

MOOCs | A Guide for Educators

(Massive Open Online Courses)

Discover a new way to improve your knowledge and skills!

MOOCs are courses available online, typically free, that expand access to quality education.

They are a unique opportunity to learn a new subject, upgrade job skills, get a professional certification and receive academic credit.

MOOCs are:

-  Open to anyone with an internet connection.
-  Offered in different fields of study from high-tech science to food management.
-  Backed by major institutions and the world's leading universities.
-  Available in numerous languages
-  Accessible any time, any place.

Educators are uniquely positioned to understand the educational needs of youth and young adults and to promote lifelong learning opportunities.

Educators themselves are among the largest users of MOOCs! They can stay up-to-date on the latest trends in their area of expertise, pedagogy and technology. **40% of learners who take open online courses in the US are educators improving their knowledge and work related skills*.**

What can educators do?
