Accessing the Services in the Global Health Programs

This Users Guide includes the preferred method for USAID operating units to access the awards described in the Project Directory.

Most projects that show “Field Support” as the preferred method of access may also be accessed using Operating Year Budget (OYB) transfers. This alternate method generally is available to provide additional, flexible ways that accommodate unique or unusual Mission circumstances. For further information about these alternatives, kindly contact the respective project COR/AORs.

Two types of awards that are especially designed for field mission use are Indefinite Quantity Contracts (IQC) and Leader with Associates Cooperative Agreements (LWA). Both methods are designed to provide quick and simple access to technical services in health by providing an “umbrella” of pre-selected sets of contractors or recipients of cooperating agreements. Under both mechanisms, missions initiate and manage the awards. Missions should contact the project COR/AORs for assistance in initiating task orders under IQCs or for negotiating associate awards under LWAs. For general information on IQCs and LWAs, please visit the Global Health intranet section for field missions.

Introduction to USAID

The mission of the United States Agency for International Development (USAID) is to engender a more prosperous, democratic, and secure world for the benefit of the American people and the international community. By creating the conditions to help countries move from poverty to prosperity, USAID serves both the American public and millions of people living in countries in development and transition.

As stated by President Obama in the Presidential Policy Directive on Global Development, our overarching goal is to promote “sustainable development that provides opportunities for more people, enabled by democratic governance and capable, reliable, and transparent institutions, and driven by people who are provided with the tools to transform their own destinies.”

USAID Health Objectives and Goals

The U.S. foreign assistance framework includes health as an area within the objective of Investing in People. The Strategic Goal of Investing in People is to help nations achieve sustainable improvements in the well being and productivity of their populations, while advancing American interests, through diplomatic and assistance initiatives that promote effective and accountable health, education, and other social services.¹

The area of health is governed by The Global Health Initiative (GHI), which directs USG assistance through the following core principles:

- **Focusing on women, girls, and gender equality:** A core objective of GHI is to improve health outcomes among women and girls, both for their own sake and because of the centrality of women to the health of their families and communities. Over the long term, improving the health of women enhances their productivity and social and economic participation. Improving women’s health also benefits, now and in the future, the social and economic development of families, communities and nations.
- **Encouraging country ownership and strengthening health systems:** Ultimately, governments - together with non-governmental organizations (NGOs), civil society organizations (CSOs) including affected communities, faith-based organizations (FBOs), the private sector and others in countries - must decide upon their countries’ health needs and strategies. They are responsible for making and sustaining progress, and they must be accountable to those served by their health systems. Accordingly, a core principle of GHI is to support country ownership, encouraging governments to engage with stakeholders at the national, provincial, district and community levels as they develop and implement their country health plans and strategies.
- **Strengthening and leveraging other efforts:** The U.S. recognizes that improving global health outcomes is a shared responsibility. The needs are too vast and the challenges too great for any one country or organization to address alone. Indeed, a key principle of GHI is to strengthen and leverage key multilateral organizations and global health partnerships. Multilateral institutions build political momentum for sustained efforts to improve global health, mobilize and coordinate donor country commitments, and promote mutual accountability among donors, partner governments and other stakeholders. Global health partnerships engage and collaborate with civil society and the private sector, increasing access to resources for those in need.
- **Increasing impact through strategic coordination and integration:** Coordinating and integrating the delivery of health interventions is essential for achieving sustained improvements in health. Under

¹ U.S. Department of State and U.S. Agency for International Development. Strategic Plan, 2007-2012, p.22.

Introduction to USAID

GHI, the United States strives to coordinate its health programming across the whole of government, other donors, and country partners. It is expected that, where possible, country-owned health delivery platforms will be the basis for providing comprehensive health services.

- **Promoting learning and accountability through monitoring and evaluation:** Monitoring and evaluating our progress, encouraging innovation, using current research, supporting and conducting new research and sharing the results of our learning are integral to all aspects of GHI and critical to its success. Consistent with the U.S. commitment to the aid effectiveness principles of country ownership, partnership, and mutual accountability, we are coordinating our learning and aligning our efforts with those of our country and development partners. This will include utilizing globally agreed-upon indicators and country indicators when possible. We are committed to meaningful and timely evaluation and research that will inform partner countries, the U.S., and other partners about what works and what does not and which approaches should be scaled up, modified or phased out.
- **Accelerating results through research and innovation:** Research has built the evidence base which underpins key interventions for the GHI, such as the use of Vitamin A to reduce child mortality, simplified antiretroviral treatment, male circumcision for prevention of HIV, community-based treatment of pneumonia, and use of insecticide-treated bed nets. Evolving disease threats, such as increased drug resistance, make it difficult to rely on the existing body of scientific evidence and technologies alone. Under GHI, research will continue to spur innovation for the discovery and development of new biomedical interventions and technologies, such as drugs, diagnostics and vaccines; medical devices, such as safe syringes; and information and communication technologies, such as mobile telephones and other data-transmitting devices that have the potential to improve people's health.

The paramount objective of GHI is to achieve major improvements in health outcomes through the application of these principles. In line with partner government priorities and in partnership with multilateral efforts, GHI supports the goals and targets described below. They confirm the U.S. commitment to the health-related Millennium Development Goals, which provide a useful framework for our GHI investments.

HIV/AIDS: Through the President's Emergency Plan for AIDS Relief (PEPFAR), support the prevention of more than 12 million new HIV infections; provide direct support for more than 6 million people on treatment; and support care for more than 12 million people, including 5 million orphans and vulnerable children.

Family Planning and Reproductive Health: Prevent 54 million unintended pregnancies. This will be accomplished by reaching a modern contraceptive prevalence rate of 35 percent across assisted countries and reducing from 24 to 20 percent the proportion of women aged 18-24 who have their first birth before age 18.

Malaria: Through the President's Malaria Initiative (PMI), halve the burden of malaria for 450 million people, representing 70 percent of the at-risk population in Africa.

Maternal and Child Health: Reduce maternal mortality by 30 percent across assisted countries, and under-five mortality rates by 35 percent across assisted countries.

Nutrition: Reduce child undernutrition by 30 percent across assisted food insecure countries, in conjunction with the President's Feed the Future Initiative (FTF).

Neglected and Tropical Diseases (NTDs): Reduce the prevalence of 7 NTDs by 50 percent among 70 percent of the affected population, contributing to: the elimination of onchocerciasis in Latin America; the elimination of lymphatic filariasis globally; the elimination of blinding trachoma; and the elimination of leprosy.

Tuberculosis: Contribute to the treatment of a minimum of 2.6 million new sputum smear positive TB cases and 57,200 multi-drug resistant (MDR) cases of TB, and contribute to a 50 percent reduction in TB deaths and disease burden relative to the 1990 baseline.²

In addition, the Bureau for Global Health works on avian influenza and other public health threats, programs to help orphans and vulnerable children, partnerships with the private sector, and international partnerships:

Avian Influenza and Other Emerging Threats: USAID has supported USG efforts to prevent and control avian influenza outbreaks among animals, minimize human exposure and strengthen pandemic readiness. These efforts fostered quick international response by the USG to the 2009 H1N1 influenza pandemic. A key priority is now to focus on preempting or combating, at their source, other diseases that could spark future pandemics.

Orphans and Vulnerable Children: USAID is the lead U.S. agency under PL 109-95, the Assistance for Orphans and Other Vulnerable Children in Developing Countries Act of 2005. Within USAID, the Bureau for Global Health is the locus of PL 109-95 leadership and the home of the Special Advisor for Orphans and Vulnerable Children, a position mandated by the Act. The PL 109-95 strategy is to improve the coherence, efficiency and impact of the USG response to highly vulnerable children.

² The Lantos-Hyde Reauthorization Act (P.L. 11 0-293) calls for the USG to support the objectives of the Global Plan to STOP TB, including the achievement of the Global Plan goals to reduce by half the TB death and disease burden from the 1990 baseline.

Working in Partnership to Achieve Shared Health Goals

The development landscape has evolved dramatically over the last two decades. The clearest sign of this evolution is the sheer number of development actors; as of 2011, there were 263 multilateral agencies and 197 bilateral agencies through which official government development assistance flows. Assistance from “emerging donor” nations such as China, India, Brazil, and the Gulf states is growing rapidly. This is all in addition to the thousands of non-governmental organizations both for-profit and not-for-profit private corporations, private foundations, local businesses, and other organizations working in the developing world.

The policy context for USAID partnering is global and embraces principles expressed in the Paris Declaration for Aid Effectiveness and the Accra Agenda for Action; it is national as set forth in the Presidential Policy Directive on Global Development and the Quadrennial Diplomacy and Development Review (QDDR); it is USAID-wide as set forth in the USAID Policy Framework and USAID Forward; and finally it is health specific in that it embraces the GHI Principles.

USAID’s Bureau for Global Health engages with a multitude of development partners – in the public sector this includes other bilateral donor governments, multilateral government entities, international financial institutions, other USG agencies, United Nations organizations, and host country governments themselves. In the private sector, our partners include foundations, corporations, contractors, universities, and a variety of non-governmental organizations large and small, global and local, including those whose members are from both public and private sectors including Global Alliance for Vaccines and Immunization (GAVI), Global Alliance for Improved Nutrition (GAIN), International AIDS Vaccine Initiative (IAVI), Roll Back Malaria (RBM), Stop TB Partnership (STOP TB), Reproductive Health Supplies Coalition (RHSC), Reproductive Maternal and Newborn Health (RMNH), and Partnership for Maternal Newborn and Child Health (PMNCH) among others.

Through partnering, we leverage the resources of others, be they financial, technical/programmatic, or political. We coordinate with other partners because we believe that by acting together we can achieve more than each of us can operating independently. We coordinate with others because we hope to achieve:

- Increased effectiveness of health aid/programming
- Increased efficiency of health aid/programming
- Increased scalability of priority health interventions
- Increased ownership by host country governments (sustainability)

Roles for the Bureau for Global Health: The funds allocated to the Bureau for Global Health address the same Agency goals and objectives as Mission funds, but are used in ways appropriate for a central, functional bureau. These uses include:

- Providing technical leadership in responding to new global health challenges
- Partnering strategically with a wide range of actors
- Accelerating the development and application of innovation, science, and technology
- Scaling up evidence-based, equitable, and locally-adapted health solutions
- Strengthening local health system capacity to support partner countries’ leadership of health policies, strategies, and actions
- Promoting gender equality and female empowerment
- Working efficiently and being effective stewards of public trust and resources

Global Health Offices and Functions

Bureau staff manages an array of technical projects, providing technical support to USAID missions and field programs, garnering support for our programs with stakeholders, and nurturing and galvanizing stronger partnerships with the development community. This global leadership is influencing the worldwide health agenda, increasing the likelihood of successful health programs and encouraging the wider global community to adopt new technologies and approaches and to pursue USAID priorities and goals.

Office of the Assistant Administrator (AA/GH)

Assistant Administrator: Ariel Pablos-Méndez

Senior Deputy Assistant Administrator: Amie E. Batson

Deputy Assistant Administrator: Wade Warren

Deputy Assistant Administrator: Robert Clay

U.S. Global Malaria Coordinator/PMI: Timothy Ziemer

Orphans and Vulnerable Children Special Advisor: Neil Boothby

Science Advisor: James Shelton

The Office of the Assistant Administrator provides oversight to the GH Bureau and leadership for the Global Health Initiative, creating support for GHI and helping to mainstream GHI principles into all GH activities and programs. The Office has ultimate responsibility for the quality of the Bureau's programs and the capacity of its workforce. It provides leadership on the design, implementation, review, coordination, and evaluation of GH initiatives, programs, and activities. The Office, through the Center for Accelerating Introduction and Impact, is the focal point for accelerating the introduction and scale up of innovative global health interventions. In addition, the Office promotes coordination between U.S. Government agencies and departments providing assistance to vulnerable children in low-and middle-income countries.

Office of Health, Infectious Diseases and Nutrition (GH/HIDN)

Director: Elizabeth Fox

Deputy Director: Kelly Saldaña

The Office of Health, Infectious Diseases and Nutrition (HIDN) manages the Global Health Bureau's activities in child survival health, maternal health, and infectious diseases, which include Tuberculosis, Malaria, Avian Influenza and Other Emerging Threats, Neglected Tropical Diseases and Water and Sanitation, and provides technical leadership in each of these areas.

- **The Health Systems Division (GH/HIDN/HS)** works across the entire portfolio of Global Health and is responsible for technical leadership and direction in health systems strengthening. Division teams focus on health policy; quality assurance; work force policy; pharmaceutical management and standards; and information, monitoring, and evaluation.
- **The Infectious Diseases Division (GH/HIDN/ID)** is responsible for technical leadership and direction in infectious diseases and environmental health issues. Division teams focus on tuberculosis, malaria, neglected tropical diseases and other infectious diseases, and environmental health.
- **The Maternal and Child Health Division (GH/HIDN/MCH)** provides technical leadership and direction in newborn, child and maternal health, and safe motherhood initiatives. Division teams focus on newborn and child health and survival; maternal health; polio; immunization programs, including support to the Global Alliance for Vaccines and Immunization (GAVI); and vaccine introduction and new technologies. This Division also houses the Environmental Health Team, which focuses on technical leadership and support for safe water, hygiene and sanitation.
- **The Nutrition Division (GH/HIDN/NUT)** is responsible for technical leadership and direction in nutrition, micronutrients and food security. Division teams focus on infant and young child nutrition, micronutrient supplementation, food fortification, and developing innovative products to improve diet quality for sustainable nutrition and food security programming. The Nutrition Division also houses the child and maternal health research program and the Child Survival and Health Grants Program that facilitates a productive partnership between USAID and U.S. private and voluntary organizations.

Office of HIV/AIDS (GH/OHA)

Director: Roxana Rogers

Deputy Director: Paul Mahanna

The Office of HIV/AIDS is the focus of HIV/AIDS technical leadership for the Agency and has primary responsibility for leading the Agency's efforts within the President's Emergency Plan for AIDS Relief (PEPFAR). In cooperation with the State Department Office of the Global AIDS Coordinator (OGAC), this responsibility entails ensuring the technical integrity of Agency and mission strategies; providing global technical leadership on the full range of issues related to HIV/AIDS prevention, care, and treatment; managing numerous research and field support programs; and monitoring and reporting on the impact of the Agency's HIV/AIDS program.

- **The Technical Leadership and Research Division (GH/OHA/TLR)** provides technical advice and support across the Agency and field missions and has primary responsibility for HIV/AIDS operational and biomedical research in areas relevant to Emergency Plan goals and objectives.
- **The Implementation Support Division (GH/OHA/IS)** focuses on the provision of assistance to accelerate and scale-up HIV/AIDS programs in the field, and manages the majority of centrally-funded HIV/AIDS programs.
- **The Strategic Planning, Evaluation, and Reporting Division (GH/OHA/SPER)** provides programmatic expertise to help the Agency and its missions develop programs that respond to USG, USAID and Congressional policy and budget priorities, and incorporate innovations, best practices and lessons learned.
- **The Supply Chain Management Division (GH/OHA/SCMS)** helps strengthen existing supply chains or establish new ones to ensure a safe, secure, reliable, and sustainable supply chain management system to procure pharmaceuticals and other products for people with HIV/AIDS and related infections.

Office of Population and Reproductive Health (GH/PRH)

Director: Scott Radloff

Deputy Director: Ellen Starbird

The Office of Population and Reproductive Health (PRH) provides strategic direction, technical leadership and support to field programs in population, voluntary family planning, and reproductive health. It manages programs that advance and apply state-of-the-art technologies, expand access to quality services, promote healthy behaviors, broaden contraceptive availability and choices, strengthen policies and systems to address family planning and reproductive health needs, and improve data collection and use.

- **The Commodities Security and Logistics Division (GH/PRH/CSL)** promotes the long-term availability of a range of high-quality contraceptives, condoms and other essential reproductive health supplies.
- **The Policy, Evaluation, and Communication Division (GH/PRH/PEC)** works across the entire portfolio of Global Health activities to improve the collection, analysis and use of data in policy-making and program planning; and promotes policies, behavior change and community norms, which result in improved reproductive and health outcomes.
- **The Research, Technology, and Utilization Division (GH/PRH/RTU)** provides technical leadership in building scientific and empirical knowledge, and ensures its use in the design and implementation of effective, efficient, high-quality family planning and reproductive health programs.
- **The Service Delivery Improvement Division (GH/PRH/SDI)** develops and applies innovative strategies that improve the performance of individuals, organizations, and systems for the sustainable delivery of quality family planning and related services.

Office of Professional Development and Management Support (GH/PDMS)

Director: Sharon Carney

The Office of Professional Development and Management Support (PDMS) is responsible for three functional areas in the Bureau for Global Health: Professional Development, Personnel, and Administrative Support.

- **The Professional Development Team (GH/PDMS)** manages professional development activities and training, which include the Fundamentals Course, eLearning and State of the Art (SOTA) workshops for Washington and overseas Agency staff, and manages the Public Health Fellows Program, which places and supports Fellows worldwide.
- **The Personnel Team (GH/PDMS)** maintains the Bureau Manage-to-Budget records; assists Bureau managers in developing workforce analyses and plans, position descriptions, and Statements of Work (SOWs); coordinates the Annual Evaluation processes and Awards programs for the Bureau; processes recruitment requests and selection approvals through SDAA/GH; coordinates with the Office of Human Resources (OHR), with the Office of Acquisition and Assistance, and directly with Institutional Contractors of GH/PDMS to provide for both Direct and Non-Direct Hire staff for the GH Bureau, other Washington Bureaus and Offices, and overseas missions; and chairs the GH Personnel Working Group with representation from each GH Bureau Office.

- **The Administrative Support Team (GH/PDMS)** manages the Bureau Operating Expense budget, in collaboration with GH/SPBO/Controller, and associated procurement activities. It also provides all logistic and systems support to Bureau staff, including space planning and assignments; network, remote, and telephone access; equipment and supplies; interface with the Office of Security (SEC) for security clearances and badges; and maintenance of Vital Records, Emergency Contact Information, Continuity of Operations Planning (COOP) and Emergency Procedures.

Office of Strategic Planning, Budgeting and Operations (GH/SPBO)

Director: Michael Zeilinger

The Office of Strategic Planning, Budgeting and Operations (SPBO) has primary responsibility for Global Health’s strategic planning, budgeting, programming and procurement functions. It serves as the secretariat for the GH Office of the Assistant Administrator to coordinate GH actions and supports the GH technical offices in achieving their goals.

- **The Strategic Planning and Budgeting Division (GH/SPBO/SPB)** undertakes strategic planning, which includes overall sector and program planning, policy monitoring and evaluation, and serves to coordinate such activities within Global Health and with other units within the Agency. It also monitors and participates in donor coordination, private partnerships, evaluation of unsolicited proposals, reconstruction and stabilization issues, and controlled correspondence.
- **The Operations Division (GH/SPBO/OPS)** is responsible for providing programmatic support to Global Health technical office staff, from activity design through implementation. It also takes the lead in procurement planning, monitoring and tracking of all procurement actions; prepares and monitors Global Health’s budgets, which includes the management of Global Health OYB and monitoring of Global Health’s pipeline.

Office Of Country Support (OCS)

Acting Director: Janis Timberlake

The Office of Country Support (OCS) is the Bureau for Global Health’s hub to provide broad, strategic assistance and support to countries and missions. With changing initiatives and priorities, this support assists both country programs and HQ country teams in understanding and managing challenges involving business practices as they relate to field programs. As a critical interlocutor of change, the OCS interfaces with GH element offices, regional bureaus, other pillar bureaus and interagency colleagues to ensure coordinated strategic, technical and programmatic assistance to countries. OCS leads the Global Health Country Team System, drawing on GH staff expertise across offices, fostering country representation from a “whole of health” program perspective.

Project Listing

Bureau for Global Health

This section of the Users' Guide includes descriptions of three kinds of activities:

1. Contracts and cooperative agreements that have an explicit mandate to address technical needs that cut across Global Health and mission health Strategic Objectives, such as data collection, monitoring and evaluation, and communication for behavior change.
2. Mechanisms to access non-direct hire technical and administrative personnel.
3. Mechanisms that provide systems support, such as database management, indicator tracking, and report preparation.

Some of these activities are managed by inter-office teams from the Bureau for Global Health's three technical offices. Others are managed within the Office of Professional Development and Management Support and the Office of Strategic Planning, Budgeting, and Operations on behalf of the Bureau for Global Health as a whole.

Purpose

The purpose of the KMS task order is to provide:

- Analysis of health, program, and financial data to support senior management decisions and investments;
- Evidence-based information and services to guide the design and management of USAID health programs;
- Knowledge management and organizational learning for USAID health programs;
- Communication products and services to raise awareness and understanding of global health issues and activities among the informed public, both US and foreign, as well as among NGOs, PVOs, and decision-makers in global health.

Services Provided

KMS provides services to all offices of the Bureau for Global Health and is able to accept funds from all GH Elements and all GHCS earmarks from other USAID operating units. This activity can also accept nonhealth funding for support to a range of services in conjunction with Health programs. Services include:

- Use of a broad range of data sources and advanced analytic methods to ensure accurate, robust analyses;
- Systematic examination of links between health indicators and socio-economic and governance data that help explain indicator trends and identify program gaps;
- Information system designs that allow for the integration and accessibility of varied information sources through a central platform;
- Evidence-based communications products, such as “Success Stories” and Best Practices” that incorporate analysis results;
- Educational and public information functions such as conferences and briefings.

Global Health Fellows Program I (GHFP-I)

Professional and Organizational Development

Purpose

The GHFP I POD program is focused on improving the effectiveness of USAID's health sector by developing and increasing capacity of its health professionals through high quality professional and organizational development services worldwide. Since 2006, GHFP I POD with its partner Management Systems International (MSI) has provided creative solutions for individual, team and unit performance challenges. More information on the program is available at www.ghfp.net.

Services Provided

The program offers a broad range of tailored organizational and professional development assistance through training, teambuilding, strategic planning, and meeting facilitation. Services available through PDMS and GHFP-I include:

- Management and leadership training for improved delegation, influencing, financial & project management, meeting management, leadership, and collaboration within alliances and initiatives.
- Personal effectiveness training in learning to use Myers Briggs Type Indicator (MBTI), emotional intelligence, managing change, and presentation skills.
- Orientation sessions providing new staff overviews of the global health sector, help in setting goals and individual development plans, as well as opportunities to learn from more experienced staff.
- Technical conferences, workshops, and other activities to support technical excellence and learning in key elements of the health sector.
- Team and organizational development retreats that focus on organizational structure, workforce analysis, work planning, improved communication or management practices, program redirection and strategy development.
- Program assessments and program strategy work that builds consensus with and engagement of local partners in health programs.
- Professional management coaching to support skill acquisition for staff in need of personalized management support.

Project/Agreement

Websites:
www.GHFP.net

Purpose

GHFP-II, led by the Public Health Institute (PHI), helps USAID address its immediate and emerging human capital needs by developing a diverse group of global health professionals to support and sustain the effectiveness of the Agency's current and future health programs. This cadre of global health talent is motivated, technically excellent, well-supported, representative of the diversity of the American people, and committed to contributing to USAID's success in key global health priority areas.

Services Provided

The GHFP-II team identifies, recruits, hires and manages the performance and professional development of fellows and interns at all levels in areas such as maternal and child health, malaria, avian influenza and other emerging threats, HIV/AIDS, TB, family planning, and reproductive health, and other public health disciplines. Fellowships are generally limited to two years with the option to extend for an additional two years.

In the US, placements can occur in Washington DC, USAID Bureaus, other federal agencies, and USAID partner organizations. Outside the US, placements can occur in Missions, Ministries, NGOs, and USAID partner country offices. Innovations include rotations, Foreign Service National exchanges and professional development, and supporting new types of participants such as short-term, private sector fellowships (with GHFP-II partner CDS Solutions). Non-traditional participants and placements at a variety of sites provide added value in accomplishing the strategic objectives of the Agency and participating NGOs/PVOs/CBOs. Internships include a cohort summer program based in Washington DC, international placements and internships on-demand and upon-request.

GHFP-II provides advisory services to onsite managers who oversee fellows and interns to encourage efficient and effective oversight of fellows and interns. GHFP-II partner, Management Systems International (MSI), helps support an integrated performance-oriented approach to the fellows' professional development, setting their experience into a larger career strategy. Services include coaching and an active alumni program.

Global Health Support Initiative-II (GHSI-II)

Purpose

This is a USAID Direct Institutional Administrative Support Services Contract that provides Human Resource Support Services to USAID's health programs worldwide. Persons hired under this contract will be predominantly mid-career or senior professionals in technical areas and will supplement USAID's cadre of health professionals.

Services Provided

Persons hired under this contract may serve in the Global Health Bureau, Regional Bureaus in Washington, D.C. or in field missions around the world, and they will complement USAID's cadre of health professionals in technical and professional specialties. Their duties will focus on supplementing health programs with their specific skills and experience. These professionals will be expected to contribute to Agency technical leadership in the health sector.

Specific goals that they are expected to embrace include:

- Improving global health, including child, maternal and reproductive health;
- Reducing disease, especially HIV/AIDS, malaria, tuberculosis, and polio; and
- Increasing access to improved drinking water and sanitation services.

Purpose

To provide the Bureau for Global Health (GH) in Washington, DC, with a mechanism to obtain administrative and program support services on an as-needed basis. The activities under this contract call for the provision of key support staff, including administrative assistants, program assistants, program analysts, program specialists and travel coordinators to further the mandate of the Bureau for Global Health.

Services Provided

IT Shows, Inc., provides administrative and program support services to the Bureau for Global Health (GH), other Agency bureaus, and independent offices thus contributing to the achievement of GH and Agency goals and objectives through a Franchise Fund Agreement with the Department of the Interior (Acquisitions Services Directorate).

Services Provided on the agreement include but are not limited to:

- Document drafting, distribution, and tracking;
- Photocopying, faxing, supply monitoring;
- Event/Meeting logistics and planning;
- Data analysis, budget tracking, program file management;
- Field support; and
- Travel Processing.

Global Health Technical Assistance Bridge Project: GH Tech Bridge

Purpose

To provide the Bureau for Global Health (GH), Regional Bureaus, and USAID field missions with the necessary technical expertise to design, manage, and evaluate program activities.

Services Provided

Key areas of assistance for this IQC include:

- Program Evaluations;
- Health Sector Assessments;
- Program Designs;
- Technical Program Assistance;
- Convening of Consultative Groups;
- Research Tracking;
- Dissemination of Lessons Learned; and
- Technical Reviews.

The Project will also provide Global Health Bureau, Regional Bureaus, and USAID field missions with the ability to access independent specialists, including those from universities, not-for-profit, and for-profit organizations and to obtain technical services of key experts to support areas of strategic interest to USAID.

Partners: Development & Training Services, Inc. (dTS) and CAMRIS International

cpc.unc.edu/measure

Purpose

MEASURE Evaluation Phase III continues the program's 10 year initiative to improve the collection, analysis and presentation of data to promote better use in planning, policymaking, managing, monitoring and evaluating of population, health and nutrition programs. The program aims to accomplish this through achieving the following six results:

- Increased user demand for data and tools;
- Increased individual and institutional capacity in monitoring and evaluation;
- Increased collaboration and coordination in obtaining and sharing health sector data;
- Improved tools, methodologies and technical guidance;
- Increased availability of data, methods and tools; and
- Increased facilitation of data use.

MEASURE Evaluation Phase III is the Global Health Bureau's primary vehicle for supporting improvements in monitoring and evaluation in population, health and nutrition worldwide.

Services Provided

The MEASURE Evaluation Phase III Leader with Associates Cooperative Agreement provides technical assistance, global leadership and training to strengthen monitoring and evaluation of host country programs across the PHN sector. It also works to strengthen routine health information systems, to build capacity in host country institutions, to develop new tools and methodologies, and to conduct evaluation research. In addition, it continues to facilitate coordination of monitoring and evaluation and routine health information system strengthening efforts. Phase III incorporates the principle of sustainability into the project's overall framework by integrating organizational development, management, and behavior change into all aspects of its technical assistance.

Currently, MEASURE Evaluation works in approximately 40 countries worldwide.

Means of Access

Field Support. Separate Associate Awards can be negotiated with the recipient of the Leader Award and with AOTR duties carried out by the requesting USAID/Washington Bureaus or Field Missions.

* Though the Leader award is scheduled to end in 2013, it may be extended for an additional year. Please contact the AOTR for information.

MEASURE Phase III, Demographic and Health Surveys (DHS)

Purpose

The purpose of MEASURE Phase III DHS is to improve the collection, analysis and presentation of data and promote better use in planning, policymaking, managing, monitoring and evaluating population, health and nutrition programs. The project seeks to increase understanding of a wide range of health issues by improving the quality and availability of data on health status and services and enhancing the ability of local organizations to collect, analyze and disseminate such information.

Services Provided

The MEASURE DHS contract is the USAID/GH's main source of nationally representative and cross-nationally comparable demographic and health survey data, and as such, addresses host countries' emerging needs for data to guide policies and programs. The range of surveys available under this project includes the following:

- Standard national Demographic and Health Survey (DHS), which is conducted at intervals of four to five years;
- AIDS Indicators Survey (AIS), which provides indicators used for monitoring and evaluating HIV/AIDS programs;
- Malaria Indicator Survey (MIS), which collects data used for monitoring the performance of malaria programs;
- Service Provision Assessment (SPA), a facility-based survey that collects data on facilities' readiness to provide essential health services and quality of services.

The project is able to collect biomarker data relating to a wide range of conditions, including infectious and sexually transmitted diseases, chronic illnesses such as diabetes, micronutrient deficiencies, and exposure to environmental toxins. In addition, the project conducts qualitative studies to guide survey development as well as to clarify findings from surveys.

Other activities for MEASURE DHS include:

- Developing country strategies for data collection, capacity building and data dissemination and use;
- Providing technical assistance to local organizations to facilitate application of DHS data to program and policy development;
- Facilitating online access to archived DHS data and publications.

Email:
maddockc@who.int

Purpose

This grant provides support for collaborative activities with USAID and the World Health Organization (WHO) in infectious diseases, maternal and child health, family planning, safe motherhood, reproductive health, environmental health and HIV/AIDS.

Services Provided

The consolidated grant to WHO consolidates most of the Bureau for Global Health's agreements with WHO under a simplified mechanism. The grant supports broad USAID-WHO collaboration at WHO headquarters in Geneva as well as at regional and country offices, in tuberculosis, malaria and other vector borne diseases (e.g., dengue), disease surveillance, research, antimicrobial resistance, maternal and child health, family planning and reproductive health, and HIV/AIDS. This grant replaces the former Umbrella Grant (AAG-G-00-99-00005).

Specifically, support is provided to WHO's relevant technical and program divisions for technical input and assistance in the development, implementation and/or evaluation of health programs and studies including:

- Global strategy development
- Technical analyses
- Demonstration activities and feasibility studies
- Capacity building
- Policy reform
- Project evaluation and assessments
- Monitoring and evaluation
- Education/information strategies
- Maternal and neonatal health
- Family Planning and Reproductive Health
- Implementing Best Practices in Family Planning
- Medical Eligibility Criteria (MEC)

** Also includes World Health Organization Consolidated Grant/Child and Adolescent Health and Development (WHO/CAH), listed in Office of HIDN project listing.*

Merck MSD; Injeflex;
Cycle Technologies, Inc.;
UPS and Logenix

Purpose

To serve as the central procurement mechanism for Missions to purchase high quality contraceptives, condoms, and other essential public health supplies.

Services Provided

CCP utilizes the field support mechanism for the transfer, obligation, and disbursement of all USAID funds designated for contraceptives, male and female condoms, and other essential public health supplies. CCP is currently implemented through the (USAID | DELIVER PROJECT Task Order 5 (TO5)), to provide procurement, warehousing and freight services. CCP provides a mechanism for independent testing to monitor the quality of products donated to USAID programs. The quality control and testing of products is implemented by FHI360.

CCP continues to offer a choice of contraceptives and condoms. However, the breadth of commodities CCP is now able to procure has broadened to a range of essential health supplies including but not limited to nutritional supplements, medical equipment, vaccines, pharmaceuticals, diagnostics and other essential public health supplies. For more information on procuring these commodities, please contact Erin Seaver at eseaver@usaid.gov.

Condom availability and use in most countries is inadequate and funding for the procurement of condoms in PEPFAR non-focus countries is often unavailable. To fill this important gap, CCP administers the Commodity Fund (CF). The CF aims to increase condom availability for HIV and AIDS prevention by providing condoms free of charge to non-focus countries.

Additional resources are available for Missions and the programs they support who plan to order commodities including USAID Contraceptive and Condom Catalog and Ordering Essential Public Health Supplies: Guidelines for USAID Missions and Country Programs. For more information and to view these publications, please visit our website: http://www.usaid.gov/our_work/global_health/pop/techareas/contraprocedure.html

*Contractors may change annually due to competitive contract procedures.

Field Support

USAID | DELIVER Project (Deliver II) Task Order 4

Purpose

DELIVER Task Order 4's objective is to increase the availability of essential health supplies in public and private services through strengthened supply chains and supportive environments for commodity security. Task Order 4 will continue to implement best practices and provide technical services that were offered under the DELIVER Task Order 1, while further aligning its work to support the Global Health Initiative, BEST, and other health initiatives.

Services Provided

Improve and strengthen in-country supply chains: TO4 supports research, assessments, analyses, supply chain designs, and capacity building to ensure that in-country supply chains are able to meet the basic health commodity requirements of public health programs, and accommodate the growing need for and influx of supplies across multiple disease and health areas. Areas of expertise include product selection, forecasting, financing, procurement, quality assurance, distribution, inventory management, storage, logistics management information systems, and disposal. TO4 places renewed focus on end-to-end supply chain strengthening, and addressing key bottlenecks throughout the supply chain, particularly procurement, infrastructure, transport, and last mile distribution.

Strengthen environments for commodity security: To strengthen country environments for commodity security, TO4 focuses on financing and resource mobilization, policies and regulations, market segmentation and market development, and advocacy and leadership. An overarching emphasis is to build local capacities to gather, analyze, and use quality data for decision making. While much of this work will directly focus on in-country environments, TO4 will also collaborate with and support partners at the global and regional levels to strengthen evidence-based global/regional advocacy for commodity security.

Across all technical areas, TO4 will place new or expanded focus on capacity and skills transfer, research and innovation, leveraging partners, and knowledge management and communications.

Means of Access

Field Support—TO4 accepts funding from all health directives.

Email:
linda.bruce@crc.uri.edu

Purpose

The BALANCED project's overall objective is to advance and support wider use of effective Population, Health, Environment (PHE) approaches worldwide.

Services Provided

Population, Health, Environment (PHE) projects acknowledge and address the complex connections between humans, their health, and their environment. The key objective of these projects is to simultaneously improve access to health services, especially family planning and reproductive health, while helping communities manage the natural resources on which they depend. The underlying philosophy is an integrated approach to meeting communities' family planning, basic health, and natural resource management needs that is more effective than delivering these services in stand-alone or parallel programs. PHE projects play an important role in areas where demographic trends such as growth and migration place pressure on the environment, where degraded natural resources impact the health and livelihoods of local communities, and where a lack of health services, especially family planning and reproductive health, threatens long-term prospects for sustainable development.

The BALANCED project will:

- Develop, organize and synthesize PHE knowledge and tools;
- Build capacity for integrated PHE project implementation; and
- Provide technical assistance and implement results-oriented PHE field activities in areas of high biodiversity.

The project will expand USAID's global leadership in integrated PHE project activities by disseminating knowledge and building capacity at a global level, based on lessons that emerge from country-specific PHE field activities. These activities will focus on building PHE capacity and scaling up proven integrated PHE approaches, building on successful PHE activities implemented under previous awards.

Communication for Change (C-Change)

Purpose

Agency-wide programming in the design, implementation, and evaluation of behavior change communication (BCC) programming to influence the social determinants of behavior including social norms and social networks. The Leader Agreement is for programming in health: family planning, HIV and AIDS, malaria, child health, maternal health, and infectious diseases. BCC and social change programming in environment, democracy and governance and other areas can be undertaken through Associate Awards. C-Change provides the opportunity for stakeholders in diverse sectors to work collaboratively to address underlying factors, or social and economic determinants, that may cut across development areas such as poverty, gender, access to basic services, and culture.

Services Provided

C-Change can help agency priority programs achieve scale and sustainability by:

- Providing assessments, strategic direction and support for the development and implementation of national BCC strategies;
- Building strong coalitions to support program growth by engaging, expanding and energizing networks of organizations;
- Increasing the capacity of local institutions to plan and implement BCC interventions;
- Engaging the media as partners, working with journalists and other media professionals to incorporate health information in media at minimal cost;
- Conducting state-of-the-art research that informs program development and implementation; and
- Generating and sharing lessons learned, easy-to-use tools and skills-based training.

geoff.dabelko@wilsoncenter.org

Purpose

The Woodrow Wilson International Center for Scholars (Wilson Center) HELPS project educates and informs U.S. and developing country decision-makers about the benefit of effective population policies, as well as health programs that link population, health, and the environment in the field, by expanding dialogue and disseminating information on population's multiple links to environment, global health, development, and security. The project synthesizes and disseminates research and practical lessons on the intersections between health and population priorities and programs and other development sectors, with a focus on environment and security. Target audiences include U.S. based decision makers, policy makers, policy champions, researchers, the media, and the security community. Developing country policy audiences are also targeted to a lesser extent.

Services Provided

The HELPS project synthesizes and disseminates research and practical lessons on health, population, environment and security through two major avenues:

- Instigating practical dialogues about population topics and their links to environment, health, development, and security among researchers, implementers, decision-makers and the media at the Wilson Center. HELPS holds events at the Wilson Center's facilities in the Ronald Reagan Building that will showcase new research, compelling case studies, lessons learned, data analysis, and future challenges presented by leaders in the field. Attendees come from the more than 4,000 D.C. area contacts representing a diverse mix of U.S. government agencies, NGOs, policymakers, universities, think tanks, donors and the media.
- Synthesizing and disseminating information, analysis, and lessons learned on linkages between population, health, development, environment, and security issues in multiple formats to relevant policy and practice audiences. The HELPS project produces written publications and audio/visual multimedia and disseminates them to target audiences. Innovative dissemination approaches to reach today's audiences, especially those outside the D.C. area, include using on-line formats such as websites, blogs, e-newsletters, listservs, podcasts, and videos, as well as social media platforms.

Field Support

Health Policy Project (HPP)

Purpose

HPP will help USG country teams and national counterparts translate the goals of GHI into policies, plans, and actions, and will directly support GHI implementation by strengthening in-country capacity for policy and governance, financing, leadership and advocacy, multisectoral coordination, and use of data for decision-making, and promoting country ownership of programs and initiatives. HPP also will support capacity development to address gender, socioeconomic, and stigma-based inequitable access to health services and to improve measurement of policy impacts on health outcomes.

Services Provided

Transferring skills to and building systems for the next generation of in-country policy leaders and champions will be the highest priority of HPP. Capacity building under HPP is seen as a process of jointly planned and focused support to identify, improve, and sustain institutional and individual competence and structures for effective policy, advocacy, and governance. HPP offers assistance to:

- Support capacity building for development, costing, financing, and implementation of country-led plans, policies and/or Partnership Frameworks;
- Strengthen partner country undergraduate, graduate, and continuing professional development programs in policy and governance;
- Conduct regional and in-country trainings and provide technical assistance to develop data use, analysis, and modeling, as well as advocacy and communication, skills; and
- Create a grants mechanism to fund the implementation and scale up of locally developed innovations and approaches.

@aspennst.org

Purpose

Recognizing the fundamental role of population and health to sustain development and the critical need for new, influential spokespersons from diverse sectors to educate various audiences about reproductive health and development, the IDEA-Aspen project will mobilize and equip select high-level policymakers to serve as champions, expand dialogues through new cross-sectoral global forums, and collaborate with partners to increase knowledge, policy action, and resources for reproductive health.

Services Provided

The IDEA-Aspen project uses the following approach:

- Use high-level strategic access to national and global leaders to dramatically amplify new messages about the centrality of reproductive health to development;
- Utilize select policymakers as champions and standard setters for their peers;
- Link reproductive health more centrally to broader development goals including the environment, security, health, and economic development;
- Engage new influential audiences and establish ongoing linkages with diverse non-health sectors;
- Emphasize the power of personal narrative through the voices of influential policy spokespeople from developing and developed nations.

Aspen engages these high-level policymakers primarily through three forums - the Population, Health and Development Track at the annual Aspen Ideas Festival; the Aspen Population and Health Roundtable Series in Washington, DC; and the Population Policy Dialogue Series in collaboration with the WHO in Geneva at the time of the World Health Assembly.

Means of Access

Core

Inform Decision-Makers to Act (IDEA) - PRB Population Reference Bureau

Purpose

The IDEA project educates and informs U.S. and developing country decision-makers about the benefit to development of health and population programs. The principal activities for the IDEA project are gathering, synthesizing, and translating data and research into digestible formats for a variety of policy audiences. More broadly, IDEA helps the USG achieve its foreign assistance goals by helping to improve country health systems through improved information, leadership and governance, and policy dialogue around the delivery of health care services.

Services Provided

The Population Reference Bureau IDEA project engages government organizations, NGOs, development networks, and other local institutions to build their capacity to design and implement effective FP/RH advocacy strategies. Under this award, PRB produces its World Population Data Sheets. It develops country-specific and global multimedia presentations to engage decision-makers on the benefits of FP/RH using advanced data-visualization technologies such as the Trendalyzer (bubble graph) software. It works with journalists to improve the quality and quantity of FP/RH issues in the media and to link FP/RH issues to population growth and development.

Priority areas include:

- Health and population data and information analyzed, synthesized and disseminated to engage relevant policy and advocacy audiences;
- Capacity of media to provide quality coverage of key health and population issues strengthened;
- Individual and institutional capacity to use information to influence policymakers improved;
- Dialogue among population and health researchers, program implementers and policymakers expanded.

Purpose

Health service providers, program managers, and policymakers need to access and use quality, relevant health information to effectively perform their work. Unfortunately, multiple barriers to health information exist, particularly in the developing world. K4Health is designed to remove impediments to accessing and adapting health information and to facilitate knowledge exchange at global, regional and local levels.

Services Provided

K4Health provides global leadership in health knowledge management - the synthesis, exchange, adaptation and use of health information. The project's major components include:

A global web portal, www.k4health.org, offering:

- A Google custom search tool to help users quickly find vetted resources;
- eLearning courses for rapid or just-in-time learning;
- eToolkits with specialized materials on priority health topics; collections that users can design, develop, or modify to meet local needs; and
- Virtual discussion forums that provide participants access to a community of experts around the world;
- Data on health information needs, preferences for obtaining and sharing information, and typical uses of information technologies; and
- Field-based information needs data collection tools and programming to respond to identified needs.

Regional and country knowledge management platforms, contributing:

- A compilation of key health information materials provided in local languages including the Family Planning Global Handbook and Wall Chart;
- Novel and easy ways to access health information at local levels;
- mHealth applications to improve information exchange amongst providers; and
- A process to gather information from health workers and facilitate the exchange of information amongst them.

MEASURE|US Census Bureau

Purpose

The MEASURE Program is a coordinated effort to improve the collection, analysis and presentation of data for use in planning, policymaking, managing, monitoring and evaluating population health and nutrition programs. The agreement with the US Census Bureau (USCB) seeks to strengthen the capability of statistical offices in developing countries to collect, analyze, disseminate and use data to increase understanding of population structure and demographic trends and their implications for development planning and policy making.

Services Provided

This interagency agreement (IAA) with the USCB will focus on:

- Country-specific technical assistance to build the capacity of national statistical organizations to implement censuses and other surveys, including technical consultations and training in census design, management procedures, data collection and processing, demographic data analysis, dissemination, and use of census data;
- In-country, regional and US-based workshops and study tours including training activities to strengthen capacity to design and manage census and survey implementation and to analyze, disseminate and use demographic data;
- Centrally coordinated activities that support worldwide efforts to improve collection, analysis and use of census and survey data including maintenance and dissemination of the International Data Base, a web-based databank containing demographic and socioeconomic data for 227 countries and areas of the world.

Purpose

MEASURE Evaluation Phase III continues the MEASURE program's initiative to improve the collection, analysis, and presentation of data to promote better use in planning, policymaking, managing, monitoring and evaluating of population, health, and nutrition programs. In line with the MEASURE Evaluation Phase III Leader, the objective of the MEASURE Evaluation Phase III Office of Population and Reproductive Health (PRH) Associate Award is to ensure optimal demand for and analysis of FP/RH data, and the appropriate use of such information to measure performance and to inform FP/RH interventions and policies. The program aims to accomplish this by achieving the following three results:

- Increased collaboration and coordination in efforts to obtain and communicate FP/RH data in areas of mutual interest;
- Improved design and implementation of M&E frameworks and information gathering processes including tools, methodologies, and technical guidance to meet users' needs; and
- Timely and topical analyses done for improved understanding of FP/RH dynamics and evidence-based decision making.

Services Provided

The MEASURE Evaluation Phase III PRH Associate Award provides technical assistance, global leadership, and training to strengthen monitoring and evaluation of PRH programs. It also works to develop PRH monitoring and evaluation tools and methodologies, and to conduct PRH evaluation research. In addition, the PRH Associate Award will facilitate and strengthen coordination of data collection, analysis, and dissemination of FP/RH data among PRH CAs and stakeholders, with the aim of providing guidance on best practices, promising innovations, and setting monitoring and evaluation standards.

Biodegradable Contraceptive Implants

Purpose

To improve contraceptive choices in developing countries through the development of a new, safe, and effective contraceptive method.

Services Provided

This five-year project will focus on furthering the development of biodegradable contraceptive implants with a one year duration of action. If proven to be safe, effective and acceptable, the inclusion of biodegradable implants would expand FP options by filling the duration of effectiveness gap between injectables (3 mos) and standard implants (5 yrs), and negating the need for removal (unless so wished by the user).

Purpose

To develop and evaluate a safe, effective, and acceptable contraceptive and HIV/AIDS prevention technology.

Services Provided

This five-year project will focus on the development of a vaginal ring that combines the recently proven HIV prevention drug, tenofovir, with the hormonal contraceptive, LNG. If shown to be safe, effective and acceptable, this combination ring would confer protection against HIV while delivering a highly effective contraceptive method, thus filling two RH needs in one product.

Means of Access

Field Support

IPM Combination Contraceptive and Anti-HIV Vaginal Ring

Purpose

To develop and evaluate a safe, effective and acceptable contraceptive and HIV/AIDS prevention technology

Services Provided

This five-year project aims to formulate a 60-day vaginal ring that combines the potential HIV prevention drug, dapivirine, with a hormonal contraceptive. Dapivirine showed high potency against HIV in early studies, and will soon enter a large scale efficacy trial in a ring formulation. This project will focus on integrating a hormonal contraceptive into the dapivirine ring, with the end goal of successfully formulating a potent and inexpensive combination ring that is effective for 60 days.

Field Support

Facilitating Regulatory Pathways for Approval of Multipurpose Prevention Technologies

Purpose

To improve reproductive health in developing countries by facilitating the regulatory pathways for approval of Multipurpose Prevention Technologies.

Services Provided

This two-year project will support collaboration with the US FDA and other stringent regulatory authorities to develop appropriate strategies and testing algorithms for the expedited approval of multipurpose prevention technologies, foster the hybridized approval of products that fall across two regulatory domains (e.g., devices and drugs), and identify gap filling preclinical and bridging studies deemed necessary for eventual approval of a multipurpose prevention technology.

Website:
<http://www.irh.org/?q=content/fam-project>

Purpose

To improve contraceptive choices by expanding access to fertility awareness-based methods (FAMs), the Standard Days Method (SDM), the TwoDay Method (TDM) and the Lactational Amenorrhea Method (LAM), in developing countries. This activity addresses the needs of women and men who want to use a FAM to avoid pregnancy but lack the information and skills to use them effectively.

Services Provided

For some people, FAMs are their first introduction to FP and/or first choice for contraception. The FAM project expands FAM options and services and improves awareness of the fertile period. The project contains the following elements:

- Operations Research to understand service delivery issues and scale-up of FAMs;
- Mainstreaming FAMs into FP programs at a large scale in 8-10 focus countries;
- Increasing RHA among youth, adults and at the community level;
- Evaluating the costs and cost-effectiveness of FAM services.

Improving capacity of public and private sector institutions to provide FAMs. The project will provide technical assistance to Ministries of Health, NGOs, other donors, other cooperating agencies, bilateral and other developing country programs for the provision and expansion of the Standard Days Method (SDM), The TwoDay Method (TDM) and the lactational Amenorrhea Method (LAM). The project also focuses on empowering women and men to participate in their own reproductive health care and decision-making. Countries interested in expanding choices to include effective fertility awareness based methods should contact either the implementing partner or the USAID AOR.

Gender Roles, Equality, and Transformations (GREAT) Project

Purpose

To understand the processes through which social norms and attitudes about gender, reproductive health, and violence are transmitted in Northern Uganda.

Services Provided

This phased five year project will conduct formative research to identify opportunities to promote the formation of gender equitable norms, attitudes and behaviors among adolescents and the significant adults in their lives. The research design includes innovative qualitative methods, such as collecting life histories from young people at different stages of the life course and in-depth interviews with individuals nominated by youth as significant influencers in their lives. Using an implementation science framework, the project will then inform the development and testing of interventions during the second phase that 1) impact gender norms to positively influence reproductive health outcomes, reduce GBV, and improve gender equity, and 2) have the potential to catalyze wide-spread, sustainable movements to challenge gender inequities worldwide.

Purpose

To understand the implementation and impact of a specific cash transfer program to impact the age of marriage in Haryana, India

Services Provided

This five-year cooperative agreement awarded to the International Council for Research on Women (ICRW) provides a unique opportunity to evaluate an ongoing, government run cash transfer program in Haryana, India. This Government program was started about 16 years ago where parents of new born girls were give a bond to cash in when the girl turns 18 years of age and is still unmarried. Several other such programs have since begun in India. The Haryana program is the first to come to maturity in a couple of years and presents an opportunity to do a large scale research study to assess its implementation and impact. The findings of this project will greatly improve the evidence to date on conditional cash transfer programs and health impacts, which can then be applied to the Haryana program, other Indian government programs, and cash transfer programs around the world.

Means of Access

Field Support

Increasing Age of Marriage

Purpose

The Population Council will systematically test a combination of interventions to delay marriage and track associated program costs with a view to scale-up.

Services Provided

This five-year cooperative agreement will provide evidence regarding the reduction of early marriage as a social determinant for reproductive health. The project will undertake a quasi-experimental study. Interventions will include community education, programs to build the educational and economic assets of girls, and direct incentives. Baseline and endline surveys will measure impact of the programs on the age at marriage and the ongoing documentation will monitor program participation and cost. An important element is the team building with local partners, engaging local governmental and nongovernmental partners as well as promoting south-to-south exchanges and capacity building. The development of a clear evidence base and costing data will be supporting research utilization and scaling up of proven approaches.

Purpose

The purpose of this activity is to develop, evaluate, bring to market, and make available to public sector programs, new and better products for family planning and for prevention of sexually transmitted HIV/AIDS and other infections.

Services Provided

Agency core-supported research by the Population Council will support the development of a proprietary hormone-releasing contraceptive vaginal ring as well as the development of proprietary vaginal microbicides to prevent or reduce sexual transmission of HIV. Overall, these activities aim to expand the array of contraceptive choices for both women and men and to improve reproductive health. Additional information is also available at www.popcouncil.org.

Means of Access

Field Support

Program Research for Strengthening Services (PROGRESS)

Purpose

To increase access to and quality of family planning services through:

- Program research to test innovative service delivery approaches;
- Research-to-practice activities;
- Institutional capacity development to use and conduct research; and
- Expanding access to improved or new contraceptive methods.

Services Provided

PROGRESS focuses on research and technical assistance to improve family planning programs worldwide. PROGRESS has a mandate to:

- Expand the number and types of service delivery points geographically and economically accessible to underserved groups particularly the poor, postpartum women and youth;
- Expand availability of contraceptive methods and effective referral systems;
- Reduce medical, policy and supply barriers to service delivery points;
- Improve the quality of contraceptive methods and services;
- Increase demand for services;
- Increase the efficiency and sustainability of services;
- Strengthen local research groups in focus countries so they can address programmatic questions using appropriate and efficient research methodologies; and
- Increase the ability of key stakeholders to value evidence-based decision-making, understand the results of program research, and use research to improve programs and services.

PROGRESS will also bridge the gap between the developers of contraceptive methods and the providers and clients who use those methods. PROGRESS will assist USAID to improve the process of developing new contraceptive methods and refine existing methods by assuring the process is informed by what potential users need and want, and by the capacity of service providers and delivery systems to make methods available.

Purpose

To understand the disconnect between unmet need and demand for family planning in Mali.

Services Provided

This five-year, phased project will be implemented by Georgetown University's Institute for Reproductive Health (IRH) in partnership with CARE International and the Center for Development and Population Activities (CEDPA). The methodology includes social network analysis to identify strategies to increase women's access to and use of family planning and reproductive health services. Based on Phase I's formative research results, IRH and its partners will design and test interventions that activate key individuals within these networks in order to reduce negative determinants and strengthen positive influences on attitudes and behaviors. Then, successful social network interventions will be expanded to additional communities throughout Mali, and if applicable, to other West African countries.

Bayer HealthCare Pharma USAID Contraceptive Security Initiative

Purpose

In September of 2009 the Global Health Bureau's Office of Population and Reproductive Health awarded a five-year collaboration agreement between USAID and Bayer HealthCare Pharma.

The Bayer-USAID Contraceptive Security Initiative is an innovative public-private partnership that seeks to address the ever increasing need for affordable contraceptives in the developing world. In the first ever project of this nature, Bayer will register, market and promote Microgynon Fe, an oral contraceptive, at an affordable price, to middle income women in multiple developing countries.

Services Provided

Bayer is seeking to create a permanent market niche for Microgynon Fe as a "Tier 2" product. As such, Microgynon Fe will have a price point above the social marketing and public sector level and below commercial prices, which will attract contraceptive users to the middle of the market, thereby growing the overall number of users and allowing governments and donors to better serve lower income markets.

Bayer uses its existing manufacturing, packaging, export/import and distribution capabilities as well as the expertise and capacity of its current management and sales staff. Tier 2 Microgynon Fe is being sold in the private sector, using local pharmacies as the primary distribution channel. This approach leverages the private sector to ensure market viability and create sustainable markets for mid-priced contraceptives.

USAID has contributed funding for initial advertising/promotional support in order to help build initial awareness and volume sales. Bayer has sub-contracted Meridian Group International, Inc., a long established USAID subcontractor on social marketing initiatives, to develop and manage the in-country promotional activities. The project is fully operational in Ethiopia, Tanzania, and Uganda, and plans to launch in eight additional countries.

Website:
www.capacityplus.org

Purpose

This project strengthens the human resources (HR) needed to implement quality health programs, in both the public and private, particularly the not-for-profit private, sectors. It addresses both the number of healthcare workers needed and the quality and performance of those workers. The definition of “healthcare worker” is expanded to include HR managers, laboratory staff, pharmacists, social workers, information systems/monitoring and evaluation specialists and others essential to the effective functioning of the health system.

It also builds capacity in service delivery thereby increasing access to high quality FP/RH, HIV/AIDS, malaria, TB, MCH and other health services while at the same time strengthening the human resource systems necessary to develop, maintain and support the workforce. Additionally, it works to foster the relationship of the workforce, as one of the six building blocks of health systems, to the other building blocks and strengthen the health system as a whole.

Services Provided

Project interventions focus on:

- Fostering global leadership and advocacy to address the HRH crisis;
- Enhancing HRH policy and planning, including strengthening HR management and information systems;
- Improving HRH workforce development, including pre-service, in-service, and continuing professional development systems;
- Strengthening HRH performance support systems to improve health worker retention and productivity;
- Generating and disseminating knowledge to promote use of evidence-based HRH approaches.

Two cross-cutting themes are promoting gender equity in HR policy and management and integrating faith-based organizations given their integral role in healthcare delivery in many countries.

Implementing partners are IntraHealth International, Inc. with Abt Associates, IMA World Health, Liverpool Associates in Tropical Health (LATH), and Training Resources Group (TRG).

Means of Access

Field Support and Associate Awards

Grant Solicitation and Management (GSM)

Purpose

The Grant Solicitation and Management (GSM) project will efficiently channel USAID funds to an individual grant or to a grants program targeting PVOs/NGOs and their partners.

Services Provided

The GSM assists field missions and GH/PRH to solicit applications, award, and manage small-to medium-sized sub-grants (up to \$2.5 million) targeting PVOs/NGOs and their partners. The GSM will accept funding for all health sector areas including family planning, HIV/AIDS, maternal child health, and control of infectious diseases; and supports community-based service delivery, training, and related activities. Depending on the source of funds, USAID/PRH and/or USAID Missions will determine the scopes of all solicitations and the selection criteria to be used for these procurements and may lead or participate in the technical review process. The GSM will perform cost analyses and determine whether potential grantees meet financial and other criteria to receive USAID funds and provide ongoing financial oversight of grantees. USAID will make the final determination on each award.

Customized technical assistance for capacity-building of local NGOs is awarded through the GSM.

A five-year program may be established by Missions or Bureaus through an Associate Award. In this case oversight of the associate award will be the responsibility of the unit that issues the award.

Purpose

To increase the use of family planning and reproductive health (FP/RH) services, with a focus on the informed and voluntary use of long-acting and permanent methods (LAPMs) of contraception.

Services Provided

- Increase access to and provision of the full range of contraceptives including LAPMs;
- Apply state-of-the-art approaches to strengthen programming for supply, demand, and the enabling environment for FP/RH and LAPM services
 - Increase access to and provision of a range of contraceptives, including LAPMs;
 - Generate interest and demand for LAPMs;
 - Strengthen commitment, support and programming for LAPMs;
- Conduct programmatic research on key operational issues to introduce and expand access to a broad range of contraceptive methods and FP/RH services;
- Design and implement programs which integrate family planning with MNCH, HIV/AIDS, gender/male involvement, PAC, and other related RH/FP services.

RESPOND's Implementing Partners:

- EngenderHealth (prime recipient), Johns Hopkins University Center for Communications Programs (JHU/CCP) Meridian Group International, Futures Institute, the Population Council, Family Health International (FHI), and Cicatelli and Associates.

Means of Access

Field Support and Associate Awards
(To discuss options for expanding LAPMs and other FP/RH services, or integrated programming of Family Planning with MNCH or HIV interventions, please contact persons listed in sidebar.)

Support for International Family Planning Organizations (SIFPO/MSI)

Purpose

SIFPO/MSI aims to increase the use of FP services globally through strengthening selected international family planning organizations which have a global reach and an extensive, multi-country network of FP clinics, in order to achieve maximum program impact and synergies.

Services Provided

SIFPO/MSI leverages the comparative advantage and innovations of international family planning organizations to strengthen access to and use of high quality family planning services and commodities that are affordable and sustainable.

SIFPO/MSI offers a wide array of technical services available to Missions and their counterparts, through two separate cooperative agreements. Awardees are working to:

- Strengthen the delivery of quality family planning services to priority populations, specifically reaching those populations with high unmet need for FP with cost effective interventions.
- Quantify and disseminate quality assurance standards to strengthen FP program performance.
- Increase organizational sustainability of country level FP programs, through internal South to South support and technical assistance to improve capacity to capture revenue and become more self-sustaining over time, while still responding to the needs of underserved and marginalized groups.
- Provide gender-sensitive FP services targeting youth strengthened so that youth and women, including young women, are able to access quality FP services that meet their needs.
- Using vouchers, social franchising, social marketing and outreach strategies, SIFPO/MSI seeks to increase use of voluntary family planning including long acting and permanent methods.

SIFPO/MSI is implemented by Marie Stopes International, with partners Population Council, International Center for Research on Women, EngenderHealth, and International HIV/AIDS Alliance.

Strengthening Health Outcomes through the Private Sector (SHOPS)

Purpose

The SHOPS Project works on increasing the role of the private sector in the sustainable provision and use of quality family planning (FP)/reproductive health (RH), HIV/AIDS; maternal, child health, and nutrition; and other health information, products, and services.

Services Provided

SHOPS builds upon decades of support for leadership in private health sector programming and on the work of its predecessor projects, Private Sector Partnerships-One (PSP-One) and Banking on Health as well as projects such as Social Marketing for Change (SOMARC), AIDSMark, and Point-of-Use Water Disinfection (POUZN). SHOPS' emphasis on exploring and advancing private sector innovations distinguishes this project from its predecessors. The SHOPS project offers a wide array of technical services available to Missions and their counterparts:

- Conduct private sector health assessments;
- Establish and facilitate public-private partnerships;
- Implement social marketing programs, including pharmaceutical partnerships;
- Conduct client-centered market segment analyses;
- Promote behavior change through targeted health communications interventions;
- Create financing mechanisms contracting, health insurance, voucher programs to improve access to affordable healthcare and products;
- Improve policy and regulatory environments for the private sector in health;
- Foster innovations and state-of-the-art private sector delivery and distribution models.

SHOPS is implemented by Abt Associates and their five core partners: Banyan Global, Jhpeigo, Marie Stopes International, the Monitor Group, and O'Hanlon Health Consulting.

Purpose

The Leadership, Management and Governance (LMG) project is designed to support health systems strengthening by addressing the gap for sustainable leadership, management, and governance capacity of health care providers, program managers, and policy makers to implement quality health services at all levels of the health system.

Services Provided

To build leadership, management and government capacity in health, the Project will, in collaboration with the governments and local civil society organizations:

- Foster global leadership and advocacy for improved leadership, management and governance capacity.
- Strengthen the delivery of quality family planning and other health services through improved leadership, management and governance capacity.
- Support the establishment and expansion of health managers as a professional cadre.
- Develop and strengthen pre-service education in leadership, management and governance.
- Develop and strengthen in-service leadership, management and governance education and training with Ministries of Health and local non-governmental and faith-based organizations.
- Expand the awareness and use of tested tools, models and approaches to strengthen leadership, management and governance capacity throughout the public sector and civil society organizations.
- Generate knowledge and conduct research to expand the knowledge base of the effect of enhanced leadership, management and governance capacity on health services outcomes in family planning, maternal and child health, HIV/AIDS and other health areas.
- Develop and update indicators for tracking country-led leadership, management and governance processes and capacity building.

LMG is implemented by Management Sciences for Health with partners African Medical and Research Foundation (AMREF), International Planned Parenthood Federation (IPPF), Yale University Global Health Leadership Institute (Yale GHLI), Johns Hopkins University Bloomberg School of Public Health (JHSPH), and FrontlinesSMS:Medic

Evidence to Action for Strengthened Family Planning and Reproductive Health Services for Women and Girls (E2A)

Purpose

Evidence to Action for Strengthened Family Planning and Reproductive Health Services for Women and Girls (E2A) is a five-year, world-wide cooperative agreement. The purpose of E2A is to increase global support for the use of evidence-based best practices to improve family planning and reproductive health (FP/RH) services, access, and quality. The project will strengthen service delivery by institutionalizing proven interventions in the health system. E2A will work to integrate FP/RH with other health and non-health services, mitigating gender barriers, and enhancing informed decision-making for women and girls.

Services Provided

E2A will work in partnership with USAID's regional and country missions, host country partners, and international organizations to:

- Support the learning agenda for GHI strategies and BEST action plans
- Document and synthesize local evidence to identify high impact interventions
- Translate knowledge into practice by facilitating selection, introduction and large-scale implementation of evidence-based practices
- Address system and policy issues that lead to sustainable scale-up strengthened services and improved health outcomes
- Introduce and test innovative service delivery approaches, especially for reaching youth; adapt and scale-up proven approaches within and between countries
- Support gender assessments, integrate and mainstream gender-equitable approaches into service delivery interventions, and evaluate the effectiveness of approaches and models
- Document program and system approaches in the delivery of integrated packages of services to identify essential elements of success that are replicable and lead to sustainable scale up
- Apply systematic approaches to achieve sustainable scale-up, and monitor and evaluate the science of sustainable scale-up

The project is led by Pathfinder International with a consortium of partners: Management Sciences for Health (MSH), IntraHealth, Program for Appropriate Technologies in Health (PATH), ExpandNet, and the African Population and Health Research Center (APHRC).

Purpose

The AIDS Support and Technical Resources (AIDSTAR) Sector I: Service Delivery Indefinite Quantity Contract (IQC) is a flexible mechanism available to USG country teams, USAID/W operating units, missions and other USG agencies, to access technical expertise and implementation support across a broad range of HIV/AIDS-related technical areas. AIDSTAR is available to work in both Emergency Plan focus and other bilateral countries. AIDSTAR contractors have demonstrated technical capacity in a range of technical areas related to prevention, care and support, treatment/anti-retroviral therapy and related services, stigma and discrimination, gender, and program-related data collection and analysis. AIDSTAR Sector I may be used for: long or short-term technical assistance and program implementation support in a full range of PEPFAR program areas including prevention, care and treatment; long or short-term in-country support for coordination and scale-up for HIV/AIDS activities in support of USG country strategies; documenting and disseminating successful innovative approaches and sustainable models, evidence-based best practices and lessons learned, and new approaches, tools and methodologies in HIV/AIDS programming.

Services Provided

The AIDSTAR website (<http://ghiqc.usaid.gov/aidstar/>) provides resources and guidelines for missions and contractors to carry out the necessary steps for procurement of task orders under this IQC.

Means of Access

Direct Task Order

AIDS Support and Technical Assistance Resources (AIDSTAR) Sector I, Task Order #1 John Snow, Inc.

Purpose

The AIDSTAR-One project provides technical assistance to USAID's Office of HIV/AIDS and USG country teams across a broad range of technical areas. The project is available to implement programs in other bilateral countries across prevention, care and treatment, and for technical assistance to support USG teams in strategic planning, program or needs assessments and documentation of successful program models. AIDSTAR-One can also undertake the management of grants to local NGOs. AIDSTAR-One assistance can be accessed through field support transfers from USAID field missions. Some restrictions apply to the use of this mechanism by focus countries. Consult the COTR (Elizabeth Berard) for further information.

AIDSTAR-One has four major components:

- HIV/AIDS Technical Resource Development and Dissemination: To create, synthesize, manage and disseminate tested approaches and good and promising practices in HIV program implementation in support of PEPFAR goals;
- HIV/AIDS Prevention, Care and Treatment: To advance and support state-of-the-art program strategies to prevent HIV transmission, and provide care and treatment services to those infected and affected by HIV;
- Policy, Systems Strengthening and Sustainability: To provide technical assistance to strengthen systems, support policies and develop guidelines to promote sustainable HIV prevention, care and treatment programs at the country level, including modes of service delivery that are cost effective and sustainable;
- Field Support-funded Program Implementation (primarily for non-focus countries): To support USG country teams by implementing programs that help meet country-level targets and contribute to broader goals of the President's Emergency Plan for AIDS Relief (PEPFAR).

Purpose

The AIDSTAR Sector II: Capacity Building Indefinite Quantity Contract (IQC) is a flexible mechanism available to USG country teams, USAID/W operating units, missions and other USG agencies, to access technical expertise and implementation support across a broad range of HIV/AIDS-related technical areas, particularly as they relate to building personnel and institution capacity to further sustainable implementation. AIDSTAR is available to work in both Emergency Plan focus and other bilateral countries. AIDSTAR contractors for Sector II have demonstrated capacity to enhance management capacity skills and leadership of national and sub-national institutions to deliver integrated, sustainable HIV/AIDS services at scale. AIDSTAR Sector II may be used for:

- Management Systems - provide training in all aspects of management and institutional capacity building;
- Building Capacity - build the capacity of host country institutions at all levels to undertake participatory planning processes involving varied stakeholders;
- Program Monitoring and Coordination - provide support for implementation planning;
- Networking and Linkages - facilitate more dynamic networking and coalition-building by indigenous institutions;
- Technical Leadership and Knowledge Management Capacity Building, and
- Management Strengthening of Global Fund to Fight AIDS, Tuberculosis, and Malaria (GFATM) Country-Level Institutions.

Services Provided

The AIDSTAR website (<http://ghiqc.usaid.gov/aidstar/>) provides resources and guidelines for missions and contractors to carry out the necessary steps for procurement of task orders under this IQC.

Direct Task Order

AIDS Support and Technical Assistance Resources (AIDSTAR) Sector II, Task Order #1 Management Sciences for Health

Purpose

The AIDSTAR-Two Project contributes to stronger and more sustainable country-led HIV/AIDS programs, organizations and networks by offering systematic organizational capacity building assistance. All organizations, institutions and networks delivering health services along the HIV/AIDS prevention-care treatment continuum require good management, leadership and governance practices, as well as good public health and clinical practices.

AIDSTAR-Two (referred here as AS-Two) offers capacity building technical assistance to local HIV AIDS implementing partners including civil society organizations (CSOs), nongovernmental organizations (NGOs), national AIDS commissions, Ministries of Health and Social Welfare, Global Fund Country Coordinating Mechanisms and Principal Recipients, as well as regional and local HIV/AIDS service and advocacy networks. In addition, AS-Two collaborates closely with five different PEPFAR Technical Working Groups (at present Orphans and Vulnerable Children, Health Information Systems, Care and Support, Most-at-risk Populations, and Health Systems Strengthening) on various capacity building related initiatives. These initiatives include country-based and regional assessments (e.g., documenting gaps in services for MARPs), workshops and conferences, and the dissemination of capacity building approaches and tools through the AS-Two website, OVCsupport.net and other mechanisms. Funded through the Office of HIV/AIDS, AS-Two is a three-year Task Order with two additional option years. Awarded at the end of September 2008, AS-Two is led by Management Sciences for Health (MSH). Consortium partners include MSH, the International HIV/AIDS Alliance, Cardno Emerging Markets, Health and Development Africa, Initiatives, Inc., Save the Children, and Religions for Peace. At present, the Alliance and Cardno are actively engaged in AS-Two activities along with MSH.

AS-Two core areas of expertise include:

- Strengthening organizational governance (e.g., CSO boards of directors and other governing bodies);
- Improving financial management;
- Setting organizational direction and strategies and improving internal management systems (financial, human resources, monitoring and evaluation, etc.);
- Strengthening leadership, management and governance and technical capacities;
- Project management;
- Performance-based financing;
- Health systems strengthening;
- Enhancing human resources for the health and social welfare workforces;
- Organizational assessments; and
- Strengthening HIV/AIDS prevention and care practices.

Purpose

The Strengthening Teams to Achieve Results (TeamSTAR) Project uses organizational development methodologies to accelerate the performance and impact of US Agencies and USAID country teams at the mission level implementing PEPFAR programs.

TeamSTAR provides a broad range of organizational development (OD) services to enable PEPFAR teams to resolve issues, strengthen team performance, and engage stakeholder organizations in ways that promote country ownership of sustainable HIV programs through:

- **Situational Assessments, Analysis and Planning** to ensure that OD field interventions are customized and responsive to country teams' needs
- **Team Support and Skill Enhancement** to improve teamwork and team members' ability to work collaboratively
- **Coaching for USG and PEPFAR Staff** to enhance their abilities for cross-agency collaborative planning and decision-making
- **Collect Tools and Resources** that address team challenges and OD needs
- **Information Dissemination** to promote knowledge sharing and adoption of state-of-the-art OD tools, best practices and methods to enhance team performance
- **Coordination with USAID/Washington and OGAC** to ensure that TeamSTAR interventions are consistent with guidance, directives and priorities; and to inform participating agencies of issues and implementation challenges

NPI: Family Health International (FHI) 360: Capable Partners (CAP)/NPI Technical Assistance Program

Purpose

Family Health International (FHI) 360 is implementing an Associate Award under USAID's Capable Partners Leader with Associate award to provide technical assistance (TA) to a cohort of NPI grantees that includes partners from rounds one, two and three.

Services Provided

As the technical assistance provider to the aforementioned NPI Grantees, FHI is charged with two broad goals under its Associate and Leader with Associate Awards:

- Support the NPI Round One Grantees to succeed in their current grants through an array of skill building activities via tailored/customized technical assistance and broad-based trainings;
- Ensure that skills built during the NPI grant period are institutionalized to allow Grantees to be able to apply for direct funding from the United States government in the future.

The goal of NuPITA is to increase the quality of program implementation and strengthen the capacity of the Round Two and nine Round Three New Partners Initiative (NPI) grantees to deliver HIV & AIDS services in eight countries in sub-Saharan Africa. NuPITA seeks to maximize the success of PEPFAR's new partners by providing needed organizational development and technical assistance in HIV prevention and care services.

Services Provided

By the end of the NPI partners' three-year program period, NuPITA expects all organizations to have achieved at least 90% of their implementation plans and targets, and to be able to clearly document changes and the actions taken to achieve organizational capacity improvements. NuPITA's activities focus on the following five tasks:

- Provide new partner orientation;
- Conduct needs assessment and develop action plans;
- Strengthen technical expertise;
- Coordinate and communicate with stakeholders; and
- Support project close-out.

Means of Access

Field Support

NPI: European Cooperative for Rural Development (EUCORD) Nigeria: Children of Hope Project (CH)

Purpose

The goal of this project is for European Cooperative for Rural Development (EUCORD), an international NGO, to lead and build the capacity of a consortium of ten indigenous service providers to implement the 'Children of Hope Project' (CH) Project. CH is scaling up OVC services by building the capacity of existing local services to respond to Orphans and Vulnerable Children (OVC).

Services Provided

CH cares for HIV affected or infected OVC by providing three core services: food and nutrition, education, and psychosocial support. Their caregivers also receive livelihood support. The project reaches OVC and their vulnerable caregivers, their families, and communities with balanced age-appropriate ABC interventions. CH is establishing 15 Community Child Care Centers embedded within existing local OVC structures for sustainability which, over the course of the project, will provide compassionate care for OVC and widows, single mothers and vulnerable women caregivers. CH also supports OVC caregivers by leveraging livelihood assistance in the form of gardening and the formation of saving and loans groups.

Purpose

The goal of the FXB Village Model Program is to safeguard the overall well-being of orphaned and vulnerable children by strengthening their families and communities. FXB achieves this by providing services that adequately address the impact of HIV/AIDS while helping caregivers launch lasting business enterprises.

Services Provided

FXB is scaling up the work for orphans and vulnerable children (OVC) by launching twenty new Villages, grouped in units of four Villages each, in communities hardest hit by the AIDS epidemic in five districts of Rwanda and Uganda. FXB is currently working in each of these districts. This will provide families affected by HIV and AIDS and living in extreme poverty with a package of health, nutrition, education, social protection, sanitation, and psychosocial services, as well as assistance to launch income generating activities (IGAs).

NPI: Grassroots Soccer (GRS)

Purpose

Grassroots Soccer (GRS) is a non-profit organization that is using the power of soccer in the fight against HIV/AIDS by providing youth with the knowledge, skills, and support to remain HIV free. Founded by former professional soccer players in 2002, GRS trains African soccer stars, soccer coaches, teachers, and peer educators in HIV-affected countries to deliver an interactive HIV prevention curriculum to youth.

Services Provided

GRS aims to educate youth using a comprehensive school-based HIV/AIDS prevention curriculum and to also reach the general population on a frequent basis with HIV prevention and stigma reduction messages in South Africa between 2009 and 2011.

This project will contribute towards PEPFAR's objective of preventing 12 million HIV infections. It embraces PEPFAR's prevention strategies to:

- Rapidly scale up existing prevention services; and
- Build capacity for effective long-term prevention programs through an expansion into more schools and communities.

GRS' prevention efforts, in particular, will focus on providing support to and enabling young people to choose abstinence before marriage or partnership and fidelity within marriage or partnership using age appropriate messages. It will also seek to increase abstinence or delay sexual onset and to increase fidelity, reduce adolescents' number of sexual partners, and increase uptake of HIV-related services, including counseling and testing.

Natural Family
Planning Center

Telephone:
(301) 897 - 9323

Email:
hannaklaus@earthlink.net

Purpose

Natural Family Planning Center of Washington D.C. (NFPC) implements this three year program in Ethiopia and Uganda. Teen STAR responds to the first two elements of the ABC strategy. By means of its detailed and effective sexuality education for adolescents in developmentally appropriate curricula, Teen STAR promotes abstinence and fidelity in marriage.

Priority Areas:

Teen STAR focuses on a curriculum that instructs youth in fertility awareness coupled with reflections on the emotional, social, cognitive and spiritual aspects of sexuality to give adolescents a broader, integrated understanding of sexuality. This increase in knowledge translates into a greater sense of self-efficacy for the adolescent and a greater sense that they are, and ought to be, in control of their sexual expression.

NPI: Worldwide Orphans Foundation (WWO)

Vietnam: Capacity Building for Psychosocial Services to OVC

Purpose

Worldwide Orphans Foundation (WWO) works to improve the quality of life of HIV/AIDS infected and affected children in Ho Chi Minh City (HCMC) and provinces nearby HCMC through building sustainable capacity among social work service providers and service provider networks.

Services Provided

WWO has three interrelated strategic objectives:

- Curriculum Development: co-designing and co-delivering Vietnam specific curricula in case management, disclosure, and social work skills in working with children and families under stress (particularly for OVC);
- Family Resource Centers: the development of model psychosocial programs that will function as training centers for service providers while providing direct services to OVC and families;
- OVC Network Collaborative: the enhancement and expansion of existing networks of public, NGO, F/CBO and mass organizations serving OVC - actively addressing overlaps and gaps in services; with special emphasis on OVC access to school.

Two major outcomes of the included objectives are:

- Development of greater capacity among social work service providers, improved structures, and networks on the local level that support OVC; and
- Direct psychosocial care and support for OVC.

Both outcomes are designed to ensure long-term sustainability of the interventions through a capacity building approach that will enhance and strengthen the practice of social work with OVC among current Vietnamese professional and paraprofessional social workers.

Telephone:
(571) 227 - 8600
Fax:
(571) 227 - 8601
Email:
rowens@pfscm.org

Purpose

SCMS is a multi-billion dollar PEPFAR Program managed by USAID and implemented by Partnership for Supply Chain Management (PfSCM). The purpose of SCMS is to ensure the supply of quality essential medicines and other products to people impacted by HIV/AIDS, and to promote sustainable supply chains in partner countries, in collaboration with US agencies and other stakeholders. SCMS supports the rapid scale up of HIV/AIDS prevention, care and treatment by providing an uninterrupted supply of key commodities.

SCMS is implemented by the Partnership for Supply Chain Management, a non-profit consortium of 13 organizations led by John Snow, Inc. Research & Training Institute (JSI) and Management Sciences for Health (MSH).

Other partners include:

Booz Allen Hamilton, Crown Agents USA, Inc., i+solutions, The Manoff Group, MAP International, North-West University, Northrop Grumman, RTT, UPS Supply Chain Solutions, Voxiva, 3i Infotech.

Services Provided

The program provides an uninterrupted supply of quality essential medicines; knowledge, skills and technology transfer; and global collaboration with other stakeholders. The technical staff support the prevention, care and treatment activities of PEPFAR in 22 countries. Working with partner countries, the USG's investment to date is \$1b which is reflected in buying 3500 different types of commodities from 280 suppliers, delivering (10000 shipments) in 50 countries. This includes antiretroviral drugs, test kits, laboratory supplies and equipment, drugs for opportunistic infections, therapeutic food, and male circumcision kits.

Since October 2011, 690 technical assistance assignments have been completed in 25 countries. The knowledge, skill and technology transferred through these long and short term assistance assignments to local institutions are helping to build robust and potentially sustainable systems that support all health related programs. Support has been provided in forecasting and quantification, warehousing and distribution, laboratory logistics, quality assurance and MIS.

Grant Management Solutions (GMS) Project

Purpose

This Contract provides technical assistance (TA) to improve the functioning of Global Fund grants to fight AIDS, Tuberculosis, and Malaria. The aim of the GMS project is to improve the functioning of Global Fund grants, and thereby increase the effectiveness and efficiency of prevention, care and treatment interventions for HIV/AIDS, TB and malaria in countries seeking TA. The mission of GMS is to provide urgent, short-term TA to CCMs and PRs for the purpose of unblocking bottlenecks and resolving systemic problems that hinder the response to the three diseases. GMS is implemented by Management Sciences for Health (MSH); it is three years plus two option years Task Order which will end in September 2012.

Services Provided

This project provides TA which is:

- Time-limited (total consultancies per request not to exceed 18 person-weeks);
- Outcome-oriented and focuses on alleviating specific bottlenecks causing grants to underperform; and
- Strengthening local capacity.

TA provided in four areas:

- Organizational development (including governance and leadership) for Global Fund Country Coordinating Mechanisms (CCMs);
- Program and financial management for Global Fund Principal Recipients (PRs);
- Procurement and supply management (PSM);and
- Monitoring and evaluation (M&E).

Means of Access

Core (applications accepted from CCMs and PRs and reviewed by U.S. Government Global Fund Technical Support Advisory Panel [TSAP]) GFTS 2.0 will be accepting field support.

Purpose

This three-year project was developed in response to the Global Health Initiative and PEPFAR Country Teams' requests for a mechanism to generate data on cost-effective interventions for health services and programs to support evidence-based decision-making. The task order can support USAID/Washington and USAID/Missions in the area of HIV/AIDS, family planning/reproductive health (FP) and maternal health (MH).

Services Provided

The project is designed to strengthen host country strategic information capacity and USG information systems, and to this end will:

- Provide national, regional and local leaders and stakeholders reliable costing data to be used to develop policy and provide for programmatic decision-making for health service delivery and system priorities.
- Provide direct technical assistance to USAID Missions, other US Government supported programs, and multilateral organizations to evaluate and assess resource allocation for public health programming and cost-effective policy priorities.
- Conduct training to bolster in-country expertise among policy national, regional and local leaders and stakeholders to utilize, analyze, interpret and present timely and accurate costing data for evidence-based decision-making and advocacy within their respective regions
- Publish, disseminate and present relevant information to 1) inform and equip USAID and other USG field staff and host-government policy makers with cost data for decision-making information and analysis for program planning and 2) document processes for replicating this work.

Means of Access

Core Funding and Field Support

Joint U.N. Program on HIV/AIDS (UNAIDS II)

Purpose

Expand UNAIDS' response aimed at preventing transmission of HIV/AIDS, providing care and support, reducing vulnerability to HIV/AIDS, and mitigating the impact of the epidemic. The five focus areas of this grant include: leadership and advocacy; strategic information; technical support; tracking monitoring and evaluation; civil society engagement; and, mobilization of resources.

Given that this grant ends in September 2012, the design process for UNAIDS III is underway and will be communicated to the field upon award.

Services Provided

In addition to the focus areas listed above, the current grant to UNAIDS supports the following components:

- Re-emphasizing prevention through guideline development for countries to address prevention issues according to different epidemiological settings and contexts.
- Country-level focus including strengthening national ownership and working to harmonize, align and coordinate national partners and priorities.
- Monitoring & Evaluation with particular focus on assisting national and regional efforts to monitor and report on efforts to achieve national universal access targets.
- Gender which includes, but is not limited to, advocating for urgent implementation of policies to address the sources of women's vulnerability.
- Counseling and Testing for which UNAIDS will continue to play a leadership role, along with WHO, on promoting country-led counseling and testing activities and initiatives.
- Technical Support Facilities (TSF) which provide technical support on possible solutions for Global Fund grants experiencing implementation bottlenecks. This is demand driven and includes capacity building of local experts and groups to provide longer-term support.

Email:
tfowler@info.census.gov

Purpose

Since 1988, the U.S. Census Bureau has worked with USAID's Bureau of Global Health to enhance the quantity, quality, and utility of HIV/AIDS-related data. These data are used for policy development, program formulation, and monitoring and evaluation, and form an integral part of USAID's work in combating HIV/AIDS. Applying its extensive experience in epidemiological data base projections and population projection modeling, the Census Bureau has contributed to the USAID program with support in monitoring the spread of HIV and in understanding the effect the AIDS pandemic has on development.

Services Provided

The Census Bureau's HIV/AIDS program includes seven principal activities:

- HIV/AIDS Surveillance Data Base: a collection of all available seroprevalence studies conducted in Africa, Asia, Latin America and the Caribbean, Eastern Europe and the countries of the former Soviet Union, and Oceania;
- Technical Support: special "on-request" analysis of data in the Surveillance Data Base, training and consultation on modeling and other projects, and direct assistance to USAID Field Missions in the form of demographic workshops and other TA;
- Modeling HIV Epidemic Trends: development of mathematical models of HIV epidemic trends in order to refine existing estimates of mortality;
- Special Reports: on important public health or policy issues related to HIV/AIDS;
- Sample Vital Registration with Verbal Autopsy (SAVVY): an innovative opportunity to collect reliable data on total deaths and deaths due to HIV/AIDS;
- Spatial Data Repository: a planned repository that would house population and health data for PEPFAR countries, potentially including health facilities, spatial characteristics of the spread of HIV/AIDS, and demographic characteristics of target populations;
- Synergy, Collaboration, and Dissemination: with organizations such as the Centers for Disease Control and Prevention (CDC), MEASURE/Evaluation, the Office of the Global AIDS Coordinator (OGAC), UNAIDS, WHO, the Global Fund, and others.

CONRAD Proprietary Product Research and Development (PPRD)

Purpose

To improve reproductive health in developing countries by reducing HIV/AIDS transmission through the development of new, safe, and effective microbicides.

Services Provided

This cooperative agreement supports research toward a successful microcide, with a focus on continued clinical testing of several microbicide candidates, including the proprietary product tenofovir gel. It also supports pre-clinical research conducted at the Department of Obstetrics and Gynecology, Eastern Virginia Medical School. New microbicides that offer protection from HIV, as well as, other sexually transmitted infections, and unplanned pregnancy are also a high priority.

CONRAD-PPRD also sponsors international workshops and technical meetings which bring together collaborating scientists and other leading experts to provide technical leadership on specific research issues.

International AIDS Vaccine
Initiative

Telephone:
(212) 328 - 7481

Fax:
(202) 847 - 1112

Email:
asastry@iavi.org

Purpose

USAID provides support to the International AIDS Vaccine Initiative (IAVI), a non-governmental organization, to accelerate the development of an effective vaccine for HIV prevention. This proposal builds upon IAVI's established infrastructure and track record in AIDS vaccine R&D, country programs, and public policy with the primary goal of ensuring the development and distribution of safe, effective, accessible preventive HIV vaccines for use throughout the world, with a particular focus on developing countries. The purpose of the research is grounded in the stark reality of the economic and social devastation of the pandemic in Africa and Asia, a public health catastrophe.

Services Provided

USAID funds are used to support:

- Vaccine Development Partnerships that are focused on advancing HIV vaccine candidates to clinical trials. Vaccine Development Partnerships link scientists in industrialized and developing countries with counterparts in the private vaccine industry. This team approach provides the technical, organizational, and financial resources needed for vaccine development. The desired result is that significantly improved vaccine products are developed and prioritized, and the most promising are tested in clinical trials;
- The Core Immunology Laboratory, which provides standardized reagents, training for developing country scientists, and quality assurance/quality control for laboratory testing associated with HIV vaccine clinical trials;
- Non-human primate studies to assist in the pre-clinical development and evaluation of HIV vaccine candidates;
- Site development and community preparations for HIV vaccine efficacy trials in developing countries. Vaccine clinical trial centers have been established in Kenya, Uganda, Rwanda, Zambia, South Africa, and India;
- Clinical trials of vaccine candidates and that these studies proceed efficiently and at the highest ethical standards to inform product development and prepare for efficacy trials in developing countries;
- Public policy research to accelerate and support HIV vaccine research and development and future access. To achieve these results, IAVI is proposing an ambitious but realistic scope of work supported by IAVI's growing network of clinical trial centers in developing countries in East and Southern Africa and India that we make ready and sustain, to flexibly utilize for efficacy trials of the most promising vaccine candidates.

Means of Access

Core Only

Livelihood and Food Security Technical Assistance (LIFT)

Purpose

The LIFT Project provides rapid technical assistance to design and integrate economic strengthening, livelihood and food security (ES/L/FS) assistance interventions within HIV/AIDS and other health programming. LIFT is a five-year project aimed at strengthening the impact of the ES/L/FS strategies of U.S. Government Agencies, implementing organizations, governments, civil society and the private sector in support of the President's Emergency Plan for AIDS Relief (PEPFAR), the Global Health Initiative (GHI) and the Feed the Future (FtF).

Services Provided

LIFT provides technical assistance in support of ES/L/FS activities, particularly in the context of NACS (nutrition assessment, counseling and support) programs, including: Conducting assessments and portfolio reviews of country ES/L/FS activities; Developing ES/L/FS country strategies and implementation plans, including technical guidance for PEPFAR Country Operation Plans (COPS); Designing and supporting monitoring and evaluation (M&E) of ES/L/FS activities to assess impact, cost effectiveness, potential for replicability and scale-up, and sustainability; Supporting policy development and establishing environments for ES/L/FS programs, including leveraging other donor resources; Strengthening implementing partner capacity, including training and quality improvement activities; and Support for program proposal and scope of work (SOW) development for ES/L/FS assistance.

LIFT can assist PEPFAR, GHI and FtF country teams in establishing priorities for strategic investment in ES/L/FS programming and can provide technical support to collaborating agencies and implementing partners.

Means of Access

Associate Award in the Office of HIV/AIDS under the Economic Growth, Agriculture and Trade (EGAT) Bureau's FIELD-Support Leaders with Associate (LWA) Cooperative Agreement, managed by FHI360, for the purpose of supporting the effective design and delivery of integrated ES/L/FS strengthening programs.

Core funding is limited, but initial support for country assessments and program design and planning can be requested from OHA. Country-level agencies can access further ES/L/FS technical support through funding of their own associate awards or by adding funds to the OHA associate award and providing a SOW to the AOTR, which can then be integrated into the LIFT Program Description.

Purpose

Through this cooperative agreement USAID collaborates with the International Partnership for Microbicides (IPM) to accelerate the development of safe, effective, acceptable and affordable microbicides to prevent sexual HIV transmission in resource-poor countries.

Services Provided

Through this agreement, IPM will continue developing its advanced product leads, especially the Dapivirine Ring. This will include relevant drug and product development activities with selected preclinical studies, such as testing toxicity and antiviral activity in nonhuman primate and other animal models, and clinical studies, such as for safety, acceptability, pharmacokinetics, and effectiveness, as appropriate.

Preventive Technologies Agreement (PTA)

Purpose

To develop, evaluate, and introduce a range of safe, effective, and acceptable HIV/AIDS prevention technologies (e.g., microbicides and barrier methods) and other reproductive health technologies and to enhance the capacity of field programs to provide services to populations at high risk.

Services Provided

The project includes the following activities:

- Developing and testing new or improved, microbicides and other reproductive health technologies, and providing technical assistance for the provision of these technologies;
- Assessing the acceptability and impact on users and programs of various microbicide products and reproductive health technologies;
- Developing and testing tools and strategies to improve integration of family planning and HIV/AIDS programs;
- Providing technical assistance to bilateral and other developing country programs to utilize state of the art research for service delivery improvement; and
- Surveillance and testing of condoms and other commodities to ensure product quality.

dkerriga@jhucp.org

Purpose

The prevention research task order has been awarded to the Johns Hopkins University Bloomberg School of Public Health. The purpose of this task order is to identify and address gaps in HIV prevention programming knowledge, provide tools for developing and evaluating promising HIV prevention interventions, and bolster the evidence base for improving and scaling up HIV prevention programs. This task order aims to advance understanding of HIV prevention at a global level and address country-specific prevention program research and evaluation needs.

The task order can accept field support from all USAID Missions for HIV prevention program research and public health evaluation activities.

Services Provided

Core funding will focus primarily on research and evaluation issues relevant to multiple countries or regions. Task order objectives are to:

- Conduct applied program research and public health evaluations to improve quality, coverage, and effectiveness of HIV prevention programming;
- Promote use of research findings and data in HIV prevention program design, strategic planning, implementation, and revision of ongoing HIV prevention efforts; and to
- Build capacity of national governments, in-country organizations, and local researchers to conduct applied HIV prevention research and utilize program research results.

The prevention program research task order will focus on the following priority areas within prevention research:

- Addressing sexual behavior and related norms in generalized epidemics;
- Bolstering the evidence base for high-risk populations and concentrated epidemics;
- Exploring the use of biomedical prevention modalities;
- Addressing prevention in a variety of service-delivery settings; and
- Conducting operations research on adult male circumcision programs.

Means of Access

Field Support

Project SEARCH: Population Council Task Order (HIVCore)

Purpose

The task order will be led by Population Council with the following partners: Futures Group, Elizabeth Glaser Pediatric AIDS Foundation, and University of Washington. The purpose of this task order is to improve access to and quality and effectiveness of HIV/AIDS treatment, care and support, and prevention of mother to child (PMTCT) service delivery programs in developing countries through operations research. Studies and evaluations conducted under the task order will identify and address gaps in programming knowledge in these areas and increase the evidence base for scaling up promising approaches.

The task order can accept field support from all USAID Missions for HIV treatment, care and support and PMTCT operations research and basic program evaluation activities. Project evaluations (e.g., mid-term and endline project performance evaluations) will not be undertaken under this task order.

Services Provided

- To identify critical knowledge gaps and conduct operations research and evaluation activities to inform program strategies relating to quality, sustainability, cost effectiveness, and efficiencies.
- To identify service delivery approaches for successful program implementation, guideline adoption and adaptation to achieve the greatest sustainable programmatic outcomes through small-scale and basic program evaluations.
- To document and disseminate promising approaches and best practices within a framework of operations research to promote utilization of results.

Purpose

To implement activities designed to improve MCH through a wide range of interventions that may include Integrated Management of Childhood Illness (IMCI); micronutrient fortification and supplementation programs (specifically iodine and vitamin A).

Note: polio/immunization activities and procurements for malaria control are supported under separate agreements with UNICEF.

Services Provided

This grant funds activities implemented through UNICEF's country, regional and headquarter offices in support of a wide range of MCH interventions. Country-specific proposals are needed to define the activities to be conducted in support of national programs and USAID mission strategic plans. In general, activities can focus on improving service delivery, planning and training, monitoring and evaluation, advocacy and communications, limited equipment procurement (e.g. cold chain) and policy development

Health Care Improvement Project (HCI)

Purpose

HCI adapts modern quality improvement approaches to the needs of USAID-assisted countries, and seeks to institutionalize improvement as an integral element of delivering health services. This contract builds on a series of GH projects which have drawn on the state-of-the-art methodologies used in the US health system. Modern quality improvement focuses on studying and improving health care processes, rather than on the provision of inputs, such as drugs, training courses, and expert advice. A wide range of studies have documented deficiencies in health care processes in developing countries, including low levels of provider compliance with evidence-based guidelines. Management processes, such as record keeping and coordination between service units, also offer opportunities for improvement. Traditional strategies like supervision have shown only limited impact on what health care workers actually do.

Services Provided:

HCI builds on the world's largest body of experience in applying modern improvement methodologies in developing countries. The most widely used methodology is the improvement collaborative, which organizes a group of facility-level teams to work on a single area of service delivery. A recent analysis of 27 collaboratives in 12 countries examined 135 indicators of provider compliance in MCH, AIDS, TB, FP, and other services. At baseline, most indicators fell below 50% compliance. After the collaboratives, 119 of the indicators reached or exceeded 80% compliance, and most sustained this level for over a year. HCI supports similar collaboratives in all USAID priority services, working directly with health system leaders or in collaboration with USAID partners. The collaborative methodology has also been applied to non-clinical issues, such as community-based services, human resources management, programs for orphans and vulnerable children, implementing chronic care, and district level management.

The collaborative model has also been successfully applied to scaling up improved practices, through a process of planned spread through the health system.

HCI also provides technical assistance in the full range of modern quality improvement approaches, including private sector regulation (accreditation, certification, licensing); pay for performance; incorporating quality improvement into supervision systems; quality assessments; quality improvement evaluations; and systems for records audit and feedback. HCI also addresses the impact of training on provider performance, including training evaluation and development of computer-based training programs.

Purpose

To improve health financing, governance and operations and to build sustainable developing country institutional capacity in these areas.

Services Provided

This is the principal USAID technical service resource in health finance, governance and operations. Health Systems 20/20 focuses on four goals:

- Finance: Increase access to PHN priority services by reducing financial barriers; Increase financing for health, and ensure that health resources are rationally allocated to maximize health impact; provide incentives through performance-based financing; provide support to health insurance and risk pooling programs; build country capacity in resource tracking and National Health Accounts;
- Governance: Improve health governance, particularly in fragile states, by helping policymakers increase the use of evidence in defining cost-effective health strategies and investments to improve health (NHA institutionalization and demand creation for information, improved reporting to parliaments and finance ministries); increase transparency and accountability in the health sector (corruption reduction, dissemination of information on procedures and fees, and regulatory systems); and encourage and support citizens to participate in shaping PHN priority services (participatory budgeting, civil society advocacy and representation, independent health policy analysis capacity and media strengthening);
- Operations: Ensure that health systems effectively plan, account for, and report on priority programs by using effective financial management systems (budget planning, reporting, transparency and compliance); human resources (policy, planning, training, deployment, productivity/incentives), effective planning and oversight (management, leadership and change management); effective information systems (finance and HR); and monitoring and evaluation systems (national system design, reporting protocols, integration with national systems, assistance in meeting the “third one”);
- Institutional capacity development: Build developing country institutional capacity so finance, governance and operations continue to support health impact by enabling developing country stakeholders to solve health system constraints to achieve the global health agenda, build local sources of ongoing support in health financing, governance and operations.

Promoting the Quality of Medicines (PQM)

Purpose

PQM's mandate is to help assure the quality and safety of priority medicines by strengthening medicines quality assurance mechanisms in developing countries. PQM is USAID's response to the growing challenge posed by substandard and counterfeit medicines. These medicines can cause treatment failure and costly adverse events, increase morbidity and mortality, and potentially contribute to the more rapid emergence and spread of antimicrobial resistance. In addition to representing a significant public health threat, these medicines also risk undermining past and current health investments.

Services Provided

The PQM program (1) provides technical assistance in strengthening national medicines quality assurance systems; (2) works with international pre-qualification mechanisms and selected manufacturers to increase the supply of quality-assured medicines of relevance to priority USAID health programs; (3) promotes and supports evidence-based interventions to combat substandard and fake medicines in the supply chain; and (4) provides technical leadership and global advocacy regarding the importance of medicines quality assurance.

Illustrative activities include:

- Strengthen national medicines quality control laboratories, establish post-marketing surveillance systems, and address quality-assurance related aspects of procurement, medicines registration, and licensing;
- Improve compliance of selected manufacturers with Good Manufacturing Practices (GMP) and support them in dossier preparation for WHO prequalification or other recognized prequalification systems;
- Build or support regional and international partnerships to exchange medicines-related information and take corrective actions to address substandard and counterfeit medicines problems (e.g. collaboration with WHO's International Medical Products Anti-Counterfeiting Taskforce - IMPACT);
- Collaborate with the World Bank, the Global Fund, the Global Drug Facility, the Green Light Committee, and the DfID-funded Medicines Transparency Alliance (MeTA), among others, to expand the availability of high quality medicines and support system strengthening efforts directed toward improving the quality of medicines at the country level;
- Test medicine samples, as needed, for USAID and USAID's collaborating partners;
- Develop relevant pharmacopeial monographs and reference standards, as well as new medicines quality assurance tools, approaches and methodologies as needed.

Project/Agreement Websites:
<http://www.siapsprogram.org>

Purpose

SIAPS focuses on enhancing pharmaceutical services through patient-centered solutions while continuing to support essential supply chain functions and medical products supply security. The SIAPS goal is to support the achievement of improved and sustained health outcomes by applying a systems strengthening approach consistent with the Global Health Initiative (GHI) principles. The SIAPS result areas address the intersections of five health systems components (governance, human resources, information, financing, and service delivery) in the design of potential interventions to ensure that they respond to health element and cross cutting concerns in support of health system strengthening.

Services Provided

- Strengthen governance in the pharmaceutical sector by improving medicines. Strengthen governance in the pharmaceutical sector by ensuring that transparency and accountability are embodied across all health system components impacting on pharmaceutical systems, including medicines policies, legislation, regulations, norms and standards, and that national pharmaceutical sector development plans are strategic and evidence based.
- Increase and enhance the capacity of individuals, institutions and networks in pharmaceutical management, including the capacity of organizations to provide pharmaceutical services and TA in pharmaceutical management systems strengthening.
- Address the information for decision-making challenges in the pharmaceutical sector by ensuring that systems support both products and services, that tools are broadly available and used, and that strategic information is available and used for planning purposes.
- Strengthen the capacity of existing financing strategies and mechanisms to improve access to medicines by ensuring the most efficient use of existing financial resources, supporting the generation of additional financial resources, and design alternative financing strategies when appropriate.
- Apply proven tools and approaches to strengthen supply chains and pharmaceutical services to assure product availability, patient safety and therapeutic effectiveness, improved medication use, and the mitigation of antimicrobial resistance.

Centers for Disease Control and Prevention IAA Agreement II

Purpose

To strengthen the delivery of infectious disease and other health programs in developing countries by accessing technical expertise from the Centers for Disease Control and Prevention (CDC) and collaborating with the CDC to address infectious disease and other health problems in the developing world. This agreement provides missions with the same access to CDC as agreement number AAG-P-00-99-00006.

Services Provided

The umbrella Interagency Agreement (IAA) with CDC allows USAID to access technical expertise from CDC, a world-renowned source of specialized technical experience and expertise in the international health field. The IAA supports activities in the control and prevention of infectious diseases including tuberculosis, malaria, disease surveillance, antimicrobial resistance, HIV/AIDS, and environmental health.

Specific work plans are developed with appropriate Centers or Divisions within CDC and activities take the form of short-term consultancies or long term technical assistance. Activities include:

- Technical and program support for the development and implementation of appropriate global/regional/country-level health programs and strategies;
- Monitoring and evaluation of global/regional/country-level health activities, projects and programs;
- Studies, assessments, evaluation and other research activities to assist in policy dialogue, planning and formulating health programs.

Missions can access the IAA through field support for either short or long term technical assistance.

Purpose

The African Program for Onchocerciasis Control (APOC) was established in 1995 to extend the delivery of the drug ivermectin for the control of onchocerciasis (river blindness) in Africa. Onchocerciasis, one of the neglected tropical diseases (NTDs), is a major cause of blindness and debilitating skin disease in many African countries. With the registration of ivermectin for the treatment of onchocerciasis in 1989, mass treatment of at-risk populations with the drug was adopted as a new strategy. With a focus on the mass treatment approach, APOC's goal is to eliminate onchocerciasis as a disease of public health importance in Africa.

APOC operates through an approach known as community-directed treatment with ivermectin (CDTI). This unique approach utilizes community drug distributors to distribute ivermectin for the prevention of onchocerciasis. APOC is a partnership program that includes 19 participating countries with active involvement of the Ministries of Health and their affected communities, several international and local NGOs, the private sector (drug donation programs), donor countries, UN agencies, and the scientific community. The World Bank and the World Health Organization (WHO) are the fiscal agent and the executing agency of APOC respectively.

Services Provided

- Support the APOC through the World Bank Trust Fund to work in the Africa region to expand its existing models for the control of onchocerciasis to the 6 other NTDs targeted by USAID's NTD Control program, which can all be addressed through mass drug administration.
- Support APOC activities initially in Tanzania and DRC, with additional countries to be added as funding permits.
- Significant reduction in the burden of NTDs in the targeted countries, where NTDs are a major public health problem.
- Building sustainable community-based systems capable of annual delivery of NTD drug delivery.
- Establishment and strengthening of effective collaborations between non-governmental organizations and national Ministries of Health in the planning and implementation of integrated NTD drug delivery programs.

END in Africa: Family Health International (FHI 360)

Purpose

The purpose of this agreement is to support the control of seven neglected tropical diseases (NTDs) in Africa. These diseases include lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), three soil transmitted helminthes (hookworm, roundworm, and whipworm), and trachoma, all of which can be controlled or eliminated in an integrated fashion using cost-effective strategies for preventive chemotherapy (PCT) with highly effective drugs, many of which are donated by major pharmaceutical companies.

Services Provided

This cooperative agreement implemented by Family Health International (FHI) focuses on the expansion of NTD control or elimination programs in African countries. FHI will provide managerial assistance, support robust Monitoring & Evaluation systems, and coordinate reporting of technical progress. FHI will also provide careful managerial oversight of funds to grantees that have experience implementing integrated NTD control or elimination programs and advanced financial accounting and fiscal management systems. FHI provides managerial capacity, organizational skills, a proven track record in managerial technical assistance, and development of streamlined work plans and budgets. FHI also has a history of close working collaboration with Ministries of Health and/or Ministries of Education in developing countries. NTD-specific technical direction and decision-making under this award will be coordinated directly by USAID.

Purpose

The purpose of this agreement is to support the control of seven neglected tropical diseases (NTDs) in Asia. These diseases include lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), three soil transmitted helminthes (hookworm, roundworm, and whipworm), and trachoma, all of which can be prevented and/or cured in an integrated fashion using cost-effective strategies for preventive chemotherapy (PCT) with highly effective drugs, many of which are donated by major pharmaceutical companies.

Services Provided

This award, implemented by FHI, focuses on the expansion of NTD control in Asia. It award includes a grants component whereby FHI will provide managerial assistance, support robust M&E systems, coordinate reporting of technical progress and provide careful managerial oversight of funds to grantees with successful experience and/or expertise implementing fully integrated NTD control programs and experience with advanced financial accounting and fiscal management systems. FHI provides high-caliber managerial capacity, organizational skills, a proven track record in managerial technical assistance, including effective fiscal management, implementation of M&E systems, development of streamlined work plans and budgets, a history of working in close collaboration with Ministries of Health and/or Ministries of Education in developing countries, and access to monitoring and evaluation (M&E) expertise. NTD-specific technical direction and decision-making under this award will be coordinated directly by USAID.

Control of Neglected Tropical Diseases (NTDs) RTI

Purpose

To provide USAID and the Bureau for Global Health with assistance to decrease the burden of Neglected Tropical Diseases (NTDs) that inflict economic, psychosocial, and physical damage on the poorest populations in the developing world.

The special focus of this cooperative agreement is on five NTDs - lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), soil transmitted helminths (intestinal worms), and trachoma that can be prevented and/or cured through targeted mass drug administration. Many of the highly effective drugs required are contributed free or at very low cost by major pharmaceutical companies.

Led by RTI International, the NTD project represents one of the first large scale and global efforts to integrate existing disease-specific treatment programs to expand care to millions of the world's poorest people. RTI International and its partners implement an innovative and integrated program to deliver immediate treatment to 16 countries (Bangladesh, Burkina Faso, Cameroon, Ghana, Guinea, Haiti, Mali, Niger, Nepal, Philippines, Sierra Leone, Southern Sudan, Tanzania, Togo, Uganda, and Vietnam) and to quickly scale up the program to deliver care to additional countries through a competitive grants program.

Services Provided

Prepare and execute disease control plans for neglected tropical diseases using preventive chemotherapy and integrated strategies to reduce costs and improve health.

- Issue grants to directly manage programs for control of NTDs in affected countries;
- Development of technical tools to support integrated implementation;
- Documentation and dissemination of best practices;
- Resource mobilization, expertise, NTD-specific technical direction and decision-making under this award will be coordinated directly by USAID.

Purpose

To provide USAID and the Bureau for Global Health with assistance to decrease the burden of Neglected Tropical Diseases (NTDs) that inflict economic, psychosocial, and physical damage on the poorest populations in the developing world.

The special focus of this cooperative agreement is the control, and in some cases elimination, of five NTDs - lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), soil transmitted helminths (intestinal worms), and blinding trachoma that can targeted with preventive chemotherapy delivered through mass drug administration. Most of the safe and effective drugs required are donated through highly successful public-private partnerships with several major pharmaceutical companies.

Led by RTI International and its partners, this project follows and builds on the Neglected Tropical Disease Control Program, USAID's first NTD project launched in 2006, and will continue to focus on an integrated program approach to deliver NTD treatments to target countries and to document control and elimination through comprehensive monitoring and evaluation.

Services Provided

Support host countries to prepare and execute comprehensive countrplans for neglected tropical diseases using preventive chemotherapy and intrgated strategies to reduce costs and improve health outcomes by controlling and in some cases eliminating the targeted diseases.

- Issue and manage grants in target countries focused on supporting host country governments to introduce and/or scale-up integrated NTD programs;
- Development of global technical tools and guidelines with the World Health Organization to support integrated implementation of NTD programs and dissemination of best practices;
- Resource mobilization, expertise, NTD-specific technical direction and decision-making under this award is be coordinated directly by the Global Health Bureau;
- Technical assistance is be provided through an on-demand 'Technical Assistance Facility'.

Deliver Project for Malaria

Purpose

To provide USAID Missions and Bureaus with a worldwide mechanism to support the goals and objectives of the President's Malaria Initiative and USAID's goal of reducing the burden of malaria in Africa. It will support USAID's implementation of malaria prevention and treatment programs through the procurement, management, and delivery of high quality, safe, and effective malaria commodities; the provision of on-the-ground logistics capacity, technical assistance, and pharmaceutical management expertise; and technical leadership to strengthen the global supply, demand, and financing of high quality malaria commodities.

Services Provided

Procurement of high quality, safe, and effective malaria commodities with on-the-ground logistics capacity, technical assistance and pharmaceutical management expertise. The goals of this task order are as follows:

- To improve and expand USAID's provision of malaria commodities to programs through direct procurement and delivery to country;
- To strengthen in-country supply systems and capacity for effective management of malaria commodities; and
- To improve global supply and long-term availability of malaria commodities.

MCDI
Telephone:
(301) 562 - 1920
Fax:
(301) 562 - 1921
Email:
lbenavente@mcd.org

Purpose

Medical Care Development International (MCDI) and its partners were awarded a 5-year Cooperative Agreement in September 2007 to improve malaria diagnostics in 15 focus countries under the President's Malaria Initiative (PMI).

Services Provided

Under IMaD, MCDI and its partners work to improve laboratory-based diagnosis of malaria (primarily at Ministry of Health facilities), and to increase understanding, acceptance, and correct use of microscopy and Rapid Diagnostic Tests (RDTs) by laboratory staff and health care practitioners providing direct care to patients. MCDI's partners on the IMaD project include the African Medical and Research Foundation (AMREF) and Hydas World Health. IMaD collaborates with National Malaria Control Program staff, other donors, and appropriate partners in PMI countries to assess baseline laboratory capacity, develop training materials, train laboratory and clinical staff, improve quality control of malaria-related laboratory procedures, and adapt or develop malaria diagnostics guidelines to reflect state-of-the-art knowledge in the field.

*Please note that a follow-on agreement is to be awarded during FY 12

Field Support

Indoor Residual Spraying 2

Purpose

To support planning and implementation of indoor residual spraying (IRS) programs to prevent malaria. This IQC will enhance USAID's ability to implement IRS programs on the ground through cost-effective commodities procurement for IRS, IRS logistics systems, access to technical expertise, and implementation of IRS in countries affected by malaria.

Services Provided

- Establish a worldwide procurement mechanism to support IRS and prepare and execute all aspects of logistical plans for IRS-related activities including timely procurement, distribution, and storage of all commodities.
- Together with NMCPs, implement IRS programs and provide operational management support (i.e. field supervision, operations planning, day-to-day implementation management) and expert short- and long-term technical and administrative assistance.
- Ensure the safe and judicious use of insecticides, including preparation of environmental assessments, adherence to best practices, and monitoring of activities.
- Build and strengthen the capacity of NMCPs in the technical and managerial functions of IRS by engaging, training, and supervising personnel at the central, provincial, and district levels.
- Provide on-going monitoring and evaluation for activities and ensure that quality control measures are established and implemented.

In addition to the IQC, GH awarded a Task Order in FY 2010 that missions can access through field support for any of the above services.

Purpose

To support planning and implementation of indoor residual spraying (IRS) programs to prevent malaria. This task order will enhance USAID's ability to implement IRS programs on the ground through cost-effective commodities procurement for IRS, IRS logistics systems, access to technical expertise, and implementation of IRS in countries affected by malaria. The IRS 2 IQC places added emphasis on building the capacity of Ministries of Health and local institutions to plan, conduct, supervise and monitor IRS programs.

Services Provided

- Establish cost-effective supply chain mechanisms including procurement, distribution and storage of IRS-related commodities and execute all aspects of logistical plans for IRS-related activities.
- Implement safe and high-quality IRS programs and provide operational management support and expert short- and long-term technical and administrative assistance.
- Provide on-going monitoring and evaluation for activities and ensure quality control measures for commodities, operations, and monitoring are established and/or refined and implemented.
- Contribute to global IRS policy-setting and country-level policy development of evidence-based IRS and disseminate experiences and best practices.
- Strengthen the capacity of NMCPs, health personnel, and other relevant institutions in the managerial, technical, supervisory, and evaluative functions of IRS by engaging, training, and supervising personnel at the central, provincial, and district levels. In addition, ensure that planning, and implementation of IRS includes sufficient attention to gender considerations and that IRS continues to protect women and children of targeted communities from malaria.

Means of Access

Field Support

International Federation of Red Cross and Red Crescent Societies (IFRC) Umbrella

Purpose

The purpose of this grant is to support the IFRC's efforts to prevent and control malaria and tuberculosis.

Services Provided

This grant will provide a flexible and simple means for USAID operating units to access the Federation's headquarters and field office expertise to support tuberculosis and malaria activities. Through individual proposals, USAID missions or headquarters will be able to work with IFRC to customize scopes of work, work-plans, budgets, and indicators to meet the needs of the country, USAID mission and IFRC, in coordination with other funding partners. In general, activities will focus on utilizing Red Cross and Red Crescent volunteers to increase insecticide-treated net (ITN) ownership, increase the correct and consistent use of ITNs, improve understanding and awareness of the signs and symptoms of malaria, and to provide community-based activities to help scale-up proven malaria prevention and treatment interventions. In the area of TB, activities will focus on increasing the detection and treatment of tuberculosis using proven interventions and engage in international partnership to support the goals of the Stop TB program.

Purpose

The Malaria Communities Program (MCP) seeks to identify and support new partner organizations and other local partners in PMI focus countries to carry out sustainable malaria prevention and control activities under the Presidential Malaria Initiative. MCP seeks to enable local capacity to undertake community-based malaria prevention and treatment activities, thus building ownership of malaria control for the long-term. Awardees work in 12 of the 15 PMI focus countries. Organizations awarded under the MCP are expected to work under the leadership of the USAID Mission with the support of the PMI in-country team (comprised of USAID and CDC staff) and in coordination and partnership with the National Malaria Control Program (NMCP), existing PMI partners, and with a range of other malaria stakeholders in country.

Services Provided

Key activities supported under the MCP include: the distribution, education on proper use, and promotion of insecticide treated nets; promotion and implementation of net retreatment activities; information, education, and communication activities to support household mobilization for indoor residual spraying; support community/facility-based activities aimed at preventing and treating malaria in pregnant women and children under five, and support activities aimed at promoting appropriate health seeking behavior among community members aimed at increasing early and effective treatment of malaria.

The organizations with active grants are:

GHN-A-00-07-00007 Episcopal Relief and Development Angola

GHN-A-00-07-00008 Christian Reformed World Relief Committee Malawi

Malaria Vaccine Development Program (MVDP)

Purpose

To develop malaria vaccines for use in control programs in the developing world. Through a cadre of partners dedicated to the malaria vaccine development enterprise, MVDP maintains a pipeline of candidate vaccines in pre-clinical, clinical and field evaluation.

Services Provided

The USAID MVDP has been successful in building strategic partnerships with some of the most capable malaria vaccine groups in the world. Through these partnerships, the program's lead vaccine, developed with the Walter Reed Army Institute of Research (WRAIR) and GlaxoSmith-Kline Biologics (GSK) is undergoing field evaluation in collaboration with the National Institute of Allergy and Infectious Diseases (NIAID) in Mali. Vaccines in earlier stages of development are in the pipeline through efforts with WRAIR, the Naval Medical Research Institute (NMRC), and NIAID.

Current agreements under the MVDP include:

- Walter Reed Army Institute of Research (WRAIR) Umbrella
GHA-T-00-08-00007
- Naval Medical Research Center (NMRC)

Medicines for Malaria Venture

Telephone:
41 22 799 4060

Fax:
41 22 791 4061

Email:
info@mmv.org

Purpose

The Medicines for Malaria Venture was established in 1999 to build and manage a research and development portfolio capable of leading to the registration of at least one new antimalarial drug every five years. Although partnered with industry, MMV's focus is on discovery and development of drugs that will be affordable to populations living in malaria endemic areas. MMV manages and directs research and development activities carried out at a broad variety of institutions, comprising 42 academic and pharmaceutical organizations located in 10 different countries. At present, there are 38 candidate antimalarial agents in MMV's portfolio, including several completely new therapeutic targets. This portfolio is highly dynamic and managed to accelerate the identification and development of promising candidates and also the recognition and rapid replacement of less promising drug projects.

Services Provided

Emphasis in the MMV portfolio is being placed on developing drugs and drug combinations that:

- Are effective against drug-resistant strains of *P. falciparum*;
- Improve patient compliance with therapeutic regimens of 3 days or less;
- Have a low propensity to select for drug resistance;
- Are safe in young children and pregnant women;
- Have potential for use as intermittent preventive treatment in pregnancy;
- Cost of product is no more than US \$1.00 per treatment.

NetWorks: Building Capacity for Sustained Net Coverage and Use

Purpose

NetWorks is a comprehensive and innovative program to build **sustainable long-lasting insecticidal nets (LLIN) systems** that bridge the key technical areas of advocacy, policy, distribution, monitoring, and communications for increased net access and use in malaria endemic countries. Endemic countries, particularly in Africa, differ widely in resources (financial and human) and experiences with LLIN distribution that contribute to a unique “net context” in each country. Partnerships and policies vary widely, while procurement and distribution challenges hamper implementation. This combination of issues underscores the need for flexibility inherent in the NetWorks approach. NetWorks emphasizes fitting program activities to the national “net context.”

Services Provided

The NetWorks dynamic approach will empower national governments, USAID missions and their partners (civil society and the private sector) to create sustainable systems to increase access, enable ownership and promote appropriate use of LLINs and other malaria prevention technologies. NetWorks partners in this project include Malaria Consortium, Swiss Tropical and Public Health Institute, and Catholic Relief Services. Through a unique, strategic process, Networks will:

- Provide an adaptive approach to rapid analysis of each country’s context and needs;
- Facilitate stakeholder coordination and policy refinement;
- Strengthen distribution networks with locally - appropriate combinations of methods - campaigns, routine distribution via health facilities and/or private sector subsidies - with capacity-building in logistics, procurement and net coverage monitoring;
- Strengthen demand creation and promotion through effective behavior change communication programs based on community input and refined via ongoing monitoring and evaluation;
- Provide ongoing evaluation of key issues/barriers and implementation strategies.

Purpose

The Global Alliance for TB Drug Development (“TB Alliance”) is a non-profit, public-private partnership with the mission to develop new TB drugs that shorten and simplify treatment, treat MDR-TB and better treat latent infection. The TB Alliance was created to address the lack of market incentives that brought research and development efforts for new TB drugs to a virtual standstill after the 1960s.

Services Provided

As a not-for-profit public-private partnership, the TB Alliance links the best practices and drive of the private sector with the health equity priorities and resources of the public sector. This process helps design new ways to leverage worldwide science and market forces for public good. With a sole focus on new TB drug development, the TB Alliance has established a strong pipeline of drug candidates. Anticipated developments include:

- Introduction of at least one moxifloxacin-based new treatment-shortening regimen to the field and registration globally;
- Movement of a multidrug resistant TB (MDR-TB) treatment through Phase III trials;
- Development of treatments for drug-resistant TB and drug-sensitive TB.

Means of Access

Core Only

STOP TB Partnership

Purpose

The purpose of this grant is to support the objectives of the Stop TB Partnership and the achievement of the global targets to detect 70% of infectious pulmonary TB cases, and to successfully treat 85% of those cases. As an important partner in USAID's TB program, this grant focuses on two areas: 1) Support for the Global TB Drug Facility (GDF); and 2) Support for key activities managed by the STB secretariat related to priority areas of USAID's strategy, particularly country level advocacy, communications and social mobilization, and TB and poverty.

Services Provided

Global TB Drug Facility (GDF): An initiative to increase access to anti-TB drugs for the implementation of DOTS. The GDF is a mechanism of the STB Partnership and is under the direction of the STB Partnership secretariat. The objective of the GDF is to provide TB drugs to treat patients and to help countries to reach the global TB control targets. This grant supports the work of the GDF, including: grant applications and review; monitoring of GDF recipients to assess program performance; rational use of anti-TB drugs; financial flows and drug management; procurement of anti-TB drugs via a competitive bidding process; technical assistance to improve the management of anti-TB drugs; the promotion of Fixed-dose-combination products; the development and testing of new products such as diagnostic kits; general GDF management and information management and support; the development of a comprehensive advocacy strategy for the GDF to help ensure that it has adequate finances/resources to implement work plan activities. Support for the STB Partnership Secretariat and other technical areas: The Secretariat supports relations with all the Stop TB partners, and encompasses liaison with current Partners, potential partners and global initiatives (e.g. the Global Fund). In addition, specific initiatives will be supported, including approaches for reaching out to the poor, integration of Advocacy, Communications and Social Mobilization into DOTS programs, information dissemination, and activities to promote the Second Global Plan to Stop TB covering 2006-2015.

Corporation, LLC.

Purpose

Tuberculosis IQC provides a mechanism for USAID Missions and Bureaus to easily access quality technical assistance and support for their tuberculosis activities. The TB IQC supports USAID operating units in the implementation of their tuberculosis control and prevention programs through the introduction and expansion of the components of the WHO-recommended STOP TB Strategy, which include:

- Pursue high-quality DOTS expansion and enhancement;
- Address TB/HIV, MDR-TB and other challenges;
- Contribute to health system strengthening;
- Engage all care providers;
- Empower people with TB, and communities; and
- Enable and promote research.

TB IQC works worldwide.

Services Provided

TB IQC provides access to qualified prime and sub-contractors with a diverse mix of expertise, skills and experience in TB control, the STOP TB Strategy and in health systems strengthening. The IQC also includes one small business as a prime contractor and many more small businesses among the sub-contractors.

Means of Access

Direct Task Order

TB Task Order 2015

Purpose

The objective of this Task Order is to support the implementation and scale-up of the Stop TB Strategy and the Global MDR-TB and XDR-TB Response Plan 2007 - 2008 to increase detection and successful treatment of TB and to achieve reductions in TB prevalence and deaths in USAID priority countries.

Services Provided

This Task Order implemented by PATH provides short- and long-term technical assistance to USAID Missions and Regional Platforms in implementing and scaling-up priority interventions in accordance with the Stop TB Strategy. Particular attention is given to assisting countries to plan, implement and scale-up diagnosis and treatment of drug resistant TB in compliance with WHO's guidelines for programmatic management of drug-resistant TB.

Priority areas of technical assistance are:

- Program gaps in implementation of the Stop TB Strategy including:
 - Strengthening quality DOTS implementation;
 - Strengthening laboratory networks and introducing new diagnostic tools;
 - Addressing the challenges of TB/HIV, including infection control;
 - Engaging the private sector;
 - Enhancing advocacy, communication and social mobilization; and
 - Monitoring and evaluation, and operations research.
- Program gaps in implementation of MDR/XDR-TB scale-up activities;
- Preparation of Global Fund proposals; and
- Implementation of Global Fund grants.

PATH has identified the following sub-contractors to assist them with implementation of this Task Order: American Society for Microbiology, Brigham and Women's Hospital, Inc./Partners in Health, Foundation for Innovative New Diagnostics, Initiatives, Inc., Management Sciences for Health and University of California, San Francisco.

Purpose

The purpose of TB CARE I is to establish a mechanism to support USAID operating units in the implementation of their TB control and prevention programs through the introduction and expansion of the components of the WHO-recommended STOP TB Strategy and contribution to the overall USAID goal and objectives in select countries by 2015. This award is a follow-on mechanism to TB CAP.

Services Provided

TB CARE I, implemented by KNCV Tuberculosis Foundation, in partnership with the American Thoracic Society (ATS), Family Health International (FHI), Japan Anti-Tuberculosis Association (JATA), Management Sciences for Health (MSH), International Union Against Lung and Tuberculosis Disease (The Union) and the World Health Organization (WHO), will work in two key areas:

- **Technical Assistance.** Provide short- and long-term technical assistance to USAID Missions and Regional Platforms in implementing and scaling-up priority interventions in accordance with the STOP TB Strategy and future longer term plans. TB CARE I will respond to the global TB epidemic by providing well-coordinated state-of-the-art, context appropriate, technically sound and cost-effective consultation and technical assistance to high-prevalence countries and Missions. TB CARE I will be engage experts in all aspects of TB control, including strengthening DOT, programmatic management of drug resistant TB (and extensively drug resistant TB – XDR TB), improving laboratory capacity, infection control, and TB/HIV-AIDS collaboration.
- **Global Technical Leadership.** Support Bureau for Global Health core programs and further USAID global technical leadership in TB control by focusing on catalytic activities and approaches to scaling-up the STOP TB Strategy. Activities will complement and expand existing global TB control efforts by working in collaboration with other global TB partners and maximize on-going efforts to accelerate the pace of DOTS expansion to meet global targets, including programmatic management on drug-resistant TB.

Purpose

Technology, Research, Education and Technical Assistance for Tuberculosis (TREAT TB) is a cooperative agreement with the International Union Against Tuberculosis and Lung Disease (IUATLD), also known as The Union. TREAT TB focuses on field evaluations of diagnostic techniques for TB, clinical trials and operations research to improve patient management, treatment efficacy, disease prevention, and infection control measures for TB and MDR TB. TREAT TB also provides for field support to address key TB and TB/HIV issues through operational research to improve the national TB program's performance.

Services Provided

This agreement will promote programmatically relevant research in the focus countries of the TB element and can accept field support funds from any mission with TB funds for technical assistance related to operational research. The primary interventions will include:

- Field evaluations of new/adapted diagnostic tools and translational research to continually update the globally-recommended diagnostic algorithm;
- Operational research to overcome constraints to implementing or introducing current and new tools/approaches;
- Clinical trials to improve MDR-TB patient management, treatment efficacy, and disease prevention;
- Technical assistance to USAID missions for the design and implementation of field trials of new tools and operational research to address programmatic constraints;
- Evaluation research to monitor the impact of new tools and approaches.

Fistula Care

Purpose

Fistula Care is a six-year, worldwide cooperative agreement to support fistula prevention, repair, and reintegration; and monitoring, evaluation and research. Fistula Care will assist USAID/Washington to monitor fistula activities and report on this area of congressional interest.

This GH/HIDN/MCH agreement is an Associate Award through the AC-QUIRE Project, and accepts both MCH and POP funds.

Services Provided

Fistula Care aims to:

- Strengthen the capacity of surgeons and hospitals to provide fistula repair;
- Increase access to emergency obstetrical care;
- Increase understanding about obstetric fistula and steps to prevent it;
- Conduct research to strengthen the quality of fistula services.

Priority activities for achieving these results include:

- Upgrading facilities and providing medical equipment and supplies;
- Training providers in clinical and counseling skills;
- Enabling health facilities to continuously monitor and improve the quality of their services;
- Supporting transportation and hospitalization costs for fistula clients;
- Working with communities to increase awareness about the causes of fistula, to increase access to preventive services, and to identify and refer women for treatment;
- Strengthening facility-based birthing and emergency obstetric care for prevention of fistula;
- Partnering with other institutions to support women's rehabilitation and reintegration into family and community life; and
- Conducting clinical and programmatic research to improve the safety and efficiency of care.

Fistula Care is implemented by EngenderHealth in partnership with IntraHealth, CARE, Meridian Group International, Adventist Development and Relief Agency (ADRA) and Society for Women and AIDS in Africa (SWAA). The project works with public sector, private sector and non-governmental and faith-based institutions, both national and international, to provide a full range of fistula care services.

Purpose

- To implement activities to eradicate polio;
- Improve immunization services; and
- Improve disease surveillance.

Services Provided

This grant supports activities implemented through WHO country, regional and headquarter offices in support of polio eradication in the context of strengthening immunization and disease control programs.

The grant supports USAID's five-part polio eradication strategy:

- Partnerships between all interested public and private sector parties;
- Routine immunization and immunization systems: cold chain refurbishment/management;
- Logistics, vaccine forecasting, planning and budgeting at the district and national levels;
- Supplemental immunization, operational support to National Immunization Days, social mobilization, house-to-house mop up immunization;
- Surveillance and case detection for AFP and other reportable diseases; and
- Information feedback and use.

Means of Access

Field Support

Health and Immunization Response Support (UNICEF Polio, EPI Grant)

Purpose

To implement activities designed to improve polio eradication efforts and routine immunization. Other MCH activities, e.g., Integrated Management of Childhood Illness (IMCI); micronutrient fortification and supplementation programs (specifically iodine and vitamin A) are supported under a separate agreement.

Services Provided

This grant funds activities implemented through UNICEF's country, regional and headquarter offices in support of a wide range of MCH interventions. Country-specific proposals are needed to define the activities to be conducted in support of national programs and USAID mission strategic plans. In general, activities can focus on improving service delivery, planning and training, monitoring and evaluation, advocacy and communications, limited equipment procurement (e.g. cold chain) and policy development.

Purpose

To increase PVO participation in polio eradication, immunization, vitamin A activities and to improve case detection of acute flaccid paralysis (AFP) and other reportable diseases in underserved or hard to reach populations in India, Angola, and Ethiopia.

Services Provided

- The CORE group is a network of 35 U.S.-based private voluntary organizations that have received funding from the USAID Bureau of Humanitarian Response's child survival grants in the past for improving maternal and child health in underserved populations. This agreement strengthens the network and builds upon ongoing field programs of CORE members. This grant supports:
- Case detection/reporting strategies for vaccine preventable diseases;
- Training and information dissemination about polio eradication and AFP/integrated disease case detection and reporting;
- Participation of PVOs in interagency committees and subnational planning events and supplemental immunization activities (NIDs, SNIDs, mop-up).

The grant supports USAID's five-part polio eradication strategy:

- Partnerships between all interested public and private sector parties;
- Routine immunization and immunization systems: cold chain refurbishment/management/logistics, vaccine forecasting, planning and budgeting at the district and national levels;
- Supplemental immunization, operational support to National Immunization Days, social mobilization, house-to-house mop up immunization;

Maternal and Child Health Integrated Program (MCHIP)

Purpose

The Maternal and Child Health Integrated Program (MCHIP) is a five-year \$600 million Leader with Associates Cooperative Agreement (LWA) designed to support the introduction, scale-up and further development of high-impact Maternal, Neonatal, and Child Health (MNCH) interventions, including the program approaches to effectively deliver those interventions, to achieve measurable reductions in under-five and maternal mortality and morbidity.

Services Provided

- Increase availability and use of appropriate high-impact maternal, neonatal and child health interventions, including supportive family planning, HIV/AIDS, and malaria interventions based on country-level needs and opportunities at the facility and community levels;
- Advance global leadership in maternal, neonatal and child health, including further development and promotion of improved approaches and scale-up plans. In partnership with UN, international and US partners and NGOs, revise and develop clinical guidelines, toolkits and indicators related to MNCH-malaria. Support global efforts to introduce new vaccines at the country level;
- Provide specialized technical assistance to PVO/NGOs and their local partners supported by the Child Survival and Health Grant Program (CSHGP) and PMI- Malaria Community Programs (MCP) that includes design, monitoring, and evaluation of innovative, effective, and scalable community-oriented strategies and strengthens NGO capacity and partnerships for conduct of operations research and program learning.

The MCHIP partnership includes Jhpiego as the prime partner, John Snow, Inc. (JSI), Johns Hopkins University/Institute for International Programs (JHU/IIP), ICF Macro, Inc., Program for Appropriate Technology in Health (PATH), Save the Children (SC), Broad Branch Associates, and Population Services International (PSI). MCHIP merges the functions of several current USAID/GH projects (ACCESS, BASICS III, ImmunizationBASICS, POPPHI, and CSTS+) to improve efficiency and effectiveness, and to support Mission needs for integrated MCH programs.

Project Website:
<http://www.washplus.org/>

Purpose

WASHPlus is a Cooperative Agreement managed by FHI 360 with CARE and Winrock International as core partners, and teamed with a highly talented group of university, private and public sector resource partners in areas such as creative financing, innovation, and public-private partnerships in addition to WASH service delivery. The project is designed to support the further development, introduction and delivery of high-impact interventions in water supply, sanitation and hygiene (WASH) and indoor air quality (IAQ).

Services Provided

WASHPlus will focus on the following key environmental health interventions:

- Increased access to improved water sources to meet domestic needs;
- Improvement in drinking water quality;
- Increased access to and use of sanitary facilities for human excreta disposal;
- Increased and improved handwashing with soap; and
- Increased use of alternatives to cooking with biomass fuels using traditional stoves and/or increased use of housing improvements to improve indoor air quality.

WASHPlus is able to provide long or short-term technical assistance to Missions, Regional Bureaus, national and local organizations to:

- Design, implement and evaluate programs that will increase the availability and use of proven, high-impact WASH and IAQ interventions;
- Design and implement hygiene improvement programs at scale that promote handwashing, sanitation and safe drinking water at the point-of-use;
- Develop and implement strategies for integration of WASH and IAQ interventions in other health and non-health programs, e.g., HIV/AIDS, food security and nutrition, etc.;
- Support participation in strategic partnerships with other donors, cooperating agencies, public and private partners;
- Develop and test new and innovative approaches and tools for WASH and IAQ implementation; and
- Build knowledge platforms for information exchange, capacity building and networking.

Saving Lives at Birth: A Grand Challenge for Development

Purpose

Saving Lives at Birth, a partnership of USAID, the Government of Norway, the Bill & Melinda Gates Foundation, Grand Challenges Canada, and the World Bank, was launched in 2011. In the first round of the challenge, the partners sought groundbreaking prevention and treatment approaches for pregnant women and newborns in poor, hard-to-reach communities around the time of childbirth. In 2012, a second round of the challenge was issued with the additional support of the UK Department for International Development (DFID).

Awards under Saving Lives at Birth include: 1) Seed Grants to demonstrate proof of concept, and 2) Transition Awards to support transition of successful innovations toward scale up.

Services Provided

Under the first round of Saving Lives at Birth, USAID manages the following sixteen fixed obligation grants and cooperative agreements:

OAA-G-11-00062	Baylor College of Medicine
OAA-A-12-00007	Columbia University
OAA-G-11-00069	Diagnostics for All
OAA-G-11-00064	Duke University
OAA-A-12-00012	Grameen Foundation USA
OAA-G-11-00071	Jhpiego
OAA-A-11-00073	John Snow, Inc. (JSI)
OAA-G-11-00060	Johns Hopkins University
OAA-G-11-00058	Monash University
OAA-G-11-00061	Operative Experience, Inc.
OAA-G-11-00072	Partners for Development
OAA-G-11-00063	PATH
OAA-G-11-00068	Population Council
OAA-G-11-00065	Rice University
OAA-G-11-00066	Save the Children
OAA-IO-11-00004	WHO

An additional 8 grants are managed by Grand Challenges Canada, one of the Saving Lives at Birth partners. In 2012, up to 30 additional awards will be selected through the second round of the challenge.

Purpose

The CSHGP facilitates a dynamic partnership between USAID and private and voluntary organizations (PVOs)/NGOs. Through the CSHGP, USAID leverages the development entrepreneurship and “know how” of PVOs/NGOs and their local partners for innovative and effective community-oriented programming that sustainably improves maternal, newborn and child health (MNCH) outcomes, strengthens local and community health systems, and contributes to reductions in morbidity and mortality. PVOs/NGOs, with their local partners (national and local MOH, local NGOs/CBOs, communities), implement in a range of settings, from remote communities in a single district to multiple districts or a province. Projects address critical health needs of vulnerable populations and work strategically with a systems approach at the household, community, health facility, and policy levels and strengthens linkages as relevant. Program components of the CSHGP combine global implementation (direct cooperative agreements) with specialized technical assistance and collaboration to advance NGO action with learning and dissemination through communities of practice and include:

- An active portfolio of 34 PVO/NGO projects in 21 countries. Approximately 10 cooperative agreements are awarded annually through a competitive RFA; and
- Specialized technical assistance for PVO/NGO community-oriented programming through the Maternal and Child Health Integrated Program (MCHIP), ensuring technical rigor and strengthening program design, monitoring and evaluation, including a focus on operations research for testing and scaling up innovations to improve the delivery of high impact MNCH interventions.

Through MCHIP, a partnership with CORE Group contributes to USAID’s leadership role in innovative integrated community MCH programming, and to maximize the inclusion of NGO contributions in scale-up of proven and integrated MCH interventions at the country level.

Services Provided

- Fostering technical, cross-sectoral and systems integration through community-oriented approaches facilitated by PVOs/NGOs;
- Advancing program learning for community-oriented solutions through technically rigorous projects with robust monitoring and evaluation systems; project evaluations; new partnerships between PVOs/NGOs, research institutions, and local/national governments for conducting operations research and for utilization of evidence and lessons; and collaboration for action and learning through an NGO coalition;
- Building local capacity of the MOH and local NGOs and documenting promising practices and processes in local capacity building and sustainability;
- Bringing new partners to USAID (national NGOs and US PVOs/NGOs); and
- Leadership for community health through combining global implementation with specialized technical assistance and resources, and collaboration for action, learning, and dissemination.

Purpose

GAIN – the Global Alliance for Improved Nutrition – is an alliance of national and international public and private organizations that promote nutrition-based solutions to address undernutrition among those most in need. GAIN was created at a special UN session for children in 2002, and is now formally a Foundation under Swiss Law. Currently, GAIN receives funding from the US Agency for International Development, the Bill and Melinda Gates Foundation, the Canadian International Development Agency, the Children’s Investment Fund Foundation, and a number of governments and charitable groups.

With this support, GAIN is funding fortification programs in twenty five countries around the world, reaching approximately 273 million people, half of whom are women and children. GAIN’s goal is to reach more than one billion people with fortified foods that have sustainable nutritional impact. Successful programs in recent years have included vitamin A-fortified edible cooking oil in Mali and Uganda, the development of high quality complementary foods in Kenya, and increasing access to nutrient enriched staple foods in Bangladesh.

Services Provided

The Global Alliance for Improved Nutrition activity provides the following services:

- Provide support to selected countries working on the Feed the Future Initiative to strengthen private-public partnerships to improve nutrition in agriculture, health and nutrition sectors.
- Competitive grant-making to developing countries through a proposal review process;
- Technical assistance on the design, implementation and evaluation of food fortification programs to ensure effectiveness;
- Create national and regional Business Alliances of leading companies, which bring high quality, affordable fortified foods to those most in need;
- Develop innovative programs and approaches to reach vulnerable groups such as infants, young children, mothers and women;
- Foster country involvement in and ownership of the integrated nutrition-related plans and programs;
- Performance measurement and monitoring to ensure that projects are efficient and cost-effective and progressing towards set targets;
- Communications, including global advocacy, corporate communications and social marketing technical assistance.

Health Research Challenge for Impact (HRCI)

Purpose

The Health Research Challenge for Impact (HRCI) conducts multi-disciplinary, multi-country research, evaluations, operations research and introductory activities with a wide range of existing and new partners/institutions to develop and test new/refined tools, technologies, approaches, policies and/or interventions to improve the health of infants, children, mothers and families in developing countries. With WHO and other partners, HRCI helps establish global prevention and treatment guidelines, standards and norms and provides the evidence-base for effective newborn, child, maternal and integrated MNCH health and nutrition programs.

Services Provided

The Health Research Challenge for Impact activity provides the following services:

- Conducts multi-disciplinary, multi-country research, evaluations, health services/operations research and introductory activities with a wide range of existing and new partners/institutions;
- Develops, tests and refines new and improved tools, technologies, approaches, interventions and policies;
- Provides the evidence-base for effective newborn, child, maternal and integrated MNCH health and nutrition programs;
- Engages local partners and contributes to national evidence-based decision making and program improvement;
- Works with WHO and other partners to help establish global prevention and treatment guidelines, standards and norms;
- Responds to global public health research priorities and challenges.

Partners and subcontractors include the International Centre for Diarrheal Disease Research, Bangladesh (ICDDR,B); Save the Children/USA; and Makerere University.

Purpose

HealthTech develops, adapts, evaluates and/or facilitates the introduction of affordable and appropriate technology solutions for the safe, effective, and more equitable distribution of health care services in low-resource countries. This project will address implementation barriers (e.g., issues with technical design, supply chain management, and policy) that typically prevent innovative technologies from reaching the most vulnerable populations. A significant focus of this project will be the advancement of health technologies through commercialization efforts.

Services Provided

The HealthTech V Project provides the following services:

- Identify and prioritize new and promising existing technologies to address health and development challenges through activities;
- Develop viable health technologies that are appropriate, affordable, and acceptable for distribution and use in low-resource settings and show promise for sustainable market;
- Introduce innovative health technologies in developing country settings, bridging the “research-to-use” gap in conjunction with capacity building;
- Support scale-up to global access and use of health technologies;
- Engages local partners and contributes to national evidence-based decision making and program improvement.

Strengthening Partnerships, Results and Innovation in Nutrition Globally (SPRING)

Purpose

SPRING is a new USAID cooperative agreement designed to provide global technical leadership to support scale-up of country-specific nutrition programs and to advance the global evidence-based, advocacy platforms, and policies for nutrition. SPRING provides technical assistance to USAID and its partners, including host country governments, international organizations and NGO implementing partners. SPRING will develop and adapt approaches to accelerate action on nutrition policies, build the capacity of countries to design, implement and evaluate nutrition programs, build the evidence base for multi-sectoral nutrition actions, promote effective delivery of a core package of nutrition interventions, and emphasize country-specific approaches to scale up nutrition programs. Focus areas for technical assistance include maternal and child health and nutrition, HIV/AIDS, and community-based nutrition programs.

Services Provided

SPRING builds on past USAID investments in nutrition and aims to deliver high impact nutrition interventions that improve maternal, infant and young child nutrition (MIYCN) to reduce stunting and micronutrient deficiencies, focusing predominantly on the 1,000 days window of opportunity (pregnancy through the first two years of life). SPRING provides technical assistance at the country level and global level to:

- Strengthen and scale-up country-specific Social and Behavior Change Communication (SBCC) programs;
- Advance country-specific approaches to improve dietary diversity and quality;
- Support country-specific scale up of evidence-based nutrition interventions;
- Strengthen policy and advocacy efforts to support food and nutrition policies and programming;
- Expand evidence-based learning, monitoring and evaluation for effective approaches to scale up nutrition services.

JHPIEGO
Telephone:
(410) 537 - 6551

Fax:
(N/A)

Email:
hvemer@jhpiego.net

Purpose

The purpose of this program is to develop, introduce, and support the scale-up of new health tools and technologies which are appropriate, affordable and acceptable for distribution and use in low-resource settings to accelerate reductions in mortality and morbidity in low resource settings. Accelovate will help to overcome technical, supply, or policy hurdles to adapt and advance effective technologies through innovations in the value chain and promotion of mainstream use. Significant emphasis will be placed on field introduction and scale up.

Services Provided

The Accelovate Project provides the following services:

- Identify and prioritize promising existing and emerging technologies to address health development challenges through activities;
- Engage in selective development of health technologies that are appropriate, affordable, and acceptable for distribution and use in low-resource settings and show promise for sustainable market;
- Advance the introduction of innovative health technologies in developing country settings, bridging the “research-to-use” gap in conjunction with capacity building;
- Lead efforts to scale up global access and use of health technologies
- Develop a significant sub-grants program to support the achievement of project objectives;
- Create opportunities for public-private partnerships to bring technology to scale;
- Build on local assets and expertise, thereby progressively increasing capacity in developing nations to participate actively in the technology value chain;
- Proactively manage technology transfer and intellectual property to ensure innovations are sufficiently protected while also reaching target populations.

Partners and subcontractors include the Jhpiego, Johns Hopkins Center for Bioengineering Innovation and Design, Johns Hopkins Center for Global Health, Population Services International, and the Laerdal Foundation

Translating Research into Action (TRAction) Project*

Purpose

The purpose of the Translating Research into Action (TRAction) Project is to accelerate the introduction and scale up of approaches and interventions that when implemented in programs will reduce mortality and severe morbidity in women, newborns and young children. There is a preponderance of evidence on the potential impact of specific maternal, neonatal and child health interventions yet the successful implementation and scale-up of these in countries remains a challenge. TRAction will address this knowledge gap by managing research, introduction and evaluation activities on how to effectively deliver, increase utilization, achieve coverage, and scale-up evidence based newborn, child, maternal and integrated MNCH health and nutrition tools, approaches, interventions and policies that are relevant to field programs. <http://www.hrcdproject.org/>

Services Provided

The Translating Research into Action (TRAction) Project:

- Solicits applications, awards and manages sub-awards on research, evaluation and introduction activities. This includes, but is not limited to:
 - Work with USAID/GH and/or USAID Missions to determine the scopes of all solicitations and the selection criteria to be used in all procurements;
 - Lead and/or participate in the technical review process;
 - Conduct cost analyses and determine whether potential grantees meet financial and other criteria to receive USAID funds
- Monitors and provides ongoing technical, programmatic and financial oversight of sub-awards;
- Conducts landscape analysis of research and program activities, undertakes evidence reviews and synthesizes research knowledge;
- Disseminates research results;
- Supports efforts to translate research results and undertakes selective introduction activities.

Harvard School of Public Health is a partner on this agreement.

Purpose

FANTA-III is a new USAID cooperative agreement designed to strengthen food security and health policies, programs and systems for improved nutrition. FANTA-III provides technical support to USAID and its partners, including host country governments, international organizations and NGO implementing partners. Focus areas for technical assistance include maternal and child health and nutrition, HIV and other infectious diseases, community-based nutrition programs, nutrition in emergencies, food security and livelihood strengthening, resiliency and vulnerability. FANTA-III develops and adapts approaches to support the design and quality implementation of field programs, while building on field experience to build and expand the evidence base, strengthen capacities to implement quality programming and strengthen and promote global standards for nutrition and health programming to improve nutrition.

Services Provided

FANTA-III's field support activities provide targeted, specialized technical assistance and training activities to support nutrition and food security programming strategies, early warning and response systems, and Monitoring and Evaluation (M&E) for Title II and other USG programs; integrate nutrition services into national health systems (e.g., Community-Based Management of Acute Malnutrition (CMAM), Nutrition Assessment, Care and Support – NACS - for People Living with HIV); strengthen and improve community-based nutrition programming; strengthen nutrition in emergencies programming; support development of nutrition-related national policies and guidelines; support quality assurance/quality improvement of nutrition programming; and support improved nutrition and food security programs in other priority areas as needed.

FANTA-III's global leadership activities support advances in methods and tools that promote program quality; increase capacity to deliver effective services at scale; strengthen international, USG, country government and implementing partner capacity to design, deliver, monitor, improve and demonstrate effectiveness and impact of USAID-assisted food security and health programs for improved nutrition; develop and refine indicators measuring household and individual food security and diet quality; build the evidence-base on the impact of lipid-based nutrient supplements (LNS); adapt data sampling methodologies for cost-effective M&E; and develop methods and tools for quality assurance/quality improvement, beneficiary screening and targeting, and cost analysis for program planning and implementation.

World Health Organization Consolidated Grant/Maternal, Child, and Adolescent Health and Development (WHO/MCA)

Purpose

To identify, sustain, and increase the effectiveness of strategies/technologies that advance child survival in developing countries. A partner in the Health Research Program (HaRP), WHO/CAH refines existing technologies and develops new and cost-effective interventions to reduce mortality and morbidity associated with major childhood illnesses. Results of these efforts establish guidelines, standards and policies used by practitioners in hospitals, clinics and community settings.

Services Provided

WHO/CAH, works with global partners including applied researchers, bilateral agencies, foundations, and host countries to:

- Monitor and coordinate research that will result in new interventions, methodologies, and/ or the establishment of global guidelines for case management and prevention of the major causes of neonatal and childhood mortality and morbidity;
- Facilitate health services and operations research;
- Monitor and evaluate progress of advances in child health.

Recent achievements and ongoing efforts include:

- Identification, validation, and planning for the use of zinc in the treatment of acute diarrhea;
- Implementation/evaluation of the Integrated Management of Childhood Illness approach;
- Identification and potential treatments for the major causes of infectious illness in neonates;
- Demonstration of new vaccine efficacy prior to incorporation into vaccine programs;
- Development of strategies to prevent disease and increase care seeking;
- Reduction of infectious disease mortality with exclusive breastfeeding.

** Included in the World Health Organization Consolidated Grant, listed in Bureau-wide project listing.*

Purpose

To help reduce the exposure of humans to emerging pandemic threats (EPT), USAID has developed an international stockpile of non-pharmaceutical health commodities including personal protective equipment (PPE) as well as laboratory and other medical supplies. The DELIVER Task Order 6 ensures the timely, consistent, and efficient provision of critical USAID donated public health commodities and other supplies required to effectively and rapidly respond to outbreaks of infectious diseases globally and in support of USAID Emerging Pandemic Threats Program requirements in order to prevent and mitigate outbreaks of existing and emerging pandemic threats.

Services Provided

This project provides a variety of services related to the management of the USAID EPT Stockpile, including establishing and operating a secure and reliable Global Distribution Mechanism to store, transport, rapidly deliver, and track in-country distribution of current and future USAID EPT commodities, as well as managing the procurement, assembly, and distribution of additional assets as needed. Specific services include:

- Providing international freight forwarding by sea, air, and land as necessary;
- Providing warehousing services and/or temporary storage facilities in-country;
- Coordinating in-country receipt, distribution, and transportation of commodities including developing processes and standards for ordering, receiving, transferring, transporting, storing, releasing, and distributing commodities within recipient countries;
- Procuring and assembling additional USAID AI Stockpile Commodities;
- Disposing of damaged and/or expired products.

Means of Access

Core Only

Food and Agriculture Organization of the United Nations (FAO) Umbrella Grant

Purpose

To provide support to FAO to carry out collaborative activities with USAID to prevent and control Highly Pathogenic Avian Influenza (HPAI) and other emerging zoonotic diseases of significant public health concern as well as other diseases, such as H1N1 influenza, that can infect both humans and animals. The overall objective is to reduce the risk of human exposure by reducing infections in animals.

Services Provided

This umbrella grant mechanism allows USAID missions and bureaus to provide support to FAO either to headquarters or to regional and country offices for specific technical input and assistance related to avian influenza and other zoonotic diseases of significant public health concern, including H1N1 influenza. USAID supports FAO as the lead international organization for animal health activities, with capacities to support outbreak surveillance and investigation, response, planning and preparedness, improved biosecurity, disinfection, public-private partnerships and communications.

jkmazet@ucdavis.edu

Purpose

The goal of PREDICT is to establish a global early warning system for zoonotic (i.e. of animal origin) disease emergence that is capable of detecting, tracking and predicting the emergence of new infectious diseases in high-risk wildlife (e.g. bats, rodents, and non-human primates) that could have pandemic potential. Particular focus will be placed on establishing an enhanced wildlife monitoring capacity in those geographic “hotspots” that pose a particular risk for the emergence of new infectious disease threats. Surveillance will focus on specific priority pathogens including, but not limited to, retroviruses, influenza, corona viruses and filoviruses.

Services Provided

Assess Capacity and Develop Plans for Implementation of Wildlife Surveillance Support in “hotspot” countries and regions:

- Develop an assessment tool to capture information on key capabilities and systems;
- Analyses of gaps in systems and barriers to implementation.

Develop Risk Models for Zoonotic Disease Emergence and Spread:

- Identify key factors contributing to the emergence and spread of zoonotic disease in geographic focus areas and/or target species;
- Produce models that illustrate the occurrence and spread of diseases from wildlife.

Implement “SMART” (Strategic, Measurable, Adaptive, Responsive, and Targeted) Wildlife Surveillance Strategies to Identify and Target High-Risk Wildlife in the Regions Most Vulnerable to Zoonotic Disease Emergence:

- Develop and improve protocols that result in more efficient and effective sampling;
- Provide countries with training and technical assistance to develop, expand, and maintain surveillance systems;
- Use modeling results to forecast events and plan surveillance strategies;
- Where appropriate, work with local authorities on disease investigations, data collection, analysis and interpretation;
- Continue engaging stakeholders in developing policy that supports the surveillance system;
- Develop/expand communication mechanisms that inform stakeholders of results.

Improve the Flow and Handling of Information, Specimens, and Samples Resulting from Surveillance Activities:

- Assist countries in formulating policy and protocols for disease notification;
- Provide technical assistance to key participants in translating surveillance information to inform animal and human health activities and policy decisions;
- Provide training and technical assistance and institute quality control systems for processing, tracking, storing, maintaining and retrieving samples and data.

Means of Access

Core Only

PREPARE

Purpose

PREPARE will improve multi-sectoral disaster management strategies and practices in designated target countries in Africa, Southeast Asia, South Asia and South America as a foundation for stronger response capacity and resilience against emerging pandemic threats.

Services Provided

- Preparedness planning and policy development;
- Indigenous capacity to develop and plan disaster and outbreak simulations of preparedness plans on an iterative basis;
- Strengthen disaster/pandemic response skills at various targeted levels.

Laurent.thomas@fao.org

Purpose

IDENTIFY is one of the several USAID projects making up the Emerging Pandemic Threats Program (EPT). This project is a partnership between USAID and three international organizations - FAO, WHO, and OIE, which together are working to develop animal/veterinary and human/public health laboratory networks and strengthen laboratories' diagnostic capacities in identified EPT geographic "hot zones", where the potential for emergent diseases and pandemics is greatest.

Services Provided

USAID's two umbrella grant agreements with WHO, and with the FAO (the latter through which USAID provide funds to the OIE as well), serve as mechanisms through which USAID bureaus and Missions can support technical assistance and program support to build nations' and regions' animal and public health laboratories and disease surveillance and reporting systems to help distinguish known disease organisms from new and emerging disease threats. Project activities include supporting outbreak investigation and response; planning and preparedness efforts for potential pandemic; improving biosecurity and biosafety practices at laboratories; building public-private partnerships to advance this project's objectives; and building linkages between the animal and public health worlds to share relevant disease and outbreak information, strategize on combined animal-human prevention and response efforts.

PREVENT

Purpose

To reduce the threats of emerging pandemic viruses among affected or at-risk populations through strategic behavior change activities in targeted high-risk regions.

Services Provided

- Promote effective risk reduction practices for emerging pandemic threats among affected populations through strategic behavior change activities in targeted high-risk regions;
- Characterize risk by working with the wildlife, veterinary, medical and scientific community to better understand what populations may be at risk for exposure to emerging pandemic threats, including H5N1, and what practices and/or factors increase the risk of exposure and infection in order to strategically target behavior change communication activities;
- Reduce exposure to risk by creating awareness among targeted, high-risk audiences of high-risk behaviors for contracting zoonotic diseases such as avian influenza and Ebola hemorrhagic fever (EHF), practical preventative measures and how to recognize and respond appropriately to cases of diseases of animal origin in animals or humans.
- Enhance national capacity by providing assistance to national governments to develop and implement a public communication strategy for emerging pandemic threats;
- Promote long-term behavior change by developing and implementing transformative behavior change approaches which seek to create awareness among targeted audiences of high-risk animal and marketing practices that put humans at risk for disease transmission from animal to humans and between humans.

Purpose

To strengthen the human capacity of countries to identify and respond to outbreaks of newly emergent diseases in a timely and sustainable manner.

Services Provided

RESPOND is a project that twins schools of public health and veterinary medicines in the “hotspot” regions with U.S. counterpart institutions to strengthen the capacities of countries to train cadres of professionals to identify and respond to outbreaks of newly emergent diseases in a timely and sustainable manner. This project develops outbreak investigation and response trainings that merge animal- and human-health approaches toward a comprehensive capacity for disease detection and control. RESPOND partners include DAI, the University of Minnesota, Tufts University, Training and Resources Group, and Ecology and Environment, Inc.

UNDP Coordinator on Avian and Pandemic Influenza

Purpose

This multi-donor trust fund, managed by UNDP, will coordinate U.N. efforts to prevent, prepare, and respond to a global influenza pandemic. This grant will support national governments, and where appropriate districts, in the development of Avian and Pandemic Influenza Preparedness and Response Plans, and will support coordination among countries, donors, and international organizations.

Services Provided

The purpose of this funding is for the UNDP to do the following:

- Build capacity to cope with a pandemic;
- Coordinate global science and research for availability of a pandemic vaccine and antiviral drugs;
- Ensure high level national leadership in the response to Animal and Human Influenza;
- Assist national governments in their coordinated response to Animal and Human Influenza;
- Social mobilization for awareness and behavior change;
- Contingency planning for operational continuity during a pandemic;
- Provide technology and logistic capacity in the event of a pandemic through common services.

Purpose

This Grant supports the World Health Organization/Africa Regional Office's (WHO/AFRO) program for the prevention and control of communicable diseases and the promotion of reproductive health and health systems in Africa. The mandate of the Organization is defined by its Member States in the Constitution adopted in 1946 that determines the objectives and functions of the Organization, its membership and its organs.

Services Provided

The regional office, largely through three Inter-country Support Teams (ISTs) that have been established in Harare, Zimbabwe, Libreville, Gabon, and Ouagadougou, Burkina Faso will:

- provide technical and managerial support and contribute to sustainable capacity building;
- engage with key partners at the sub-regional level;
- provide rapid responses to countries in epidemic and emergency situations;
- generate health knowledge and information and report back to the Country and WHO/AFRO Regional Office;
- plan, monitor and evaluate inter-country activities.

The program components supported by USAID address the following health problems:

- Malaria (MAL)
- Tuberculosis (TB)
- Integrated Disease Surveillance and Response (IDS)
- Child and Adolescent Health (CAH)
- Maternal and Newborn Health (MNH)
- Immunization, Vaccine Preventable Diseases (VPD)
- Family Planning and Reproductive Health (FP/RH)
- Health System Strengthening (HSS)

Means of Access

World Health Organization/Africa Regional Office (WHO/AFRO) Support for the Eradication of Polio

Purpose

This Grant supports the World Health Organization/Africa Regional Office's (WHO/AFRO) program to eradicate polio in Africa. WHO/AFRO supports Member States in the following six (6) areas:

- (1) Developing partnerships to support polio eradication and vaccination;
- (2) Strengthening immunization delivery systems;
- (3) Improving planning, implementation, and monitoring of supplemental immunizations;
- (4) Improving acute flaccid paralysis (AFP) surveillance and response;
- (5) Supporting certification, containment, and post-certification policy development; and
- (6) Improving information dissemination to improve polio eradication activity quality.

Services Provided

The regional office, largely through three Inter-country Support Teams (ISTs) that have been established in Harare, Zimbabwe, Libreville, Gabon, and Ouagadougou, Burkina Faso to support country programs as appropriate to do the following:

- Provide technical and managerial support to supplemental immunization activities;
- Support the geographical expansion and quality improvement of surveillance systems;
- Improve the performance of laboratories;
- Social mobilization and communication.

Purpose

To work with African institutions, other development partners and partners within the USG to identify issues of regional significance in Africa, to develop strategies or approaches to resolve those issues and to provide support to the African institutions in applying the strategies and approaches throughout the region.

Services Provided

ASH supports AFR/SD in identifying social sector issues, providing critical analysis of those issues, disseminating the analysis, advocating for solutions, promoting African partnerships, and strengthening African capacity in program planning, monitoring and evaluation. Specifically, ASH will:

- Provide strategic, analytical, information dissemination and advocacy support to the Africa Bureau, AID/W, USAID Missions, USAID Regional programs, as well as African institutions and networks;
- Identify implementation constraints and emerging priorities that threaten or limit program performance and/or exacerbate problems to improving African health status;
- Assist USAID and its development partners to identify innovative approaches to address and overcome these problems;
- Assist AFR/SD in the evaluation of regional and country programs aimed at assessing results achieved or not achieved, learning from these experiences and sharing promising practices to advance organizational learning and tell the Agency's story;
- Support issues identification, analysis, sharing of promising practices, monitoring and evaluation across the areas of: Maternal and Child Health; Infectious Diseases; Reproductive Health; Multi-sectoral support to improving health outcomes, and Health System financing.

Means of Access

Field Support

Displaced Children and Orphans Fund

Purpose

The Displaced Children and Orphans fund (DCOF) provides financial and technical assistance for community-based programs that assist Vulnerable Children who are separated or orphaned and without parental or adult supervision.

Services Provided

This fund is coordinated and supported by the Office of Democracy, Human Rights and Governance, although most activities are implemented through USAID Mission-managed grants and agreements. The major portion of these Funds is used to support program activities and provide technical assistance for programs and methodological approaches that strengthen families and communities to provide the necessary care, protection, and support for highly vulnerable children. Program activities address the needs of especially vulnerable children, including children affected by armed conflict, street children, and children otherwise separated from appropriate care-giving situations.

DCOF currently supports programs in 27 countries.

As part of its oversight and managerial responsibilities for the Fund, DCHA /DRG maintains a technical assistance contract with New Editions Inc. This contract provides technical assistance and support for fields missions that are interested in developing programs under the Fund.

Purpose

The Patrick J. Leahy War Victims Fund (LWVF) provides financial and Technical assistance to programs that address the needs of people living with disabilities, primarily those who suffer from mobility-related injuries, caused by unexploded ordinance (UXO), including anti-personnel landmines, and other direct and indirect causes of physical disability (polio and other preventable diseases that might result from interrupted immunization campaigns).

Services Provided

The LWVF is concerned with the provision of orthopedic services and devices to ensure unassisted mobility for civilian war victims and other persons with disabilities. Assistance may include training and institutional capacity strengthening, facilities upgrading, materials provision, and support for national disabilities policy reform and public advocacy. In addition, programs include support for increasing the social and economic opportunities of these survivors.

This fund is coordinated and supported by the Office of Democracy, Human Rights and Governance, although most activities are implemented through grants and agreements that are managed by USAID Missions.

The LWVF currently supports program activities in 25 countries.

As part of its oversight and managerial responsibilities of the Fund, DCHA/DRG maintains a technical assistance contract with New Editions. This contract provides technical assistance and support for field missionsthat are interested in developing programs under the Fund.

Victims of Torture Fund

Purpose

The Victims of Torture fund (VOT) provides financial and technical assistance to programs worldwide that assist in the rehabilitation of individuals who suffer from the physical and psychological effect of torture.

Services Provided

The VOT primarily supports programs that help heal the psychological and physical trauma caused by torture. Additionally, the Fund recognizes that communities, along with survivors, need to heal and recover. To this end, The Fund supports programs that affirm the dignity of the survivor by restoring his or her position as a functioning and contributing member of the family and the community.

The Fund works through nongovernmental organizations (NGOs) overseas that (1) provide direct services to survivors, their families, and communities; (2) strengthen the capacity of country-based institutions in their delivery of services to survivors; and (3) increase the level of knowledge and understanding about the needs of torture victims. The Fund supports activities in 20 countries that attend to the medical, psychological, and social needs of torture survivors and their families. These programs include advocacy, training, technical assistance, and research. The Fund is coordinated and supported by the Office of Democracy and Governance, although most activities are implemented through grants and agreements that are managed by USAID missions.

As part of its oversight and managerial responsibilities of the Fund, DCHA/DRG maintains a technical assistance contract with New Editions. This contract provides technical assistance and support for field missions that are interested in developing programs under the Fund.

MCH	Maternal and Child Health or Maternal and Child Health Division (HIDN)
MDB	Multilateral Development Bank
M&E	Monitoring & Evaluation
MEDS	Monitoring, Evaluation and Design Support Activity
MENA	Middle East and North Africa
M/FM	Office of Financial Management
MH	Maternal Health
MIS	Management Information System
M&L	Management and Leadership
MMR	Maternal Mortality Ratio
MNH	Maternal and Neonatal Health
MOH	Ministry of Health
MOPH	Ministry of Public Health
MOST	Micronutrient Operational Strategies and Technologies
MOU	Memorandum of Understanding
MSH	Management Sciences for Health
MTCT	Mother-to-Child Transmission (of HIV/AIDS)
MVDP	Malaria Vaccine Development Program
MVI	Malaria Vaccine Initiative
NACP	National AIDS Control Program
NAD	New Activity Description
NAPCP	National AIDS Prevention and Control Program
NDH	Non-Direct Hire
NEP	New Entry Professional

NGO	Non-Governmental Organization
NHA	National Health Accounts
NID	National Immunization Days
NIH	National Institutes of Health
NIS	Newly Independent States Program Funds
NMRC	Navy Medical Research Center
NPR	National Performance Review
NUT	Nutrition Division (HIDN)
OAS	Organization of American States
OB	Obstetric
OC	Oral Contraceptive
OCP	Onchocerciasis Control Program
OE	Operating Expense
OFDA	Office of Foreign Disaster Assistance
OHA	Office of HIV/AIDS
OMB	Office of Management and Budget
OMNI	Opportunities for Micronutrient Interventions Project
OPS	Operations Division (SPBO)
OPV	Oral Polio Vaccine
OR	Operations Research
ORS	Oral Rehydration Salts
ORT	Oral Rehydration Therapy
OTI	Office of Transition Initiatives (DCHA)
OVC	Orphans and Vulnerable Children
OYB	Operational Year Budget
PAA	Population Association of America
PACD	Project Assistance Completion Date
PACT	Private Agencies Cooperating Together
PAHO	Pan American Health Organization
PAPA	Participating Agency Program Agreement
PAR	Performance and Accountability Report
PASA	Participating Agency Service Agreement
PATH	Programs for Appropriate Technologies in Health
PCV	Peace Corps Volunteer
PDC	Policy Development Coordination
PDMS	Office of Professional Development and Management Support (GH)
PEC	Policy, Evaluation and Communication Division (PRH)
PEI	Polio Eradication Initiative
PEPFAR	Presidents Emergency Plan for AIDS Relief
PHC	Primary Health Care
PHN	Population, Health, and Nutrition
PHR	Partnership for Health Reform
PIO	Public International Organization
PL	Public Law
PLP	Population Leadership Program
PLWHA	People Living with HIV/AIDS
PMF	Presidential Management Fellow
PML	Presentation Materials Library

Acronym List

PMNCH	Partnership for Maternal Newborn and Child Health
PMP	Performance Management Plan
PMTCT	Prevention of Mother to Child Transmission (of HIV/AIDS)
PNFPP	Philippines National Family Planning Program
POPIN	United Nations Population Information Network
PPC	Bureau for Policy and Program Coordination
PPDS	Program and Performance Data
PRB	Population Reference Bureau
PRH	Office of Population and Reproductive Health
PRIME	Primary Providers' Training and Education in Reproductive Health
PROWID	Promoting Women In Development
PSC	Personal Service Contract
PSIP	Procurement System Improvement Project
PSP	Private Sector Programs
PVC	Office of Private Voluntary Cooperation
PVO	Private Voluntary Organization
QA	Quality Assurance
QDDR	Quadrennial Diplomacy and Development Review
RBM	Roll Back Malaria
RCS	Office of Regional and Country Support
REDSO	Regional Economic Development Support Office
RFA	Request for Application
RH	Reproductive Health
RH/PHC	Reproductive and Primary Health Care
RHSC	Reproductive Health Supplies Coalition
RIF	Reduction in Force
RMNH	Reproductive Maternal and Newborn Health
RP	Results Package (see AAD)
RPM	Rational Pharmaceutical Management
RRB	Ronald Reagan Building
R&RS	Research and Reference Service
RSSA	Resource Support Services Agreement
RTU	Research, Technology and Utilization Division (PRH)
SADC	Southern Africa Development Community
SAI	Special Assistance Initiative
SCF	Save the Children Foundation
SCT	Sewage Collection and Treatment Systems
SDI	Service Delivery Improvement Division (PRH)
SEED	Support for East European Democracy (see AEED)
SM	Safe Motherhood
SNID	Sub-National Immunization Days
SO	Strategic Objective
SOTA	State of the Art
SOW	Statement of Work
SPA	Service Provision Assessment
SPB	Strategic Planning and Budgeting Division (SPBO)
SPBO	Office of Strategic Planning, Budgeting and Operations
SPER	Strategic Planning, Evaluation and Reporting Division (OHA)

SpO	Special Objective
SPU	Strategic Planning Unit
SSO	Strategic Support Objective
STD	Sexually Transmitted Disease
STI	Sexually Transmitted Infections
StopTB	Stop Tuberculosis
TA	Technical Assistance
TAACS	Technical Advisor in AIDS and Child Survival
TASC	Technical Assistance and Support Activity
TB	Tuberculosis
TBA	Traditional Birth Attendant
TBD	To Be Determined
TEC	Total Estimated Cost
TFGI	The Futures Group International
TFR	Total Fertility Rate
TI	Transition Initiative
TLR	Technical Leadership and Research Division (OHA)
TN	Technical Notification
TO	Task Order
TOA	Transfer Obligation Authority
U.S.	United States
U5MR	Under 5 Mortality Rate
UN	United Nations
UNAIDS	Joint United Nations Programme on HIV/AIDS
UNDP	United Nations Development Programme
UNFPA	United Nations Population Fund
UNICEF	United Nations Children's Fund
USAID	United States Agency for International Development
USAID/W	USAID/Washington
USDH	United States Direct Hire
USG	United States Government
USP	U.S. Pharmacopeial Convention
VAD	Vitamin A Deficiency
VB	Vector Born Disease
VCT	Voluntary HIV Counseling and Testing
VITA	Vitamin A Initiative
VOA	Voice of America
VVM	Vaccine Vial Monitor
WARP	West Africa Regional Program
WFP	World Food Program
WHO	World Health Organization
WID	Office of Women in Development (EGAT Bureau)
WRAIR	Walter Reed Army Institute of Research
YARH	Young Adult Reproductive Health
