training (RCT) | \$ 1.2 Million |
| National Population Council (NPC) | <u>\$ 0.2 Million</u> |
| Total | \$ 133.5 Million |

The POP/IV budget for commodities and commodity related services is \$ 5.7 Million. Obviously, only a small percentage of the needs can be acquired through POP/FP IV. Other sources of financing may be solicited for procurement of other urgent needs.

In order to help determine which requirements might be most suitable for POP/FP IV financing, it may be useful to examine "big ticket" items:

| | |
|-----------------------------------|-----------------|
| 1. Ultrasound | \$ 47.4 Million |
| 2. Hot Ovens-Sterilization/Tables | \$ 8.3 Million |
| 3. Furniture-Administrative | \$ 8.2 Million |
| 4. Washing Machines | \$ 6.8 Million |
| 5. Electric Microscopes | \$ 6.4 Million |
| 6. Telephone Systems / Lines | \$ 6.4 Million |
| 7. Vehicles, Vans, 4 X 4 | \$ 5.1 Million |
| 8. Photocopy Machines | \$ 5.0 Million |
| 9. Cupboards-instruments/other | \$ 4.3 Million |
| 10. Pregnancy Test Kits | \$ 4.2 Million |
| 11. Beneficiary Card Box | \$ 3.6 Million |
| 12. Gynecological Bed | \$ 2.1 Million |
| 13. IUD Insertion/Removal Kits | \$ 1.6 Million |
| 14. Air Conditioners / Fans | \$ 1.3 Million |

The number of vehicles requested would almost equal the total project budget for commodities:

| Organization | Quantity | Cost |
|--------------|----------|--------------|
| MOH | 182 | \$ 3,603,600 |
| NPC | 2 | \$ 39,600 |
| RCT | 1 | \$ 19,800 |
| SIS | 20 | \$ 396,000 |
| CSI | 38 | \$ 1,040,200 |
| Total | | \$ 5,099,200 |

Assuming all the MIS equipment is approved for procurement and half the vehicles, the project budget for commodities would be:

| Organization | MIS | Vehicles | Total |
|--------------|--------------|--------------|--------------|
| MOH | \$ 688,925 | \$ 1,801,800 | \$ 2,490,725 |
| NPC | \$ 101,818 | \$ 19,800 | \$ 121,618 |
| RCT | \$ 32,855 | \$ 19,800 | \$ 52,655 |
| SIS | \$ 104,510 | \$ 198,000 | \$ 302,510 |
| CSI | \$ 80,875 | \$ 520,100 | \$ 600,975 |
| Total | \$ 1,008,983 | \$ 2,559,500 | \$ 3,568,483 |

Considering the differences in the primary mission of the five organizations and the influence on priority equipment needs, following is a hypothetical allocation for the projected \$ 5.7 million commodity budget:

| Organization | MIS | Vehicles | Other | Total |
|--------------|--------------|--------------|--------------|--------------|
| MOH | \$ 688,925 | \$ 1,801,800 | \$ 509,275 | \$ 3,000,000 |
| NPC | \$ 101,818 | \$ 19,800 | \$ 78,382 | \$ 200,000 |
| RCT | \$ 32,855 | \$ 19,800 | \$ 297,345 | \$ 350,000 |
| SIS | \$ 104,510 | \$ 198,000 | \$ 147,490 | \$ 450,000 |
| CSI | \$ 80,875 | \$ 520,100 | \$ 399,025 | \$ 1,000,000 |
| Total | \$ 1,008,983 | \$ 2,559,500 | \$ 1,431,517 | \$ 5,000,000 |

From the \$ 5.7 million commodity budget, \$ 700,000 would be held for transportation, maintenance contracts, contingencies, etc.

The hypothetical budget allocations above will finance all of the MIS equipment needs of the 5 organizations. It will finance half of their vehicles needs. The "other" commodity funding would be dedicated primarily for needs directly related to the organizations mission: RCT - Training; SIS - Audiovisual / presentation; CSI - Clinical; etc.

The MOH "Needs" are so great (\$ 118.4 million) that it is virtually impossible to determine which items should be purchased with POP/FP IV funds. Even if an attempt were made to prioritize the more than 100 line items, it would probably be an exercise in futility. While not of the same magnitude as MOH, CSI has "needs" totaling \$ 13.03 million.

RCT is an organization with a clear training mission. Their training equipment and supplies are in such poor condition and disrepair that the quality of training will suffer. USAID needs to assess its commitment to this particular organization. The \$ 350,000 hypothetical allocation above will cover RCT's most urgent needs.

POP/FP III primarily devoted commodity procurement to MIS equipment and vehicles. It may be an acceptable rationalization to follow the established precedent in POP/FP IV. It would at least provide some resolution to the MOH problem of needs vs. resources. MOH

II Procurement Plan

A. Procurement Approach

The purchase and delivery of goods and materials is one of the most important parts of the project and timely arrival of the appropriate commodities is of crucial importance to the success of the undertaking. Pathfinder International's goal is to assure that commodities arrive when and where they are needed. We also recognize that we are a steward of USAID's funds and must follow certain rules and procedures to help assure that objectives are met. In this regard, we will assure that all provisions specified in our contract, the assistance agreements and implementation documents which are applicable to the procurement process are followed.

In order to enhance and strengthen the procurement process, Pathfinder International has subcontracted the commodity purchasing function to American Manufacturers Export Group (AMEG). AMEG is a professional Procurement Services Agency (PSA) that has provided project procurement and related technical services for USAID programs for over 16 years. They have extensive experience in Egypt.

AMEG was responsible for conducting an expedited "Needs Assessment" during the early stage of project start-up and prior to initiating procurement. This assessment identifies commodity needs in all the family planning counterpart implementing agencies.

Pathfinder International will work very closely with AMEG from the beginning of the program to ensure compliance as well as timeliness. AMEG and Pathfinder will communicate expeditiously. Points of concerns or problems which could adversely affect the program will be addressed immediately in order to provide solutions in a timely manner.

The amount budgeted for commodities and commodity related services is over \$ 5.7 million. Most of the procurement will be conducted in project years one and two. All commodities will have their source and origin in the U.S. (Geographic Code 000), except for local procurement allowed by USAID regulations, or otherwise agreed to in writing by USAID. The Pathfinder POP/FP IV staff in Egypt will work closely with AMEG to insure that specifications for project commodities are appropriate and that purchase and delivery schedules are coordinated with the project goals in a timely fashion.

B. U.S. Procurement Services

1. Specifications

An important requirement for effective competitive procurement is sufficiently detailed specifications. They must not be unduly restrictive, so that a reasonable number of suppliers may compete on a fair and equitable basis. AMEG fully understands the importance of ensuring that a proper description of the commodities or services is provided in terms which will eliminate items not furnishing the necessary utility, while at the same time, providing for maximum competition. AMEG has the in-house technical expertise to recognize the type of specifications required. In doing this, we are able to use the specialized knowledge and sources of information available to us. An accurate and precise description may take the form of a published federal, commercial, or trade association specification.

2. Terms and Conditions

AMEG is able to assemble IFB's and RFQ's that meet the special needs of the project, follow good commercial practice insofar as possible and will assure that all regulations and other requirements are met. The staff we have assigned to

to permit the supplier to prepare his bid and for the bid to reach the designated site by the date and hour scheduled for opening.

7. Receipt, Opening and Recording of Bids

AMEG is prepared to conduct public bid openings in its offices for formal competitive procurement (IFB). Inquiries of a general nature dealing with procedural matters, specifications, and policies and regulations governing contract award and administrative matters will be answered fully and explicitly by AMEG; however, no information will be furnished to a bidder which is not readily available or known to any other bidder. The AMEG technical staff receiving requests for information will be alert to recognize indications of deficiencies in the IFB. Any such deficiencies will be immediately corrected by the issuance of an amendment. All bidders will be treated on an equal and equitable basis. Prior to the opening of bids, no information relating to bids received, such as the number of bids or the names of firms from which bids are received will be released. Prior to the time of opening, AMEG will assure that all bids are segregated by invitation number and stored in a secure place to prevent the possibility of loss or tampering.

At the time the bids are opened, disclosure will be made of pertinent information contained in all bids received and a record of the opening made. The reading will usually be confined to a recital of such information as name of bidder, items and quantity offered, and price. Pertinent data of the bid opening will be recorded and include, at a minimum, a listing of the names of all bidders, the invitation number, the date and time of opening, the number of invitations issued, and a summary tabulation of bids received. Late bids and bid modifications which are not received at or before the exact time specified in the IFB will not be considered unless the failure to receive the bid at the time and place specified is demonstrated to be the fault of AMEG.

8. Evaluation of Bids and Quotations

AMEG will individually evaluate the bids or offers for award purposes. The objective will be to select the bid or offers of responsible bidders which meet the specifications and are responsive to the terms and conditions of the IFB or RFQ, and are lowest in price. During the period of evaluation, AMEG may have occasion to confer or correspond with individual bidders in connection with the clarification of their bids. No discussion will be permitted relative to the merits of other bids under consideration. Premature disclosure of anticipated awards will be avoided. The AMEG technical staff will prepare an abstract of bids. During the process of abstracting, all matters affecting responsiveness to the specifications and questions affecting price must be fully considered and resolved in connection with all bids.

9. Award of Contract

The successful bidder or offeror will receive notification of the award from AMEG within the time specified for acceptance. Every effort will be made to avoid evaluation delays. Notifications may be made by Fax, but will be followed up with a formal notification in writing over the signature of the appropriate AMEG officer in the form of a purchase order.

10. Protest

AMEG recognizes the importance of prompt handling of protests. It is our experience that a substantial proportion of them are based on misunderstandings, lack of knowledge regarding procurement procedures, or incorrect interpretations. It is AMEG policy to take positive steps to avoid formal protest by arranging a

14. Consolidation

AMEG provides complete control and detailed reporting at every stage, from the placement of purchase orders straight through to the dock. AMEG can ensure that packing and crating meets established and stringent standards. The cargo is securely and reliably packed to withstand the toughest conditions. Our analytical approach to export preparation maximizes cargo consolidation, affording lower shipping costs. The commodities are systematically logged when they arrive at the warehouse. They are verified against purchase order line items and vendor packing lists. The items are registered, marked, and weighed prior to storage. The materials receiving and reporting procedures function as an extension of the purchasing cycle. In Houston, AMEG has available a concrete tiltwall warehouse, with sprinkler fire protection. The surrounding complex consists of fenced and security-lighted outdoor storage which is all-weather surfaced. Professional and efficient service is ensured with all of these elements combining to afford maximum security, accountability, and performance. If, for reasons of economy, it is more advantageous to consolidate shipments in other areas, we have warehousing space available for temporary storage, consolidation and export preparation on both the U.S. east and west coast.

15. Inspection

AMEG will inspect or arrange independent inspection at place of manufacturer, port of embarkation or other location, whichever is most appropriate in terms of the type of commodity and conditions involved. We will be guided by good and sound commercial practice in deciding where and how often inspections should be performed, except where specific directions are given. Such inspections will include a determination as to compliance with specifications, quantity, adequacy of export packing and preparation, and compliance with marking requirements.

16. Reporting and Records

AMEG will provide a "Procurement Status Report" which will give information on progress made in carrying out the program. The report(s) will follow formats developed by AMEG personnel for use with similar programs in other countries. Information will be provided on a transaction-by-transaction basis and data will be in sufficient detail to allow the project manager to measure actual progress. A narrative will be utilized to report any unusual circumstances adversely affecting implementation, steps taken or planned to overcome these difficulties, or provide an explanation for any matters of substance regarding the procurement process. AMEG will maintain records, documents, and accounts with respect to all transactions under the program. All such records, documents, and accounts will be open to inspection and audit by USAID.

17. Communication

It is AMEG's policy to communicate expeditiously with the client, country and/or designated parties as the need arises. Contact shall be made by fax, E-Mail, telephone or courier services. Points of concern or problems which could adversely affect the program will be addressed immediately in order to provide solutions in a timely manner.

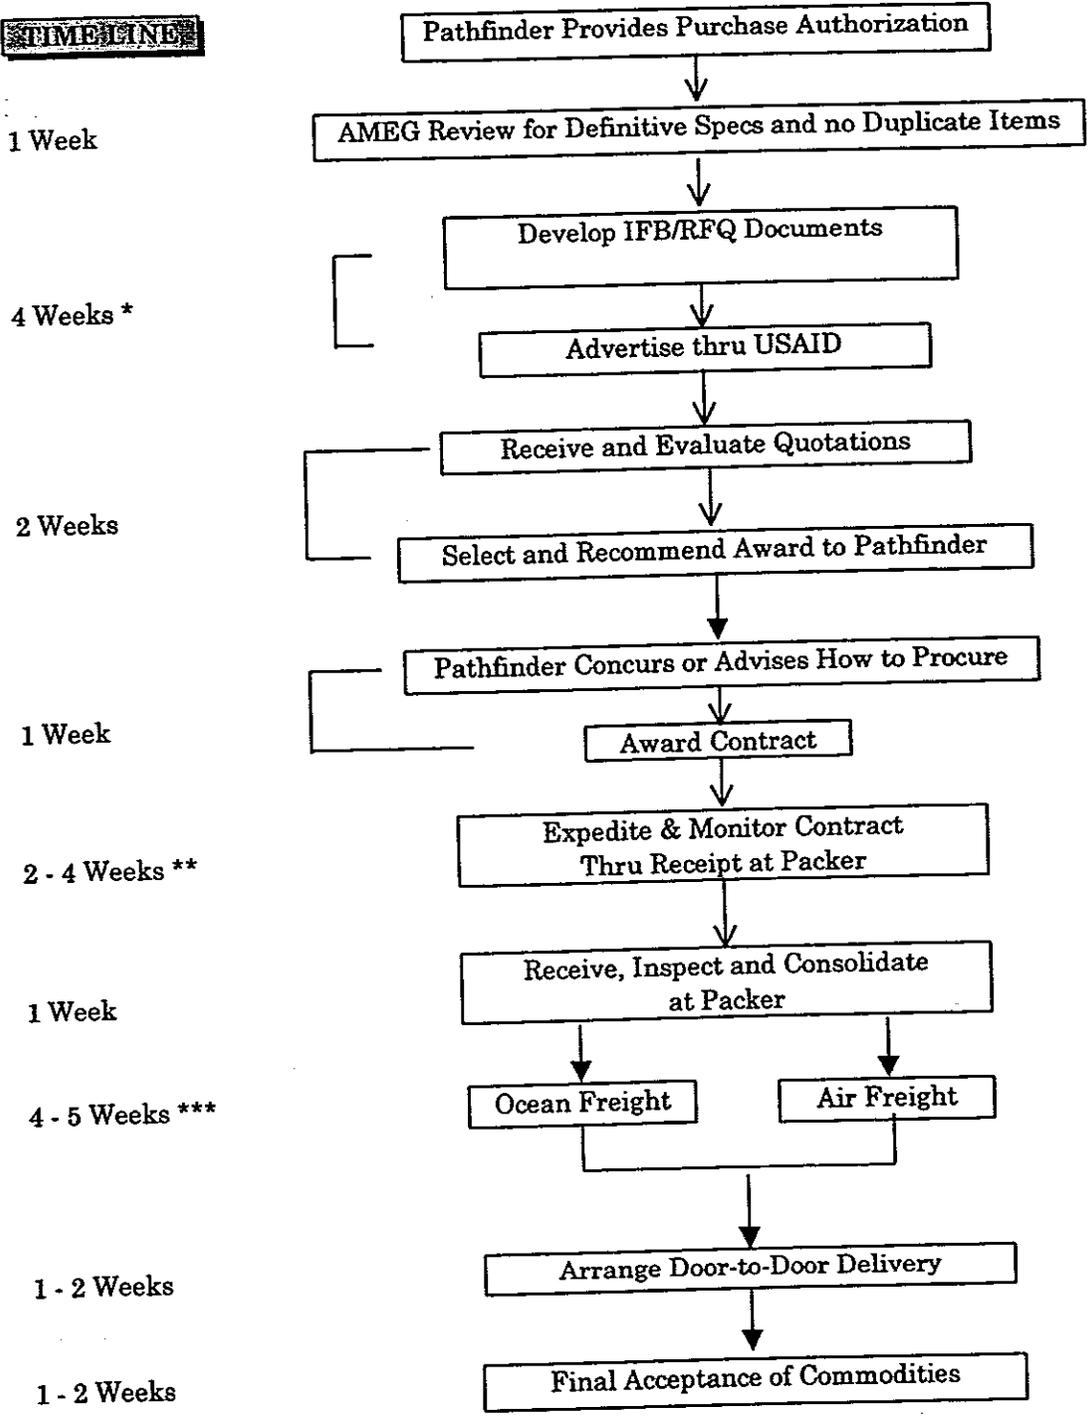

C. Procurement Process for an Order

It is the intention of AMEG to perform the work with its own highly qualified in-house staff. AMEG will provide the following services to complete the full procurement cycle for an order:

D.

PROCUREMENT FLOWCHART

TIMELINE

- * Plus time for USAID to publish
- ** Depends on commodity lead time
- *** Air Freight 1 Week

Pathfinder/Egypt determines that local procurement of commodity(s) is in the best interest of the project and are eligible. AMEG may be contacted for advice or assistance as required.

Pathfinder/Egypt solicits quotations from local vendors; preferably a minimum of three (3).

Pathfinder/Egypt submits copies of quotations/pro forma invoice(s) to AMEG/Houston with award(s) recommendation.

AMEG/Houston concurs in award recommendation and prepares AMEG Purchase Order(s).

AMEG/Houston forwards copies of the P.O.'s to Pathfinder/Egypt.

AMEG/Houston forwards a check or a wire transfer to the local vendor in accordance with P.O. payment terms.

Pathfinder/Egypt takes receipt of commodities.

H. Providing Technical Assistance

AMEG is prepared to provide the services of short-term procurement and logistics specialist to assist with the in-country procurement process and strengthen the capability of Pathfinder to improve the efficiency and ability to purchase and deliver POP/FP IV goods and services in a timely manner.

Pat Hluchanek is a Senior AMEG Procurement Specialist and will serve as the supporting Procurement Officer to the Project Officer for the POP/FP IV Project. Mr. Hluchanek has been on the AMEG staff for over ten years. He has had primary responsibility for our Egypt projects and has extensive experience in the procurement of medical supplies and equipment, computers, audio visual equipment and vehicles. He is the Procurement Officer for USAID Population Support Projects in Madagascar, Zambia and the Population Council worldwide programs.

Saleem Ahmed will be the AMEG Contracting Officer for the POP/FP IV project. He will provide liaison on contractual matters with the Pathfinder Contracts Officer. He will coordinate with other implementation team members to assure compliance with contract provisions. Mr. Ahmed has served with AMEG both overseas and in the U.S. for ten years.

Linda Satterwhite will be the Financial Officer for POP/FP IV project . She will be responsible for making payments to vendors for commodities and commodity related services. Ms. Satterwhite will submit payment-cost reimbursement vouchers to the Pathfinder payment office. She will be responsible for the AMEG financial management system and maintain books, records, and documents in accordance with accepted accounting procedures. Linda Satterwhite is a CPA and is the Senior AMEG Finance and Accounting Officer.

J. Facilities and Equipment

After occupying the same office building for a number of years, AMEG recently relocated to a more modern and larger office complex. AMEG has a state-of-the-art multi-user multitasking computer information system accommodating a wide range of software applications. Linked to fax and e-mail capabilities, the AMEG communications system provides us effective contact with POP/FP IV project activities in the U.S. and overseas.

In Houston, AMEG has available a concrete tiltwall warehouse, with sprinkler fire protection. The surrounding complex consists of fenced and security-lighted outdoor storage which is all-weather surfaced. If it is advantageous to consolidate shipments on either the U.S. east or west coast, we have access to warehousing space for temporary storage, export preparation and consolidation.

USAID

UNITED STATES AGENCY for INTERNATIONAL DEVELOPMENT

CAIRO, EGYPT

August 7, 2000

Mr. Jestyn Portugill
Chief of Party
Pathfinder International
28L El Safa St.,
Maadi-Egypt

SUBJECT: Commodity Procurement Plan
Approval
POP IV Contract
No. 263-C-00-00017-00

Dear Mr. Jestyn:

I would like to inform you that USAID hereby, approves Pathfinder's revised procurement plan, submitted to USAID on August 2, 2000 and we concur with the contents of the information provided.

Accordingly, Pathfinder can proceed with the procurement process.

Sincerely,

A handwritten signature in black ink that reads "Mark White". The signature is written in a cursive, slightly slanted style.

Mark White
Acting Chief
Population & Health Division

USAID/Egypt
Zahraa El Maadi, Maadi
Cairo, Egypt

2 August 2000

Cairo, Egypt

RE: **Approval for Procurement Plan**

Dear Mr. White,

Attached for your review and approval are two versions of the revised procurement plan—sorted by counterpart agency, and sorted by commodity category. Although USAID approval was granted for the procurement lists on June 28, in order to ensure complete agreement, we were requested by Dr. Ayman Abdel Mohsen to contact our counterpart agencies for a final review and agreement.

The counterpart agencies reviewed the lists, and in some cases, proposed changes. Copies of the letters received from the counterpart agencies are also attached. Please note that because USAID previously obtained MOHP approval, at Dr. Ayman's suggestion, we did not seek the Ministry's approval again. We also did not seek approval from individual medical schools for their procurement lists, because this process has been fully reviewed by USAID and the subprojects.

We have incorporated any proposed changes into this new version of the plan. In addition, we have standardized both item descriptions and estimated prices across agencies to facilitate the bid and purchasing process. This process has created minor fluctuations in amounts for each agency and category. However, we have maintained the previous balance between agencies and kept the ceiling below the \$5.2 million as originally proposed.

We would like to obtain your approval of these procurement lists as soon as possible, so that we can submit the lists to our procurement agency. Please call me at 516-6170 (office) or 012-325-5322 (mobile) if you have any questions.

Sincerely,

Stephen Croll
Deputy Chief of Party

cc: A. Mohsen
J. Portugill
J. Dobriner

**Pathfinder Pop/FP IV
Approved Procurement List**

|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|----------|------------|----------------|----------|---------|----------|--------------|
| Bilateral BSE Model | Breast Self Examination Made of lifelike material. One breast has five lumps that can be felt, the other breast has no lumps. Mounted on a collapsible easel type stand. Carrying case included. Model Dimensions approx: 45cm x 32.5cm. | AMZCO | CD26547 | 90 | 174.95 | 15,745.50 | | Medical | Training | CSI |
| Breast Palpation Bra | This simulator is designed to demonstrate palpation of normal breast tissue and breast tissues with abnormal tissue growth. Includes 8 interchangeable breasts and is mounted on a smoked lucite stand. | AMZCO | S 230.41 | 100 | 201.60 | 20,160.00 | | Medical | Training | CSI |
| Cervix Set | Six cervix replicas depicting pathological conditions. Features: Individually hand-painted. Smoked lucite stand. Illustrated booklet. | AMZCO | S505 | 100 | 72.50 | 7,250.00 | | Medical | Training | CSI |
| Condom Model | Male Condom Model - Spongy vinyl for lifelike feel and texture. Adaptable from flaccid state to erect state. Smoked lucite stand. Includes package of 3 condoms. Instruction booklet. | AMZCO | S517 | 100 | 56.00 | 5,600.00 | | Medical | Training | CSI |
| Family Planning Educator | A basic simulator for the demonstration of introduction and removal of IUD, diaphragm and sponge contraceptive devices. Carrying case. | AMZCO | S502 | 90 | 194.00 | 17,460.00 | | Medical | Training | CSI |
| Female Condom Model | This model may be placed in the client's lap to simulate the position in which the female condom should be inserted. Life-size anteverted uterus is simulated pelvic cavity. Soft nylon carrying bag. | AMZCO | S509 | 50 | 97.80 | 4,890.00 | | Medical | Training | CSI |
| Female Pelvic Organs | A sagittal view artwork model that displays the internal and external structure of female pelvic anatomy. Circular base. | AMZCO | S511 | 50 | 120.70 | 6,035.00 | | Medical | Training | CSI |
| Female Pelvic Organs | Natural size, in coronal section. Uterus covered by plastic window to permit easy viewing of correct IUD placement. Light weight and portable. | AMZCO | S506 | 50 | 64.00 | 3,200.00 | | Medical | Training | CSI |
| Female Reproductive System | A plaque model of female pelvic organs, lightweight plastic. Activity guide. | AMZCO | H500 | 50 | 231.80 | 11,590.00 | | Medical | Training | CSI |

|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------|----------|------------|----------------|----------|---------|----------|--------------|
| Full Term Pregnancy | A sagittal view artwork model that illustrates the internal and external pelvic organs prior to parturition. Features: Sagittal section. Fetus, in uterus removable. Anatomically accurate. | AMZCO | S515 | 25 | 209.00 | 5,225.00 | | Medical | Training | CSI |
| Growing Uterus Charts Laminated | Charts are indispensable for teaching the physiology of pregnancy and fetal development. Set of 7 charts with teaching notes. Each chart laminated: Dimensions: 55cm x 65cm. | AMZCO | ES90648 | 75 | 82.00 | 6,150.00 | | Medical | Training | CSI |
| Human Menstrual Cycle | A set of models that depict menstruation in the human female. *Set of twenty artwork models. *Smoked Lucite base. *Illustrated booklet. | AMZCO | S512 | 100 | 227.00 | 22,700.00 | | Medical | Training | CSI |
| Intra - Uterine Human Development | Series of eight models depicts the fetus inside the coronally bisected pregnant uterus from the first through seventh month of pregnancy. Anatomically accurate. Illustrated booklet. | AMZCO | S516 | 10 | 275.00 | 2,750.00 | | Medical | Training | CSI |
| IUD Insertion Educator Kit | Kit includes: 1 Ea. Graves Vaginal Speculum Medium, SS; 1 Ea. Uterine, Braun's Tenaculum, forceps, straight, SS; 1 Ea. Uterine, Dressing-Bozeman forceps, curved, SS; 1 Ea. Artery Pean-Forceps, curved, 215mm, SS; 1 Ea. Hysterometer/Uterine Sounds, SIMS: calibrated in CM; 1 Ea. IUD Removal Hook, SS, malleable, hook/loop; 1 Ea. IUD Simulator. | AMZCO | 29 | 5 | 425.00 | 2,125.00 | | Medical | Training | CSI |
| Male Reproductive System | Male Pelvic Organs - A plaque model of the male pelvic organs, constructed from lightweight, plastic. Activity guide included. | AMZCO | H501 | 10 | 231.00 | 2,310.00 | | Medical | Training | CSI |
| Menstrual Cycle | A life-size uterus is featured in four states of the average 28-days reproductive cycle. Highlights change in the uterus and the position of the ovum. Lesson plan included. Model measures: 24" x 18" (60cm x 45cm) | AMZCO | 2065 | 10 | 87.00 | 870.00 | | Medical | Training | CSI |

|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------|----------|------------|----------------|----------|---------|----------|-----------------|
| Standard BSE Teaching Model | Full-size model for teaching women proper breast self-examination. Made from a synthetic material. Five different lumps illustrating common type of tumors are embedded in the model. Packed with slip-on cover in carrying case. | AMZCO | A 26500 | 25 | 85.00 | 2,125.00 | | Medical | Training | CSI |
| Uterus | Compact Hand-Held Model - *Sculptured normal uterus. *Clear plastic window permits easy viewing of IUD. *Plastic window "tilts" open to permit removal of IUD. | AMZCO | S507 | 100 | 14.00 | 1,400.00 | | Medical | Training | CSI |
| Arm Models (for Norplant) | Possibly: I.V. Training Arm and Hand. The resilient plastic arm and hand permit venipuncture exercises that insure mastery of techniques before administering to patients. By palpating either the arm or hand to locate a vein, needle may be inserted to draw blood or inject fluid. <i>May need to find more appropriate model for Norplant.</i> | AMZCO | | 140 | 60.00 | 8,400.00 | | Medical | Training | Medical Schools |
| Breast Models | Breast Self Examination Model. Lifelike, realistic feel and texture. Multiple pathologies contained in the breast are designed for practice in identifying and logging tumor locations. Measures: 17.5cm x 10cm. Wt: 1 kg. | AMZCO | | 140 | 95.00 | 13,300.00 | | Medical | Training | Medical Schools |
| Female & Male Genital Organs | Female Genital Trainer - Made of durable vinyl, for inserting catheter. Female Genital Condom Trainer - For demonstration of correct usage and placement of female condom. The Male Trainer Organ Trainer - Designed for teaching and practicing the procedures for inserting and stabilizing Foley Catheter. The model is anatomically accurate. Measures: 31.5cm x 25cm x 12.5cm; Wt: 1 kg. The Male Organ Condom Trainer - For demonstration of correct usage and placement of condoms. Includes insert to simulate erection and 3 condoms. | AMZCO | | 140 | 272.00 | 38,080.00 | | Medical | Training | Medical Schools |

Dr. Mohamed Edrees , Executive Director
CSI
3 Abu Dawood El Zahri, of Makram Ebeid St., NC
Cairo, Egypt.

Sub: POP IV Procurement- USAID Grant No. 263-0267

Dear Dr. Mohamed,

This is to inform you that Pathfinder International will deliver Xerox photocopiers to your agency. The shipment will be delivered on:

Date: Feb 27, 2001
Via: Xerox

Please inspect this shipment to make sure that nothing is missing or damaged. In order to keep our records up-to-date, please complete the delivery acknowledgement that is on the back of this letter. Please note that there are two originals of this letter/acknowledgement. One original should be given to Pathfinder International, and one should be kept for your files. Please note that USAID regulations require semi-annual reporting on the status of equipment during the life time of the Population, Family Planning IV contract (through June 30, 2002).

IT IS IMPORTANT THAT YOU COMPLETE AND RETURN THE DELIVERY ACKNOWLEDGEMENT TO PATHFINDER, TO ENABLE US TO COMPLETE OUR CONTRACTUAL OBLIGATIONS FOR THE PROCUREMENT.

Sincerely,

Stephen Croll
Deputy Chief of Party
Pathfinder International

Dr. Hamdy Al Kabarity
Ob/Gyn Hospitals, Faculty of Medicine
Ain Shams University
Cairo, Egypt.

Sub: POP IV Procurement- USAID Grant No. 263-0267

Dear Dr. Hamdy,

This is to inform you that Pathfinder International will deliver Audiovisual/ Medical equipment and Xerox copier to your agency. The shipment will be delivered on:

Date: October 21, 2001
Via: Zust Bachmeier

Please inspect this shipment to make sure that nothing is missing or damaged. In order to keep our records up-to-date, please complete the delivery acknowledgement that is on the back of this letter. Please note that there are two originals of this letter/acknowledgement. One original should be given to Pathfinder International, and one should be kept for your files. Please note that USAID regulations require semi-annual reporting on the status of equipment during the life time of the Population, Family Planning IV contract (through June 30, 2002).

IT IS IMPORTANT THAT YOU COMPLETE AND RETURN THE DELIVERY ACKNOWLEDGEMENT TO PATHFINDER, TO ENABLE US TO COMPLETE OUR CONTRACTUAL OBLIGATIONS FOR THE PROCUREMENT.

Sincerely,

Stephen Croll
Deputy Chief of Party
Pathfinder International

Please inspect this shipment to make sure that nothing is missing or damaged. In order to keep our records up-to-date, please complete the delivery acknowledgement that is on the back of this letter. Please note that there are two originals of this letter/acknowledgement. One original should be given to Pathfinder International, and one should be kept for your files. Please note that USAID regulations require semi-annual reporting on the status of equipment during the life time of the Population, Family Planning IV contract (through June 30, 2002).

IT IS IMPORTANT THAT YOU COMPLETE AND RETURN THE DELIVERY ACKNOWLEDGEMENT TO PATHFINDER, TO ENABLE US TO COMPLETE OUR CONTRACTUAL OBLIGATIONS FOR THE PROCUREMENT.

Sincerely,

Stephen Croll
Deputy Chief of Party
Pathfinder International

Ob/Gyn Hospitals, Faculty of Medicine
Suhag University
Suhag- Egypt.

Sub: POP IV Procurement- USAID Grant No. 263-0267

Dear Dr. Othman,

This is to inform you that Pathfinder International will deliver computer equipment and Xerox copier to your agency. The shipment will be delivered on:

Date: June 18, 2001 (computer equipment)
Via: Zust Bachmeier
Date: June 19, 2001 (copiers)
Via: Xerox

Please inspect this shipment to make sure that nothing is missing or damaged. In order to keep our records up-to-date, please complete the delivery acknowledgement that is on the back of this letter. Please note that there are two originals of this letter/acknowledgement. One original should be given to Pathfinder International, and one should be kept for your files. Please note that USAID regulations require semi-annual reporting on the status of equipment during the life time of the Population, Family Planning IV contract (through June 30, 2002).

IT IS IMPORTANT THAT YOU COMPLETE AND RETURN THE DELIVERY ACKNOWLEDGEMENT TO PATHFINDER, TO ENABLE US TO COMPLETE OUR CONTRACTUAL OBLIGATIONS FOR THE PROCUREMENT.

Sincerely,

Stephen Croll
Deputy Chief of Party
Pathfinder International
