Copies of the Guide are available for download from <http://www.eif-it.com>. All respective trademarks, brands, and names are the property of their respective owners. Enterprise Incubator Foundation does not guarantee the accuracy of the data and information included in this publication.

This Guide was supported by the Ministry of Economy of the Republic of Armenia, (<http://www.mineconomy.am>) and USAID/Armenia Mission (<http://armenia.usaid.gov/>).

The publication of this Guide has been made possible by the support of the American People through the United States Agency for International Development (USAID). The contents of this publication are the sole responsibility of the authors and do not necessarily reflect the views of USAID or the United States Government.

The concept of this Guide was initiated by Enterprise Incubator Foundation, a business development and incubation agency supporting technology companies in Armenia. The objectives of the Guide stem from and parallel the mission of Enterprise Incubator, which is to foster economic growth in Armenia by assisting IT companies in areas of business development and management, skills development and training, and start-up formation and entrepreneurship. The aim of the Guide is to give an easy access to the information on existing companies operating in Armenia's IT sector. The profile of each company includes its contact information, background, and products and services offerings.

The Guide is expected to serve both international and Armenia-based enterprises and individuals interested in business opportunities with Armenia and its IT industry. EIF strongly believes that this initiative is of great importance and value to the successful promotion of Armenian IT companies and their products in international markets and development of additional channels for new business and investment opportunities in Armenia.

In addition to this Guide, EIF also issues a periodic report on the state of Armenian IT sector with a detailed overview and analysis of the industry. The copies of the report are available for download from <http://www.eif-it.com>.

Alphabetical Index

A2 Ltd

Mr. Ararat Voskanyan, Director
2/2 Shrjanain St., Yerevan 0068, Armenia

Phone: +374 10 77-06-34

Fax: +374 10 77-01-81

Email: ararat@arminco.com

<http://www.a2ltd.am>

A2 Ltd is specializing in the design and manufacturing of measurement and control systems for measurement, analysis and control of technological processes. The company was established in 1990 on the basis of the science and research institute "AGATH", one of the major R&D centers of the former Soviet Union. Our employees are highly qualified experts in the areas of IT, systems engineering, and automation. A2 has successfully cooperated with the Ministry of Energy of Armenia, ArmRosGaz-Prom, and other major utility companies in Armenia. A2 has designed a number of products including:

- Multifunctional microprocessor counters, ISO 9002 certificate;
- Electric power automated monitoring and measurement system;
- Electronic Gas Volume Correctors "ElCorr";
- ArmFlow, a microprocessor outlay measurement system;
- CAMERTON-2000, an automatic liquid density meter;
- Systems for measurement and control of electrical meters.

AbideWeb Technologies LLC

Mr. Samvel Amiraghyan, CEO
16/1 Vardanants St., Yerevan 0010, Armenia
Phone: +374 10 53-12-11
Fax: +374 10 56 49 30

Providing complex solutions for designing IT networks.

Developing infrastructures for telecommunication networks.

Design and construction of Data Centers and Database Centers.

Design and Construction of structural cabling for buildings.

Design, construction and support of WiFi/WiMax networks.

Developing of multifunctional (multiservice) networks, Call Centers, corporate audio-video systems.

Integration and support of Informational Systems:

- Accounting,
- Billing
- Collaborative application system.

Providing Informational security and systems parametrical security.

Providing solutions for informational infrastructure control and monitoring systems.

Providing complex technical support and IT-outsourcing.

Developing, installation and support of applications (programs).

Developing, hosting and further support of Web-sites and portals.

IT consulting, IT business systems preparation and accomplishment.

Training center

Trainings:

- Computer basics;
- IT networks and systems;
- IT management;
- Programming Languages.

Children's professional groups on IT systems, mathematics, chemistry, physics, radio.

IT Laboratory lending.

Production

Facilities for IT systems infrastructures;

Network facilities;

Intellectual games and handbooks for children and youth.

**"ACTRADE-
SOFT" LTD**

Mr. Tigran Sargsyan, Director

Republic of Armenia, Yerevan, 0086, Sharuri Str. 2, apt. 20

Tel.: +374 10 53 94 08 +374 55 53 94 08, +374 99 86 77 29

Email: info@actrade-soft.com

<http://www.actrade-soft.com>

Perfection doesn't have limits. We will continue to grow and develop,

keeping step with time. We have all preconditions and possibilities for that as the adoption and service of computer software is not only the effective means of earning money for our employers but also favorite occupation.

"ACTRADE-SOFT" LTD is not large, but is sure of its strength company which mainly specializes in accounting, trade and warehouse accounting (including the connection of all type of commercial equipment), automation of salary calculation, production processes, and generally of all the economical spheres, as well as in computer programs training. During its activity "ACTRADE-SOFT" LTD has obtained experience, high qualification specialists, reliable partners and customers due to its accepted work principles:

- Affordable,
- Honest,
- Reliable,
- Fast,
- Saving.

"To be affordable for all the sections of the population due to its flexible policy,

To attract customers not only with the quality of the products and properly providing of services but also be honest with them,

To be dependable and reliable partner,

Develop and adopt such software which will help our customers in fast and qualitative solving of their problems,

To be saving, to think also about customers' pocket, save their money and to offer everybody worthy price".

Main spheres of company activity are:

- Automation of accounting, trade and warehouse accounting, salary calculation, production processes,
- Installation of operation systems,
- Installation of antivirus systems, as well as the periodical update of bases and cleaning of viruses,
- Projection and connection of nets,

- Installation of commercial equipment, connection to different computer software,
- Computer programs training on different levels and in short time-period.

Today newly established but rapidly growing "ACTRADE-SOFT" LTD has distinguished orientation, concrete goals and healthy potential of overcoming of any kind of appearing problem... This was the type of the company its establishers Harutyun, Vladimir and Tigran Sargsyans have imagined not so long ago in 2009 while creating the company.

The adoption of programs can be profitable and useful and WE will prove this.

AdBook LLC

Mr. Zhirair Terzyan, Director

**26/1 V. Sargsyan Str., Erebuni Plaza Business Center,
Suite 406, Yerevan 0010, Armenia**

Phone: + 374 10 56 04 94

Fax: + 374 10 56 04 43

Email: contact@adbook.am

<http://www.adbook.am>

Adbook is an online advertising Network. It was founded in 2008 and since then has become a major online advertising platform in Armenian market. Adbook presents a special technology that enables the advertisers to easily advertise on many websites at the same time and to choose the amount of money they prefer to spend on their ads. Advertisers can easily create and submit their ads to various websites simultaneously using the Adbook online software, as well as view reports on the per-

formance of their ads. Adbook supports both textual and banner online advertisement formats.

Anyone can create an AdBook account for free and easily advertise with us, receiving real-time statistics on the performance of the placed advertisement.

Our qualified professional will gladly guide you throughout your advertising processes and will give you valuable advice on maximizing the performance of your ads.

Algorithm- Service CJSC

Mr. Vladimir Hakobyan, Executive Director
2 Avetisyan St., Yerevan 0033, Armenia

Phone: +374 10 27-58-80

Fax: +374 10 22-81-91

Email: info@algserv.am

<http://www.algserv.am>

Algorithm-Service CJSC, founded in 1992, develops multimedia educational programs on such subjects as the Internet, Microsoft Office, Microsoft Windows, study of foreign languages and sciences, and other topics. Overall, the company developed more than 50 courses on different educational subjects. Major clients and partners of Algorithm-Service are The Central Bank of Russia, MMT&DL (Russia), Samotec GmbH (Germany), and Phenix Technologies (France).

Algorithm-Service uses GOLD shell and Complex TeachPro technologies developed by the company to facilitate the creation of multimedia programs. These technologies allow rapid development of new multimedia courses in six months by simply modifying data within existing and adjustable modules.

Algorithm-Service offers multimedia educational programs for teaching English, French, German, Russian, and Spanish languages and software training programs for Windows, Microsoft Office and its components, Adobe products (Photoshop, Illustrator, Premiere), and MathCAD. Software training courses are available for English, German, Russian, and Spanish native speakers.

Each course contains a comprehensive range of lessons and practical tasks for mastering the subject without teachers, manuals, or reference books. Visual demonstrations, accompanied by detailed explanations are the most effective ways to master computer programs. Quizzes, at the end of each lesson, measure progress. A convenient interface, terminology search system, and bookmarks make the learning process simple and effective. Their courses provide the necessary knowledge and skills for an individual to learn a foreign language and/or to work efficiently and effectively with various computer programs.

AltaCode LTD

Mr. Edgar Hambaryan, Executive Director
19 Kievyan St., Site 11, Yerevan, Armenia
Phone: +374 10 22-46-99

Armenia Telephone Company (ARMENTEL) CJSC

Mr. Neycho Velichkov, Director
2 Avetis Aharonyan St., Yerevan 0014, Armenia

Phone: +374 10 28-90-31

Fax: +374 10 28-16-20

Email: pr@beeline.am

<http://www.beeline.am>

As the largest telecommunication services provider of the country ArmenTel CSC (brand Beeline), owned by VIMPELCOM OJSC, has always acknowledged its role and importance in the development of telecommunication sphere. Since April 7, 2008, right after the changeover of the ownership, VimpelCom has adopted a new development strategy. The introduction of modern technologies in the fixed and mobile networks of the company, the wide range of investments as well as professional services and innovative products continuously contribute to the improvement of telecommunication infrastructure creating competitive advantages and exciting opportunities for all its customers, both corporate and individuals.

Beeline services are constantly developing and expanding. Today, in the sphere of fixed telephony the company provides various services such as traditional telephony, Premium Rate, Free phone, 4 digit number, Dial-up, VoIp, ICDN, ADSL and Hi-line services as well as Internet and VPN services to ISPs and Business Companies.

In the area of mobile business Beeline offers its customers access to the most innovative services including “Third Generation” mobile connection technology (including video- call and video –conferencing), GPRS, MMS and WAP services. Due to the introduction of “Global Roaming”

service the number of our roaming agreements with different countries has been sharply increased reaching 440 operators in 190 countries.

The whole fixed telephony is being upgraded and migrated into IP packet network, which in turn will create the feasibility to provide broadband and multimedia services in Armenia. The digital capacity of PSTN with the incorporation of CDMA network is nearly 400K lines, 1149 km fiber –optic lines are installed all over the country; the digitalization in the territory of Armenia has been reached up to 61%. Now the company is on its way to realize the introduction of the most innovative NGN converges technologies which will combine various types of telecom services into one customer - tailored package.

In the sphere of internet business Beeline is a dedicated supplier of different modern services. Today the company offers its customers a top modern technology- CDMA service for regions. It serves as a fixed telephony without wires and insures high quality of voice, wider opportunities of the network and fast internet. Recently Hi Line, a new internet service based on ADSL technology, has been also introduced. It has significantly better performance (100times faster as compared with Dial-up) and gives our customers a wonderful opportunity to download films, music as well as to travel in the internet and enjoy themselves.

Besides the fairly justified commercial aim those development initiatives are targeted to assist GOA in its challenging task to break digital divide and make Armenia a country which is fully integrated into Global Information society.

"Armenian Datacom Company" CJSC

Mr. Harald Grytten, General Director

13/1H.Kochar Str., 0012 Yerevan, RA

Tel.: +37410 212200

Fax: +37410 279980

Email: info@adc.am

<http://www.adc.am>

"Armenian Datacom Company" CJSC (ADC) was formed as an Armenian-Norwegian joint venture in April 2006, and has in January 2009 been joined by Dubai based "Delta Partners" telecommunication fund with significant investment dedicated to expanding the company's network and service portfolio.

ADC was the first company to create a 21st century ultramodern fiber-optic network spanning all around Yerevan covering both central areas and the suburbs. The main goal of ADC is to invite Armenian companies and the public to a new digital world with exceptional levels of data transmission security and reliability.

Due to city-wide distributed high-capacity network solutions, ADC provides high-speed fiber-optic broadband Internet and ultramodern data communication services to corporate segment of the market.

As part of regularly expanding the spectrum of services, ADC recently has developed new hosting solutions. A key part of the new hosting services is the introduction of an innovative solution named Virtual Dedicated Server based on the Virtual Dedicated Server (VDS) innovative technology. This is a completely new service in the Armenian market. The VDS technology is ideal solution for hosting a single application or database, also for larger solutions for a variety of development and pro-

duction servers, as well as for hosting content to be accessed by the public.

In addition to VDS service, ADC offers traditional hosting solutions such as dedicated server and co-location as well as domain registration.

A significant portion of the new capital raised in the company is dedicated to the development of home broadband Internet services in Yerevan. This service compliments the already widespread fibre-optic network built and operating in Yerevan and is a key component in the further development service portfolio expansion.

ArmilDesign Project LTD

Mr. Arthur Badalyan, Director
49 Komitas, 0051, Yerevan, Armenia

Tel.: +374 94 13 04 00

Bi-Line Ltd

Mr. Hayk Khanjyan, President
50 Khanjyan St., Yerevan 0025, Armenia

Phone: +374 10 57-88-25

Fax: +374 10 57-45-59

Email: info@bi-line.am

<http://www.bi-line.am>

Bi-Line was established in 1996, and since then has become one of the IT industry leaders. The company has two main operating segments: hardware and systems integration and software development. Bi-Line is a distributor, dealer and service provider for a number of leading computer equipment and systems manufacturers including Alcatel, APC, Canon, Cisco, IBM, HP, Oracle, and Siemens. Bi-Line clients are Ministries of Foreign Affairs and State Revenue of Armenia, UNICEF, USDA, the World Bank, Marriott, the Central Bank of Armenia, a number of major banks and manufacturing companies in Armenia.

Bi-Line offers complex "turn-key" solutions with prior and post integration consultations and training services. The list of projects delivered by the company include "Data, Phone and Power Supply" network system,

“Accounting, Warehouse, and Sales” complex software system, “Drivers License” system for the Armenia’s main drivers license facility.

The company’s software segment specializes in multimedia applications, web design, and custom software development. In 2002, Bi-Line finished the development of the animated “Armenian Fairy Tales” multimedia CD in 3 languages. The production of this CD was done in cooperation with a French partner TransTech International.

In 2001, we designed and developed a statistical application by the request of the US based Numetrics Management Systems Inc. The software was intended for statistical and mathematical modeling and simulations used in chip design.

Currently, Bi-Line is developing a proprietary 3D engine for computer games and a new methodology and software tool to be used in the simulation, verification and testing of integrated circuits on the Gate-Gate level.

<http://www.cit.am>

"CIT" ("Center for Information Technologies") LLC is one of the first IT companies in the Republic of Armenia. The company was founded in 1992 as a subsidiary company for Computing Technics and Informatics Scientific Research Institute (former "Algorithm"). The company has been presented by CIT brand since 2000, it's one of the most popular and successful brands in Armenian IT market.

In Armenian IT market CIT is distinguished by its scientific - technical means, long-term experience and scientific traditions. The company is the essential business partner of Computing Technics and Informatics Scientific Research Institute. Being one of the first private companies in IT sphere CIT acted as special school for training specialists for Armenia's IT sphere. Founders and senior specialists of about ten leading Armenian IT companies have gained their professional skills working in CIT.

The quality of products and services provided by the company was approved by international qualifications and certificates. CIT is one of the first Armenian IT companies which was certified (in 2001) by ISO 9001 standard. For several years the company has been leading among companies announced as winners in different large-volume bidding projects. The largest projects implemented by CIT are as follows:

- ARLIS Armenian Legal Information System including the whole management system, CD/DVD versions and www.arlis.am website
- Ten marz portals of e-governance system (lori.region.am, vdzor.region.am etc.), eleven community portals (sevan.region.am, masis.region.am etc.) of the same system and regional governance central portal (www.region.am)
- Automated system of the RA State Registry including www.stateregistry.am website
- Components of the real estate and State Cadastre system

Directions of CIT's activities have been enlarged in accordance with market current requirements. Currently the main activities of the company are:

- Web applications, web development, design and maintenance, integrated solutions for companies of scientific, economic, service and other spheres
- Development and maintenance of corporate Web sites, e-Commerce, e-Governance, e-Consulate, e-Learning, management and monitoring systems, statistical software, catalogs, voice messaging systems, logistics etc.
- Enterprise solutions (Enterprise Management, Business Automation, Financial/Accounting Software, sales software)
- Network solutions and service

CIT also provides services as follows:

- Web, portal and graphic design
- Applications' support
- Hardware warranty and post warranty period service and support
- Hardware update

Hardware production and service department founded in 1993 offers computers and peripherals. CIT is the only company in Southern Caucasus that assembles computers on its own assembly line. The assembly

line corresponding to international standards not only assembles computers but also carries thermal and electric tests.

CIT has 2 local stores and a branch in UAE. The company as well functions in Nagorno Karabakh. Distribution channels and partnerships cover USA, Canada, Germany, Pakistan, UAE, Switzerland, Georgia Russia, Ukraine and Taiwan. The company is the representative of MSI (Dealer), HP, Compaq (Business Partner), 1C Russian company (Franchisee).

With the advent of electronic trading in the 1970-ies, the trading process has speeded up immensely. The accuracy and reliability of electronically-transmitted market data have become a necessity rather than luxury in a short time period.

CQG began serving United States traders in 1980, expanding to Europe in 1988 and to Asia in 1998. It leads the industry in providing reliable data, superior decision making, and execution software with customer support that understands the trader.

For more than 25 years, CQG has developed new technologies, offering real-time and historical data integrated with graphics and technical analysis tools. CQG's innovations have become industry standards.

Headquartered in Colorado, USA; CQG development teams operate from four countries and its customer support teams from eleven locations, counting more than 400 employees worldwide.

Founded in 2004, the Yerevan branch of CQG is fully integrated with the global team, and participates in all kinds of operations-from software development to quality assurance, to customer support.

Email: info@fibernet.am, press@fibernet.am

<http://www.fibernet.am>

FiberNet Communications - the second telecommunication company of Armenia having exits on the international communication channels, has been created in 2006. Our company controls its own modern telecommunication network and provides the wide range of services, like: International Private Line, IP Transit, Rent of communication channels, Virtual points of presence, Access to Internet, Collocation.

Company business partners are large the provider both the corporate companies and the state structures of Armenia.

Our network has been built with regard of demands of modern customers for most popular services and such requirements to the channel quality, like a high carrying capacity, (data transfer from 1Mbps to 1Gbps speed, minimum connection latency, high extent of reliability and the system configuration flexibility).

The technical basics of Fibernet are the latest ideas and new technologies of the leading world manufacturers like Cisco, Ericsson and Lucent.

Currently Fibernet Communications has one of the IP-networks branched most out in Armenia with the basic main channels in capacity

STM-4 (622 Mbps) both 1 Gbps, and an exit on foreign networks on routes Yerevan-Tbilisi, Yerevan-Moscow, Yerevan-Frankfurt, Yerevan-Budapest, Yerevan-London, Yerevan-Paris.

The network of Fibernet Communications connects the main business centers of Armenia with similar centers in Russia and European countries. SDH/DWDM technologies is the basic of its composition.

"GNC-Alfa", founded in 2007, is one of the three telecommunications backbone operators of Armenia. The Company's network is based on Fiber Optic Cable, the main part of which is passing along the national gas pipeline. The Yerevan-Meghri segment of the network, which is interconnected with the fiber optic network of Iran, has been put into op-

eration in September 2009. The Northern segment of the backbone cable, which is passing through the largest cities of the Country and interconnected with the fiber optic networks of Georgia at least in two border-crossing points, will be put into operation by mid 2010.

The list of services provided by the Company includes lease of «dark fibers», Internet access wholesale service (IP transit), national and international leased line and virtual private network services.

Gyumri Information Technologies Center

Mr. Gurgen Paronyan, Executive Director
Republic of Armenia, Gyumri, Ankakhutyan 9 square, 3101
Phone: +374 94 034 034; +374 312 4 72 99
Email: info@gitc.am
<http://www.gitc.am>

Gyumri Information Technologies Center (GITC) is a post-graduate educational institution created as a result of a vision that aims to capitalize on the intellectual capital of Armenia's rural regions to foster the expansion of the IT boom from Yerevan to other major cities, and consequently throughout Armenia.

The main focus of the Center is to develop the IT potential in rural areas, and major cities other than Yerevan, as a means to create job opportunities and utilize local human capital for stimulating the Armenian econ-

omy. The government of Armenia supports the development and growth of IT within the country, although this policy is pursued mainly to the benefit of interests located in Yerevan where the main players are branches of well-known multinational IT companies such as Synopsis, Lycos, Virage Logic, Synergy etc. GITC has positioned itself as a medium for drawing the IT industry into areas outside the resource-rich capital of Armenia.

GITC's curriculum is market-driven. We work closely with IT companies in Armenia and abroad, in training technology professionals that will be ready to meet the needs of the global IT market. Currently, the school offers two main courses of study: Electrical Engineering and Web Technologies.

<http://www.iig.am>

IIG LLC is the business partner of the US based Information Integration Group, Inc. IIG LLC was founded in 2001 in Yerevan, Armenia by Alec Baghdasaryan. The company is mainly engaged in accounting systems (Sage MAS 500 ERP, Microsoft Dynamics NAV, MAS 90 ERP, Sage MAS 200 ERP, and so on) development, as well as web development. Currently qualified and experienced specialists are employed at IIG.

As for Information Integration Group, Inc (IIG), being founded in 1991 it provides business management solutions to small and mid-sized businesses. IIG is a Microsoft Certified Master Developer building complete solutions for industry specific needs. With over 1000 Clients, IIG continues to build on the tremendous success, experience and history to serve clients and develop new solutions for businesses.

IIG specializes in serving mid-market companies finding solutions for their needs.

IIG provides a full array of Professional Services among which are the following:

IIG is prepared to undertake the most complex IT projects involving custom programming in a variety of languages. Here are the more common Programming Services:

- Custom Software Application Design and Development
- Custom Database Design and Construction
- Various Platforms Code Conversion
- Application Upgrade and Modernization
- Wireless and Mobile Devices Applications Development
- Internet Applications Design eCommerce/Internet Portals Design and Implementation

IIG development team uses various technologies, languages and tools such as:

- ASP programming with MS SQL Server/MS Access databases
- ASP.Net programming with MS SQL Server/MS Access databases
- PHP programming with MySQL
- Also animated web site design with Flash Graphics is widely used.

For custom programming the following languages, technologies and tools are used:

- Visual Basic
- Visual Basic .Net
- C#
- The C/AL programming language designed especially for Dynamics NAV system
- The ProvideX programming language designed especially for Sage MAS90/200 systems (with OOP components)
- XML
- Web Services

Impeva Labs, Inc.

41 Arshakunjats Ave, Yerevan, 0026, Armenia

Phone: +374 10 44-15-71

Fax: +37410 44-89-02

Email: l.zmblyan@impeva.com

<http://www.impeva.com>

Impeva Labs is the leading supplier of intermodal container monitoring, tracking and security solutions that enable the most efficient global transportation of goods by providing a Continuous Chain of Custody (C-3) Shipping System™.

Impeva Labs, Inc. is a privately-held firm developing and providing the leading container monitoring, tracking and security products and services. The company's innovative hardware, software and infrastructure capabilities provide immediate worldwide reporting on container location, condition and security to shippers and government agencies, resulting in a Continuous Chain of Custody (C-3) Shipping System™ for rapid security processing at points of entry, and more efficient logistics management along the entire supply chain.

The company is advancing in major validation and certification trials, and has strategic partnerships with key communication network providers, logistics managers, and system integrators.

Our strategy is to engage with customers to tailor our technology for rapid deployment to immediately enhance their supply chain and inventory management.

Impeva Labs products consist of Global Sentinel™ container security devices that are capable of providing real-time status, position and event

information from any point on earth on a continuous basis and Device Management Center (DMC) that provides immediate global monitoring of intermodal shipping container security, condition and location. The container-mounted Global Sentinel device incorporates various types of electronic sensors and communicates seamlessly worldwide with Impeva Labs's DMC through multiple wireless technologies, providing immediate secure access to data from the container. The DMC links to Impeva Labs customers' data centers in a number of ways including standard XML over a secure network connection. Customers and appropriate agencies can also be notified via SMS text messaging and email notification within minutes of a container experiencing an abnormal event.

The Impeva Labs systems provide the entire supply chain with improved security, reduced shrinkage and, thus, lower insurance premiums. By providing a virtual «Continuous Chain of Custody», Global Sentinel facilitates the implementation of fastlane Customs processing and the time-critical knowledge to enhance logistics management.

"Impression Web Studio" LLC

<http://www.web-itc.com>

Company

Industrial Technologies Co (ITC) is an engineering design firm that specializes in helping you convert your idea into a successful product. We

have over 10 years of experience and a solid reputation among our clients in the global marketplace.

ITC's creative design team has been working together since 1998, when they comprised the Armenia-based R&D department of a leading innovative tool manufacturer in the USA and UK. ITC was spun-off in 2003 and established as an independent company. Our comprehensive services include engineering and product development, testing and certification of tools, art design as well as implementation of production and outsourcing. ITC also provides IP research and filing services.

Services

The core services ITC offers its customers include the following:

1. Engineering and Product Development
 - o Design & Engineering of Machines
 - o Design of Hand, Powered, Agricultural, Metal-Cutting Tools
2. Industrial Design
 - o CAD/CAE software services
 - o CAD & Drafting Services
3. FEM & CFD Analysis Software
4. Testing and Certification of Tools
5. IP Research and Filing

Customers

ITC's customer base is comprised of well-known manufacturers of power and hand tools and industrial hardware, as well as testing and measuring equipment, in the USA, Canada, EU/UK, Russia/CIS and China. We have established an impressive track record of developed products, many of which currently are sold in major US and UK hardware stores - such as, Home Depot, Wal-Mart, Sears, Home Base, etc. Our specialized machines are profitably used in factories and plants.

"Infocom-Service" CJSC

<http://dm-lab.sci.am>

Information Society Technologies Center (IST-C) was founded in 1999 as a spin-off from "Discrete Modeling, Analysis and Recognition" Department of Institute for Informatics and Automation Problems of National Academy of Sciences. Basic objective is the science intensive RTD, motivated by challenge of supporting development, implementation and wide use of information society technologies in Armenia, supporting the State and Society in Regulation in Knowledge Triangle - RTD, Education and Innovation. IST-C works in tight with IT Standardization TC of National Institute of Standards, FP7 ICT and INCO NCP Armenia, and INFSO DG EC.

IST-C carries out both theoretical investigations: Discrete Optimization, Cryptography, Logic, Algorithms, Intelligence, Distribution and Complexity; as well as Information Technologies Development: systems with Data Mining, Word Processing, Internet Automation, Image Processing and Understanding, Network protection, etc. IST-C is involved in Science Management and Outsourcing activities.

Particular applications address systems for Earthquake Data Analysis and Special GIS; Software Agent systems, CSP models for WSN and

Network Protection, OCR system for Armenian character sets, software for classification and prediction, Data stream analysis algorithms, Wireless Networks. Example projects are: INTAS 96-952 "Concurrent heuristics in data analysis and prediction"; NATO Linkage Grant HTECH-LG 96-1170 «Distributed Information Systems for Critical Social Issues»; ESPRIT (ICIMS-NOE 9251) - INCO COPERNICUS AMETMAS-NOE «A Network Of Excellence in Advanced Methodologies and Tools for Manufacturing Systems»; Esprit 23802, INCO COPERNICUS Extension GEIXS, «Geological Electronic Information Exchange System»; IST 12637 SPARTA, "Security Policy Adaptation Reinforced Through Agents"; INTAS 00- 626 "Data Mining Algorithm Incubator"; NTAS 00-397 "Data Mining Technologies And Image Processing: Theory And Applications", 04-77-7173 "Data flow systems: algorithms and complexity", IST 045059 Idealist7fp and other projects.

Innova Solutions LLC

CITADEL Business Center
105/1 Teryan Str., Yerevan, 0010, Armenia
 Phone: +374 10 514-394
 Fax: +374 10 514-395
 Email: info@innova.am

The Company

Innova Group operates within the Telecommunications and IT ecosystem, providing complete solutions. The Group aims to build a strong regional presence in South East Eu-

rope providing Communications and IT Solutions.

Innova Group currently consists of the following companies:

- Innova S.A., being the headquarters of the Group, with its offices located at Maroussi, Attica, Greece
- Innova Solutions S.A., with its offices located at Bucharest, Romania
- Innova Solutions LLC, with its offices located at Yerevan, Armenia
- Innova Solutions S.A., with its offices located at Sofia, Bulgaria
- Innova Solutions Ltd, with its offices located at Tirana, Albania
- TCE Technoevolution Ltd, with its offices located at Nicosia, Cyprus

The Activities

Value Added Services Solutions for Telecoms Service Providers

Innova Group has strongly invested in the area of VAS & Billing Solutions. Our Solutions support IMS, converged networks and hybrid environments - providing a smooth bridge between existing and emerging networks. Our scalable end - to - end solutions support flexible deployment models, including in network, hosted and managed services, to meet each service provider's unique marketing, billing, technology and business requirements.

- Billing
- Content
- Messaging
- IP Communications
- FMC

Next Generation & IP Networking Solutions

The Next Generation Network which is based on IP technology must be capable of supporting the evolving multiplay services such as Video on Demand (VoD), IPTV, Voice over IP (VoIP) and other new bandwidth - intensive services that demand customer satisfaction. It is therefore criti-

cal for the organizations that such new services are able to be delivered with a positive customer experience.

- Experience in designing bandwidth - intensive services
- Know - how in multiplay environments
- Focusing on end - to - end network control and security

Operation Support Systems and Information Technology Solutions

1. OSS Transformation

Our solutions and systems in this area are:

- Network Fault Management
- Performance & SLA Management
- Service Provisioning
- Service Assurance & Optimization
- Inventory Management & Consolidation

2. IT Infrastructure Optimization

Our solutions cover the areas of:

- Datacenter Infrastructure optimization
- Systems Management
- Data Protection & Availability
- Storage Management
- High Availability & Disaster Recovery
- Data & File Archiving
- Availability Management
- Workload Automation

Information & Network Security

- Enterprise Risk Assessment Services
- Information Security Management Framework
- Architecture & Technology Implementation
- Managed Security Services
- InfoSec Management Program Implementation

Wireless Network Infrastructure

INNOVA specialized in turnkey fixed & wireless infrastructure including rollout operation and maintenance.

Our Portfolio consists of:

- Projects Management of integrated solution
- Datacenter infrastructure deployment
- Multivendor Planning and Engineering Services
- Deployment Services:
- Logistic planning & application Site Acquisition
- Civil Works
- Sites Constructions
- Telecom Equipment Installations
- Commissioning
- After Sales Support / Maintenance

The People

INNOVA Group currently employs 120 highly experienced professionals in 6 countries with unique combinations of specializations and certifications along with wide market acknowledgement.

Our main initiative is to offer a customized approach to business needs by leveraging expertise and engineering capacity to deliver value to our customers.

Specializations:

- Project Management
- Marketing Consultancy
- Security Solutions Consultancy & implementation
- Next Generation Networking, planning, engineering, optimization & implementation
- Telecom Network Engineering
- S/W Development Architecture & Design
- VAS Services Design
- OSS Planning & Engineering

The Future

We target to become established as one of the leading and recognized enterprises in the technology fields of our specialization, in the geography of our operation.

The current business lines as well as the market presence will expand towards a critical size to secure sustainable growth.

Our Vision

Innova Group envisages in a natural Communication ecosystem where people socialize, collaborate and access information securely, real time, in a simple and transparent way.

Our Mission

We are committed to build trust among our customers, assist them to evolve into a natural Communications ecosystem and contribute in obtaining their business goals.

Quality

Since the first year of operations, INNOVA has obtained ISO 9001:2000 certifications.

Our commitment to the quality of products, services and internal procedures have been awarded.

Instigate CJSC

Mr. Arman Poghosyan, CEO
58 K. Ulnetsu St., Yerevan 0069, Armenia

Phone: +374 10 24-84-11 (Armenia), +1 408 454-6172 (USA)

Fax: +374 10 24-29-19

<http://www.instigatedesign.com>

Instigate CJSC is an engineering company with hardware and software teams based in Yerevan and Gyumri Armenia. There are company representatives in USA and Europe. The company was founded on July 6, 2005. Currently more than 80 engineers work in Instigate CJSC. The main area of our expertise is system level design of electronic systems, EDA specific software design and parallel programming. The company is collaborating with USA and Europe customers. Instigate CJSC quality management system was certified according to ISO 9001:2000 standard.

Instigate CJSC provides the following services:

1. Electronic design automation

- Development of bit/clock-accurate simulators and GUI IDEs for a specific device
- Design and implementation of proprietary ESL design environment
- Development of compilers for an embedded CPU

2. Electronic system design

- Implementation of a complete SoC
- IP blocks design using EDA tools
- Development of large designs used for validation of an FPGA platform
- Development of Embedded Linux on the modeled CPU

3. SW acceleration and parallelization

- NUMA specific optimizations for multi-core systems
- Acceleration using NVIDIA and ATI GPGPU cards
- HW acceleration (FPGA/ASIC)

4. Quality Assurance

- White-box and black-box QA of various software tools

- Validation of HW Fabric and EDA tools/flows

5. Audio/Video coding and multimedia

- Design and implementation of Mpeg2, H.263, Mpeg4, H.264, VC-1, AVS codecs

6. Offering Subsidiary Creation

- Setting up the company Recruiting the personnel → → Training
→ Management
→ IP protection → Passing the ownership.
"Instigate Training Center" NGO launched in March, 2008. It runs training courses on programming and digital circuit design. The courses include extended programs both for beginners and for professionals. The lecturers are the lead engineers and senior programmers of Instigate. All the lessons are accompanied with practical work.

ISMA Ltd

Mr. Edward Manukyan, Director

ISMA Ltd is a software company specializing in the development of applications using artificial intelligence technology. The company was founded in 1995. ISMA's clients include large companies, SMEs, government and development agencies. ISMA Ltd offers solutions in the areas of database management systems, speech processing, and text processing and translation utilizing artificial intelligence technology.

The list of company's products includes:

- ISMA expert system, a tool for forecasting regional geo-political situation;
- MacroTool, a program for visual development of multimedia applications, presentations, and animations;
- ISMA Developer, a tool for building distributed information systems;
- Automated school testing system, an application for testing students specializing in science and engineering.

Currently, the company is developing a machine translation system based on artificial intelligence system. Now system is including Eastern Armenian, English, Western Armenian languages. Russian and Turkish languages adding in system is in process. As auxiliary services, the system offers explanatory dictionaries, text analyzers and spell checkers.

**"IT Park" Business Center"
Computing Technics and
Informatics Scientific
Research Institute" CJSC**

Mr. Gagik Karapetyan, President
6/1 Abelyan Street, 0038, Yerevan, Armenia
Tel.: + 374 10 398625
Fax: + 374 10 398573
Email: info@itpark.am
<http://www.itpark.am>

"IT Park" is a modern, fast moving business center specialized in IT sphere. Yerevan IT Park model differs from classic technopark by its formula as follows: modern business center + technopark with IT priority + special environment. Currently the majority of about fifty companies located in the business center are IT companies.

"IT Park" Business Center offers a special environment for companies, especially from the point of view of providing conditions for effective work and sustainable development for beginners. Technopark offers services in accordance with requirements of the companies located in the business center contributing to the increase of their competitiveness in the market.

Business Center is as well specialized in providing information on local and international tenders and bidding procedures and in preparation of bids upon order.

"IT Park" was founded on the basis of "Algorithm" center for computing technics and informatics in former Soviet Union. In 2003 the aforesaid institution finally underwent privatization and in 2006 "IT Park" was

founded. Thus, "IT Park" inherited the building of "Algorithm" institute with special architecture as well as scientific and technical base.

The center offers all the conditions necessary for making and organizing business process, namely:

- Well - arranged area with all the modern conveniences (central heating, air conditioning, water supply)
- High quality communication means and service staff
- Office equipment rent and LAN service support
- Security system, safe parking lot and turnstiles
- Service staff with highly qualified professionals
- Halls for presentations and meetings
- Marketing and PR consultancy, brand style design
- Accounting, HR management

There are also video and sound recording studios, marketing, training and career centers, printing house, hardware store, cafe and a leisure club in IT Park. All these give extra opportunities to the companies located in IT Park to organize effective business.

ITE CJSC

<http://www.ite.am>

ITE founded in 1998, is a software company specializing in the design and development of web sites, database management systems, and multimedia applications. The number of employees is 10 and their average experience is 8 years. Customers of ITE include SMEs, development agencies (UNESCO, Eurasia Foundation, UNDP), and individual clients.

Our company is ready to develop websites of different levels of sophistication from simple web pages and web-catalogs to full e-commerce and multimedia solutions, including transaction processing and on-line verification. Our specialists are developing solutions based on MS SQL, Macromedia Flash, Dreamweaver, and other technologies.

"IUnetworks" LLC

0010 Yerevan Pushkini 41, 2a

Tel.: +374 10 500-650

Fax.: +374 10 537-599

Email: info@iunetworks.am

<http://www.iunetworks.am>

IUNetworks has been operating in Armenia since 2008, nevertheless it has already become well known in the Armenian networking equipment and IT market thanks to its highly qualified specialists, technical capacity and professional approach. IUNetworks cooperates with a range of large Armenian and international companies, state institutions and has proven to be a reliable and respected partner.

Our main activities include importation, wholesale, installation and maintenance of IT equipment and complex networking solutions in different industries and businesses.

The installation of such systems and solutions enables the following advantages to companies:

- Manage more efficiently the flow and storage of the information inside the company, create and effectively operate and manage databases,
- Build a corporate IT infrastructure based on Virtualization and Thin Clients,
- Automate the business procedures, thus saving time and resources,
- Organize IP video Surveillance of head buildings and facilities,
- Connect between facilities and buildings through IP Telephony and much more.

IUNetworks cooperates with a range of world known companies such as Sun Microsystems, Ericsson, Cisco, 3COM, Pirelli, Planet, Axis and many others.

The IT infrastructure solutions offered by IUNetworks and its partners are widely used in the following industries:

- Technical/ Scientific,
- Education
- Different size businesses
- Telecommunications
- Internet providing services
- Banking and Financial services
- Government
- Construction
- Media and Television
- Etc.

IUNetworks also offers technical support for the whole range of the products of the above listed companies. The flexible and individual approach to each client, taking into consideration the specificities of their activity sector, enables our specialists to precisely determine the needs of the client and offer appropriate solutions in accordance to those needs.

Presently, for the first time in the RA, IUNetworks, in cooperation with Ericsson, ordered by Ucom, is installing a Gigabit Passive Optical Network (GPON) in Yerevan city which will enable the simultaneous delivery of 3 kinds of services:

- IP Television,
- Fixed IP Telephone,
- High speed Internet.

IUNetworks has also successfully carried out the following IT projects:

1. Planning and installation of a video surveillance system for the State Revenue Committee of RA, which functions in all the regions of the RA,
2. Planning and installation of an interactive education system for the Ministry of Education and Science of the RA,
3. Supply of Juniper high network security equipment and technical support for Orange Armenia,
4. Other projects.

Thanks to its experience in the IT sector and its sufficient technical capacity, our company is ready to not only carry out partial tasks of the client's IT projects, but is also able to undertake and fully execute the whole project, to the extent of the purchase, supply, installation of the necessary equipment, maintenance and tech support as well as implementation of the finite system into a real network environment.

IUNetworks, Your IT solutions.

Macadamian AR was established in October 2007 as a subsidiary of Canadian company. Macadamian is a full-service software product creation partner for North American companies that are developing new products and improving existing products. We contribute to initial product idea generation and user research then ensure the product is developed and delivered RIGHT out of the gate: the right product developed expertly, no matter how complex or time-sensitive the requirements are.

We are unique in our ability to help our clients determine what the best software product for their end users will be, contributing to initial idea generation and software product innovation. We excel at complex, time-sensitive projects and software products that are the first of their kind. We are unique because:

- We contribute to the idea generation phase of software product creation, working with our clients to innovate and create products that meet with end-user satisfaction.
- Our end-user research capabilities ensure that the product's intended customer helps shape the product and eliminate the risk of failure.
- We are experts in tackling uncharted territory and complex projects, such as 1.0 releases, developing software for new platforms, and using beta technologies. These skills give clients the edge they needed to be first-to-market pioneers.
- Our software interface design and usability expertise ensure that a product will be rapidly adopted by the intended users.
- We are adept at stepping into a software development cycle at any point to immediately accelerate productivity and provide on-demand engineering horsepower.

MARGASOFT LLC

Mr. Tigran Margaryan, President

8 Sharur St. Suite#28 Yerevan, 0043, Armenia

Phone: +374 10 46-44-22

Email: info@margasoft.com

<http://www.margasoft.com>

Margasoft is in business of developing, selling and supporting Margasoft software products and providing software services. Founded in 2005 Margasoft is a place where everything makes sense. It may sound simple, but in reality that obvious rule does not exist in many software companies. Margasoft provides complete software solutions based on our MICMA architecture. We also specialize in software conversion, transitions and migrations. We work with our customers from concept through creation. We offer our clients the opportunity to start out small, yet we help position them for continued growth.

Providing quality software services on a project basis or as part of support of our solutions is what we do at Margasoft. We believe in honest and transparent relationship and that's why we formalize every contract and project in a set of documents reflecting the details of the project plan and its phases from initiation, through requirements document, implementation and sign off. The openness and predictability from the first step of relationship helps our customer to have greater informational power in the process of the decision making. We understand that our mission is to help our customers and work with them to find the best path to the solutions they need.

At Margasoft we specialize in software services related to software transitions, upgrades, conversions and migrations. Our expertise lies in planning, implementing and managing transition process from one application to another. Regardless, whether our clients are transitioning to one of our MICMA framework based product or another new product, we can help you to:

- Plan and implement the data migration and conversion
- Manage the transition period, create custom application and data flows to support the operations during the transition
- Design and implement post-conversion data validation tasks
- Create and verify acceptance tests cases
- Organize user trainings and support.

Our extensive experience allows us to quickly grasp the requirements and come up with flexible unique solutions for our customers on time and within budget.

In the basis of creation of "Mer Soft" company lies the uninterruptedly growing demand of automatic systems in the local market. We offer various administrative solutions to organizations, individual specialists and simple users. "Mer Soft" LLC sets problems which get complete solutions as a result of which unique and practical systems come forward; the latter are successfully implemented into different spheres:

- public health - stomatological automatic system,
- educational system - school automatic system,
- for large-scale enterprises - human resources and personnel management system,
- for trade organizations - warehouse automatic system,
- time management system etc.

Besides the above-listed systems "Mer Soft" LLC has realized two projects for a group of more extensive users. One of them is the web-project www.merinfo.am which is an electronic business environment. The other one is the "My Accountant" project which is supposed for registration and analysis of family or small organizations' incomes and expenses.

During its two years of existence "Mer Soft" LLC has succeeded in gaining the reputation of reliable partner among many leading organizations in Armenia. "Mer Soft" LLC offers multifunctional but at the same time easy to use software solutions for businesses.

Readicom CJSC

Mr. Gevorg Yeghoyan, Executive Director
23 D. Anhakhti St., Yerevan 0014, Armenia

Phone: +374 10 24-94-13

Fax: +374 10 24-94-18

Email: readicom@readicom.am

<http://www.readicom.am>

Readicom CJSC was founded in 1998 in Yerevan, Armenia. In 2000 the company was accredited as a Certification Body (Accreditation N AST - 001.L-0002-2006 of 29 September 2006) and Testing Laboratory (Accreditation N AST - 001.Q-0011-2006 of 29 September 2006) for Telecommunications Means and Systems. In 2009 Readicom Certification Body and Testing Laboratory was granted a new Accreditation license for further 3 (three) years of activity (up to 2012).

During its activity Readicom CJSC has issued certificates for both local and foreign companies, including certificates on serial production of telecommunications equipment issued to such leading telecommunication companies as Ericsson, Alcatel-Lucent, Nokia Siemens Networks, Huawei Technologies Co, ECI Telecom, SIAE Microelettronika, Intracom S. A. Telecom Solutions and others.

Readicom staff is formed of highly educated specialists, qualified as experts in the field of Certification and accreditation by the National Standards Institute (SARM) and carrying expert certificates issued by NIST. Moreover, Readicom Testing Laboratory, equipped with high-class devices and operated by well-trained and professional employees, allows carrying out in-place and laboratory testing of telecommunications equipment. We constantly enhance our equipment base in order to broaden the range and improve the quality of the offered tests.

Readicom is well known for its professional approach in providing excellent services, precise and high-grade testing, and customer care. Currently, both Certification Body and Testing Laboratory is in the process of obtaining an accreditation from MLA co-signatory European Accreditation Agency to become a member of the European community of Certification bodies and testing laboratories.

Sonics Armenia Holdings Inc. Armenian Branch

Mr. Gagik Boyakhchyan, Manager
19 Kievyan St., Yerevan, 0033 Armenia
Phone: +374 10 21-00-27
Fax: +374 10 21-00-82
Email: gagik@sonicsinc.com
<http://www.sonicsinc.com>

Sonics is a leading provider of semiconductor IP for on-chip communications networks that connect the 30 to 100+ IP blocks used in today's sophisticated System-on-Chip designs by semiconductor and system companies. For more than a decade, Sonics has evolved its pioneering "Network-on-chip" (NoC) technology to offer the broadest portfolio of intelligent on-chip communications networks that form the foundation of today's complex SoCs. Our products optimize memory access, seamlessly manage on-chip network traffic, boost system performance and reduce power consumption in SoCs with advanced voice, data and video features-such as those found in next-generation home entertainment, networking, wireless and mobile devices. With a broad array of silicon-proven IP, Sonics helps designers eliminate memory bottlenecks asso-

ciated with complex, high-speed SoC design, streamline and unify data flows and solve persistent network challenges in embedded systems with multiple cores. Sonics, Inc. is headquartered in Milpitas, California, with sales offices serving the US, Europe and Asia.

In early 2005, Sonics, Inc., opened an engineering branch in Armenia. Over the last several years the team in Armenia has grown, while making significant contributions to the company's broad range of IP products. Sonics has enabled its customers, including semiconductor leaders Broadcom Corporation, Samsung, Texas Instruments and Toshiba, to ship more than 500 million units worldwide.

<http://www.synisys.com>

Overview

Synergy International Systems, Inc. provides groundbreaking software and services for mission-critical information collection, analysis and dissemination to public and private sector clients. Since 1997, we have been providing our services as both a software vendor and a systems integrator to customers in over 30 countries worldwide. Our rapid application development, strategic consulting, effective capacity building, and high customer satisfaction complement the flexibility and strength of our technology. We are headquartered in the Washington, D.C. metropolitan area, and have a Research & Development Center and a Global Learning Center in Yerevan, Armenia.

Synergy Platform Technology

Synergy's Intelligent Data Manager (IDM) platform technology enables the accelerated creation of sophisticated, flexible, and user-friendly Web applications, including database systems and portals. IDM combines powerful business intelligence analytics with a user-friendly interface, facilitating the effective use of information for strategic decision-making.

Clients & Partners

Synergy clients and partners worldwide include:

- A wide array of government agencies, including Ministries of Finance, Planning, and various Line Ministries.
- International organizations such as the United Nations Development Program, the World Bank, and the Global Fund to Fight Aids, Tuberculosis, and Malaria.
- U.S. Government agencies, including the United States Agency for International Development (USAID), the Millennium Challenge Corporation (MCC), and the President's Emergency Plan for Aids Relief (PEPFAR).
- Private sector companies such as Booz Allen Hamilton and First Advantage SafeRent.

Synergy Armenia

Synergy International Systems (USA) opened its Armenian branch in 1999 where it now employs around 100 highly professional staff in the areas of software development, systems analysis, systems integrations, network administration, quality assurance, and business analysts. Synergy is expanding its operations in Armenia with the construction of a new state-of-the-art business center and a projected increase in staff to 300 within the next 2-3 years.

In Armenia, Synergy has implemented significant projects such as the Armenian Development Gateway Portal, the Silicon Armenia Portal, the International Assistance Database for Armenia, as well as the Mother See of Holy Etchmiadzin Official Website, and the Web Portal for Armenia Social Transition Program. The most recent project of Synergy in Armenia concentrated on the development of the Automated Enforcement Service Management System (AESMS) Database and Enforcement Services Department (ESD) website.

Synopsys Armenia CJSC

Dr. Rich Goldman, CEO
Arshakunyats 41 St., Yerevan 0026, Armenia

Phone: +374 10 49-25-61

Fax: +374 10 49-29-96

<http://www.synopsys.am>

Synopsys is a world leader in electronic design automation (EDA), supplying the global electronics market with the software, IP and services used in semiconductor design and manufacturing. Synopsys' comprehensive, integrated portfolio of implementation, verification, IP, manufacturing and FPGA solutions helps address the key challenges designers and manufacturers face today, such as power and yield management, system-to-silicon verification and time-to-results. These technology-leading solutions help give Synopsys customers a competitive edge in bringing the best products to market quickly while reducing costs and schedule risk. Synopsys is headquartered in Mountain View, California, and has more than 60 offices located throughout North America, Europe, Japan, Asia and India.

The Synopsys Engineering team in Armenia is involved in the design, development, testing and support of Synopsys' Manufacturing Yield Management (MYM) software, Mask Synthesis and Data preparation products (CATS) and the IC Workbench platform. The team also provides tool and library development to support Synopsys' Test Chip business. The program management for all MYM products is directed from Armenia using the standard Synopsys Cross Functional Team (CFT) methodologies.

Synopsys established its presence in Armenia in 2004, after Armenia declared information technology (IT) as a priority business for the country. Since then, Synopsys Armenia Closed Joint Stock Company (CJSC)

has become an important Synopsys site, providing R&D and product support in EDA, design for manufacturing (DFM) and the development of semiconductor intellectual property (IP). The company employs several hundred qualified Armenian engineers and is one of largest IT employers in Armenia. To help provide Armenia with highly qualified IT specialists, Synopsys Armenia invests locally in IT education and is engaged in a number of successful cooperation programs with major Armenian universities such as Yerevan State University (YSU), State Engineering University of Armenia (SEUA), American University of Armenia (AUA), Russian-Armenian (Slavonic) State University, and the Moscow Institute of Electronic Technologies (MIET). The company consistently promotes public interest in the high tech industry by sponsoring Presidential Awards for the best students in IT and contests among young specialists and students, and engages the broader community through charity work and volunteer activities. Synopsys Armenia CJSC is located in Yerevan. Visit Synopsys online at <http://www.synopsys.com> (global site) and <http://www.synopsys.am> (Armenia).

"TEL-CELL" CJSC

Mr. Aram Azatyan, Director

8 Vardanants blind alley, Yerevan, 0010, Armenia

Phone: +374 10 29-19-23

Fax: +374 10 56-01-15

Email: info@tel-cell.am

<http://www.tel-cell.am>

On 4 August, 2007, "TEL-CELL" Company gave a start to an absolutely new business direction; the first network of payments intake via self-service terminals has found its place in Armenia.

Today "TEL-CELL" CJSC is the largest system of payments intake in Armenia, covering the capital and other regions and centers of the republic.

Our system provides for a high speed processing of transactions - the Telcell processing center receives signals from all terminals of the network in the true time regime, processes and links to the payment gateways of the operators.

The work of high qualified specialists of our company for a very short period made it possible to create the most comfortable working conditions for our partners, providing income stable growth.

At present, the payment terminals of our company get payments in favor of 30 communication operators and providers of various services. The system is designed for expansion and the number of services will increase.

We keep working on the improvement of the system and upgrade of the rendered services.

Telcell system means: saving time, comfort, freedom of choice of where, how much and what for to pay.

Ucom LLC

Mr. Hayk Yesayan, Director

Phone: + 374 010 52 52 58

Fax: + 374 010 52 52 72

Email: info@ucom.am

<http://www.ucom.am>

Ucom LLC was founded in 2007. It is one of the rapidly developing companies in Armenia. One of the main goals of the company is geared towards fostering the stimulation of the development in the spheres of information, communication and high technologies (ICT & Hi-Tech) in Armenia through introduction of new technologies and application of innovative solutions.

Ucom offers the consumers its global technological solutions by means of forming of fundamental infrastructures, providing sustainability and reliability of services supplied.

Aimed at the accomplishment of the above-mentioned mission Ucom in collaboration with Ericsson Corporation, Sweden, has built up a FTTH (fiber to the home) fiber optic network with unprecedented Gigabit capacity in Armenia which is based on GPON (Gigabit Passive Optical Network) technology. Through its FTTH network Ucom offers modern "Triple Play" service to the consumers. Reaching each apartment, fiber optic cable provides an opportunity for the subscriber to use fixed phone line, IPTV and broadband internet services.

"Triple Play" which includes U!TV, U!Net and U!Phone packages is built on Ericsson IMS base (IP Multimedia Subsystem). IMS solutions will change your understanding of mentioned traditional services.

The introduction of new technologies to each home is a revolutionary innovation in Armenia, which will completely change your understanding of the above mentioned traditional services.

Unicomp CJSC

Westsoft LLC was founded in 2002 and was initially operating as a software developing company for the telecommunications market, creating billing and monitoring systems for small and medium size telecom carriers. In less than two years period the company had developed 5 major software systems for the telecom industry, including:

- Westsoft Billing (Billing and Data Management Intergrated Systems)
- Westsoft Monitor (Operations Monitoring Systems)
- WestSoft Mail Delivery (Automatic Mail notification and Mail delivery confirmation system)
- WestSoft Recognition Mailing System (Postal system)
- WestSoft Trouble Ticketing (Trouble Tickets registration and processing system)

Since 2004 Westsoft has focused its main direction on developing enhanced Business Process Automation systems and creating its own Basalt technology that includes:

1. Object- oriented Data Management System
2. Visual Components supporting Data input and display
3. Data Transmission Network Protocol

Software products developed by Westsoft have been successfully deployed by many small and medium sized businesses in Armenia and in other countries.

Westsoft offers enhanced business process Automation systems that provide a complete integration of the business processes and ease of use. All of these assure that the system operates in conditions closest to the real life business processes.

Based on Basalt technology, our company has developed Integrated Automation systems for the following fields:

- HoReCa (Hotel-Restaurant-Cafe),
- Sports Betting
- Wholesale and retail operations
- Enterprise Integrated Financial Management System
