BASICS (Basic Support for Institutionalizing Child Survival) is a global project to assist developing countries in reducing infant and child mortality through the implementation of proven health interventions. BASICS is funded by the U.S. Agency for International Development (contract no. GHA-I-00-04-00002-00) and implemented by the Partnership for Child Health Care, Inc., comprised of the Academy for Educational Development, John Snow, Inc., and Management Sciences for Health. Subcontractors include the Manoff Group, Inc., the Program for Appropriate Technology in Health, and Save the Children Federation, Inc.

# Missed Opportunities for Pediatric HIV: Program Checklist

Home-based care programs  
OVC Programs

Adult with HIV

ART SITES

Mother

- Does the HCW who sees the adult ART patient ask about children in the household and whether they have been tested for HIV?

MCH Clinic/PMTCT site

- Does the HBC worker ask about HIV status of infants/ children in the household with someone with HIV – and refer for testing and care and treatment, if indicated.
- Do OVC programs assess children for HIV infection and refer?

Mother Infant

HIV+ mother delivers

- Does the PMTCT site monitor whether the HIV infected mother returns for follow up?
- Does the PMTCT site ensure that the baby is tested for HIV or clinically assessed over time?
- Does someone put the baby on CTX prophylaxis at 6 weeks?

MCH/ IPD/OPD

- Does the HCW identify exposed infants? – check mother’s card or do rapid test?
- Does the HCW look for signs of HIV in infants and children ,e.g., id failure to thrive, recurrent pneumonias?
- Does the HCW ensure the infant gets CTX prophylaxis?
